FOR IMMEDIATE RELEASE

ALVARION'S BREEZEMAX™ Si WINS PRESTIGIOUS 'BEST OF WIMAX WORLD' AWARD

Self Installable WiMAX CPE Recognized in Commercial Application/Deployment Category at Boston Show

Alvarion Customer WiMAX Telecom Also Wins Award

WiMAX World, Boston, Massachusetts, USA, October 11, 2006 — Alvarion Ltd. (NASDAQ:ALVR), the world's leading provider of wireless broadband solutions and specialized mobile networks, today announced that its BreezeMAX Si won a prestigious 'Best of WiMAX World' award in the 'Commercial Application/Deployment - Equipment Provider' category. Selected from more than 40 nominations, Alvarion's self installable WiMAX CPE was recognized during the WiMAX World USA Conference and Expo being held this week at the Boston World Trade Center.

In addition, Alvarion customer WiMAX Telecom won the 'Commercial Application/Deployment - Service Provider' award for its world class commercial WiMAX network that uses BreezeMAX equipment.

The Best of WiMAX World winners were selected by an independent judging panel including Charles Wu, principal, CWLab; Craig Mathias, principal, Farpoint Group; Will Strauss, principal analyst, Forward Concepts; Adlane Fellah, CEO and founder, Maravedis Inc.; Carolyn Gabriel, lead research analyst, Rethink Research; Berge Ayvazian, chief strategy officer, Yankee Group; and representatives from xchange magazine and Trendsmedia. The winners will be publicized in the WiMAX World Show Daily (www.wimaxworld.com) as well as in the December issue of xchange magazine (www.xchangemag.com). The winners will be posted also on the WiMAX World, WiMAX Trends and xchange Web sites.

"We are pleased to be recognized by an independent panel of industry experts for our market leading BreezeMAX Si and the BreezeMAX network of one of our key European customers, WiMAX Telecom," said Tzvika Friedman, president and CEO of Alvarion. "These awards are further recognition of Alvarion's major success in commercial WiMAX deployments providing quality services and a solid business case to dozens of satisfied operators worldwide. In just two years, BreezeMAX has become the reference WiMAX product in the market, and now with the Si, we are leading the industry towards mainstream, widespread adoption of WiMAX services."

Alvarion's award-winning WiMAX Certified™ platform is designed from the ground up according to the IEEE 802.16 standards and is a third-generation OFDM platform with advanced non-line-of-sight (NLOS) functionality. Its carrier-class design supports broadband speeds and quality of service (QoS) to enable carriers to offer quadruple play broadband services over IP to thousands of subscribers in a single base station. BreezeMAX is now successfully deployed in over 180 installations in more than 80 countries around the world and is the radio access base station of the company's mobile WiMAX solution, 4Motion™.

The BreezeMAX™ Si is a WiMAX Certified™, self installable, all indoor WiMAX customer premises equipment (CPE) that opens the door for mass-market deployment of WiMAX services everywhere. This compact CPE uses advanced radio technology for improved indoor penetration and NLOS operation, enables simple end user plug and play installation, and paves the way for nomadic and portable services. By eliminating professional installation, the Si enables carriers to broaden their distribution channels to best fit their business models, and when combined with outdoor CPEs, optimizes their network planning by trading-off coverage, capacity and installation costs.

About Alvarion

With more than 2 million units deployed in 150 countries, Alvarion is the world's leading provider of innovative wireless network solutions enabling *personal broadband* services to improve lifestyles and productivity with portable and mobile data, VoIP, video and other applications. Providing systems to carriers, ISPs and private network operators, the company also supplies solutions to extend coverage of GSM networks to developing countries and other hard to serve areas.

Leading the WiMAX market with the most widely deployed WiMAX system in the world, Alvarion has the most extensive networks deployments and proven product portfolio in the industry covering the full range of frequency bands with both fixed and mobile solutions. Alvarion's products enable the delivery of business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection, public safety communications, and mobile voice and data. Alvarion works with several global OEM providers and more than 200 local partners to support its diverse global customer base in solving their last-mile challenges.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for more than 10 years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience in deploying OFDM-based systems, the Company's prominent work in the WiMAX Forum™ is focused on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to mobile WiMAX solutions.
