MARKET VECTORS INDUSTRY ETFS

(unaudited)

Dear Shareholder:

We are pleased to present this semi-annual report for the industry exchange-traded funds (ETFs) of the Market Vectors ETF Trust for the six month period ended March 31, 2015.

Traditionally, biotechnology (biotech) and pharmaceuticals (pharma) are separated into two distinct industry groups. Van Eck Global offers access to these dynamic sectors in two separate funds, the fortunes of which have been quite intertwined, over the last several years, through mergers and acquisitions (M&As).

The differences between biotech and pharma may not be well understood by many investors. The chief difference is in the approach that each takes to develop its drugs and therapies. Biotech companies are primarily engaged in the research, development, manufacturing and/or marketing of products based on genetic analysis and genetic engineering. This industry includes companies specializing in protein-based therapeutics to treat human diseases, but excludes companies manufacturing products, using biotechnology, without a health care application. Pharma companies are engaged in the research and development of small-molecule drugs using chemical-based synthetic processes.

Market Vectors Biotech ETF (NYSE Arca: BBH) displayed impressive performance over the six month period. During the period under review, a number of large biotech companies with important prospective products under trial released encouraging clinical test results. Performance was further driven by a flurry in M&A activity in both the biotech and pharma industries. This resulted in many company valuations moving higher, particularly in the biotech industry.

Premiums Paid above Acquired Company Stock Price

Source: Bloomberg as of March 31, 2015. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. Past performance is no guarantee of future

results; current performance may be lower or higher than the performance data quoted.

Among biotech companies, makers of cancer therapies and treatments commanded higher premiums and during the six month period, BBH's holdings were heavy in companies focused on the area of oncology.

We will, as always, continue to seek out and evaluate the most attractive opportunities for you as a shareholder. We encourage you to stay in touch with us through the videos, email subscriptions, and blogs available on our website (www.vaneck.com). Should you have any questions, please contact us at 1.888.MKT.VCTR or visit www.marketvectorsetfs.com.

2

Management Discussion (unaudited)

Five of the six Market Vectors Industry ETFs realized positive performance in the six months ended March 31, 2015. The Market Vectors Retail ETF posted an impressive total return of 24.83%, with the Market Vectors Biotech ETF not far behind providing a total return of 22.46%. Both funds comfortably outperformed the S&P 500® Index's 5.93% gain over the same period.

Source: Van Eck Global. Returns based on NAV. The performance data quoted represent past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflects temporary waivers of expenses and/or fees. Had the Funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

Biotech

After October 14 (the day the Dow Jones Industrial Average dropped over 223 points¹ in a single day), biotech stocks rose fitfully, if steadily, throughout the remainder of the fourth quarter of 2014. While activity in both licensing agreements and mergers & acquisitions (M&As) may have been particularly brisk throughout 2014,² there were also some interesting U.S. Food and Drug Administration (FDA) product approvals³ during the last quarter of the year. These included Gilead Sciences' (13.8% of Fund net assets) new hepatitis C virus treatment Harvoni and Amgen's (12.1% of Fund net assets) Blincyto, a leukemia drug. In the first quarter of 2015, M&A activity continued briskly with, toward the end of the period, the agreement by AbbVie, Inc. (not held by Fund) to purchase Pharmacyclics, Inc. (3.8% of Fund net assets) for \$21 billion in cash and stock,⁴ of particular note.

U.S. companies contributed by far the most to total return, but there were also small contributions from both the Netherlands and Spain. Pharmacyclics, Incyte Corp. (3.7% of Fund net assets), and BioMarin Pharmaceutical (4.9% of Fund net assets) all made significant contributions to the Fund's overall performance. Gilead Sciences, in particular, detracted from overall performance.

Environmental Services

Both overall economic growth and, in particular, that of the construction and home-building industries have historically benefitted environmental services companies. In addition, a number of macroeconomic factors are seen as affecting the industry and creating potential. These include both increased regulation and regulatory change.⁵ While U.S. stocks accounted for the majority of the Fund's total return, a positive contribution also came from the single Canadian stock in the Fund, Progressive Waste Solutions Ltd. (3.5% of Fund net assets). However, the Fund's performance remained flat.

On December 1, 2014,⁶ French company Veolia Environnement SA (sold by Fund at period end), which was a significant holding of the Fund at the time and contributed positively to the overall performance of the Fund during

MARKET VECTORS INDUSTRY ETFS

(unaudited)

the period under review, announced its decision, as a potential cost savings measure, to request the voluntary delisting of its American Depositary Receipts (ADRs) from the New York Stock Exchange with a view to terminating its registration with the U.S. Securities and Exchange Commission (SEC). The registration was, subsequently, terminated and the Fund ceased to invest in the company.

Gaming

The Fund posted a decline of 11.07% for the six month period. Macau, the world's biggest gaming hub, recorded its first ever (since such figures were first recorded in 2002) full-year fall⁷ in gambling revenue at the close of 2014. Particularly hard hit by Beijing's anti-corruption campaign, the southern Chinese territory saw gambling revenues fall 2.6% in 2014 to \$44 billion. In December, with a drop of 30% from the year before, revenues recorded their seventh consecutive monthly decline. The decline in revenues in Macau continued from January⁸ through February⁹ and into March.¹⁰ While in the U.S., December's gambling revenues in Las Vegas recorded their fifth consecutive monthly decline, falling 16.4%;¹¹ they rose in January,¹² but declined once again in February.¹³ Gaming companies operating in Macau were, by far, the most significant detractors from the Fund's overall performance. Companies in the gaming business in Australia and Ireland made the greatest positive contributions to overall performance.

