Form 10-Q/A
June 21, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q/A

- QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED December 31, 2006**
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE TRANSITION PERIOD FROM _____ TO _____.**

Alliance One International, Inc.
(Exact name of registrant as specified in its charter)

Virginia

001-13684

54-1746567

(State or other jurisdiction of Incorporation)

(Commission File Number)

(I.R.S. Employer Identification No.)

8001 Aerial Center Parkway
Morrisville, NC 27560-8417
(Address of principal executive offices)

Edgar Filing: ALLIANCE ONE INTERNATIONAL, INC. - Form 10-Q/A

(919) 379-4300

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Exchange On Which Registered</u>
Common Stock (no par value)	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated Filer
Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of January 31, 2007, the registrant had 95,667,000 shares outstanding of Common Stock (no par value), including 7,853,000 shares owned by a wholly-owned subsidiary.

Explanatory Note

The purpose of this amendment on Form 10-Q/A to the Quarterly Report on Form 10-Q of Alliance One International, Inc. for the quarter ended December 31, 2006 is to restate our unaudited Condensed Consolidated Statements of Operations, Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Cash Flows, for the three months and nine months ended December 31, 2006 to correct income tax errors as described in Note 16 to the Condensed Consolidated Financial Statements.

No attempt has been made in this Form 10-Q/A to modify or update other disclosures presented in the original report on Form 10-Q, except as required to reflect the effects of the restatement. Information not affected by the restatement is unchanged and reflects the disclosures made at the time of the original filing of the Form 10-Q on February 8, 2007. Accordingly, this Form 10-Q/A should be read in conjunction with our filings made with the Securities and Exchange Commission subsequent to the filing of the original Form 10-Q, including any amendments to those filings. The following items have been amended as a result of the restatement:

•

Part I Item 1 Financial Statements

•

Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

•

Part I Item 4 Controls and Procedures

As a result of the restatement described above, the Company's Chief Executive Officer and Chief Financial Officer, with the assistance of other members of management, have re-evaluated the effectiveness of the Company's internal controls over financial reporting as of December 31, 2006, and, based on this re-evaluation, have determined that a material weakness in internal control over financial reporting existed as of December 31, 2006 with respect to accounting for income taxes. This revised assessment is included under Part 1, Item 4 in this document.

Alliance One International, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(in thousands)

1. **BASIS OF PRESENTATION**

Description of Business

The Company is principally engaged in purchasing, processing, storing, and selling leaf tobacco in the United States, Africa, Europe, South America and Asia.

Basis of Presentation

The Company was renamed Alliance One International, Inc. (Alliance One) concurrent with the merger of Standard Commercial Corporation (Standard) on May 13, 2005 with and into DIMON Incorporated.

Because the merger was completed after the close of the fiscal year ended March 31, 2005, the information contained in these unaudited condensed consolidated financial statements for the nine months ended December 31, 2005 includes the operations of Standard since May 13, 2005 and a full nine months of results of DIMON. See Note 2 Merger of Standard and DIMON to the Notes to Condensed Consolidated Financial Statements for further information.

The accounts of the Company and its consolidated subsidiaries are included in the condensed consolidated financial statements after elimination of intercompany accounts and transactions. The Company uses the cost or equity method of accounting for its investments in affiliates; all of which are owned 50% or less. Because of the seasonal nature of the Company's business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. This Form 10-Q/A should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2006. The year ended March 31, 2006 is sometimes referred to herein as fiscal year 2006.

As of March 31, 2006, the Company deconsolidated its operations in Zimbabwe in accordance with the Accounting Research Bulletin 51, *Consolidated Financial Statements* (ARB 51). ARB 51 provides that when a parent does not have control over a subsidiary due to severe foreign exchange restrictions or governmentally imposed uncertainties, the subsidiary should not be consolidated. The Company is accounting for the investment on the cost method and has been reporting it in Cost Method Investments in the condensed consolidated balance sheet since March 31, 2006. At December 31, 2006, the investment in the Zimbabwe operations had been written down to zero. See Note 3 Restructuring and Asset Impairment Charges to the Notes to Condensed Consolidated Financial Statements for further information.

Equity and Cost Method Investments

The Company's equity method investments and its cost method investments, which include its Zimbabwe operations, are non-marketable securities. The Company reviews such investments for impairment whenever events or changes in circumstances indicate that the carrying amount of an investment may not be recovered. For

example, the Company would test such an investment for impairment if the investee were to lose a significant customer, suffer a large reduction in sales margins, experience a major change in its business environment, or undergo any other significant change in its normal business. In assessing the recoverability of equity or cost method investments, the Company uses discounted cash flow models. If the fair value of an equity investee is determined to be lower than its carrying value, an impairment loss is recognized. The preparation of discounted future operating cash flow analysis requires significant management judgment with respect to future operating earnings growth rates and the selection of an appropriate discount rate. The use of different assumptions could increase or decrease estimated future operating cash flows, and the discounted value of those cash flows, and therefore could increase or decrease any impairment charge.

Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). FIN 48 prescribes a more likely than not threshold for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on de-recognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, accounting for income taxes in interim periods, and income tax disclosures. This Interpretation is effective for the Company as of April 1, 2007. The Company is currently evaluating the impact of FIN 48 on its financial statements. See Note 10 Contingencies to the Notes to Condensed Consolidated Financial Statements for further discussion.

-7-

Alliance One International, Inc. and Subsidiaries

1. **BASIS OF PRESENTATION** (*Continued*)

Accounting Pronouncements (*Continued*)

In September 2006, the Financial Accounting Standards Board (FASB) issued FAS No. 157, *Fair Value Measurements*, which enhances existing guidance for measuring assets and liabilities using fair value. FAS No. 157 provides a single definition of fair value, together with a framework for measuring it, and requires additional

disclosure about the use of fair value to measure assets and liabilities. FAS No. 157 also emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and sets out a fair value hierarchy with the highest priority being quoted prices in active markets. Under FAS No. 157, fair value measurements are disclosed by level within that hierarchy. FAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company is evaluating the impact of FAS No. 157 on its financial condition and results of operations.

In September 2006, the Financial Accounting Standards Board (FASB) issued FSP No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities*. The FSP prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities such as periodic major overhauls and maintenance of plant and equipment in annual and interim reporting periods. The FSP requires disclosure of the method of accounting for planned major maintenance activities selected, as well as information related to the change from the accrue-in-advance method to another method. The FSP is effective for the first fiscal year beginning after December 15, 2006. The Company is evaluating the impact of FSP No. AUG AIR-1 on its financial condition and results of operations.

On September 29, 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* ("SFAS 158"), which amends SFAS 87 and SFAS 106 to require recognition of the over funded or under funded status of pension and other postretirement benefit plans on the balance sheet. Under SFAS 158, gains and losses, prior service costs and credits, and any remaining transition amounts under SFAS 87 and SFAS 106 that have not yet been recognized through net periodic benefit cost will be recognized in accumulated other comprehensive income, net of tax effects, until they are amortized as a component of net periodic cost. SFAS 158 is effective for publicly-held companies for fiscal years ending after December 15, 2006. The Company will adopt the balance sheet recognition provisions of SFAS 158 at March 31, 2007. The adoption of FAS 158 is expected to increase stockholders' equity at March 31, 2007 by approximately \$10,000. The Statement does not affect the Company's results of operations.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108 (SAB 108). SAB 108 provides guidance on the consideration of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. The staff of the SEC (the Staff) believes registrants must quantify the impact of correcting all misstatements, including both carryover and reversing effects of prior year misstatements, on a company's current year consolidated financial statements. The Staff prescribes two approaches to assessing the materiality of misstatements: the rollover approach, which quantifies misstatements based on the amount of error originating in the current year income statement and the iron curtain approach, which quantifies misstatements based on the effects of correcting the cumulative effect

existing in the balance sheet at the end of the current year. If under either approach, misstatements are deemed material, a company is required to adjust its financial statements, including correcting prior year financial statements, even if such correction was, and continues to be, immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require a company to amend previously filed reports, and such corrections may be made the next time the company files its prior year statements. Based upon the Company's assessment, it does not currently anticipate any adjustments resulting from the application of SAB 108.

2. MERGER OF STANDARD AND DIMON

On May 13, 2005, the Company completed the merger with Standard pursuant to the Agreement and Plan of Merger, dated as of November 7, 2004 (the "Merger Agreement"). Upon the consummation of the merger, Standard was merged into DIMON, which simultaneously changed its name to Alliance One International, Inc.

Under the terms of the merger agreement, Standard shareholders received three shares of the Company's common stock for each Standard share owned. Approximately 41,243 shares of the Company's common stock were issued in exchange for all outstanding shares of common stock of Standard based on the three-for-one exchange ratio, at an aggregate value of \$264,368 (based on the average closing price of \$6.36 of DIMON common stock during the two business days before and after the date the merger was announced). The net share value, after consideration of unearned compensation restricted stock of \$2,463, is \$261,905. The common stock issuance combined with professional fees and charges incurred to effect the merger of \$12,205 resulted in a total purchase price of \$274,110.

-8-

Alliance One International, Inc. and Subsidiaries

2. MERGER OF STANDARD AND DIMON (*Continued*)

The merger has been treated as a purchase business combination for accounting purposes, with the Company as the acquiring entity. As such, Standard's assets acquired and liabilities assumed have been recorded at their fair value and the results of

operations after May 13, 2005 are included in the results of the Company. In identifying the Company as the acquiring entity, the companies took into account the relative share ownership of the surviving entity, the composition of the governing body of the combined entity and the designation of certain senior management positions. As a result, the historical financial statements of DIMON become the historical financial statements of the Company. The purchase price for the acquisition, including transaction costs, has been allocated to the assets acquired and liabilities assumed based on estimated fair values at the date of acquisition, May 13, 2005. The purchase price allocation was completed as of March 31, 2006 as follows:

	May 13, 2005

Total unearned compensation restricted stock	\$ 2,463
Net assets acquired	\$ 274,110

As indicated in the above table, the goodwill and intangible asset relative to the merger was \$143,030 and is non-deductible for tax purposes. See Note 4 Goodwill and Intangibles to the Notes to Condensed Consolidated Financial Statements for further information. Included within this balance is a finite lived customer relationship intangible of \$33,700, which is being amortized over a useful life of twenty years.

In fiscal 2006, the Company had established reserves for employee separation and operational exit costs related to the integration of certain Standard functions and operations into the Company. Costs associated with these integration actions did not impact earnings and were recognized as a component of purchase accounting, resulting in an adjustment to goodwill. See Note 3

Restructuring and Asset Impairment Charges to the Notes to Condensed Consolidated Financial Statements for further disclosure of the purchase accounting separation and exit costs.

Alliance One Selected Unaudited Pro Forma Combined Financial Information

The unaudited pro forma information in the table below summarizes the combined results of operations of DIMON and Standard for the three months and nine months ended December 31, 2005 as if the companies were combined as of April 1, 2005. The pro forma information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved had the merger taken place at the beginning of each period or results of future periods. The following information has not been adjusted to reflect any anticipated cost savings or operating efficiencies that may be realized as a result of the merger.

