PART I

Item 1. Business:

a) General

Unity Bancorp, Inc., (the "Company" or "Registrant"), is a bank holding company incorporated under the laws of the State of New Jersey to serve as a holding company for Unity Bank (the "Bank"). The Company was organized at the direction of the Board of Directors of the Bank for the purpose of acquiring all of the capital stock of the Bank. Pursuant to the New Jersey Banking Act of 1948 (the "Banking Act"), and pursuant to approval of the shareholders of the Bank, the Company acquired the Bank and became its holding company on December 1, 1994. The only significant activity of the Company is ownership and supervision of the Bank. The Company also owns 100% of the common equity of Unity (NJ) Statutory Trust II and Unity (NJ) Statutory Trust III. The trusts have issued \$10.3 million and \$5.2 million of preferred securities to investors, respectively.

The Bank opened for business on September 16, 1991. The Bank received its charter from the New Jersey Department of Banking and Insurance on September 13, 1991. The Bank is a full-service commercial bank, providing a wide range of business and consumer financial services through its main office in Clinton, New Jersey and fourteen New Jersey branches located in Clinton, Edison, Flemington, Highland Park, Linden, Middlesex, North Plainfield, Phillipsburg, Scotch Plains, Somerset, South Plainfield, Union, Washington and Whitehouse. In addition, the Bank has one Pennsylvania branch located in Forks Township. The Bank's primary service area encompasses the Route 22/Route 78 corridors between the Forks Township, Pennsylvania office and its Linden, New Jersey branch.

The principal executive offices of the Company are located at 64 Old Highway 22, Clinton, New Jersey 08809, and the telephone number is (908) 730-7630. The Company's website address is www.unitybank.com.

Business of the Company

The Company's primary business is ownership and supervision of the Bank. The Company, through the Bank, conducts a traditional and community-oriented commercial banking business and offers services, including personal and business checking accounts, time deposits, money market accounts and regular savings accounts. The Company structures its specific services and charges in a manner designed to attract the business of the small and medium sized business and professional community, as well as that of individuals residing, working and shopping in its service area. The Company engages in a wide range of lending activities and offers commercial, Small Business Administration ("SBA"), consumer, mortgage, home equity and personal loans.

Service Areas

The Company's primary service area is defined as the neighborhoods served by the Bank's offices. The Bank's main office, located in Clinton, NJ, in combination with its Flemington and Whitehouse offices, serves the greater area of Hunterdon County. The Bank's North Plainfield and Somerset offices serve those communities located in the northern, eastern and central parts of Somerset County and the southernmost communities of Union County. The Bank's Scotch Plains, Linden, and Union offices serve the majority of the communities in Union County and the southwestern communities of Essex County. The offices in Middlesex, South Plainfield, Highland Park, and Edison extend the Company's service area into Middlesex County. The Bank's Phillipsburg and Washington offices serve Warren County. The Bank's Forks Township office serves Northampton County, Pennsylvania.

Competition

The Company is located in an extremely competitive area. The Company's service area is also serviced by national banks, major regional banks, large thrift institutions and a variety of credit unions. In addition, since passage of the Gramm-Leach-Bliley Financial Modernization Act of 1999 (the "Modernization Act"), securities firms and insurance companies have been allowed to acquire or form financial institutions, thereby increasing competition in the financial services market. Most of the Company's competitors have substantially more capital, and therefore greater lending limits than the Company. The Company's competitors generally have established positions in the service area and have greater resources than the Company with which to pay for advertising, physical facilities, personnel and interest on deposited funds. The Company relies on the competitive pricing of its loans, deposits and other services, as well as its ability to provide local decision-making and personal service in order to compete with these larger institutions.

Employees

At December 31, 2012, the Company employed 158 full-time and 14 part-time employees. None of the Company's employees are represented by any collective bargaining units. The Company believes that its relations with its employees are good.

Executive Officers of Registrant

The following table sets forth certain information as of December 31, 2012, regarding each executive officer of the Company who is not also a director.

Name, Age and Position	Officer Since	Principal Occupation During Past Five Years
John Kauchak, 59, Chief Operating Officer and Executive Vice President of the Company and Bank	2002	Previously, Mr. Kauchak was the head of Deposit Operations for Unity Bank from 1996 to 2002.
Alan J. Bedner, 42, Chief Financial Officer and Executive Vice President of the Company and Bank	2003	Previously, Mr. Bedner was Controller for Unity Bank from 2001 to 2003.

SUPERVISION AND REGULATION

General Supervision and Regulation

Bank holding companies and banks are extensively regulated under both federal and state law, and these laws are subject to change. As an example, in the summer of 2010, Congress passed, and the President signed, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) (discussed below). These laws and regulations are intended to protect depositors, not stockholders. To the extent that the following information describes statutory and regulatory provisions, it is qualified in its entirety by reference to the particular statutory and regulatory provisions. Any change in the applicable law or regulation may have a material effect on the business and prospects of the Company and the Bank. Management of the Company is unable to predict, at this time, the impact of future changes to laws and regulations.