Pharmaceutical

As with biotech stocks, after October 14 (the day the Dow Jones Industrial Average dropped over 223 points¹ in a single day), pharmaceutical stocks rose fitfully, if steadily, throughout the remainder of the fourth quarter of 2014. By the end of December, the U.S. Federal Drug Administration (FDA) had approved some 41¹⁴ new molecular entities for the year, 17 of which offered a novel mechanism of action in treating a disease.¹⁵ This was 14 more than the 27 approved in 2013.¹⁶

Since the end of the year, news from the pharma market has featured strong M&A activity. In addition to the agreement by AbbVie, Inc. (4.4% of Fund net assets) to purchase Pharmacyclics, Inc. (not held by Fund) for \$21 billion in cash and stock,¹⁷ in March there was also a bidding war which resulted in Canada's Valeant Pharmaceuticals International, Inc. (4.5% of Fund net assets) buying Salix Pharmaceuticals, Ltd. (0.7% of Fund net assets) for \$10.1 billion in an all cash deal.¹⁸ The Fund posted a healthy total return for the six month period of 11.26%. Nearly all countries contributed positively, with the U.S. contributing most substantially to the Fund's overall performance. However, companies in both France and Ireland detracted from the Fund's overall performance.

Retail

The six month period ended March 31, 2015 brought with it commendably positive performance and the Fund returned 24.83%. On the back of lower gas prices and continuing job growth, the U.S. National Retail Federation reported that total holiday retail sales, which include those for both November and December, increased 4% to \$616.1 billion.¹⁹ While figures for December were disappointing, they were the best holiday sales since 2011.²⁰ Although retail sales in both January and February²¹ fell, not least because of the cold weather gripping certain areas of the U.S., the Fund had a positive first three months of 2015 to close the six month period on a very positive note.

While stores involved in specialty retail and food and staples retailing made by far the greatest contributions to total return, health care providers and providers of health care services also contributed positive percentages to the Fund's overall performance. Internet and catalog retail companies contributed the least to overall performance.

Semiconductor

Global semiconductor sales in 2014 hit a new high (for the second consecutive year), with record sales of \$335.8 billion, up 9.9% on sales of \$305.6 billion in 2013.²² Sales in the last quarter of 2014 amounted to \$87.4 billion, 9.3% higher than the \$79.9 billion recorded in the same quarter the previous year.²³ Sales in the Americas increased 12.7% in 2014. The three largest categories of semiconductor by sales were logic, memory, and micro-ICs (integrated circuits), respectively.²⁴ While global sales of semiconductors for February were 2.7% lower than those for January at \$27.8 billion, they were still 6.7% higher than in February 2014.²⁵ The IoT, or the "Internet of Things", with its impact not only on the memory sector, but also the IC design, foundry, and outsourced assembly and test sectors, is still seen as a major driver going forward.²⁶ Within the semiconductor industry, the strongest sector growth opportunities in 2015 are seen to lie in sensors technology (with their applicability to the IoT, automotive technology applications, wearables and touch screens), Big Data applications, and the medical end market.²⁷

Although contributing the most to the Fund's total return, the industry's strong positive performance over the period was not restricted to the U.S. alone, with stocks from both Taiwan and the Netherlands making positive contributions. The single holding from the United Kingdom, ARM Holdings Plc (4.2% of Fund net assets), contributed the least to overall performance.

† All Fund assets referenced are Total Net Assets as of March 31, 2015.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, not securities in which investments can be made.

‡ S&P 500® Index consists of 500 widely held common stocks covering the industrial, utility, financial and transportation sectors.

BIOTECH ETF (BBH)

PERFORMANCE COMPARISON

March 31, 2015 (unaudited)

Total Return	Share Price ¹	NAV	MVBBHTR ²
Six Months	22.43 %	22.46 %	22.59 %
One Year	42.49 %	42.54 %	42.91 %
Life* (annualized)	48.89 %	48.86 %	49.13 %
Life* (cumulative)	268.88 %	268.65 %	270.89 %

*since 12/20/2011

Commencement date for the Market Vectors Biotech ETF was 12/20/11.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, ¹for the period from commencement (12/20/11) to the first day of secondary market trading in shares of the Fund (12/21/11), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.39% / Net Expense Ratio 0.35%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% of the Fund's average daily

net assets per year until at least February 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors[®] US Listed Biotech 25 Index (MVBBHTR) is a rules based, modified capitalization weighted, float adjusted index intended to give investors a means of tracking the overall performance of the largest and the most liquid common stocks and depositary receipts of U.S. exchange-listed companies that derive at least 50% of their revenues from biotechnology, which includes companies engaged primarily in research and development as well as production, marketing and sales of drugs based on genetic analysis and diagnostic equipment (excluding pharmacies).

Market Vectors US Listed Biotech 25 Index (the "Index") is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Biotech ETF (the "Fund") is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

ENVIRONMENTAL SERVICES ETF (EVX)

Index data prior to September 24, 2012 reflects that of the S-Network Global Gaming Index (WAGRT). From September 24, 2012 forward, the index data reflects that of the Fund's underlying index, Market Vectors Global Gaming Index (MVBJKTR). Index history which includes periods prior to September 24, 2012 reflects a blend of the performance of WAGRT and MVBJKTR and is not intended for third party use.

Commencement date for the Market Vectors Gaming ETF was 1/22/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/22/08) to the first day of secondary market trading in shares of the Fund (1/24/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.88% / Net Expense Ratio 0.65%

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.65% of the Fund’s average daily net assets per year until at least February 1, 2016. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors[®] Global Gaming Index (MVBJKTR) is a rules based index intended to give investors a means of tracking the overall performance of the largest and most liquid companies in the global gaming industry that generate at least 50% of their revenues from casinos and hotels, sports betting (including internet gambling and racetracks) and lottery services as well as gaming services, gaming technology and gaming equipment.