(1) Merger related debt retirement expenses were \$0 and \$66,474 and restructuring, impairment and integration charges were \$15,163 and \$32,737 for the three months and nine months, respectively.

3. RESTRUCTURING AND ASSET IMPAIRMENT CHARGES

As a result of the merger, the Company developed a detailed preliminary integration plan as of the closing of the merger with Standard that addressed each origin and functional area. Through the use of regional integration teams, assessments were made of each of DIMON's and Standard's processing facilities around the world as well as identification of countries in which there may be duplicative facilities and/or excess capacity and certain redundancies were determined. The plan also reviewed origin and corporate offices. As a result of these closures and redundancies, the plan also included a significant reduction in the global workforce. Subsequent to the acquisition of Standard, the Company has continued assessing relevant information obtained as it relates to markets and customers that were not available prior to the merger which has resulted in modifications to the preliminary integration plan. The integration plan specifically identifies all significant actions to be taken to complete the plan, activities of the acquired company that will not be continued, including the method of disposition and location of those activities, and the plan's expected date of completion. Actions required by the plan were initiated immediately and throughout fiscal 2006 and are continuing in fiscal 2007.

Employee related severance costs in fiscal 2006 totaled \$30,944. Severance and other cash charges for fiscal 2006 totaled \$43,805. Related payments of \$30,161 were made in fiscal 2006 with the remaining \$13,644 to be paid in fiscal 2007. During the nine months ended December 31, 2006, additional restructuring costs of \$9,367 were recorded primarily related to additional employee related severance costs which will substantially all be paid in fiscal 2007. Employee related severance costs and other charges between \$2,000 and \$3,000 are expected to be incurred during the remainder of fiscal 2007 due to ongoing restructuring and integration plans.

In fiscal 2006, integration charges resulting from the Company's decisions had different accounting treatment depending on whether they were related to former DIMON operations or former Standard operations. In accordance with Emerging Issues Task Force (EITF) 95-3, Recognition of Liabilities in Conjunction with a Purchase Business Combination, the Company has recorded the costs of a plan to (1) exit an activity of the former Standard operations, (2) involuntarily terminate employees of the former Standard operations, or (3) relocate employees of the former Standard operations as liabilities assumed in a purchase business combination and included in the allocation of the acquisition cost resulting in an increase in goodwill. The Company concluded that these costs were not associated with or were not incurred to generate revenues of the combined entity after the consummation date, had no future economic benefit to the combined Company, were incremental to other costs incurred in the conduct of activities prior to the consummation date, and will be incurred as a direct result of the plan to exit an activity of the Standard. However, all costs of integration actions associated with former DIMON operations are recorded in earnings as restructuring and asset impairment costs.

In fiscal 2007, all costs of integration actions associated with former DIMON and former Standard operations are recorded in earnings as restructuring and asset impairment costs only when they are incurred or meet the criteria for recording in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets or SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities.

3. RESTRUCTURING AND ASSET IMPAIRMENT CHARGES
(Continued)

Sale of Spanish tobacco operations

On February 1, 2006, the Company entered into agreement to sell 100% of the stock of Agroexpansion, S.A., its former DIMON operation, and World Wide Tobacco España, S.A. (WWTE), its former Standard operation. In connection with the decision to close the operations, the Company reviewed its fixed assets for impairment. In the third and fourth quarters of fiscal 2006, the Company recorded asset impairment and restructuring costs of \$10,576. Of this amount, the Company recognized \$3,241 in earnings and an adjustment related to the former Standard operations of \$7,335 as an adjustment to the purchase price of the merger at March 31, 2006 in connection with the pending sale. The Company completed the sale of Agroexpansion and WWTE on August 1, 2006. Additional restructuring charges of \$493 were recorded during the nine months ended December 31, 2006, to complete the transaction.

Zimbabwe Investment Impairment

As of March 31, 2006, the Company deconsolidated its operations in Zimbabwe in accordance with the Accounting Research Bulletin 51, Consolidated Financial Statements (ARB 51). ARB 51 provides that when a parent does not have control over a subsidiary due to severe foreign exchange restrictions or governmentally imposed uncertainties, the subsidiary should not be consolidated. A non-cash impairment charge of \$47,899 was recorded to reduce the net investment in Zimbabwe operations to estimated fair value at March 31, 2006.

Governmental authorization is required before any dividends can be paid from a Zimbabwe operation. The Company's Zimbabwe operations had tried unsuccessfully to pay dividends in prior years due to certain unattainable criteria set by the Reserve Bank of Zimbabwe and the government not granting the necessary authorizations. During the three months ended September 30, 2006, the Company received a \$10,000 dividend payment from one of its Zimbabwe subsidiaries that had been negotiated with the Zimbabwe authorities. The \$10,000, which was paid from Zimbabwe dollar devaluation gains for the year ended December 31, 2005, was permitted as a result of a negotiated prepayment of \$20,000 of export funds due into Zimbabwe at a later date. The dividend was recorded as a reduction in the investment in the Zimbabwe subsidiary. The Company does not consider the ability to pay dividends in the near future a possibility.

Current economic and political conditions have continued to decline in fiscal 2007 as inflation, lending rates and investment rates have deteriorated. General farming operations are being negatively impacted by the lack of foreign exchange to buy crop inputs and fuel. The crop size in Zimbabwe also continues to decline. Due to these continually declining conditions, the Company decided to reevaluate the Zimbabwe operational structure. As a result, several significant

operational changes were made including the closure of the Zimbabwe processing factory, outsourcing the 2006 crop tobacco processing and a significant reduction in permanent personnel.

Based on events discussed above, the Company evaluated the fair value of the Zimbabwe operations and determined that the net investment in the Zimbabwe operations exceeded the estimated fair value. The Company recorded an additional non-cash impairment charge of \$13,246 during fiscal 2007 to write down the net investment in the Zimbabwe operations to zero.

SFAS No. 144 Asset Impairment

CdF Sale of dark air-cured operations

As a consequence of the ongoing transition in overcapacity within certain markets of the industry, the Company began tentative negotiations to dispose of its dark air-cured operations. In June 2005, the Company reviewed its assets for impairment and a pre-tax impairment charge of \$4,548 was recorded which primarily related to intangibles of the dark air-cured tobacco operation in Indonesia. On January 23, 2006, the Company entered into a non-binding letter of intent to sell its ownership interest in Compania General de Tabacos de Filipinas, S.A. (CdF), the owner of the Company's dark air-cured tobacco business. In connection with this letter of intent, additional asset impairment charges of \$7,972 were recorded during fiscal 2006.

Thailand Asset Impairment

In fiscal 2006, concurrent with the closure of the former DIMON Thailand processing facilities, assets of \$5,743 were reclassified in the Company's balance sheet to assets held for sale. These assets are primarily land and production facilities that have become redundant as a result of the merger.

As a result, the Company conducted a review of the fair value of the Thai assets held for sale. An asset impairment charge of \$1,333 related to land and buildings was recorded during the three months ended September 30, 2006. The sale of the land and buildings was completed in December 2006. Additional costs of \$229 were incurred to complete the transaction.

3. RESTRUCTURING AND ASSET IMPAIRMENT CHARGES
(Continued)

SFAS No. 144 Asset Impairment (Continued)

Greece Asset Impairment

As a result of the partial and pending full closure of Greek operations, the Company tested the long-lived assets for impairment in accordance with SFAS No. 144. During the nine months ended December 31, 2006, the Company recorded an asset impairment charge of \$3,166 related to machinery and equipment.

Assets Held for Sale

As of December 31, 2006, assets of \$9,775 were actively marketed and classified in the Company's balance sheet as assets held for sale. The Company evaluated the criteria of SFAS No. 144 and concluded that these assets qualify as assets held for sale. In accordance with SFAS No. 144, the Company recorded the assets held for sale at the lower of carrying amount or fair value less costs to sell. These assets were primarily production and administrative facilities that had become redundant as a result of the merger. The Company reclassified assets totaling \$2,238 from assets held for sale to property, plant and equipment due to changes to the plan to sell the assets.

4. GOODWILL AND INTANGIBLES

Goodwill represents costs in excess of fair values assigned to the underlying net assets of acquired businesses. Goodwill is not subject to systematic amortization, but rather is tested for impairment annually or whenever events and circumstances indicate that an impairment may have occurred. The Company has chosen the first day of the last quarter of its fiscal year as the date to perform its annual goodwill impairment test.

The Company has no intangible assets with indefinite useful lives. It does have other intangible assets which are being amortized. The following table summarizes the changes in the Company's goodwill and other intangibles for the three months and nine months ended December 31, 2006 and 2005.

Discontinued Italian Operations, Other Regions Segment

On September 30, 2004, concurrent with the sale of the Italian processing facility, the Company made a decision to discontinue all of its former DIMON Italian operations as part of its ongoing plans to realign its operations to more closely reflect worldwide changes in the sourcing of tobacco. As a result of the merger on May 13, 2005, the remaining net assets of the discontinued Italian operations of Standard were acquired.

The Company has completed the sale of the Italian operations. The collection of the accounts receivable and the liquidation of the inventory not acquired by the purchaser are continuing.

In fiscal 2006, Italian operations of both former DIMON and Standard were being investigated by the Directorate General for Competition (DGCOMP) of the European Commission (EC) into tobacco buying and selling practices within the leaf tobacco industry in Italy. During the quarter ended September 30, 2005, as a result of this investigation, fines of \$12,000 were levied against the former DIMON entity and \$16,800 were levied against the former Standard entity. Fines levied against the former DIMON entity are included in the summary shown below, while fines levied against the former Standard entity were recorded as a purchase price adjustment as the investigation was initiated prior to the combination of the two companies.

Due to the unexpected delays in selling the Italian tobacco and to take advantage of an opportunity to accelerate the disposition of the remaining Italian inventory, the Company has been negotiating the sale of the remaining Italian tobacco inventory. The Company recorded a charge to inventory totaling \$5,600 during the three months ended December 31, 2006 to adjust the cost of inventory to the sales price being considered as part of this bulk sale transaction. Additionally, the Company updated their evaluation of the collectibility of the accounts receivable and recorded an additional allowance of \$3,650 during the three months ended December 31, 2006.

Results of operations and the assets and liabilities, other than subsidiary debt guaranteed by the Company and the related interest expense, are reported as discontinued operations. Sales and operating losses for the three months and nine months ended December 31, 2006 and 2005 are presented below.

Discontinued Wool Operations, Other Regions Segment

As a result of the merger, the Company acquired the remaining net assets of Standard's discontinued wool operations. The liquidation of these assets is continuing. The remaining assets are primarily in France and, along with the remaining trading operations in France, are the subjects of separate sales agreements pending governmental approval. Due to unexpected delays in conjunction with obtaining approval from the French government the sale of these operations has been delayed. The Company is obtaining approval from the French government as expeditiously as possible.