5

General Bank Holding Company Regulation

General: As a bank holding company registered under the Bank Holding Company Act of 1956, as amended, (the "BHCA"), the Company is subject to the regulation and supervision of the Federal Reserve Board (the "FRB"). The Company is required to file with the FRB annual reports and other information regarding its business operations and those of its subsidiaries. Under the BHCA, the Company's activities and those of its subsidiaries are limited to banking, managing or controlling banks, furnishing services to or performing services for its subsidiaries or engaging in any other activity which the FRB determines to be so closely related to banking or managing or controlling banks as to be properly incident thereto.

The BHCA requires, among other things, the prior approval of the FRB in any case where a bank holding company proposes to; (i) acquire all or substantially all of the assets of any other bank; (ii) acquire direct or indirect ownership or control of more than 5% of the outstanding voting stock of any bank (unless it owns a majority of such bank's voting shares); or (iii) merge or consolidate with any other bank holding company. The FRB will not approve any acquisition, merger or consolidation that would have a substantially anti-competitive effect, unless the anti-competitive impact of the proposed transaction is clearly outweighed by a greater public interest in meeting the convenience and needs of the community to be served. The FRB also considers capital adequacy and other financial and managerial resources and future prospects of the companies and the banks concerned, together with the convenience and needs of the community to be served, when reviewing acquisitions or mergers.

The BHCA also generally prohibits a bank holding company, with certain limited exceptions, from; (i) acquiring or retaining direct or indirect ownership or control of more than 5% of the outstanding voting stock of any company which is not a bank or bank holding company; or (ii) engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or performing services for its subsidiaries, unless such non-banking business is determined by the FRB to be so closely related to banking or managing or controlling banks as to be properly incident thereto. In making such determinations, the FRB is required to weigh the expected benefits to the public such as greater convenience, increased competition or gains in efficiency, against the possible adverse effects such as undue concentration of resources, decreased or unfair competition, conflicts of interest or unsound banking practices.

The BHCA was substantially amended through the Modernization Act. The Modernization Act permits bank holding companies and banks, which meet certain capital, management and Community Reinvestment Act standards, to engage in a broader range of non-banking activities. In addition, bank holding companies, which elect to become financial holding companies, may engage in certain banking and non-banking activities without prior FRB approval. Finally, the Modernization Act imposes certain privacy requirements on all financial institutions and their treatment of consumer information. At this time, the Company has elected not to become a financial holding company.

There are a number of obligations and restrictions imposed on bank holding companies and their depository institution subsidiaries by law and regulatory policy that are designed to minimize potential loss to the depositors of such depository institutions and the Federal Deposit Insurance Corporation (the "FDIC") insurance fund in the event the depository institution becomes in danger of default. Under regulations of the FRB, a bank holding company is

required to serve as a source of financial strength to its subsidiary depository institutions and to commit resources to support such institutions in circumstances where it might not do so absent such policy. The FRB also has the authority under the BHCA to require a bank holding company to terminate any activity or to relinquish control of a non-bank subsidiary upon the FRB's determination that such activity or control constitutes a serious risk to the financial soundness and stability of any bank subsidiary of the bank holding company.

6

Capital Adequacy Guidelines for Bank Holding Companies: The FRB has adopted risk-based capital guidelines for bank holding companies. The risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profile among banks and bank holding companies, to account for off-balance sheet exposure and to minimize disincentives for holding liquid assets. Under these guidelines, assets and off-balance sheet items are assigned to broad-risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items.

The risk-based guidelines apply on a consolidated basis to bank holding companies with consolidated assets of \$500 million or more. The minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) is 8%. At least 4% of the total capital is required to be "Tier I," consisting of common stockholders' equity and certain preferred stock and other qualifying hybrid instruments, less certain goodwill items and other intangible assets. The remainder, "Tier II Capital," may consist of the allowance for loan losses of up to 1.25% of risk-weighted assets and certain other securities which do not qualify as Tier I capital. Total capital is the sum of Tier I and Tier II capital, less reciprocal holdings of other banking organizations' capital instruments, investments in unconsolidated subsidiaries and any other deductions as determined by the FRB (determined on a case-by-case basis or as a matter of policy after formal rule-making).

Bank holding company assets are given risk-weights of 0%, 20%, 50% and 100%. In addition, certain off-balance sheet items are given similar credit conversion factors to convert them to asset-equivalent amounts to which an appropriate risk-weighting will apply. These computations result in the total risk-weighted assets. Most loans are assigned to the 100% risk category, except for performing first-mortgage loans that are fully secured by residential property, which carry a 50% risk-weighting. Most investment securities (including, primarily, general obligation claims of states or other political subdivisions of the United States) are assigned to the 20% category, except for municipal or state revenue bonds, which have a 50% risk-weighting, and direct obligations of the U.S. Treasury or obligations backed by the full faith and credit of the U.S. Government, which have a 0% risk-weighting. In converting off-balance sheet items, direct credit substitutes (including general guarantees and standby letters of credit backing financial obligations) are given a 100% risk-weighting. Transaction-related contingencies, such as standby letters of credit backing non-financial obligations and undrawn commitments (including commercial credit lines with an initial maturity of more than one year), have a 50% risk-weighting. Short-term commercial letters of credit have a 20% risk-weighting and certain short-term unconditionally cancelable commitments have a 0% risk-weighting.