Market Vectors Global Gaming Index (the “Index”) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Gaming ETF (the “Fund”) is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

PHARMACEUTICAL ETF (PPH)

PERFORMANCE COMPARISON

March 31, 2015 (unaudited)

Total Return	Share Price ¹	NAV	MVPPHTR ²
Six Months	11.27 %	11.26 %	11.22 %
One Year	22.54 %	22.41 %	22.35 %
Life* (annualized)	25.80 %	25.41 %	25.28 %
Life* (cumulative)	112.30 %	110.12 %	109.40 %

*since 12/20/2011

Commencement date for the Market Vectors Pharmaceutical ETF was 12/20/11.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (12/20/11) to the first day of secondary market trading in shares of the Fund (12/21/11), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.40% / Net Expense Ratio 0.35%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% of the Fund's average daily

net assets per year until at least February 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors[®] US Listed Pharmaceutical 25 Index (MVPPHTR) is a rules based, modified capitalization weighted, float adjusted index intended to give investors a means of tracking the overall performance of the largest² and the most liquid common stocks and depositary receipts of U.S. exchange-listed companies that derive at least 50% of their revenues from pharmaceuticals, which includes companies engaged primarily in research and development as well as production, marketing and sales of pharmaceuticals.

Market Vectors US Listed Pharmaceutical 25 Index (the "Index") is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, October 1, 2014 to March 31, 2015.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

During the period ended March 31, 2015, transfers of securities from Level 1 to Level 2 were \$354,452. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

(a) Commencement of operations

Total return is calculated assuming an initial investment made at the net asset value at the beginning of period, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a

(b) redemption at the net asset value on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

(c) Annualized

(d) Not Annualized

(e) Amount represents less than \$0.005 per share

On February 14, 2012, the Fund effected a 3 for 1 share split (See Note 10). Per share data has been adjusted to reflect the share split.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited)

Note 1—Fund Organization—Market Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of March 31, 2015, offers fifty-five investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Biotech ETF, Environmental Services ETF, Gaming ETF, Pharmaceutical ETF, Retail ETF and Semiconductor ETF, (each a “Fund” and, together, the “Funds”). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by the NYSE Euronext or Market Vectors Index Solutions GmbH, a wholly-owned subsidiary of Van Eck Associates Corporation (the “Adviser”).

The Funds’ commencement of operations dates and their respective indices are presented below:

Fund	Commencement of Operations	Index
Biotech ETF	December 20, 2011	Market Vectors® US Listed Biotech 25 Index*
Environmental Services ETF**	October 10, 2006	NYSE Arca Environmental Services Index
Gaming ETF**	January 22, 2008	Market Vectors® Global Gaming Index*
Pharmaceutical ETF	December 20, 2011	Market Vectors® US Listed Pharmaceutical 25 Index*
Retail ETF	December 20, 2011	Market Vectors® US Listed Retail 25 Index*
Semiconductor ETF	December 20, 2011	Market Vectors® US Listed Semiconductor 25 Index*

*Published by Market Vectors Index Solutions GmbH

**Effective January 1, 2012, the Fund changed its fiscal year end from December 31 to September 30.

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification (“ASC”) 946 Financial Services - Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of the Adviser appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services,

32

quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Federal Income Taxes—It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund (except Pharmaceutical ETF, which is declared and paid quarterly). Distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when

D. accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the

E. securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited) (continued)

Repurchase Agreements—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of March 31, 2015 are reflected in the Schedules of Investments.

Use of Derivative Instruments—The Funds may invest in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the period ended March 31, 2015.

Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting agreements or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at March 31, 2015 is presented in the Schedules of Investments. Also, refer to related disclosures in Note 2F (Repurchase Agreements) and Note 9 (Securities Lending).

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.35% of each Fund's average daily net assets (except for annual rates of 0.50% for Environmental Services ETF and Gaming ETF). The Adviser has agreed, at least until February 1, 2016, to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense caps (excluding acquired fund fees and expenses, interest expense, trading expenses, offering costs, taxes and extraordinary expenses) listed in the table below.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

The current expense limitations and the amounts waived/assumed by the Adviser for the period ended March 31, 2015, are as follows:

Fund	Expense Limitations	Waiver of Management Fees
Biotech ETF	0.35 %	\$ 120,381
Environmental Services ETF	0.55	30,683
Gaming ETF	0.65	42,104
Pharmaceutical ETF	0.35	85,694
Retail ETF	0.35	48,206
Semiconductor ETF	0.35	89,598

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' distributor (the "Distributor"). Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

Note 4—Investments—For the period ended March 31, 2015, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Fund	Cost of Investments Purchased	Proceeds from Investments Sold
Biotech ETF	\$ 117,345,508	\$ 37,090,049
Environmental Services ETF	3,204,987	2,527,653
Gaming ETF	5,460,012	7,227,577
Pharmaceutical ETF	58,673,627	25,655,741
Retail ETF	13,749,924	1,434,355
Semiconductor ETF	27,993,305	29,959,460

Note 5—Income Taxes—As of March 31, 2015, for Federal income tax purposes, the identified cost of investments owned, net unrealized appreciation (depreciation), gross unrealized appreciation, and gross unrealized depreciation of investments were as follows:

Fund	Cost of Investments	Gross Unrealized	Gross Unrealized	Net Unrealized Appreciation
------	------------------------	---------------------	---------------------	--------------------------------

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

		Appreciation	Depreciation	(Depreciation)
Biotech ETF	\$688,804,966	\$120,468,240	\$(8,279,650)	\$112,188,590
Environmental Services ETF	15,644,762	2,481,886	(1,148,631)	1,333,255
Gaming ETF	39,416,726	1,991,021	(9,039,936)	(7,048,915)
Pharmaceutical ETF	315,316,834	28,047,571	(5,177,405)	22,870,166
Retail ETF	307,066,680	24,383,020	(753,684)	23,629,336
Semiconductor ETF	419,224,062	739,256	(6,320,346)	(5,581,090)