Results of operations and the assets and liabilities, other than subsidiary debt guaranteed by the Company, are reported as discontinued operations. This information is summarized for the appropriate fiscal periods as follows:

5. DISCONTINUED OPERATIONS *(Continued)***Discontinued Mozambique Operations, Other Regions Segment**

On March 16, 2006, the Board of Directors of the Company made a decision to discontinue operations in Mozambique after the procurement of the 2006 crop. This decision involves the closure of its three operating entities and will affect approximately 550 permanent employees.

As a result of the merger, the Company's concession to promote tobacco production in the Chifunde district of Mozambique was terminated by the government for the fiscal 2006 crop year. In conjunction with the appeal process the Company received a letter on October 11, 2005 from the Minister of Agriculture of Mozambique referring the case back to the local government. At that point the Company entered into discussions with the local government of the

Chifunde district to secure the concession for the 2007 crop year.

These discussions continued through January 31, 2006 at which time the Company concluded that it was unlikely that the local government would issue a concession for the crop year in fiscal 2007 to the Company. Due to this decision by the local government the Company initiated a process to evaluate the strategic alternatives for its remaining Mozambique operations without the Chifunde district and determined that it was not in the Company's economic interest to remain in Mozambique without this strategic district. The Company evaluated the criteria of SFAS No. 144 and concluded that the Mozambique operations qualify to be presented as assets held for sale and accordingly, the assets have been written down to their fair value less any selling costs.

Results of operations and the assets and liabilities of our businesses reported as discontinued operations were as follows:

	Three Months Ended		Nine Months Ended	
	December 31,		December 31,	
	2006	2005	2006	2005

Discontinued Non-Tobacco Operations, Other Regions Segment

In January 2004, the Company acquired a majority interest in a non-tobacco entity previously reported using the equity method of accounting. Production expectations and the development of emerging markets have not met management's expectations. As a result, the Company began investigating strategic alternatives for its non-tobacco operation in fiscal 2006, which led to an impairment evaluation in accordance with SFAS No. 144. The Company recorded asset impairment charges of \$1,764 during the three months ended December 31, 2005. The Company reevaluated the criteria for classifying the assets as held for sale and reporting the results of operations as discontinued operation in the fourth quarter of fiscal 2006 and concluded that the Company now met all of the criteria prescribed by SFAS No. 144. The assets of the non-tobacco operations were reclassified as held for sale and the results of operations, including the impairment charge, were presented as discontinued operations. The Company sold the assets on April 13, 2006. The transaction resulted in no material gain or loss. The Company is reporting a tax charge to discontinued operations for the sale of Green Natural Fibers that relates to an increase in the Valuation Allowance for a portion of the loss that may be characterized as a capital loss, which cannot be deducted against operating income.

6. SEGMENT INFORMATION

The Company purchases, processes, sells and stores leaf tobacco. Tobacco is purchased in more than 45 countries and shipped to more than 90 countries. The sales, logistics and billing functions of the Company are primarily concentrated in service centers outside of the producing areas to facilitate access to our major customers. Within certain quality and grade constraints, tobacco is fungible and, subject to these constraints, customers may choose to fulfill their needs from any of the areas where the Company purchases tobacco.

The Company's internal review is conducted by regions and those regions must be evaluated to determine that they possess similar economic characteristics. Due to the growth and significance of the South American region to the Company's performance, the Company has determined it has two segments, South America and Other.

The Company's operations are seasonal. Therefore, the individual and combined segment results of operations for the three months and nine months ended December 31, 2006 are not necessarily indicative of the results to be expected for the year ending March 31, 2007. Historically, the first two fiscal quarters ending September 30 are the strongest performance periods for the South America segment.

Selling, logistics, billing, and administrative overhead, including depreciation, which originates primarily from the Company's corporate and sales offices are allocated to the segments based upon segment operating income. The Company reviews performance data from purchase through sale based on the source of the product and all intercompany transactions are allocated to the region that either purchases or processes the tobacco.

During the three months ended June 30, 2006, the Company entered into an agreement with local government in Brazil, which provides for realization of accumulated intrastate trade taxes related to the 2005 crop on a monthly basis as stipulated therein. As a result, intrastate trade taxes related to the 2005 crop of \$19,225 previously recorded as cost of goods sold in fiscal 2006 were reversed in fiscal 2007.

7. EARNINGS (LOSS) PER SHARE

Basic earnings per share are computed by dividing earnings by the weighted average number of common shares outstanding. The weighted average number of common shares outstanding is reported as the weighted average of the total shares of common stock outstanding net of shares of common stock held by a wholly-owned subsidiary. Shares of common stock owned by the subsidiary were 7,853 at December 31, 2006. This subsidiary does not receive dividends on these shares and it does not have the right to vote.

In connection with the closing of the merger with Standard, many of the Company's financing arrangements were refinanced, including in July of 2005, the Company's \$73,328 of convertible subordinated debentures due 2007. The diluted earnings per share calculation assumes that all of the 6 ¼ % Convertible Subordinated Debentures due 2007 outstanding during the periods presented were converted into shares of common stock at the beginning of the reporting period thereby increasing the weighted average number of

shares considered outstanding during each period and reducing the after-tax interest expense. The weighted average number of shares outstanding is further increased by shares of common stock equivalents for employee stock options and restricted shares outstanding.

For the three months and nine months ended December 31, 2005, the computation of diluted earnings per share did not assume the conversion of the convertible subordinated debentures into 2,549 shares at the beginning of the period and the reduction of after-tax interest expense by \$0 and \$811, respectively, because the inclusion would have been antidilutive. For the three months and nine months ended December 31, 2006 and 2005, all outstanding restricted stock and stock options were excluded because the effect of their inclusion would have been antidilutive.

9. STOCK-BASED COMPENSATION

On April 1, 2006, the Company adopted SFAS No. 123(R), Share-Based Payment. This statement requires the Company to expense the fair value of grants of various stock-based compensation programs at fair value over the vesting period of the awards. The Company elected to adopt this statement using the Modified Prospective Application (MPA) transition method which does not result in the restatement of previously issued financial statements. Application of the MPA transition method requires compensation costs to be recognized beginning on the effective date for the estimated fair value at date of grant in accordance with the original provision of SFAS No. 123, Accounting for Stock-Based Compensation, for all stock-based compensation awards granted prior to, but not yet vested as of April 1, 2006. Awards granted after April 1,

2006 will be recognized as compensation expense based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123(R). The MPA transition method also requires that any unearned or deferred compensation recorded in contra-equity accounts be eliminated against the equity accounts that will be affected by the on-going recognition of stock based compensation. Accordingly, the Company has reclassified \$3,134 from Unearned Compensation Restricted Stock to Common Stock.

Prior to adoption of SFAS No. 123(R), all benefits of tax deductions resulting from the exercise of share-based compensation were presented as operating cash flows in the Company's Condensed Consolidated Statements of Cash Flows. SFAS 123(R) requires that benefits of tax deductions in excess of deductions for compensation cost recognized (excess tax benefits) be classified as financing cash flows.

For the three months and nine months ended December 31, 2006, compensation expense for stock-based compensation plans was \$1,158 and \$3,401.

The Company currently has three types of stock based compensation awards: Stock Options, Stock Options with Stock Appreciation Rights, and Restricted Stock. These various types of grants are made in accordance with the Alliance One International, Inc. 2003 Incentive Plan (the Plan) which was approved by shareholders of the Company in November 2003. This plan authorizes the issuance of the various stock based compensation awards to any employee of the Company or any subsidiary and any member of the Board that the Executive Compensation Committee determines has contributed to the profits or growth of the Company or its affiliates. The Plan amended previous plans dating back to 1995. Under this plan and predecessor plans, 6,466 share based compensation awards have been authorized of which 3,685 options and 799 shares of restricted stock are outstanding and 1,767 shares are available for future awards. Shares issued under the Plan are new shares which have been authorized and designated for award under the Plan. In addition to the restricted shares outstanding above, 217 restricted shares remain outstanding under an approved plan of the former Standard Commercial Corporation. The individual awards are discussed in greater detail below.

Stock Option Awards

Stock options allow for the purchase of common stock at a price determined at the time the option is granted. This price has historically been the stock price on the date of grant. Stock options generally vest at the end of three years or ratably over four years and generally expire after ten years. The fair value of these options is determined at grant date using the Black-Scholes valuation model. The fair value is then recognized as compensation expense ratably over the vesting term of the options. There were 477 stock options granted during the nine months ended December 31, 2006 and 532 stock options granted during the nine months ended December 31, 2005.

The following assumptions were used to determine the fair value of options issued in 2006:

Grant Price	\$3.94
Exercise Price	\$3.94
Expected Life in Years	6.25
Annualized Volatility	47%
Annual Dividend Rate	0%
Discount Rate	4.83%

Alliance One International, Inc. and Subsidiaries

9. STOCK-BASED COMPENSATION (Continued)

A summary of option activity for stock options follows:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at March 31, 2006	4,283	7.55	5.49	(11,137)
Granted	477	3.94	10.00	(0)
Exercised	(368)	4.49	5.19	(600)
Forfeited	(343)	7.70	5.44	(1,194)
Cancelled	(364)	14.77	0	(3,560)
Outstanding at December 31, 2006	3,685	6.67	5.93	1,453
Vested and expected to vest	3,312	6.69	5.81	1,210
Exercisable at December 31, 2006	2,507	7.59	4.60	(1,333)

The intrinsic values in the table above represent the total pre-tax intrinsic value (the difference between the Company's closing stock price and the exercise price multiplied by the number of options). The closing price will be subject to the share price on the last trading day of the respective period ending dates, thus the amounts are not additive. Cash received from the exercise of options for the three months and nine months ended December 31, 2006 was \$1,051 and \$1,211, respectively. As of December 31, 2006, there was \$1,526 of remaining unamortized stock-based compensation related to unvested options which will be expensed over the remaining service period through July 2010.

The table below shows the movement in unvested shares from March 31, 2006 to December 31, 2006.

	Shares	Weighted Average Grant Date Fair Value	Aggregate Grant Date Fair Value
Unvested March 31, 2006	1,427	\$1.91	\$ 2,728
Granted	477	2.07	988
Forfeited	(88)	2.74	(243)
Cancelled	(28)	2.64	(74)
Vested	(611)	2.12	(1,295)
Unvested December 31, 2006	1,177	\$1.79	\$ 2,104

Stock Options with Stock Appreciation Rights

Stock appreciation rights (SARs) have historically been granted in tandem with option grants under which the employee may choose to receive in cash the excess of the market price of the share on the exercise date over the market price on the grant date (the intrinsic value of the share) rather than purchase the shares. The choice to receive cash is limited to five years after grant. After the fifth year and up to the tenth year after grant, the employee will continue to be able to purchase shares under the award but no longer has the choice of receiving the intrinsic value of the shares. Compensation expense for Stock Options with Stock Appreciation Rights is treated as a liability due to the express ability of the employee to make the choice of whether to receive cash or purchase shares. Prior to the adoption of SFAS 123(R), the intrinsic value of SARs outstanding was multiplied by the cumulative vesting in each SAR award to determine the liability at each balance sheet date. Amounts charged to compensation expense resulted from the change in the vested intrinsic value between balance sheet dates. Following adoption of SFAS 123(R), the fair value of SARs are determined at each balance sheet date using a Black-Scholes valuation model multiplied by the cumulative vesting of each SAR award. After consideration for estimated forfeitures, this change in accounting resulted in a cumulative effect of accounting change adjustment of \$252.