In addition to the risk-based capital guidelines, the FRB has adopted a minimum Tier I capital (leverage) ratio, under which a bank holding company must maintain a minimum level of Tier I capital to average total consolidated assets of at least 3% in the case of a bank holding company that has the highest regulatory examination rating and is not contemplating significant growth or expansion. All other bank holding companies are expected to maintain a leverage ratio of at least 100 to 200 basis points above the stated minimum.

The Company is currently in compliance with these minimum Federal capital requirements. However, there are proposals pending to revise and enhance the capital requirements applicable to the Company. The Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, adopted Basel III in September 2010, which constitutes a strengthened set of capital requirements for banking organizations in the United States and around the world. Basel III is currently the subject of notices of proposed rulemakings released in June of 2012 by the respective U.S. federal banking agencies. Basel III would require a minimum amount of capital

to be held in the form of tangible common equity, generally increase the required capital ratios, phase out certain kinds of intangibles treated as capital and certain types of instruments and change the risk weightings of assets used to determine required capital ratios. In addition, institutions that seek the freedom to make capital distributions and pay discretionary bonuses to executive officers without restriction must also maintain 2.5% in common equity attributable to a capital conservation buffer to be phased in from January 1, 2016 until January 1, 2019. However, on November 9, 2012, the U.S. federal banking agencies announced that they do not expect that any of the proposed rules would become effective on January 1, 2013. They did not indicate the likely new effective date.

7

General Bank Regulation

As a New Jersey-chartered commercial bank, the Bank is subject to the regulation, supervision, and control of the New Jersey Department of Banking and Insurance (the “Department”). As an FDIC-insured institution, the Bank is subject to regulation, supervision and control of the FDIC, an agency of the federal government. The regulations of the FDIC and the Department affect virtually all activities of the Bank, including the minimum level of capital that the Bank must maintain, the ability of the Bank to pay dividends, the ability of the Bank to expand through new branches or acquisitions and various other matters.

Insurance of Deposits: The Dodd-Frank Act has caused significant changes in the FDIC’s insurance of deposit accounts. Among other things, the Dodd-Frank Act permanently increased the FDIC deposit insurance limit to \$250 thousand per depositor.

On February 7, 2011 the FDIC announced the approval of the assessment system mandated by the Dodd-Frank Act. Dodd-Frank required that the base on which deposit insurance assessments are charged be revised from one based on domestic deposits to one based on assets. The FDIC’s rule to base the assessment base on average total consolidated assets minus average tangible equity instead of domestic deposits lowered assessments for many community banks with less than \$10 billion in assets and reduced the Company’s costs.

Dividend Rights: Under the Banking Act, a bank may declare and pay dividends only if, after payment of the dividend, the capital stock of the bank will be unimpaired and either the bank will have a surplus of not less than 50% of its capital stock or the payment of the dividend will not reduce the bank's surplus.

On December 5, 2008, the Company completed a transaction with the U.S. Treasury under the Capital Purchase Program (“CPP”) through which the Treasury purchased \$20.6 million in preferred stock from the Company. As part of the CPP, the Company’s future ability to pay cash dividends is limited for so long as the Treasury holds the preferred stock. As so limited the Company may not increase its quarterly cash dividend above \$.05 per share, the quarterly rate in effect at the time the CPP program was announced, without the prior approval of the Treasury.

Capital Requirements: The FDIC imposes on the Bank minimum regulatory requirements that are substantially the same as those applicable to the Company under FRB regulations discussed above.

Sarbanes-Oxley Act

On July 30, 2002, the Sarbanes-Oxley Act (“SOX”) was enacted. SOX is not a banking law, but applies to all public companies, including the Company. The stated goals of SOX are to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. SOX is the most far-reaching U.S. securities legislation enacted in some time. SOX generally applies to all companies, both U.S. and non-U.S., that file or are required to file periodic reports with the Securities and Exchange Commission (the “SEC”) under the Securities Exchange Act of 1934, as amended.

SOX includes very specific additional disclosure requirements and corporate governance rules and requires the SEC and securities exchanges to adopt extensive additional disclosure, corporate governance and other related rules and mandates further studies of specific issues by the SEC. SOX represents significant federal involvement in matters traditionally left to state regulatory systems such as, the regulation of the accounting profession, and to state corporate law, such as the relationship between a board of directors and management and between a board of directors and its committees.

SOX addresses, among other matters:

- Audit Committees;
- certification of financial statements by the Chief Executive Officer and the Chief Financial Officer;
- the forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer's securities by directors and senior officers in the twelve-month period following initial publication of any financial statements that later require restatement;
- a prohibition on insider trading during pension plan black-out periods;
- disclosure of off-balance sheet transactions;
- a prohibition on personal loans to officers and directors, unless subject to Federal Reserve Regulation O;
- expedited filing requirements for Form 4 statements of changes of beneficial ownership of securities required to be filed by officers, directors and 10% shareholders;
- disclosure of whether or not a company has adopted a code of ethics;
- "real time" filing of periodic reports;
- auditor independence; and
- various increased criminal penalties for violations of securities laws.

Complying with the requirements of SOX as implemented by the SEC has increased our compliance costs and could make it more difficult to attract and retain board members.