The tax character of dividends paid to shareholders during the year ended September 30, 2014 was as follows:

Fund	Ordinary Income
Biotech ETF	\$16,340
Environmental Services ETF	225,000
Gaming ETF	802,900
Pharmaceutical ETF	5,483,238
Retail ETF	408,291
Semiconductor ETF	4,956,298

The tax character of current year distributions will be determined at the end of the current fiscal year.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited) (continued)

At September 30, 2014, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Fund	Post-Effective No		Post-Effective Amount Expiring		
	Expiration Short-Term Capital Losses	Expiration Long-Term Capital Losses	in the Year Ended September 30,		
			2018	2017	2016
Environmental Services ETF	\$ 38,147	\$ 3,273,429	\$479,375	\$6,445,705	\$2,110,133
Gaming ETF	1,403,367	—	—	—	—
Retail ETF	10,340	—	—	—	—
Semiconductor ETF	137,530	—	—	—	—

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for open tax years (tax years ended 2011-2014), or expected to be taken in the Funds’ current tax year. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the period ended March 31, 2015, the Funds did not incur any interest or penalties.

Note 6—Capital Share Transactions—As of March 31, 2015, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index plus a small amount of cash. For the period ended March 31, 2015, the following Funds had in-kind contributions and redemptions:

Fund	In-Kind Contributions	In-Kind Redemptions
Biotech ETF	\$288,931,092	\$264,332,453
Environmental Services ETF	1,740,113	2,570,773
Gaming ETF	5,272,791	9,759,956

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Pharmaceutical ETF	84,591,208	218,543,004
Retail ETF	275,549,316	55,709,228
Semiconductor ETF	3,765,725,109	3,772,501,248

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund’s daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect gross shareholder transactions including any cash component of the transactions.

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective by investing in a portfolio of securities that generally replicates the Fund’s index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities and shares the interest earned on the collateral and borrowing fees received with the securities lending agent. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds’ behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at March 31, 2015 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

Note 10—Share Split—On January 27, 2012, the Board of Trustees of the Market Vectors ETF Trust approved a split of the shares for Biotech ETF, Pharmaceutical ETF, and Retail ETF. The share splits took place for shareholders of record as of the close of business on February 10, 2012, and were paid on February 13, 2012. Each Fund’s shares began trading on a split-adjusted basis on February 14, 2012. Biotech ETF and Retail ETF split its shares three-for-one. Pharmaceutical ETF split its shares two-for-one.

Note 11—Bank Line of Credit—The Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended March 31, 2015, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan	Average Interest Rate	Outstanding Loan Balance as
------	---------------------	--------------------------	-----------------------------	-----------------------------------

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

		Balance		of
				March 31,
				2015
Biotech ETF	67	\$1,766,294	1.51 %	\$754,790
Environmental Services ETF	4	244,028	1.49	—
Gaming ETF	30	185,438	1.51	172,467
Pharmaceutical ETF	165	1,097,929	1.51	1,211,652
Retail ETF	61	580,040	1.51	308,720
Semiconductor ETF	132	865,381	1.51	—

Note 12—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended March 31, 2015, there were no offsets to custodian fees.

Note 13—Subsequent Events—The Funds have evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

The following dividend from net investment income was declared and paid subsequent to March 31, 2015:

Fund	Ex-Date	Record Date	Payable Date	Per Share
Pharmaceutical ETF	4/1/15	4/6/15	4/8/15	\$0.4975

37

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus and Summary Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus and summary prospectus contains this and other information about the investment company. Please read the prospectus and summary prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.888.MKT.VCTR, or by visiting marketvectorsetfs.com, or on the Securities and Exchange Commission's website at <http://www.sec.gov>.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

MARKET VECTORS STRATEGIC EQUITY ETFs

(unaudited)

Dear Shareholder:

We are pleased to present this semi-annual report for the five Strategic Equity exchange-traded funds (ETFs) of the Market Vectors ETF Trust for the six month period ended March 31, 2015.

“Strategic Equity” – Building a Better Core

As you will see from this report, our MSCI Quality ETFs and the Market Vectors Morningstar® Wide Moat ETF (MOAT) are now described as Strategic Equity funds. We see this as a better description of the market exposure each of these funds offers and how they can be used in a portfolio. These ETFs seek to track rules-based indices that systematically screen for stocks that meet specific criteria, for example, companies that exhibit attractive valuations or are in a strong financial position.

Investors looking to make long-term allocations to broad asset classes, such as U.S. equity, international, or emerging markets, may find that this strategic approach offers an attractive way to maintain exposure.

“Quality” ETFs Continue to Outperform

Quality is a factor in which we have been particularly interested and which may benefit investors, particularly in volatile markets, when, we believe, they should be more selective. Quality, as defined by MSCI, screens for companies that have demonstrated historically high return on equity, stable annual earnings growth, and low financial leverage.

Recent volatility in emerging and international markets has provided a nice backdrop against which to assess two of our newest ETFs, Market Vectors MSCI International Quality ETF (QXUS) and Market Vectors MSCI Emerging Markets Quality ETF (QEM). The underlying MSCI index methodology has provided the means for these ETFs to be selective and to tap a company’s long-term potential. As of March 31, 2015, two of our quality-based ETFs, Market

Vectors MSCI International Quality ETF (QXUS) and Market Vectors MSCI Emerging Markets Quality ETF (QEM), have outperformed their corresponding non-quality benchmarks (see charts below).

Performance of “MSCI Quality” ETFs versus Non-Quality Benchmarks

Source: FactSet. Data as of March 31, 2015. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index. See disclosure and Index descriptions at end of letter.