Options with Attached SARs	Shares	Weighted Average Exercise Price	SAR Term	Aggregate Intrinsic Value	Aggregate Fair Value
Outstanding at April 1, 2006	520	\$6.72	2.12	\$ (965)	\$ 435
Exercised	(4)	\$6.25	0.71	\$ 3	\$ 6
Forfeited	(92)	\$6.68	1.91	\$ (194)	\$ (61)
Expired	(88)	\$7.44	-	\$ (307)	\$ -
Outstanding at December 31, 2006	336	\$6.54	1.83	\$ 174	\$724
Exercisable at December 31, 2006	204	\$6.59	1.14	\$ 97	\$366
Vested and Expected to Vest	338	\$6.52	1.75	\$ 164	\$647

Alliance One International, Inc. and Subsidiaries

9. STOCK-BASED COMPENSATION *(Continued)***Stock Options with Stock Appreciation Rights** *(Continued)*

As of December 31, 2006, there was \$46 of remaining unearned compensation expense related to stock options with attached SARs which will be expensed over the remaining service period through October 2007. However, since actual compensation expense will be determined by the change in fair value of the SARs from period to period, actual compensation expense related to these awards may be different from this amount. The Company recognized expense of \$325 and \$0 for the three months and \$227 and \$(138) for the nine months ended December 31, 2006 and 2005 related to stock options with attached SARs.

The table below shows the movement in unvested SARs from March 31, 2006 to December 31, 2006.

	Shares	Weighted Average Grant Date Fair Value	Aggregate Grant Date Fair Value
Unvested March 31, 2006	271	\$2.19	\$ 594
Forfeited	(24)	2.63	(63)
Vested	(115)	2.54	(292)
Unvested December 31, 2006	132	\$1.81	\$ 239

Assumptions to used to determine the fair value of SARs as of December 31, 2006 included the following assumptions:

Stock Price	\$7.06
Exercise Price	\$6.54
Expected Life in Years	1.9
Annualized Volatility	47%
Annual Dividend Rate	0%
Discount Rate	4.88%

As the exercise price of these SARs is below the current stock price, the expected life has been determined to be the maximum time period the SAR may be exercised. The discount rate used is the risk free treasury bill rate consistent with the expected life. Volatility is based on historical volatility of the Company.

Restricted Stock

Restricted stock is common stock that is both nontransferable and forfeitable unless and until certain conditions are satisfied. The fair value of restricted shares is determined on grant date and is amortized over the vesting period which is generally three years.

Restricted Stock	Shares	Weighted Average Grant Date Fair Value
Restricted at March 31, 2006	1,068	5.56
Granted	366	3.94
Vested	(400)	6.07
Forfeited	(18)	5.51
Restricted at December 31, 2006	1,016	4.77

As of December 31, 2006, there was \$2,081 of remaining unamortized deferred compensation associated with restricted stock awards that will be expensed over the remaining service period through July 2009. Expense recognized due to the vesting of restricted stock awards was \$608 and \$922 for the three months and \$2,419 and \$2,192 for the nine months ended December 31, 2006 and 2005, respectively.

Fair Value Disclosures Prior to Adoption of SFAS No. 123(R)

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation for the three months and nine months ended December 31, 2005.

10. CONTINGENCIES

Tax

During June 2004, the Company received from Brazilian tax officials notices of proposed adjustments to income tax returns for the Company's Brazil operations for tax years 1999 through 2002, inclusive, that total \$54,360 as of March 31, 2005. Of these proposed adjustments \$39,446 related to disallowance of local currency foreign exchange losses on U.S. dollar funding. In March 2005, the Taxpayer's Council dismissed the assessment relating to the disallowance of local currency foreign exchange losses. The remaining \$14,914 related to disallowance of other sales related expenses. As of December 31, 2006, this amount is valued at \$20,755 due to the devaluation of the U.S. dollar to the Brazilian real. The Company is continuing to argue its position on the disallowance of sales related expenses, and believes it has strong defenses to these adjustments. No provision has been set up for this issue as the outcome is not considered probable.

In 1993 and 1996, the Company received notices from Brazilian tax authorities of proposed adjustments to the income tax returns of the Company's entities located in Brazil for the calendar years ending 1988 through 1992. The Company has successfully defeated many of the proposed adjustments in litigation and settled the

other issues under REFIS and Tax Amnesty programs. As of December 31, 2006, total estimated tax, penalties and interest relating to still unresolved issues is \$1,262. The Company has established a reserve of \$321 for this assessment as it is considered probable and estimable.

On August 21, 2001, the Company's subsidiary in Brazil won a claim related to certain excise taxes (IPI credit bonus) for the years 1983 through 1990 and is now pursuing collection. The collection procedures are not clear and the total realization process could potentially extend over many years. Through March 2005, the Company has utilized \$20,377 of IPI credit bonus in lieu of cash payments for Brazilian federal income and other taxes. No benefit for this IPI credit bonus has been recognized, and it has been recorded as deferred revenue, because the Company has been unable to predict whether the Brazilian Government will require payment of amounts offset. In January 2005, the Company received a Judicial Order to suspend the IPI compensation. An appeal was filed and the Company received notification from the tax authorities in March 2005 to present all documentation pertaining to the IPI credit bonus. On April 24, 2006, the Company received an assessment of \$26,600 for federal income taxes in 2005 that were offset by the IPI credit bonus. As of December 31, 2006, this amount is valued at \$27,204 due to devaluation of the U.S. dollar to the Brazilian real. The Company has appealed the assessment and believes it has properly utilized the IPI credit bonus. No provision has been set up for this issue as the outcome is not considered probable.

In 1998, a tax law was issued in which the taxable basis for PIS/Cofins taxes in Brazil was increased. PIS and Cofins are taxes paid on sales revenues. The tax law issued in 1998 increased the basis of calculation to include other revenues such as interest income. The constitutionality of the increase of the tax basis was challenged and on November 10, 2005, the Brazilian Supreme Court declared the increase of the tax basis unconstitutional. Based on this decision, the Company reversed the PIS/Cofins tax expense amount of \$ 3,933 during the third quarter of fiscal 2006. In November 2006, the Supreme Court in Brazil rendered a specific decision in favor of the Company. The Company began the administrative process of requesting the release of the escrow deposits, including unrecognized interest income of approximately \$3,065, in December 2006. The Company expects to receive total funds of approximately \$7,000 during the fourth quarter of fiscal 2007 and recognize the related interest income.

Alliance One International, Inc. and Subsidiaries

10. CONTINGENCIES (*Continued*)

Tax (*Continued*)

On October 31, 2002, the Company received an assessment from the tax authorities in Germany regarding the taxable gain from the sale of its flower operations, Florimex, in September 1998. The report concluded the values of the real estate located in Germany were greater than those arrived at with the buyer of the flower operation. The proposed adjustment to income tax, including interest, as of December 31, 2006 is equivalent to approximately \$4,903 for federal corporate income tax and \$2,758 for local trade income tax, without interest accrued. On January 2, 2007, the Company received notice of the decision rendered by the Fiscal Tax Court. The Court decided in favor of the tax authorities and denied the Company's request for appeal. The Company believes it has grounds for appeal against this decision and it is now preparing an application to appeal. The total tax assessed by the German tax authorities, including interest to date, was €7,608 or \$10,005 as of December 31, 2006. The Company has increased the previous reserve against this contingent exposure by an additional \$7,111, bringing it from \$2,894 to \$10,005 as of December 31, 2006.

In September 2002 and in January 2004, the Company's Tanzanian operations received assessments for income taxes equivalent to approximately \$1,515 and \$4,785, respectively as of December 31, 2006. In September 2005, additional assessments for 2001, 2002, 2003 and 2004 were received. The assessments for 2001, 2002 and 2003 reduce tax loss carryovers equivalent to \$8,525 as of December 31, 2006. The 2004 assessment carries a tax equivalent to \$1,667 as of December 31, 2006. The Company has filed protests and appeals and is currently awaiting replies. The Company has established a reserve of \$921 for this assessment as it is considered probable and estimable.

In September 2006, the Company's Serbian operations were assessed for VAT and government pension liability for payments to farmers. In December 2006, one third of the assessment was reduced. The remaining issues are still being discussed. The Company is contesting these assessments and has established a reserve of \$239 for the VAT component of the assessment.

On August 28, 2006, the Company's South Africa shipping office received an assessment from the South Africa Revenue Service (SARS) for approximately 40,500 Rand (equivalent to \$5,400). The assessments, at that time, had no explanations. Due to devaluation of the US\$ against the Rand, as of December 31, 2006, the US dollar equivalent value of the assessment was \$5,785. On January 31, 2007, the Company received the SARS report explaining the assessment. Upon reviewing the SARS report it is clear the assessment has been based on an inaccurate analysis of the

business and contains significant internal mathematical mistakes. The Company has assembled a team to appeal the assessments and is preparing its response. Under current South Africa law, the Company may be required to deposit the taxes to continue its appeal. As of December 31, 2006, the Company has received a deferral of such payment and is currently negotiating to extend that deferral. No provision has been set up for this issue as the outcome is not considered probable.

As discussed in other footnotes, the Company does business in countries and taxing jurisdictions where the rules are unclear and the enforcement is inconsistent. These inherent risks are most pronounced in the area of the pricing of intercompany sales and services. The Company has estimated a reserve for probable transfer pricing issues of \$4,000.

While the Company believes it has properly reported its income and provided for taxes in Brazil, Germany, Serbia, South Africa and Tanzania in accordance with applicable laws, the final resolution of the proposed adjustments is uncertain and involves unsettled areas of the law. The Company has evaluated each issue described above, based on currently available information, and has provided for the probable liability associated with these matters. While the resolution of these issues may result in tax liabilities that may differ from the specific accruals established for the matters, the Company currently believes that the resolution will not have a material adverse effect on its financial position or liquidity. However, an unfavorable resolution could have a material adverse effect on its results of operations or cash flows in the quarter and year in which an adjustment is recorded or the tax is due or paid. As the Company is no further than the initial stages of the appeals process for any of the above matters, the timing of the ultimate resolution and any payments that may be required for the above matters cannot be determined at this time.

In June 2006, the Financial Accounting Standards Board issued FIN 48. This interpretation requires the Company to establish reserves for Uncertain Tax Positions if it is not more than likely that the Company will prevail on the merits if audited and challenged. This interpretation will be applicable for the Company beginning April 1, 2007.

The effect of this interpretation is being reviewed and it could have a material impact on the Company because the Company does business in countries that do not have clear tax rules concerning transfer pricing and other tax matters.

This lack of clarity in the tax rules creates uncertainty which cannot be easily analyzed or predicted. Additionally, the Company may have tax presence liabilities that could give rise to accruals under FIN 48 that will never reverse.