The American Recovery and Reinvestment Act of 2009

The American Recovery and Reinvestment Act of 2009 (the "ARRA") became law on February 17, 2009. The main purpose of the ARRA is to provide fiscal stimulus to the U.S. economy and help foster job creation and economic

activity. However, portions of the ARRA amend the Emergency Economic Stabilization Act and the terms of the CPP, and impose new requirements on institutions participating in the CPP, like the Company. Among other things, these provisions, and the regulations issued by the Treasury to implement them, require substantial new restrictions on executive compensation, prohibiting severance payments regardless of the cause of an executive's departure and bonus payments to certain officers of institutions participating in the CPP, and require the adoption of various policies and procedures affecting compensation. The ARRA also imposes new certification requirements on management of an institution participating in the CPP, and new review requirements on the compensation committee of such an institution. These restrictions may make it more difficult for the Company to attract and retain senior management.

Dodd-Frank Wall Street Reform and Consumer Protection Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 was signed into law on July 21, 2010. Generally, the Dodd-Frank Act is effective the day after it was signed into law, but different effective dates apply to specific sections of the law, many of which will not become effective until various Federal regulatory agencies have promulgated rules implementing the statutory provisions. Uncertainty remains as to the ultimate impact of the Dodd-Frank Act, which could have a material adverse impact on the financial services industry by increasing compliance costs and reducing some sources of revenue. The Dodd-Frank Act, among other things:

- Directs the Federal Reserve to issue rules to limit debit-card interchange fees;
- Provides for an increase in the FDIC assessment for depository institutions with assets of \$10 billion or more, increases in the minimum reserve ratio for the deposit insurance fund from 1.15% to 1.35% and changes the basis for determining FDIC premiums from deposits to assets;
- Permanently increases the deposit insurance coverage to \$250 thousand and allows depository institutions to pay interest on checking accounts;
- Established a new independent consumer financial protection bureau within the Federal Reserve, empowered to exercise broad regulatory, supervisory and enforcement authority with respect to both new and existing consumer financial protection laws. However, smaller financial institutions, like the Bank, are subject to the supervision and enforcement of their primary federal banking regulator with respect to the federal consumer financial protection laws.
- Provides for new disclosure and other requirements relating to executive compensation and corporate governance;
- Changes standards for Federal preemption of state laws related to federally chartered institutions and their subsidiaries;
- Provides mortgage reform provisions regarding a customer's ability to repay, restricting variable-rate lending by requiring the ability to repay to be determined for variable-rate loans by using the maximum rate that will apply during the first five years of a variable-rate loan term, and making more loans subject to provisions for higher cost loans, new disclosures, and certain other revisions; and
- Creates a financial stability oversight council that will recommend to the Federal Reserve increasingly strict rules for capital, leverage, liquidity, risk management and other requirements as companies grow in size and complexity.

In January 2013, the Consumer Financial Protection Bureau, or CFPB, issued a series of final rules amending the mortgage servicing provisions of the Truth in Lending Act and the Real Estate Settlement Procedures Act. These rules, which become effective on January 10, 2014, are designed to protect borrowers from risky lending practices and includes, among other things, minimum requirements for creditors in making ability-to-repay determinations, special provisions to encourage creditors to refinance non-standard mortgages into standard mortgages with fixed rates, general underwriting criteria for qualifying mortgage loans and expansion of required disclosures and notices to the borrower.

To date, the Company's operations have not been adversely impacted by those provisions of the Dodd-Frank Act which have become effective.

Item 1A. Risk Factors:

Our business, financial condition, results of operations and the trading price of our securities can be materially and adversely affected by many events and conditions including the following:

We have been and may continue to be adversely affected by national financial markets and economic conditions, as well as local conditions.

Our business and results of operations are affected by the financial markets and general economic conditions in the United States, including factors such as the level and volatility of interest rates, inflation, home prices, unemployment and under-employment levels, bankruptcies, household income, consumer spending, investor confidence and the strength of the U.S. economy. The deterioration of any of these conditions can adversely affect our securities and loan portfolios, our level of charge-offs and provision for credit losses, our capital levels, liquidity and our results of operations.

In addition, we are affected by the economic conditions within our New Jersey and Pennsylvania trade areas. Though there have been signs of improvement, economic growth in these areas has been slow to recover. Unlike larger banks that are more geographically diversified, we provide banking and financial services primarily to customers in the six counties in the New Jersey market and one county in Pennsylvania in which we have branches, so any decline in the economy of New Jersey or eastern Pennsylvania could have an adverse impact on us.

Our loans, the ability of borrowers to repay these loans, and the value of collateral securing these loans are impacted by economic conditions. Our financial results, the credit quality of our existing loan portfolio, and the ability to generate new loans with acceptable yield and credit characteristics may be adversely affected by changes in prevailing economic conditions, including declines in real estate values, changes in interest rates, adverse employment conditions and the monetary and fiscal policies of the federal government. Although economic conditions in our primary market have fared better than other areas of the United States, we cannot assure you that these conditions will continue to prevail. We cannot assure you that positive trends or developments discussed in this annual report will continue or that negative trends or developments will not have a significant adverse effect on us.

A significant portion of our loan portfolio is secured by real estate, and events that negatively impact the real estate market could hurt our business.