Please stay in touch with us through our website (www.vaneck.com) on which we offer videos, email subscriptions, blogs, and educational literature. Should you have any questions, please contact us at 1.888.MKT.VCTR or visit www.marketvectorsetfs.com.

(unaudited)

Thank you for participating in the Market Vectors ETF Trust. On the following pages, you will find the performance record of each of the funds for the six month period ended March 31, 2015. You will also find their financial statements. We value your continuing confidence in us and look forward to helping you meet your investment goals in the future.

Jan F. van Eck

Trustee and President

Market Vectors ETF Trust

April 27, 2015

Represents the opinions of the investment adviser. Past performance is no guarantee of future results. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in a fund. An index's performance is not illustrative of a fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

MSCI ACWI ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of 45 developed and emerging markets.

MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of 23 emerging markets.

Market Vectors MSCI International Quality ETF (QXUS) and the Market Vectors MSCI Emerging Markets Quality ETF (QEM) are subject to risks which include those associated with investments in emerging markets and foreign securities, including market volatility, economic and political instability, currency fluctuation, and adverse governmental regulation, which may adversely affect the Funds or Fund trading. QEM is also subject to risks associated with Asian issuers. QXUS's and QEM's assets may be concentrated in particular sectors and subject to more risk than investments in a diverse group of sectors. "Quality" is a measure of historical variables used by the Index Provider and is not intended to imply a judgment about the future performance of any Index constituent or the Index as a whole.

Management Discussion (unaudited)

Among the Market Vectors Strategic Equity ETFs, both of the MSCI Quality ETFs realized positive performance for the six month period ended March 31, 2015, while, during the same period, both of the MSCI Quality Dividend ETFs posted negative returns. Although economic recovery in the U.S. continued through this period, Europe generally remained sluggish. The ongoing crisis in Ukraine, and Russia's involvement, as well as developments in the Middle East, continued to cast shadows.

Source: Van Eck Global. Returns based on NAV. The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflects temporary waivers of expenses and/or fees. Had the Funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

MSCI Emerging Markets Quality (QEM)

Exposure to China was the single largest positive contributor to the Fund's total returns, followed by Taiwan, South Korea, and India. A number of countries undermined performance, with exposures to Brazil, Russia, and Mexico detracting the most. The information technology sector was the largest positive contributor to the Fund's total returns and energy represented the highest detractor of seven sectors that hurt the Fund's performance.

MSCI Emerging Markets Quality Dividend (QDEM)

As with the MSCI Emerging Markets Quality ETF, China was the single largest positive contributor to the Fund's total returns. However, returns from 21 of the 26 other countries to which the Fund had exposure detracted from overall performance. While financial companies made the most significant contribution to total return, energy stocks were by far the greatest detractors from overall performance. The consumer discretionary sector was the only other sector, apart from financials, to contribute positively to overall return.

MSCI International Quality (QXUS)

Exposure to China was the single largest positive contributor to the Fund's total returns, followed by exposures to Denmark, Taiwan, South Korea, and Germany, in that order. Exposures to Australia and Brazil were the two largest detractors from performance. On a sector basis, information technology and consumer discretionary companies provided the greatest positive contributions and energy and materials companies the greatest negative contribution.

MARKET VECTORS STRATEGIC EQUITY ETFS

(unaudited)

MSCI International Quality Dividend (QDXU)

In the following order, China, Germany, Japan, and Switzerland were the four largest positive contributors to the Fund's total returns, while Canada, the U.K., the Netherlands, and France were the four highest detractors from performance. On a sector basis, consumer discretionary and telecommunications services companies provided the greatest positive contribution and energy companies by far the greatest negative contribution.

Morningstar Wide Moat (MOAT)

For the six month period, the fund's benchmark index, the Morningstar® Wide Moat Focus IndexSM was down 1.46%, while the S&P 500® Index was up by 5.93%.[‡]The primary driver of underperformance was the Fund's concentration in the energy sector. More specifically, the Fund's exposure to the oil, gas & consumable fuels industry within the energy sector was the largest detractor from Fund performance. Top contributing sectors for the period included health care and consumer staples. Within health care, pharmaceuticals and health care providers and services firms provided the strongest positive contribution to return.

[‡]Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index.

Morningstar® Wide Moat Focus IndexSM (MWMFTR) is a rules-based, equal-weighted index intended to offer exposure to companies that the Index Provider determines have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors ("wide moat companies").

S&P 500® Index consists of 500 widely held common stocks covering the industrial, utility, financial, and transportation sectors.

MORNINGSTAR WIDE MOAT ETF (MOAT)

PERFORMANCE COMPARISON

March 31, 2015 (unaudited)

Total Return	Share Price ¹	NAV	MWMFTR ²
Six Months	(1.92)%	(1.76)%	(1.46)%
One Year	4.77 %	4.85 %	5.45 %
Life* (annualized)	16.00%	16.01 %	16.54 %
LIfE* (cumulative)	54.56%	54.61 %	56.69 %

*since 4/24/2012

Commencement date for the Market Vectors Morningstar Wide Moat ETF was 4/24/12.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, ¹ for the period from commencement (4/24/12) to the first day of secondary market trading in shares of the Fund (4/25/12), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.48% / Net Expense Ratio 0.48%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% of the Fund's average daily net assets per year until at least February 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Morningstar® Wide Moat Focus IndexSM (MWMFTR) is a rules-based, equal-weighted index intended to offer exposure to companies that Morningstar, Inc. determines have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors (“wide moat companies”).

The Morningstar® Wide Moat Focus IndexSM was created and is maintained by Morningstar, Inc. Morningstar, Inc. does not sponsor, endorse, issue, sell, or promote the Market Vectors Wide Moat ETF and bears no liability with respect to that ETF or any security. Morningstar® is a registered trademark of Morningstar, Inc. Morningstar® Wide Moat Focus IndexSM is a service mark of Morningstar, Inc.