Alliance One International, Inc. and Subsidiaries

10. CONTINGENCIES (*Continued*)

Other

The Company has received correspondence from an Italian company, Mindo S.r.l., which was the purchaser, in June, 2004, of the Company's Italian subsidiary, DIMON Italia S.r.l., alleging that the Company and various of its subsidiaries, employees and other individuals not employed by the Company, failed to disclose, at the time of Mindo's purchase, certain events or circumstances which, if disclosed, would have caused Mindo not to purchase the Company's subsidiary and which amount to a breach of the purchase agreement. Although no formal legal proceeding has yet been filed, Mindo is apparently contending that it is entitled to the rescission of the purchase agreement. The Company has investigated the claims, believes them to be without merit and intends to vigorously defend any legal proceeding which might be brought.

In March 2004, the Company discovered potential irregularities with respect to certain bank accounts in southern Europe and central Asia. The Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of activity relating to these accounts. That investigation revealed that, although the amounts involved were not material and had no material impact on the Company's historical financial statements, there were payments from these accounts that may have violated the U.S. Foreign Corrupt Practices Act (the "FCPA").

In May 2004, the Company voluntarily reported the matter to the U.S. Department of Justice. Soon thereafter, the Company closed the accounts in question, implemented personnel changes and other measures designed to prevent similar situations in the future, including the addition of new finance and internal audit staff and enhancement of existing training programs, and disclosed these circumstances in its filings with the U.S. Securities and Exchange Commission (the "SEC"). In August 2006, the Company learned that the SEC has issued a formal order of investigation of the Company and others to determine if

these or other actions may have violated certain provisions of the Securities Exchange Act of 1934 and rules thereunder. The Company is cooperating fully with the SEC with respect to the investigation.

If the U.S. authorities determine that there have been violations of federal laws, they may seek to impose sanctions on the Company that may include, among other things, injunctive relief, disgorgement, fines, penalties and modifications to business practices. It is not possible to predict at this time whether the authorities will determine that violations have occurred, and if they do, what sanctions they might seek to impose. It is also not possible to predict how the government's investigation or any resulting sanctions may impact the Company's business, results of operations or financial performance, although any monetary penalty assessed may be material to the Company's results of operations in the quarter in which it is imposed.

The Company and certain of its foreign subsidiaries guarantee bank loans to growers to finance their crop. Under longer-term arrangements, the Company may also guarantee financing on growers' construction of curing barns or other tobacco production assets. The Company also guarantees bank loans to certain tobacco cooperatives to assist with the financing of their growers' crops. Guaranteed loans are generally repaid concurrent with the delivery of tobacco to the Company. The Company is obligated to repay any guaranteed loan should the grower or tobacco cooperative default. If default occurs, the Company has recourse against the grower or cooperative. At December 31, 2006, the Company was guarantor of an amount not to exceed \$309,152 with \$279,376 outstanding under these guarantees. The majority of the current outstanding guarantees expire within the respective annual crop cycle. The Company considers the risk of significant loss under these guarantees and other contingencies to be remote and the accrual recorded for exposure under them was not material at December 31, 2006.

11. REFINANCING OF DEBT ARRANGMENTS

Senior Secured Credit Facility

On May 13, 2005 we entered into a \$650,000 senior secured credit facility with a syndicate of banks consisting of:

-

a three-year \$300,000 revolver, which accrues interest at a rate of LIBOR plus a margin of 3.25%;

-

a three-year \$150,000 term loan A, which accrues interest at an annual rate equal to LIBOR plus 3.25%; and

-

a five-year \$200,000 term loan B, which accrues interest at an annual rate equal to LIBOR plus 3.50%.

Borrowers and Guarantors. One of our primary foreign holding companies, Intabex Netherlands, B.V. (Intabex), is co-borrower under the revolving credit line, and our portion of the borrowings under that line are limited to \$150,000 outstanding at any one time. Intabex is the sole borrower under each of the term loans. One of our primary foreign trading companies, Alliance One International AG (AOIAG), is a guarantor of Intabex's obligations under the new senior secured credit facility. Such obligations are also guaranteed by us and all of our present or future material direct or indirect domestic subsidiaries.

Collateral. Our borrowings under the senior secured credit facility are secured by a first priority pledge of:

-

100% of the capital stock of any material domestic subsidiaries;

-

65% of the capital stock of any material first tier foreign subsidiaries, or of its domestic subsidiaries;

-

Intercompany notes evidencing loans or advances we make to subsidiaries that are not guarantors; and

-

U.S. accounts receivable and U.S. inventory owned by us or our material domestic subsidiaries (other than inventory the title of which has passed to a customer and inventory financed through customer advances).

Alliance One International, Inc. and Subsidiaries

11. REFINANCING OF DEBT ARRANGMENTS (*Continued*)

In addition, Intabex's borrowings under the senior secured credit facility are secured by a pledge of 100% of the capital stock of Intabex, AOIAG, and certain of our and Intabex's material foreign subsidiaries.

Financial Covenants. The senior secured credit facility includes certain financial covenants and requires us to maintain certain financial ratios, including:

- a minimum consolidated interest coverage ratio of 1.50 to 1.00 as of December 31, 2006, escalating to 1.55 as of March 31, then 1.70 to 1.00 beginning April 1, 2007;
- a maximum consolidated leverage ratio of 6.75 to 1.00 as of December 31, 2006, changing to 6.25 as of March 31, then 6.00 to 1.00 beginning April 1, 2007;
- a maximum consolidated total senior debt to borrowing base ratio of .900 to 1.00; and
- a maximum amount of annual capital expenditures of \$40,000.

The senior secured credit facility also contains certain restrictions on additional indebtedness, guarantees, liens and asset sales.

We continuously monitor our compliance with these covenants and we are not in default as of, or for the quarter ended, December 31, 2006. If we were in default and were unable to obtain the necessary amendments or waivers under our senior secured credit facility, the lenders under that facility have the right to accelerate the loans thereby demanding repayment in full and extinguishment of their commitment to lend. Certain defaults under the senior secured credit facility would result in a cross default under the indentures governing our senior notes and senior subordinated notes and could impair access to our seasonal operating lines of credit in local jurisdictions. A default under our senior secured credit facility would have a material adverse effect on our liquidity and financial condition.

Amendments. From time to time, we enter into various amendments and or waivers under the agreement governing our senior secured credit facility seeking specific

modification to covenants or other provisions relating to changes in the normal course of business, special one time occurrences, financial performance or other unforeseeable events. We have entered into four such amendments since May 13, 2005. Effective November 8, 2006, we entered into the third amendment to the senior secured credit facility to increase our maximum permitted uncommitted inventory from \$115,000 to \$150,000. This amendment also provides for delivery of certain modified internal monthly financial information within 45 days (rather than 15 days) after the end of each month. See Note 17 Subsequent Event Amendment 4 to Senior Secured Credit Facility in the Notes to Condensed Consolidated Financial Statements for further information.

Senior Notes

Also, on May 13, 2005, we issued \$315,000 of 11% senior notes due 2012. The indenture governing the senior notes contain certain covenants that, among other things, limit our ability to incur additional indebtedness; issue preferred stock; merge, consolidate or dispose of substantially all of our assets; grant liens on our assets; pay dividends, redeem stock or make other distributions or restricted payments; repurchase or redeem capital stock or prepay subordinated debt; make certain investments; agree to restrictions on the payment of dividends to us by our subsidiaries; sell or otherwise dispose of assets, including equity interests of its subsidiaries; enter into transactions with our affiliates; and enter into certain sale and leaseback transactions.

Senior Subordinated Notes

Also, on May 13, 2005, we issued \$100,000 of 12 3/4% senior subordinated notes due 2012 at a 10% original issue discount to reflect a 15% yield to maturity. The indenture governing the senior subordinated notes contains covenants substantially identical to those contained in the indenture governing the senior notes.

12.

DERIVATIVE FINANCIAL INSTRUMENTS

Floating to Fixed Rate Interest Swaps

Prior to the implementation of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, the Company entered into multiple interest rate swaps to convert a portion of its worldwide debt portfolio from floating to fixed interest rates to reduce its exposure to interest rate

volatility. As of June 30, 2006, all instruments of this type had been terminated. SFAS No. 133 eliminated hedge accounting treatment for these instruments because they do not meet certain criteria. Accordingly, the Company is required to reflect the full amount of all changes in their fair value, without offset, in its current earnings. These fair value adjustments historically have caused substantial volatility in the Company's reported earnings. For the three months ended December 31, 2006 and 2005, the Company recognized non-cash income before income taxes of \$0 and \$1,239, respectively from the change in fair value of these derivative financial instruments. For the nine months ended December 31, 2006 and 2005, the Company recognized non-cash income before income taxes of \$290 and \$4,023, respectively from the change in fair value of these derivative financial instruments. With the recognition of each income or expense relating to these instruments, a corresponding amount is recognized in Deferred Credits Pension, Postretirement and Other.

-26-

Alliance One International, Inc. and Subsidiaries

12. DERIVATIVE FINANCIAL INSTRUMENTS *(Continued)*

Forward Currency Contracts

The Company periodically enters into forward currency contracts to protect against volatility associated with certain non-U.S. dollar denominated forecasted transactions. In accordance with SFAS No. 133, when these derivatives qualify for hedge accounting treatment, they are accounted for as cash flow hedges and are recorded in other comprehensive income, net of deferred taxes.

The Company has entered into forward currency contracts to hedge cash outflows in foreign currencies around the world for green tobacco purchases and processing costs. Some of these contracts do not meet the requirements for hedge accounting treatment under SFAS No. 133, and as such, are reported in income. For the three months ended December 31, 2006 and 2005, income of \$1,628 and \$0, respectively, has been recorded in cost of goods and services sold. For the nine months ended December 31, 2006 and 2005, income of \$6,124 and \$0 respectively, has been recorded in cost of goods and services sold.

Fair Value of Derivative Financial Instruments

In accordance with SFAS No. 133, the Company recognizes all derivative financial instruments, such as interest rate swap contracts and foreign exchange contracts, at fair value regardless of the purpose or intent for holding the instrument.

Changes in the fair value of derivative financial instruments are either recognized periodically in income or in stockholders' equity as a component of comprehensive income depending on whether the derivative financial instrument qualifies for hedge accounting, and if so, whether it qualifies as a fair value hedge or cash flow hedge. Changes in fair values of derivatives accounted for as fair value hedges are recorded in income along with the portions of the changes in the fair values of the hedged items that relate to the hedged risk(s). Changes in fair values of derivatives accounted for as cash flow hedges, to the extent they are effective as hedges, are recorded in other comprehensive income net of deferred taxes. Changes in fair values of derivatives not qualifying as hedges are reported in income.

The fair value estimates presented herein are based on quoted market prices. There were no fair value hedges during the three months or nine months ended December 31, 2006.

During the three months ended December 31, 2005, accumulated other comprehensive income decreased by \$20, net of deferred taxes of \$11 due to the reclassification into earnings, primarily as cost of goods and services sold, as transactions were fulfilled. For the nine months ended December 31, 2005, there was no change in accumulated other comprehensive income as all transactions entered into in 2005 were fulfilled.