A significant portion of our loan portfolio is secured by real estate. As of December 31, 2012, approximately 97 percent of our loans had real estate as a primary or secondary component of collateral. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value during the time the credit is extended. Continued weakening of the real estate market in our primary market

areas could result in an increase in the number of borrowers who default on their loans and a reduction in the value of the collateral securing their loans, which in turn could have an adverse effect on our profitability and asset quality. The declines in home prices in the New Jersey and Pennsylvania markets we serve also may result in increases in delinquencies and losses in our loan portfolios. This combined with a deepened economic recession and continued elevated unemployment levels could drive losses beyond that which is provided for in our allowance for loan losses. In that event, our earnings could be adversely affected.

There is a risk that the SBA will not honor their guarantee.

The Company has historically been a participant in various SBA lending programs which guarantee up to 90% of the principal on the underlying loan. There is a risk that the SBA will not honor their guarantee if a loan is not underwritten and administered to SBA guidelines. The Company follows the underwriting guidelines of the SBA, however our ability to manage this will depend on our ability to continue to attract, hire and retain skilled employees who have knowledge of the SBA program.

There is a risk that we may not be repaid in a timely manner, or at all, for loans we make.

The risk of nonpayment (or deferred or delayed payment) of loans is inherent in commercial banking. Such nonpayment, or delayed or deferred payment of loans to the Company, if they occur, may have a material adverse effect on our earnings and overall financial condition. Additionally, in compliance with applicable banking laws and regulations, the Company maintains an allowance for loan losses created through charges against earnings. As of December 31, 2012, the Company's allowance for loan losses was \$14.8 million, or 2.51 percent of our total loan portfolio and 84.49 percent of our nonperforming loans. The Company's marketing focus on small to medium size businesses may result in the assumption by the Company of certain lending risks that are different from or greater than those which would apply to loans made to larger companies. We seek to minimize our credit risk exposure through credit controls, which include evaluation of potential borrowers' available collateral, liquidity and cash flow. However, there can be no assurance that such procedures will actually reduce loan losses.

We have a significant level of nonperforming assets, and this has, and will continue, to affect our results of operations.

At December 31, 2012, our total nonperforming assets equaled \$19.3 million or 3.28 percent of total loans and OREO. This is a significant level of nonperforming assets compared to our peer group institutions. Our level of nonperforming assets reflects the general economic slowdown in our marketplace and its effect on our borrowers, and our focus on SBA lending, which may entail greater credit risk than other types of lending. This deterioration in credit quality has negatively impacted our results of operations, through additional provisions for loan losses and reduced interest income, and will continue to impact our performance until these assets are resolved. In addition, future increases in our nonperforming assets will further negatively affect our results of operations. We can give you no assurance that our nonperforming assets will not increase further.

Our allowance for loan losses may not be adequate to cover actual losses.

Like all financial institutions, we maintain an allowance for loan losses to provide for loan defaults and nonperformance. Our allowance for loan losses may not be adequate to cover actual losses, and future provisions for loan losses could materially and adversely affect the results of our operations. Risks within the loan portfolio are analyzed on a continuous basis by management; and, periodically, by an independent loan review function and by the Audit Committee. A risk system, consisting of multiple-grading categories, is utilized as an analytical tool to assess risk and the appropriate level of loss reserves. Along with the risk system, management further evaluates risk characteristics of the loan portfolio under current economic conditions and considers such factors as the financial condition of the borrowers, past and expected loan loss experience and other factors management feels deserve recognition in establishing an adequate reserve. This risk assessment process is performed at least quarterly and, as adjustments become necessary, they are realized in the periods in which they become known. The amount of future losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates that may be beyond our control, and these losses may exceed current estimates. State and federal regulatory agencies, as an integral part of their examination process, review our loans and allowance for loan losses and have in the past required an increase in our allowance for loan losses. Although we believe that our allowance for loan losses is adequate to cover probable and reasonably estimated losses, we cannot assure you that we will not further increase the

allowance for loan losses or that our regulators will not require us to increase this allowance. Either of these occurrences could adversely affect our earnings.

We are subject to interest rate risk and variations in interest rates may negatively affect our financial performance.

Net interest income, the difference between interest earned on our interest-earning assets and interest paid on interest-bearing liabilities, represents a significant portion of our earnings. Both increases and decreases in the interest rate environment may reduce our profits. Interest rates are subject to factors which are beyond our control, including general economic conditions, competition and policies of various governmental and regulatory agencies, such as the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, could influence not only the interest Unity receives on loans and investment securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) Unity's ability to originate loans and obtain deposits, (ii) the fair value of Unity's financial assets and liabilities, including the held to maturity and available for sale securities portfolios, and (iii) the average duration of Unity's interest-earning assets. This also includes the risk that interest-earning assets may be more responsive to changes in interest rates than interest-bearing liabilities, or vice versa (repricing risk), the risk that the individual interest rates or rate indices underlying various interest-earning assets and interest-bearing liabilities may not change in the same degree over a given time period (basis risk), and the risk of changing interest rate relationships across the spectrum of interest-earning asset and interest-bearing liability maturities (yield curve risk).

The banking business is subject to significant government regulations.

We are subject to extensive governmental supervision, regulation and control. These laws and regulations are subject to change, and may require substantial modifications to our operations or may cause us to incur substantial additional compliance costs. These laws and regulations are designed to protect depositors and the public, but not our shareholders. In addition, future legislation and government policy could adversely affect the commercial banking industry and our operations. Such governing laws can be anticipated to continue to be the subject of future modification. Our management cannot predict what effect any such future modifications will have on our operations. In addition, the primary focus of Federal and state banking regulation is the protection of depositors and not the shareholders of the regulated institutions.