Life* (annualized)	6.40%	7.54%	8.56%
Life* (cumulative)	7.66%	9.03%	10.26%

*since 1/21/2014

Commencement date for the Market Vectors Emerging Markets Quality ETF was 1/21/14.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/21/14) to the first day of secondary market trading in shares of the Fund (1/24/14), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 3.59% / Net Expense Ratio 0.51%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.50% of the Fund's average daily net assets per year until at least February 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

MSCI Emerging Markets Quality Index (M1EFQU) is modified capitalization weighted and aims to capture the performance of quality growth stocks selected from the Parent Index (MSCI Emerging Markets Index), by identifying stocks with high quality scores based on three main fundamental variables: high return on equity, stable year-over-year earnings growth and low financial leverage. The Index reweights the selected quality growth stocks from the parent index to emphasize stocks with high quality scores.

MSCI Emerging Markets Quality Index (the “Index”) is the exclusive property and a trademark of MSCI and has been licensed for use for certain purposes by Van Eck Associates Corporation for Market Vectors Emerging Markets Quality ETF (the “Fund”) based on the Index. The Fund is not sponsored, endorsed, sold or promoted by MSCI, and MSCI makes no representation regarding the advisability of trading in the Fund.

Commencement date for the Market Vectors International Quality Dividend ETF was 1/21/14.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/21/14) to the first day of secondary market trading in shares of the Fund (1/24/14), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 4.63% / Net Expense Ratio 0.45%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.45% of the Fund's average daily net assets per year until at least February 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

MSCI ACWI ex USA High Dividend Yield Index (M1WDUDY) is modified capitalization and is designed to reflect the performance of equities in the Parent Index (MSCI ACWI ex USA Index) with dividend yields that are higher than average dividend yield of the Parent Index that are deemed by the Index Provider (MSCI) to be both sustainable and persistent.

MSCI ACWI ex USA High Dividend Yield Index (the “Index”) is the exclusive property and a trademark of MSCI and has been licensed for use for certain purposes by Van Eck Associates Corporation for Market Vectors International Quality Dividend ETF (the “Fund”) based on the Index. The Fund is not sponsored, endorsed, sold or promoted by MSCI, and MSCI makes no representation regarding the advisability of trading in the Fund.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, October 1, 2014 to March 31, 2015.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During the Period.”

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Beginning Account Value	Ending Account Value	Annualized Expense Ratio	Expenses Paid During the Period* October 1, 2014-

Hypothetical**	\$1,000.00	\$1,022.69	0.45%	\$2.27

Expenses are equal to the Fund's annualized expense ratio (for the six months ended March 31, 2015) multiplied by

* the average account value over the period, multiplied by the number of days in the most recent fiscal half year divided by the number of days in the fiscal year (to reflect the one-half year period).

** Assumes annual return of 5% before expenses

During the period ended March 31, 2015, transfers of securities from Level 1 to Level 2 were \$95,905 and transfers from Level 2 to Level 1 were \$25,884. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

*See Schedule of Investments for security type and geographic sector breakouts.

During the period ended March 31, 2015, transfers of securities from Level 2 to Level 1 were \$25,456. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

† Security fully or partially on loan. Total market value of securities on loan is \$57,007.

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$4,523,804 which represents 91.8% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

During the period ended March 31, 2015, transfers of securities from Level 1 to Level 2 were \$40,029 and transfers from Level 2 to Level 1 were \$10,442. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

† Security fully or partially on loan. Total market value of securities on loan is \$170,270.

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$4,014,376 which represents 87.5% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

During the period ended March 31, 2015, transfers of securities from Level 1 to Level 2 were \$38,404 and transfers from Level 2 to Level 1 were \$4,541. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited)

Note 1—Fund Organization—Market Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of March 31, 2015, offers fifty-five investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Morningstar Wide Moat ETF, MSCI Emerging Markets Quality ETF, MSCI Emerging Markets Quality Dividend ETF, MSCI International Quality ETF and MSCI International Quality Dividend ETF (each a “Fund” and, together, the “Funds”). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by Morningstar or MSCI.

The Funds’ commencement of operations dates and their respective indices are presented below:

Fund	Commencement of Operations	Index
Morningstar Wide Moat ETF	April 24, 2012	Morningstar® Wide Moat Focus Index SM
MSCI Emerging Markets Quality ETF	January 21, 2014	MSCI Emerging Markets Quality Index
MSCI Emerging Markets Quality Dividend ETF	January 21, 2014	MSCI Emerging Markets High Dividend Yield Index
MSCI International Quality ETF	January 21, 2014	MSCI ACWI ex USA Quality Index
MSCI International Quality Dividend ETF	January 21, 2014	MSCI ACWI ex USA High Dividend Yield Index

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification (“ASC”) 946 Financial Services – Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant

- A. ADR's and futures contracts. Participatory Notes ("P-Notes") are fair valued using the current market value of the underlying equity investments. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Debt securities for which market quotations are readily available are valued on the basis of quotations furnished by an independent pricing service approved by the Board of Trustees or provided by securities dealers. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and/or (ii) quotations from bond dealers to determine current value and are categorized as Level 2 in the fair value hierarchy. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of Van Eck Associates Corporation (the "Adviser")

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited) (continued)

appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Federal Income Taxes—It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

C.Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income, if any, are declared and paid quarterly by each Fund (except for Morningstar Wide Moat ETF which are declared and paid annually). Distributions from net realized capital gains, if any, are declared and paid annually. Income dividends

and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day.

Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when

D. accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

E. Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the

44

securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

Use of Derivative Instruments—The Funds may invest in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the period ended March 31, 2015.