13. **PENSION AND POSTRETIREMENT BENEFITS**

The Company has a defined benefit plan that provides retirement benefits for substantially all U.S. salaried personnel based on years of service rendered, age and compensation. The Company also maintains various other Excess Benefit and Supplemental Plans that provide additional benefits to (1) certain individuals whose compensation and the resulting benefits that would have actually been paid are limited by regulations imposed by the Internal Revenue Code and (2) certain individuals in key positions. The Company funds these plans in amounts consistent with the funding requirements of Federal Law and Regulations.

Additional non-U.S. defined benefit plans sponsored by certain subsidiaries cover certain full-time employees located in Germany, Greece, Turkey and United Kingdom.

Components of Net Periodic Benefit Cost

Net periodic pension cost for continuing operations consisted of the following:

	Three Months Ended December 31,		Nine Months Ended December 31,	
	2006	2005	2006	2005
Service cost	\$ 873	\$1,662	\$ 2,618	\$4,490
Interest expense	1,984	2,121	5,952	5,899
Expected return on plan assets	(1,630)	(1,616)	(4,890)	(4,448)
Amortization of prior service cost	491	689	1,473	1,818
Effect of settlement/curtailment costs	318	3	318	(147)
Termination Charge	-	-	-	167
Actuarial loss	148	28	445	82
Net periodic pension cost	\$ 2,184	\$2,887	\$ 5,916	\$7,861

Employer Contributions

The Company's investment objectives are to generate consistent total investment return to pay anticipated plan benefits, while minimizing long-term costs. Financial objectives underlying this policy include maintaining plan contributions at a reasonable level relative to benefits provided and assuring that unfunded obligations do not grow to a level to adversely affect the Company's financial health. During the nine months ended December 31, 2006, contributions of \$4,190 were made to pension plans for fiscal 2007. Additional contributions to pension plans of approximately \$1,122 are expected during the rest of fiscal 2007.

However, this amount is subject to change, due primarily to potential plan combinations, asset performance significantly above or below the assumed long-term rate of return on pension assets and significant changes in interest rates.

Alliance One International, Inc. and Subsidiaries

13. PENSION AND POSTRETIREMENT BENEFITS *(Continued)*Postretirement Health and Life Insurance Benefits

The Company also provides certain health and life insurance benefits to retired U.S. employees, and their eligible dependents, who meet specified age and service requirements. The Company has amended the plan effective September 1, 2005 to limit benefits paid to retirees under the age of 65 to a maximum of two thousand five hundred dollars per year. Employees joining after August 31, 2005 will not be eligible for any retiree medical benefits. As of December 31, 2006, contributions of \$639 were made to the plan for fiscal 2007.

Additional contributions of \$213 to the plan are expected during the rest of fiscal 2007. The Company retains the right, subject to existing agreements, to modify or eliminate the medical benefits.

Components of Net Periodic Benefit Cost

Net periodic benefit cost consisted of the following:

	Three Months Ended December 31,		Nine Months Ended December 31,	
	2006	2005	2006	2005
Service cost	\$ 22	\$ 124	\$ 66	\$ 410
Interest expense	132	359	396	1,143
Expected return on plan assets	-	(2)	-	(5)
Curtailment Cost	-	-	-	(472)
Amortization of prior service cost	(406)	(71)	(1,217)	(146)
Actuarial loss	87	(16)	261	(33)
Net periodic pension cost	\$(165)	\$ 394	\$(494)	\$ 897

14. INCOME TAXES

Effective tax rates were an expense of 98.5% for the nine months ended December 31, 2006 and a benefit of 16.8% for the nine months ended December 31 2005. The effective tax rates for these periods are based on the current estimate of full year results after the effect of taxes related to specific events which are recorded in the interim period in which they occur. The Company forecasts the effective tax rate for the year ended March 31, 2007 will be 1600.6% after absorption of discrete items. The significant difference from the statutory rate is primarily due to the inability to recognize the benefit of losses in

certain jurisdictions, reduction of tax rates in Turkey and the additional income tax accrual for the tax audit in Germany. The increase in the forecasted income tax rate from the quarter ended September 30, 2006 is due primarily to \$7,111 additional income tax accrued in the third quarter related to the tax audit in Germany as more fully discussed in Note 10

Contingencies to the Notes to Condensed Consolidated Financial Statements. For the nine months ended December 31, 2006, the Company recorded a specific event adjustment expense of \$5,676 bringing the effective tax rate estimate for the nine months ended December 31, 2006 from 74.0% to 98.5%. During the nine months ended December 31, 2005, adjustments of \$29,010 related to valuation allowance adjustments as a result of changes in judgment about the ability to realize certain deferred tax assets were recorded as specific events. The net effect of these adjustments on the tax provision was to decrease the effective tax rate for the nine months ended December 31, 2005 from a benefit of 39.1% to 16.8%. The Company continuously updates its estimates and forecasts of tax expense and adjusts the effective tax rate accordingly.

15. SALE OF RECEIVABLES

On September 27, 2006, Alliance One International, A.G., a wholly owned subsidiary of the Company, entered into a revolving trade accounts receivable securitization agreement to sell receivables to a limited liability company (LLC). The LLC is funded through loans from a bank-sponsored commercial paper conduit which has committed up to a maximum of \$55,000 in funding at any time. The agreement, which matures September 25, 2009, provides for the periodic, non-recourse sale of receivables from customers who are domiciled in countries that are not members of the Organization of Economic Cooperation and Development. To the extent that the balance of the receivables sold into the pool is less than \$55,000, the Company is subject to a 0.3 percent fee on the unused amount.

Pursuant to the agreement, the Company retains servicing responsibilities and subordinated interests in the receivables sold. The Company receives annual servicing fees of 0.5 percent of the outstanding balance, which approximates the fair value of services to be rendered under the agreement, and rights to future cash flows in excess of funds contractually obligated to investors. The value of the subordinated interest is subject to credit and interest rate risks on the transferred financial assets.

-28-

Alliance One International, Inc. and Subsidiaries

15. SALE OF RECEIVABLES *(Continued)*

The Company has recorded the transaction as a sale of receivables and has removed such receivables from its financial statements and has recorded a receivable for the retained interest in such receivables. In recording the sale of receivables, the Company has recognized pre-tax losses of \$788 on sales of receivables through

December 31, 2006. In addition, the Company has recorded charges of \$1,320 related to the negotiation of the agreement. As of December 31, 2006, \$24,199 receivables had been sold resulting in \$22,865 in cash proceeds and the Company retained an interest in these receivables of \$1,031.

In valuing the retained interests at the date of the sale of the receivables, the Company assumed a weighted average life of 48 days and a discount rate of 9.23% as well as an additional 0.3% on the unused balance for the same term. Theoretical increases in the discount rate by 10% and 20% would have decreased the value of retained interests by \$30 and \$61 respectively. Historically, credit loss and prepayments on the customer base included in these agreements have been negligible.

16. RESTATEMENT

Subsequent to the issuance of the Company's Quarterly Report on Form 10-Q for the quarter ended December 31, 2006 filed on February 9, 2007, the Company identified material errors in its accounting for income taxes which impact the Condensed Consolidated Statements of Operations, Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Cash Flows for the three and nine months ended December 31, 2006. As a result, the Company has restated these financial statements, correcting the income tax errors for the three and nine months ended December 31, 2006. The following is a description of the nature of the errors:

1.

deferred income tax expense was not recognized when certain assets were written off for statutory tax purposes. The net impact of this error in accounting for income taxes was to understate deferred income tax expense by \$5,653 and \$10,271 for the three and nine months ended December 31, 2006, respectively.

2.

deferred income tax benefits were not recognized as a result of the write-off of related assets for financial statement reporting purposes. The net impact of the errors in accounting for income taxes was to overstate deferred income tax expense by \$1,075 for the nine months ended December 31, 2006. There was no impact for the three months ended December 31, 2006.

3.

deferred income tax expense was not recognized on an unrealized foreign exchange gain that is taxable in a future period for statutory tax purposes. The net impact of this error in accounting for income taxes was to understate deferred income tax expense by \$1,090 for the nine months ended December 31, 2006. There was no impact for the three months ended December 31, 2006.

4.

a valuation allowance was not reversed to reflect the utilization of the related net operating losses as a result of events that occurred in the three months ended December 31, 2006. The net impact of this error in accounting for income taxes was to overstate deferred income tax expense by \$685 for the three and nine months ended December 31, 2006.

5.

other income tax related adjustments that were not material, individually and in the aggregate, are included in these restated financial statements. The net impact of these errors in accounting for income taxes was to overstate deferred income tax expense by \$331 and \$945 for the three and nine months ended December 31, 2006, respectively.

The impact of the restatement on the applicable line items in the financial statements of the Company are presented below:

<u>Condensed Consolidated Statements of Operation Information Three and Nine Months Ended December 31, 2006:</u>	As Previously Reported		As Restated

17. SUBSEQUENT EVENTS

Amendment 4 To Senior Secured Credit Facility

Effective January 16, 2007, the Company and the Lenders entered into a Fourth Amendment to the Senior Secured Credit Agreement to allow certain asset sales. The original credit agreement prohibited sales of assets (or agreements to sell assets) in excess of \$15,000 in any fiscal year. The fourth amendment waives

the occurrence of asset sales or agreements to engage in asset sales, in excess of such \$15,000 limit for the fiscal year ending March 31, 2007, and in future fiscal years allows for the sale of certain selected assets up to \$90,000 in the aggregate provided the proceeds from such sales are used to prepay outstanding term loans under the senior secured credit facility. This amendment also allows certain guarantees in the ordinary course of business relative to the Company's consolidated cash management and credit card agreements.

Agreement With Government Of Rio Grande Do Sul

Effective January 1, 2005, the government of Rio Grande do Sul, the state in which the Company's subsidiaries operate in Brazil, adopted changes in their Imposto Sobre Circulacao de Mercadorias e Servicos (ICMS), a tax on the transfer of goods and services between states within Brazil. Prior to this change, the Company's transfers of leaf tobacco and processed tobacco inventory between states in Brazil was taxed, but these transfers generated tax credits that were used to offset ICMS tax obligations or were transferred to third parties. Pursuant to the change, the credits generated from the payment of ICMS taxes could not be used to reduce the overall tax exposure by third parties by more than 10% of the generating company's tax liability in any tax year, severely reducing the ability to sell excess tax credits to others. In conjunction with this change, the Company recorded a reserve against the \$25,090 of ICMS credits recorded as a receivable as of March 31, 2005. This reserve remained as the Company entered into negotiations with the government of Rio Grande do Sul.

Effective on May 23, 2006, the Company entered into an agreement with the government of Rio Grande do Sul which provided for the sale of a certain amount of ICMS credits each month through 2011. Based on the Company's evaluation of the agreement and the ability to sell ICMS credits to third parties each month, the reserve was reversed during the quarter ended June 30, 2006 as it related to inventory that had already been sold.