For example, the recently adopted Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) has resulted in substantial new compliance costs, and may restrict certain sources of revenue. The Dodd-Frank Act was signed into law on July 21, 2011. Generally, the Act is effective the day after it was signed into law, but different effective dates apply to specific sections of the law, many of which will not become effective until various Federal regulatory agencies have promulgated rules implementing the statutory provisions. Uncertainty remains as to the ultimate impact of the Dodd-Frank Act, which could have a material adverse impact either on the financial services industry as a whole, or on our business, results of operations and financial condition. The Dodd-Frank Act, among other things:

- Directs the Federal Reserve to issue rules to limit debit-card interchange fees;
- Provides for an increase in the FDIC assessment for depository institutions with assets of \$10 billion or more, increases in the minimum reserve ratio for the deposit insurance fund from 1.15% to 1.35% and changes the basis for determining FDIC premiums from deposits to assets;
- Permanently increases the deposit insurance coverage to \$250 thousand and allows depository institutions to pay interest on checking accounts; established a new independent consumer financial protection bureau within the Federal Reserve, empowered to exercise broad regulatory, supervisory and enforcement authority with respect to both new and existing consumer financial protection laws. However, smaller financial institutions, like the Bank, are subject to the supervision and enforcement of their primary federal banking regulator with respect to the federal consumer financial protection laws;
- Provides for new disclosure and other requirements relating to executive compensation and corporate governance;
- Changes standards for Federal preemption of state laws related to federally chartered institutions and their subsidiaries;
- Provides mortgage reform provisions regarding a customer’s ability to repay, restricting variable-rate lending by requiring the ability to repay to be determined for variable-rate loans by using the maximum rate that will apply

during the first five years of a variable-rate loan term, and making more loans subject to provisions for higher cost loans, new disclosures, and certain other revisions; and

- Creates a financial stability oversight council that will recommend to the Federal Reserve increasingly strict rules for capital, leverage, liquidity, risk management and other requirements as companies grow in size and complexity.

In addition, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, adopted Basel III in September 2010, which constitutes a strengthened set of capital requirements for banking organizations in the United States and around the world. Basel III is currently the subject of notices of proposed rulemakings released in June of 2012 by the respective U.S. federal banking agencies. The comment period for these notices of proposed rulemakings ended on October 22, 2012. Basel III is intended to be implemented beginning January 1, 2013 and to be fully-phased in on a global basis on January 1, 2019. Basel III would require capital to be held in the form of tangible common equity, generally increase the required capital ratios, phase out certain kinds of intangibles treated as capital and certain types of instruments and change the risk weightings of assets used to determine required capital ratios. However, on November 9, 2012, the U.S. federal banking agencies announced that they do not expect that any of the proposed rules would become effective on January 1, 2013. They did not indicate the likely new effective date.

These provisions, as well as any other aspects of current or proposed regulatory or legislative changes to laws applicable to the financial industry, may impact the profitability of our business activities and may change certain of our business practices, including the ability to offer new products, obtain financing, attract deposits, make loans, and achieve satisfactory interest spreads, and could expose us to additional costs, including increased compliance costs. These changes also may require us to invest significant management attention and resources to make any necessary changes to operations in order to comply, and could therefore also materially and adversely affect our business, financial condition and results of operations.

Our management is actively reviewing the provisions of the Dodd-Frank Act and Basel III, many of which are to be phased-in over the next several months and years, and assessing the probable impact on our operations. However, the ultimate effect of these changes on the financial services industry in general, and us in particular, is uncertain at this time.

We are subject to changes in accounting policies or accounting standards.

Understanding Unity's accounting policies is fundamental to understanding our financial results. Some of these policies require the use of estimates and assumptions that may affect the value of assets or liabilities and financial results. Unity has identified its accounting policies regarding the allowance for loan losses, security valuations and impairments, goodwill and income taxes to be critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain. Under each of these policies, it is possible that materially different amounts would be reported under different conditions, using different assumptions, or as new information becomes available.

From time to time, the FASB and the SEC change their guidance governing the form and content of Unity's external financial statements. In addition, accounting standard setters and those who interpret U.S. generally accepted accounting principles ("GAAP"), such as the FASB, SEC, banking regulators and Unity's outside auditors, may change or even reverse their previous interpretations or positions on how these standards should be applied. Such changes are expected to continue, and may accelerate based on the FASB and International Accounting Standards Board commitments to achieving convergence between U.S. GAAP and International Financial Reporting Standards. Changes in U.S. GAAP and changes in current interpretations are beyond Unity's control, can be hard to predict and could materially impact how Unity reports its financial results and condition. In certain cases, Unity could be required to apply a new or revised guidance retroactively or apply existing guidance differently (also retroactively) which may result in Unity restating prior period financial statements for material amounts. Additionally, significant changes to U.S. GAAP may require costly technology changes, additional training and personnel, and other expenses that will negatively impact our results of operations.

Declines in value may adversely impact the investment portfolio.

