Chairman of the Board

President and CEO

George Haligowski: What is performance? What separates one financial institution from another? Is it profitability? Growth? Financial stability? Shareholder value? We believe it is the measured relationship between all four of these execution driven parameters that have made ITLA, consistently, a stand out performer year after year. In fact we see profitability, growth, financial stability and shareholder value as the four building blocks that have uniquely defined our company's performance over the last 31 years.