On January 1, 2007, a new government took office in the state of Rio Grande do Sul. The government requested a review of the terms to the agreement entered into in May 23, 2006. The Company and the government are currently discussing the terms related to the ICMS credits that the government will allow to be sold to third parties on a monthly basis. The Company has evaluated the expected changes to the terms and the ultimate collectibility of the ICMS credits recorded as an asset and determined that no reserve is necessary at this time. This evaluation included the financial viability of the state of Rio Grande do Sul, the federal government and the assurances received from the new government of Rio Grande do Sul that they will honor the existing agreement.

Alliance One International, Inc. and Subsidiaries

**Item 2. Management's Discussion and Analysis of
Financial Condition and Results of Operations.**

EXECUTIVE OVERVIEW

The following executive overview is intended to provide significant highlights of the discussion and analysis that follows. The accompanying management's discussion and analysis of financial condition and results of operations gives effect to the restatement of the Company's unaudited condensed consolidated statements for the three months and nine months ended December 31, 2006 as discussed in Note 16 to the Company's condensed consolidated financial statements in Item 1.

Results of operations

The current quarter results met our expectations, though the mix of business has changed. Increased margins in the United States were offset somewhat by significant delays in ship loading at the Southern Africa port of Beira, Mozambique. The port suffers from infrastructure issues, including: extreme terminal congestion arising from significant increases in designated volumes, lack of appropriate storage capacity, logistical issues, breakdown in both port cranes and required continual dredging. The scale of the problems indicates that this issue will not be solved quickly. We presently have more than 5.0 million kilos of African tobacco in transit awaiting loading at Beira. Other ports from which we can ship African tobaccos would be more costly. We have noted that our operating cycle provides for the dominant generation of margin in our first and second quarters, and we are seeing that pattern continue as expected. While increases in gross margin were eroded by the strength of local currencies against the U.S. dollar, primarily the Euro, in addition to the delays in loading of shipments from Beira, we continue to outpace the prior year results for the comparable period. Selling, administrative and general expenses remain in line with a normalized run rate for the current quarter and year to date. We had moderate additional restructuring charges in the third quarter as we continue to refine our operational footprint. In December 2006, an adverse ruling was rendered by the German tax court related to the sale of Florimex in fiscal 1999, and we have reflected an additional charge of \$7.1 million in additional taxes. Overall, our year to date results continue to demonstrate successful execution of our strategy.

Liquidity

We have obtained lender approvals to sell non-core assets and use the proceeds from such sales to further deleverage the balance sheet and reduce interest costs. Following quarter end, we made additional term loan A and B prepayments totaling \$30.5 million as a result of non-core asset sales. We maintain appropriate levels of liquidity throughout the year utilizing long term commitments augmented by various international banking relationships for our continued seasonal credit needs. Aggressive integrated global working capital management is stressed and resulted in an undrawn revolving credit facility at December 31, 2006.

Outlook

Global demand for our products remains solid and we are well positioned where growth is occurring. We continue to challenge all of our operations to achieve appropriate return targets and to effect actions which will positively improve future performance. The strategy behind our merger and the creation of Alliance One is simple, and has not changed: We are seeking to create the profile of a strategic leaf supply partner with the footprint and scale necessary to drive efficiency, sustainability and long-term shareholder value in what remains an intensely competitive global industry. Our focus in fiscal 2007 has been on profit improvement and debt reduction, and we have shown notable success in both areas. We remain totally committed to our customer-focused strategy, and we are confident that this strategy, with our merger as its cornerstone, will position us to enhance our already strong customer relationships and allow us to grow with our customers. As such, we will continue to focus our attention and resources on those origins that are growing in market importance, on delivering outstanding customer service, exercising expense discipline, and above all, delivering the full benefits of the merger.

LIQUIDITY AND CAPITAL RESOURCES:

Overview

Purchasing, processing and selling activities of our business are seasonal. Our need for capital fluctuates and, at any one of several seasonal peaks, our outstanding indebtedness may be significantly greater or less than at year-end. Historically we have needed capital in excess of cash flow from operations to finance accounts receivable, inventory and advances to farmers for pre-financing tobacco crops in foreign countries, including Argentina, Brazil, Guatemala, Malawi, Tanzania, Turkey and Zambia.

Seasonal liquidity beyond cash flow from operations is provided by our revolving credit facility, seasonal working capital lines throughout the world, advances from customers and sale of accounts receivable from non-OECD countries. As of December 31, 2006, we are near our low point in seasonally adjusted working capital borrowing. Borrowings related to South America are approaching full repayment as tobacco from the most recent crop has largely been sold. Africa and Europe are in the middle of their selling seasons and are utilizing working capital funding. North America is maximizing its working capital funding as it continues buying, processing and selling its current crop.

Alliance One International, Inc. and Subsidiaries

LIQUIDITY AND CAPITAL RESOURCES: *(Continued)*

Working Capital

Our working capital decreased from \$538.9 million at March 31, 2006 to \$472.2 million at December 31, 2006. Our current ratio was 1.8 to 1 at December 31, 2006 compared to 1.6 to 1 at March 31, 2006. The decrease in working capital is primarily related to decreases in accounts receivable and inventories and advances on purchases of tobacco partially offset by decreases in notes payable and advances from customers.

The following table is a summary of items from the Condensed Consolidated Balance Sheet and Condensed Consolidated Statements of Cash Flows.

		As of	
	2006	December 31, 2005	March 31, 2006
<i>(in millions except for current ratio)</i>			
Cash and cash equivalents	\$ 25.8	\$ 49.1	\$ 26.0
Net trade receivables	230.7	248.5	320.9
Inventories and advances on purchases of tobacco	668.6	847.9	875.3
Total current assets	1,055.2	1,280.4	1,368.2
Notes payable to banks	189.0	266.0	299.9
Accounts payable	85.2	77.9	175.9
Total current liabilities	583.0	630.7	829.3
Current ratio	1.8 to 1	2.0 to 1	1.6 to 1
Working capital	472.2	649.7	538.9
Total long term debt	629.9	813.6	744.5
Stockholders equity	213.5	534.6	214.2

Operating Cash Flows

Net cash provided by operating activities was \$142.0 million in 2006 compared to \$75.2 million in 2005. The increase in cash provided was primarily due to a \$15.4 million net loss in 2006 compared to \$124.1 million in 2005.

Cash provided was further increased by a \$119.3 million change in accounts receivable and inventories and advances on purchases of tobacco, including the sale of receivables as disclosed in Note 15 Sale of Receivables to the Notes to Condensed Consolidated Financial Statements, a \$53.0 million change in deferred items, a \$13.2 million change in other operating assets and liabilities and a \$8.0 million net increase in income taxes payable. The increase in cash provided was reduced by a \$232.8 million decrease in accounts payable and advances from customers and a \$1.9 million change in operating activities of discontinued operations.

Investing Cash Flows

Net cash provided by investing activities was \$23.5 million in 2006 compared to \$46.6 million in 2005. The decrease in cash provided by investing activities was primarily due to \$42.0 million of cash received in the prior year as a result of the purchase and merger of Standard Commercial Corporation into Alliance One. Additional decreases in cash provided were due to \$5.2 million cash distributed with the sale of the Spanish operations, \$10.6 million less cash provided by other assets partially offset by \$10.0 million received as return of capital on cost method investments, \$9.3 million less cash used for the purchase of property, \$2.2 million less cash used for cost method investments, \$6.3 million cash provided by Brazilian tax deposits and a \$5.9 million increase in notes receivable.

Financing Cash Flows

Net cash used by financing activities was \$165.9 million in 2006 compared to \$94.8 million in 2005. Decreases of \$363.7 million were due to net decreases in proceeds from long term borrowings resulting from new arrangements in the prior year, partially offset by the repayment of former long term debt in the prior year. The decrease from long term borrowings was partially offset by \$259.1 million less cash used by short term borrowings in 2006, \$23.6 million less cash used for debt issuance costs in 2006 compared to 2005 and the discontinuance of dividends to shareholders of \$9.9 million.

Debt Financing

We have historically financed our operations through a combination of short-term lines of credit, revolving credit arrangements, long-term debt securities, customer advances and cash from operations. In addition, we received \$22.9 million as of December 31, 2006 from the sale of receivables which was used to reduce debt. See Note 15 *Sale of Receivables* to the *Notes to Condensed Consolidated Financial Statements* for further information. At December 31, 2006, we had no material capital expenditure commitments. We believe that these sources of funds will be sufficient to fund our anticipated needs for fiscal year 2007. No cash dividends were paid to stockholders during the nine months ended December 31, 2006.

- (4) Maturities do not reflect the additional paydowns on term loan A and term loan B made after the end of the quarter.
- (5) Debt classification is based on a next twelve months basis and does not reflect the additional paydowns on term loan A and term loan B made after the end of the quarter.

The following summarizes the material terms of each significant component of our debt financing.

Senior Secured Credit Facility

On May 13, 2005 we entered into a \$650 million senior secured credit facility with a syndicate of banks consisting of:

- a three-year \$300 million revolver, which accrues interest at a rate of LIBOR plus a margin of 3.25%;
- a three-year \$150 million term loan A, which accrues interest at an annual rate equal to LIBOR plus 3.25%; and
- a five-year \$200 million term loan B, which accrues interest at an annual rate equal to LIBOR plus 3.50%.

-33-

Alliance One International, Inc. and Subsidiaries

LIQUIDITY AND CAPITAL RESOURCES: (Continued)

Senior Secured Credit Facility (Continued)

Borrowers and Guarantors. One of our primary foreign holding companies, Intabex Netherlands, B.V. (Intabex), is co-borrower under the revolving credit line, and our portion of the borrowings under that line are limited to \$150 million outstanding at any one time. Intabex is the sole borrower under each of the term loans. One of our primary foreign trading companies, Alliance One International AG (AOIAG), is a guarantor of Intabex's obligations under the new senior secured credit facility. Such obligations are also guaranteed by us and all of our present or future material direct or indirect domestic subsidiaries.

Collateral. Our borrowings under the senior secured credit facility are secured by a first priority pledge of:

- 100% of the capital stock of any material domestic subsidiaries;
- 65% of the capital stock of any material first tier foreign subsidiaries, or of its domestic subsidiaries;
- Intercompany notes evidencing loans or advances we make to subsidiaries that are not guarantors; and
- U.S. accounts receivable and U.S. inventory owned by us or our material domestic subsidiaries (other than inventory the title of which has passed to a customer and inventory financed through customer advances).

In addition, Intabex's borrowings under the senior secured credit facility are secured by a pledge of 100% of the capital stock of Intabex, AOIAG, and certain of our and Intabex's material foreign subsidiaries.

Financial Covenants. The senior secured credit facility includes certain financial covenants and requires us to maintain certain financial ratios, including:

- a minimum consolidated interest coverage ratio of 1.50 to 1.00 as of December 31, 2006, escalating to 1.55 as of March 31, then 1.70 to 1.00 beginning April 1, 2007;
- a maximum consolidated leverage ratio of 6.75 to 1.00 as of December 31, 2006, changing to 6.25 as of March 31, then 6.00 to 1.00 beginning April 1, 2007;
- a maximum consolidated total senior debt to borrowing base ratio of .900 to 1.00; and
- a maximum amount of annual capital expenditures of \$40 million.