Repurchase Agreements—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of March 31, 2015 are reflected in the Schedules of Investments.

Participatory Notes—The Funds may invest in P-Notes issued by banks or broker-dealers and designed to offer a return linked to the performance of a particular underlying equity security or market. P-Notes can have the characteristics or take the form of various instruments, including, but not limited to, certificates or warrants. The Funds are entitled to receive any dividends paid in connection with the underlying security, however, generally do not receive voting rights. P-Notes held as of March 31, 2015 are reflected in the Schedules of Investments.

Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at March 31, 2015 is presented in the Schedules of Investments. Also, refer to related disclosures in Note 2G (Repurchase Agreements) and Note 9 (Securities Lending).

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily.

- J.** Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited) (continued)

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of each Fund's average daily net assets. The Adviser has agreed, at least until February 1, 2016, to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense limitations (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) listed in the table below.

The current management fee rate, expense limitations and the amounts waived/assumed by the Adviser for the period ended March 31, 2015, are as follows:

Fund	Management Fee Rate	Expense Limitations	Waiver of Management Fees	Expenses Assumed by the Adviser
Morningstar Wide Moat ETF	0.45 %	0.49 %	\$ —	\$—
MSCI Emerging Markets Quality ETF	0.50	0.50	15,112	78,475
MSCI Emerging Markets Quality Dividend ETF	0.50	0.50	12,202	65,711
MSCI International Quality ETF	0.45	0.45	11,002	109,893
MSCI International Quality Dividend ETF	0.45	0.45	10,572	87,555

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' distributor (the "Distributor"). Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

Note 4—Investments—For the period ended March 31, 2015, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Fund	Cost of Investments Purchased	Proceeds from Investments Sold
Morningstar Wide Moat ETF	\$98,366,674	\$2,161,478
MSCI Emerging Markets Quality ETF	3,490,510	693,074
MSCI Emerging Markets Quality Dividend ETF	404,539	428,560

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

MSCI International Quality ETF	232,864	317,624
MSCI International Quality Dividend ETF	485,796	565,440

Note 5—Income Taxes—As of March 31, 2015, for Federal income tax purposes, the identified cost of investments owned, net unrealized appreciation (depreciation), gross unrealized appreciation, and gross unrealized depreciation of investments were as follows:

Fund	Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
Morningstar Wide Moat ETF	\$ 1,010,725,752	\$ 5,161,014	\$(74,346,267)	\$(69,185,253)
MSCI Emerging Markets Quality ETF	10,553,270	790,782	(533,443)	257,339)
MSCI Emerging Markets Quality Dividend ETF	5,159,845	393,050	(592,931)	(199,881)
MSCI International Quality ETF	4,978,189	406,522	(421,225)	(14,703)
MSCI International Quality Dividend ETF	5,211,299	178,114	(642,155)	(464,041)

The tax character of dividends paid to shareholders during the year ended September 30, 2014 was as follows:

Fund	Ordinary Income
Morningstar Wide Moat ETF	\$4,225,050
MSCI Emerging Markets Quality ETF*	41,240
MSCI Emerging Markets Quality Dividend ETF*	92,780
MSCI International Quality ETF*	145,310
MSCI International Quality Dividend ETF*	123,500

*For the period from January 21, 2014 (commencement of operations) through September 30, 2014.

The tax character of current year distributions will be determined at the end of the fiscal year.

At September 30, 2014, Morningstar Wide Moat ETF had capital loss carryforwards available to offset future capital gains, as follows:

Post-Effective No Expiration Long-Term Capital Losses	\$3,359
Post-Effective No Expiration Short-Term Capital Losses	34,228

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for open tax years (tax years ended 2012-2014), or expected to be taken in the Funds’ current tax year. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the period ended March 31, 2015, the Funds did not incur any interest or penalties.

Note 6—Capital Share Transactions—As of March 31, 2015, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of at least 100,000 shares (50,000 shares for Morningstar Wide Moat ETF), or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index plus a small amount of cash. For the period ended March 31, 2015, the following Funds had in-kind contributions and redemptions:

Fund	In-Kind Contributions	In-Kind Redemptions
Morningstar Wide Moat ETF	\$438,060,786	\$419,049,553
MSCI Emerging Markets Quality ETF	2,569,911	—

MSCI Emerging Markets Quality Dividend ETF, MSCI International Quality ETF and MSCI International Quality Dividend ETF had no in-kind contributions or redemptions during the period ended March 31, 2015.

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund’s daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect gross

shareholder transactions including any cash component of the transactions.

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective by investing in a portfolio of securities that generally replicates the Funds’ index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

Investments in P-Notes involve certain risks in addition to those associated with a direct investment in the underlying foreign companies or foreign securities markets whose return they seek to replicate. For instance, there can be no assurance that the trading price of a P-Note will equal the underlying value of the foreign company or foreign securities market that it seeks to replicate. P-Notes constitute direct, general and unsecured contractual obligations of the banks or broker-dealers that issue them, which therefore subject the Funds to counterparty risk. The Funds are relying on the creditworthiness of the counterparty issuing the P-Note and have no rights under a P-Note against the issuer of the underlying security.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2015 (unaudited) (continued)

As a result of recent events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers' held by the Funds.

At March 31, 2015, the Adviser owned approximately 42% of MSCI Emerging Markets Quality ETF and 63% of MSCI International Quality ETF.

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities and shares the interest earned on the collateral and borrowing fees received with the securities lending agent. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds’ behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at March 31, 2015 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

Note 10—Bank Line of Credit—The Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended March 31, 2015, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate	Outstanding Loan Balance as of March 31, 2015
Morningstar Wide Moat ETF	152	\$1,454,286	1.51 %	\$1,081,263
MSCI Emerging Markets Quality ETF	16	385,389	1.51	—
MSCI Emerging Markets Quality Dividend ETF	2	139,572	1.50	—
MSCI International Quality ETF	2	106,265	1.50	—
MSCI International Quality Dividend ETF	2	247,177	1.50	—

Note 11—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended March 31, 2015, there were no offsets to custodian fees.