As of December 31, 2012, we had approximately \$89.5 million and \$21.5 million in available for sale and held to maturity investment securities, respectively. We may be required to record impairment charges in earnings related to credit losses on our investment securities if they suffer a decline in value that is considered other-than-temporary. Additionally, (a) if we intend to sell a security or (b) it is more likely than not that we will be required to sell the security prior to recovery of its amortized cost basis, we will be required to recognize an other-than-temporary impairment charge in the statement of income equal to the full amount of the decline in fair value below amortized cost. Factors, including lack of liquidity, absence of reliable pricing information, adverse actions by regulators, or unanticipated changes in the competitive environment could have a negative effect on our investment portfolio and may result in other-than-temporary impairment on our investment securities in future periods.

Liquidity risk.

Liquidity risk is the potential that Unity will be unable to meet its obligations as they come due because of an inability to liquidate assets or obtain adequate funding in a timely basis, at a reasonable cost and within acceptable risk tolerances.

Liquidity is required to fund various obligations, including credit commitments to borrowers, mortgage and other loan originations, withdrawals by depositors, repayment of borrowings, dividends to shareholders, operating expenses and capital expenditures.

Liquidity is derived primarily from retail deposit growth and retention; principal and interest payments on loans; principal and interest payments on investment securities; sale, maturity and prepayment of investment securities; net cash provided from operations and access to other funding sources.

Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to persistent weakness, or downturn, in the economy or adverse regulatory action against us. Our ability to borrow could also be impaired by factors that are not necessarily specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole.

We are in competition with many other banks, including larger commercial banks which have greater resources than us.

The banking industry within the State of New Jersey is highly competitive. The Company's principal market area is also served by branch offices of large commercial banks and thrift institutions. In addition, in 1999 the Gramm-Leach-Bliley Financial Modernization Act was passed into law. The Modernization Act permits other financial entities, such as insurance companies and securities firms, to acquire or form financial institutions, thereby further increasing competition. A number of our competitors have substantially greater resources than we do to expend upon advertising and marketing, and their substantially greater capitalization enables them to make much larger loans. Our success depends a great deal upon our judgment that large and mid-size financial institutions do not adequately serve small businesses in our principal market area and upon our ability to compete favorably for such customers. In addition to competition from larger institutions, we also face competition for individuals and small businesses from recently formed banks seeking to compete as "hometown" institutions. Most of these new institutions have focused their marketing efforts on the smaller end of the small business market we serve.

Future offerings of common stock may adversely affect the market price of our stock.

In the future, we may increase our capital resources, raise capital to redeem our preferred stock issued to the U.S. Treasury as part of the Capital Purchase Program or, if our or the Bank's capital ratios fall below the prevailing regulatory required minimums, we or the Bank could be forced to raise additional capital by making additional offerings of common stock or preferred stock. Additional equity offerings may dilute the holdings of our existing shareholders or reduce the market price of our common stock, or both.

We cannot predict how changes in technology will impact our business.

The financial services market, including banking services, is increasingly affected by advances in technology, including developments in:

- telecommunications;
- data processing;
- automation;
- Internet-based banking;
- Tele-banking; and
- debit cards/smart cards

Our ability to compete successfully in the future will depend on whether we can anticipate and respond to technological changes. To develop these and other new technologies, we will likely have to make additional capital investments. Although we continually invest in new technology, we cannot assure you that we will have sufficient resources or access to the necessary proprietary technology to remain competitive in the future.

The Company's information systems may experience an interruption or breach in security.

The Company relies heavily on communications and information systems to conduct its business. Any failure, interruption or breach in security of these systems could result in failures or disruptions in the Company's customer-relationship management, general ledger, deposit, loan and other systems.

We are further exposed to the risk that our external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as us) and to the risk that our (or our vendors') business continuity and data security systems prove to be inadequate. We maintain a system of comprehensive policies and a control framework designed to monitor vendor risks including, among other things, (i) changes in the vendor's organizational structure or internal controls, (ii) changes in the vendor's financial condition, (iii) changes in the vendor's support for existing products and services and (iv) changes in the vendor's strategic focus. In addition we maintain cyber liability insurance to mitigate against any loss incurred.

While the Company has policies and procedures designed to prevent or limit the effect of the failure, interruption or security breach of its information systems, there can be no assurance that any such failures, interruptions or security breaches will not occur; or, if they do occur, that they will be adequately addressed. The occurrence of any failures, interruptions or security breaches of the Company's information systems could damage the Company's reputation, result in a loss of customer business, subject the Company to additional regulatory scrutiny or expose the Company to civil litigation and possible financial liability; any of which could have a material adverse effect on the Company's financial condition and results of operations.

Our business strategy could be adversely affected if we are not able to attract and retain skilled employees and manage our expenses.

We expect to continue to experience growth in the scope of our operations and, correspondingly, in the number of our employees and customers. We may not be able to successfully manage our business as a result of the strain on our management and operations that may result from this growth. Our ability to manage this growth will depend upon our ability to continue to attract, hire and retain skilled employees. Our ability to attract and retain senior management may be adversely affected by the restrictions imposed upon us under the CPP, as revised by the American Reinvestment and Recovery Act. Our success will also depend on the ability of our officers and key employees to continue to implement and improve our operational and other systems, to manage multiple, concurrent customer relationships and to hire, train and manage our employees.

Hurricanes or other adverse weather events could negatively affect our local economies or disrupt our operations, which would have an adverse effect on our business or results of operations.