Note 12—Subsequent Event Review—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

The following dividends from net investment income were declared and paid subsequent to March 31, 2015:

Fund	Ex-Date	Record Date	Payable Date	Per Share
MSCI Emerging Markets Quality ETF	04/1/2015	04/6/2015	04/8/2015	\$0.1270
MSCI Emerging Markets Quality Dividend ETF	04/1/2015	04/6/2015	04/8/2015	\$0.2060
MSCI International Quality ETF	04/1/2015	04/6/2015	04/8/2015	\$0.2800
MSCI International Quality Dividend ETF	04/1/2015	04/6/2015	04/8/2015	\$0.4000

MARKET VECTORS ETF TRUST

APPROVAL OF INVESTMENT MANAGEMENT AGREEMENTS

March 31, 2015 (unaudited)

At a meeting held on December 4, 2014 (the “December Meeting”), the Board of Trustees (the “Board”) of Market Vectors ETF Trust (the “Trust”), including all of the Trustees that are not interested persons of the Trust (the “Independent Trustees”), considered and approved an investment management agreement between the Trust and Van Eck Associates Corporation (the “Adviser”) (the “December Investment Management Agreement”) with respect to the Market Vectors Morningstar International Wide Moat ETF (the “New December Fund”). In addition, at a meeting held on March 2, 2015 (the “March Meeting”), the Board, including all of the Independent Trustees, considered and approved investment management agreements (the “March Investment Management Agreement”) with respect to the Market Vectors Asia ex Japan Equal Weight ETF, Market Vectors Australia Equal Weight ETF, Market Vectors Australia Hedged Equal Weight ETF, Market Vectors Brazil Equal Weight ETF, Market Vectors China Equal Weight ETF, Market Vectors Europe Equal Weight ETF, Market Vectors Europe Hedged Equal Weight ETF, Market Vectors Germany Equal Weight ETF, Market Vectors Global Spin-Off ETF, Market Vectors Hong Kong Equal Weight ETF, Market Vectors India Equal Weight ETF, Market Vectors Italy Equal Weight ETF, Market Vectors Japan Equal Weight ETF, Market Vectors Japan Hedged Equal Weight ETF, Market Vectors Mexico Equal Weight ETF, Market Vectors Russia Equal Weight ETF, Market Vectors South Africa Equal Weight ETF, Market Vectors South Korea Equal Weight ETF, Market Vectors Spain Equal Weight ETF, Market Vectors Taiwan Equal Weight ETF and Market Vectors United Kingdom Equal Weight ETF (and collectively, with the December Fund, the “Funds”). The December Investment Management Agreement and the March Investment Management Agreement are collectively referred to as the “Investment Management Agreements.”

The Board’s approval of each Investment Management Agreement was based on a comprehensive consideration of all of the information available to the Trustees and was not the result of any single factor. Some of the factors that figured particularly in the Trustees’ deliberations and how the Trustees considered those factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors.

In advance of the relevant meeting, the Trustees received materials from the Adviser, including expense information for other funds. The Adviser provided the Trustees with information regarding, among other things, the various aspects of each Fund’s proposed investment program, fee arrangements and service provider arrangements. The Independent Trustees’ consideration of each Investment Management Agreement was based, in part, on information obtained through discussions with the Adviser at the December Meeting and March Meeting (as applicable) regarding the management of the Funds, information obtained at other meetings of the Trustees and/or based on their review of the materials provided by the Adviser, including the background and experience of the portfolio managers and others proposed to be involved in the management and administration of the Funds. The Trustees also considered the terms and scope of services that the Adviser would provide under each Investment Management Agreement, including the Adviser’s commitment to waive certain fees and/or pay expenses of each of the Funds to the extent necessary to prevent the operating expenses of each of the Funds from exceeding agreed upon limits for a period of at least one year following the effective date of each Fund’s respective registration statement.

In addition, the Trustees were given data on the exchange-traded fund market and expense ratios of other funds. The Trustees considered the benefits, other than the fees under the Investment Management Agreements, that the Adviser would receive from serving as adviser to each Fund, including any it may receive from providing administrative services to each Fund and from an affiliate of the Adviser serving as distributor to each Fund. The Trustees did not consider historical information about the cost of the services provided by the Adviser or the profitability of each of the Funds to the Adviser because the Funds had not yet commenced operations. In addition, because the Funds had not yet commenced operations, the Trustees could not consider the historical performance or the quality of services previously provided to each of the Funds by the Adviser, although they concluded that the nature, quality and extent of the services to be provided by the Adviser were appropriate based on the Trustees' knowledge of the Adviser and its personnel and the operations of the other series of the Trust.

The Independent Trustees were advised by and met in executive session with their independent counsel at the December Meeting and the March Meeting (as applicable) as part of their consideration of the Investment Management Agreements.

In voting to approve the Investment Management Agreements, the Trustees, including the Independent Trustees, concluded that the terms of the Investment Management Agreements are reasonable and fair in light of the services to be performed, the fees paid by certain other funds, expenses to be incurred and such other matters as the Trustees considered relevant in the exercise of their reasonable judgment. The Trustees further concluded that each Investment Management Agreement is in the best interest of each Fund and such Fund's shareholders.

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus and Summary Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus and summary prospectus contains this and other information about the investment company. Please read the prospectus and summary prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.888.MKT.VCTR, or by visiting marketvectorsetfs.com, or on the Securities and Exchange Commission's website at <http://www.sec.gov>.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.