Hurricanes and other weather events can disrupt our operations, result in damage to our properties and negatively affect the local economies in which we operate. In addition, these weather events may result in a decline in value or destruction of properties securing our loans and an increase in delinquencies, foreclosures and loan losses.

The dividend rate on our outstanding preferred stock issued to the U.S. Treasury under the Capital Purchase Program will increase to 9% from 5% if it is not redeemed by December 5, 2013, substantially increasing our dividend cost and reducing earnings available to common shareholders.

Under the terms of the preferred stock we issued to the U.S. Treasury as part of the Capital Purchase Program, the dividend rate will increase from 5% to 9% after five (5) years. This will occur on December 5, 2013, unless we redeem the outstanding preferred shares prior to December 5, 2013. In order to redeem these shares, we must, among other requirements, obtain the prior approval of our Federal regulators and of the U.S. Treasury. We can provide you no assurance that we will obtain the required approvals, or obtain them prior to December 5, 2013. We currently have \$20.1 million in preferred stock outstanding and held by the Treasury. The increase in dividend rate would result in our dividend costs increasing by approximately \$826 thousand per year, or 80 percent.

Item 1B. Unresolved Staff Comments: None

Item 2. Properties:

The Company presently conducts its business through its main office located at 64 Old Highway 22, Clinton, New Jersey, and its fourteen branch offices.

The following table sets forth certain information regarding the Company's properties from which it conducts business as of December 31, 2012.

Location	Leased or Owned	Date Leased or Acquired	Lease Expiration	2012 Annual Rental Fee
North Plainfield, NJ	Owned	1991	-	-
Clinton, NJ	Leased	1996	2013	427,304
Linden, NJ	Owned	1997	-	-
Whitehouse, NJ	Owned	1998	-	-
Highland Park, NJ	Leased	1999	2014	95,239
South Plainfield, NJ	Leased	1999	2014	114,849
Edison, NJ	Leased	1999	2014	132,842
Union, NJ	Owned	2002	-	-
Scotch Plains, NJ	Owned	2004	-	-
Flemington, NJ	Owned	2005	-	-
Phillipsburg, NJ	Leased	2005	2015	92,334

Middlesex, NJ	Owned	2007	-	-
Somerset, NJ	Leased	2012	2017	-

Item 3. Legal Proceedings:

From time to time, the Company is subject to other legal proceedings and claims in the ordinary course of business. The Company currently is not aware of any such legal proceedings or claims that it believes will have, individually or in the aggregate, a material adverse effect on the business, financial condition, or operating results of the Company.

Item 4. Mine Safety Disclosures: N/A

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities:

(a) Market Information

The Company’s Common Stock is quoted on the NASDAQ Global Market under the symbol “UNTY.” The following table sets forth the high and low closing prices of the Common Stock as reported on the NASDAQ Global Market for the periods indicated.

For the year ended December 31, 2012:	High	Low
4th Quarter	\$ 6.25	\$ 5.75
3rd Quarter	6.15	5.88
2nd Quarter	6.25	5.92
1st Quarter	6.40	5.98

For the year ended December 31, 2011:	High	Low
4th Quarter	\$ 6.76	\$ 6.25
3rd Quarter	6.79	6.36
2nd Quarter	7.00	6.48
1st Quarter	7.20	6.09

(b) Holders

As of March 1, 2013, there were approximately 435 shareholders of record of the Company’s Common Stock.

(c) Dividends

The Company did not pay any cash dividends in 2012 or 2011.

Under the terms of the CPP, we are limited in our ability to pay cash dividends. We cannot pay a quarterly cash dividend in excess of \$0.05 per share, the amount of our last quarterly cash dividend in effect at the time the CPP program was announced, without the approval of the Treasury. However, we ceased paying dividends in the first quarter of 2009. Our decision to resume paying any cash dividends will depend on a number of factors, including our net income, capital needs and the economic environment.

Under the CPP, we are also prohibited from repurchasing any shares of our outstanding stock.

Item 6. Selected Financial Data:

The information under the caption, "Selected Consolidated Financial Data," in the Company's Annual Report to Shareholders for the year ended December 31, 2012, is incorporated by reference herein.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations:

The information under the caption, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Company's Annual Report to Shareholders for the year ended December 31, 2012, is incorporated by reference herein.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk:

The information under the caption, "Market Risk," in the Company's Annual Report to Shareholders for the year ended December 31, 2012, is incorporated by reference herein.

Item 8. Financial Statements and Supplementary Data:

The Financial Statements and Notes to Consolidated Financial Statements in the Company's Annual Report to Shareholders for the year ended December 31, 2012, are incorporated by reference herein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure: None

Item 9A. Controls and Procedures:

(a) Evaluation of disclosure controls and procedures:

Based on their evaluation, as of the end of the period covered by this Annual Report on Form 10-K, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined

in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934 (the “Exchange Act”)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms.

(b) Management’s Report on Internal Control Over Financial Reporting:

The information under the caption, “Management’s Report on Internal Control Over Financial Reporting,” in the Company’s Annual Report to Shareholders for the year ended December 31, 2012, is incorporated by reference herein.

(c) Changes in internal controls:

There were not any significant changes in internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Item 9B. Other Information:

None