The senior secured credit facility also contains certain restrictions on additional indebtedness, guarantees, liens and asset sales.

We continuously monitor our compliance with these covenants and we are not in default as of, or for the quarter ended, December 31, 2006. If we were in default and were unable to obtain the necessary amendments or waivers under our senior secured credit facility, the lenders under that facility have the right to accelerate the loans thereby demanding repayment in full and extinguishment of their commitment to lend. Certain defaults under the senior secured credit facility would result in a cross default under the indentures governing our senior notes and senior subordinated notes and could impair access to our seasonal operating lines of credit in local jurisdictions. A default under our senior secured credit facility would have a material adverse effect on our liquidity and financial condition.

Amendments. From time to time, we enter into various amendments and or waivers under the agreement governing our senior secured credit facility seeking specific modification to covenants or other provisions relating to changes in the normal course of business, special one time occurrences, financial performance or other unforeseeable events.

We have entered into four such amendments since May 13, 2005. Effective November 8, 2006, we entered into the third amendment to the senior secured credit facility to increase our maximum permitted uncommitted inventory from \$115 million to \$150 million. This amendment also provides for delivery of certain modified internal monthly financial information within 45 days (rather than 15 days) after the end of each month. Effective January 16, 2007, we entered into a Fourth Amendment to the senior secured credit facility to allow certain asset sales. The original credit agreement prohibited sales of assets (or agreements to sell assets) in excess of \$15 million in any fiscal year.

The fourth amendment waives the occurrence of asset sales or agreements to engage in asset sales, in excess of such \$15 million limit for the fiscal year ending March 31, 2007, and in future fiscal years allows for the sale of certain selected assets up to \$90 million in the aggregate provided the proceeds from such sales are used to prepay outstanding term loans under the senior secured credit facility. This amendment also allows certain guarantees in the ordinary course of business relative to our consolidated cash management and credit card agreements.

-34-

Alliance One International, Inc. and Subsidiaries

LIQUIDITY AND CAPITAL RESOURCES: (Continued)

Senior Notes

Also, on May 13, 2005, we issued \$315 million of 11% senior notes due 2012. The indenture governing the senior notes contain certain covenants that, among other things, limit our ability to incur additional indebtedness; issue preferred stock; merge, consolidate or dispose of substantially all of our assets; grant liens on our assets; pay dividends, redeem stock or make other distributions or restricted payments; repurchase or redeem capital stock or prepay subordinated debt; make certain investments; agree to restrictions on the payment of dividends to us by our subsidiaries; sell or otherwise dispose of assets, including equity interests of its subsidiaries; enter into transactions with our affiliates; and enter into certain sale and leaseback transactions.

Senior Subordinated Notes

Also, on May 13, 2005, we issued \$100 million of 12 3/4% senior subordinated notes due 2012 at a 10% original issue discount to reflect a 15% yield to maturity. The indenture governing the senior subordinated notes contains covenants substantially identical to those contained in the indenture governing the senior notes.

Foreign Seasonal Lines of Credit

We have typically financed our non-U.S. operations with uncommitted unsecured short term seasonal lines of credit at the local level. These operating lines are seasonal in nature, normally extending for a term of 180 to 270 days corresponding to the tobacco crop cycle in that location. These facilities are typically uncommitted in that the lenders have the right to cease making loans and demand repayment of loans at any time. These loans are typically renewed at the outset of each tobacco season. As of December 31, 2006, we had approximately \$189.0 million drawn and outstanding on foreign seasonal lines totaling \$419.6 million. Additionally against these lines there was \$8.0 million available in unused letter of credit capacity with \$18.0 million issued but unfunded.

operating revenues

Three Months Ended December 31, 2006 Compared to Three Months Ended December 31, 2005

Sales and other operating revenues. The decrease of 10.9% from \$515.1 million in 2005 to \$458.8 million in 2006 is the result of a 16.2% or 25.7 million kilo decrease in quantities sold, offset by a 3.9% or \$0.12 per kilo increase in average sales prices and a 22.7% or \$6.6 million increase in processing and other revenues.

South America region. Revenues decreased \$64.1 million, reflecting a 17.8 million kilo decrease in quantities sold versus the prior year third quarter, which resulted from a decrease in demand relative to the higher prices and the lower quality 2006 crop. Also impacting South America revenues was a \$0.50 per kilo decrease in average sales prices, attributable primarily to the change in product mix sold in the current quarter versus the prior year third quarter.

Other regions. Revenues increased \$1.2 million due to a \$0.26 per kilo increase in average sales prices, partially offset by a 7.9 million kilo decrease in quantities sold. The increase in revenues reflected the increase in average sales prices resulting from the product mix in African origin sales combined with increases in U.S. average sales prices, offset by decreased average sales prices in Europe. The decrease in volume reflected the significant delay in Africa origin shipments from the Southern Africa port in Beira, Mozambique. The magnitude of the issues in Beira will potentially impact our ability to ship tobacco in the next quarter. The decrease in volume also reflected earlier shipments from Asia into prior quarters, and the exit from certain European markets. Partially offsetting the decrease in volume in the current quarter was the impact of the timing of shipments in the United States. Other region processing and other revenues increased \$6.6 million primarily related to greater quantities of U.S. customer-owned tobacco processed.

Gross profit as a percentage of sales. The \$9.4 million increase in gross profit, or 18.3%, from \$51.3 million in 2005 to \$60.7 million in 2006, as well as the increase in gross profit percentage from 10.0% in 2005 to 13.2% in 2006 is primarily attributable to the Other Regions operating segment.

In the Other Regions operating segment, U.S. gross profit increased as a result of processing greater quantities of customer-owned tobacco as well as the impact in the current quarter of shipments that had been delayed in the prior year quarter. In addition, U.S. gross profit increased due to lower processing costs as a result of the increase in volume. As a result of the deconsolidation of Zimbabwe period costs from Zimbabwe were excluded which increased gross profit in 2006 compared to 2005. Increases in the Other Regions overall gross margins were eroded by the strength of local currencies against the U.S. dollar, primarily the Euro. In the South America operating segment, gross profit was relatively constant in comparison with the prior year quarter.

In addition, purchase accounting adjustments on gross profit on sales of inventory acquired in the merger were reduced by \$4.4 million in 2005 compared to zero in 2006, primarily in the Other Regions operating segment. The absence of such adjustments in the current year will continue to improve gross profit as well as gross profit percentages in the fourth quarter.

Alliance One International, Inc. and Subsidiaries

RESULTS OF OPERATIONS: *(Continued)*

Three Months Ended December 31, 2006 Compared to Three Months Ended December 31, 2005 *(Continued)*

Selling, administrative and general expenses decreased \$1.4 million or 3.5% from \$40.1 million in 2005 to \$38.7 million in 2006. The decrease is primarily due to lower compensation costs and travel expenses as a result of merger and integration related reductions and the deconsolidation of Zimbabwe partially offset by increases in insurance expense.

Other Income of \$1.5 million in 2006 and \$0.4 million in 2005 relates primarily to fixed asset sales.

Restructuring and asset impairment charges were \$5.5 million in 2006 compared to \$13.4 million in 2005. The 2006 costs relate to additional employee severance and other integration related charges of \$4.5 million, primarily in Turkey as a result of the merger integration. The remaining \$1.0 million in 2006 relates to additional asset impairment charges on assets held for sale, primarily in the United States. The 2005 costs relate to asset impairment charges of \$8.9 million, primarily related to the potential sale of the dark air-cured operations and \$4.5 million for employee severance and other integration related charges as a result of the merger. See Notes 2 Merger of Standard and DIMON and 3 Restructuring and Asset Impairment Charges to the Notes to Condensed Consolidated Financial Statements for further information.

Interest expense decreased \$1.7 million from \$28.2 million in 2005 to \$26.5 million in 2006 primarily due to lower average borrowings partially offset by higher average rates.

Derivative financial instruments resulted in a benefit of \$1.2 million in 2005. These items are derived from changes in the fair value of non-qualifying interest rate swap agreements.

Effective tax rates were an expense of 142.1% in 2006 and a benefit of 7.1% in 2005. The effective tax rates for these periods are based on the current estimate of full year results after the effect of taxes related to specific events which are recorded in the interim period in which they occur. The Company forecasts the tax rate for the year ended March 31, 2007 will be 1600.6% after absorption of discrete items. The significant difference from the statutory rate is primarily due to the inability to recognize the benefit of losses in certain jurisdictions, reduction of tax rates in Turkey and the additional income tax accrual for the tax audit in Germany. The increase in the forecasted income tax rate from the quarter ended September 30, 2006 is due primarily to \$7.1 million additional income tax accrued in the third quarter related to the tax audit in Germany. For the quarter ended December 31, 2006, adjustments of \$6.2 million primarily related to the tax audit in Germany were recorded as specific events. The net effects of these adjustments on the tax provision was to increase the effective tax rate for the quarter ended December 31, 2006 from an expense of 53.3% to 142.1%. During the quarter ended December 31, 2005, adjustments of \$9.6 million related to valuation allowance adjustments as a result of changes in judgment about the ability to realize certain deferred tax

assets were recorded as specific events. The net effect of these adjustments on the tax provision was to decrease the effective tax rate for the quarter ended December 31, 2005 from a benefit of 45.2% to 7.1%.

Losses from discontinued operations were \$10.9 million in 2006 and income of \$0.7 million in 2005. The decrease of \$11.6 million is primarily due to current quarter charges of \$9.3 million related to finalizing our exit from the Italian market and a \$1.1 million fair value adjustment to inventory in Mozambique. See Note 5 *Discontinued Operations* to the *Notes to Condensed Consolidated Financial Statements* for further information.

Nine Months Ended December 31, 2006 Compared to Nine Months Ended December 31, 2005

Sales and other operating revenues. The increase of 0.9% from \$1,531.4 million in 2005 to \$1,545.9 million in 2006 is the result of a 26.9% or \$10.0 million increase in processing and other revenues and a 7.9% or \$0.24 per kilo increase in average sales prices, offset by a 7.0% or 34.3 million kilo decrease in quantities sold.

South America region. Revenues decreased \$21.9 million, reflecting a 27.2 million kilo decrease in quantities sold versus the prior year primarily related to the timing of prior year shipments that had been delayed and a decrease in demand primarily resulting from the quality of the 2006 crop. This was offset by a \$0.32 per kilo increase in average sales prices, attributable primarily to the increased costs of the 2006 crop.

RESULTS OF OPERATIONS: (Continued)

Nine Months Ended December 31, 2006 Compared to Nine Months Ended December 31, 2005 (Continued)

Other regions. Revenues increased \$26.4 million due to a \$0.18 per kilo increase in average sales prices, partially offset by a 7.1 million kilo decrease in quantities sold. The increase in revenues reflected the increase in average sales prices resulting from the product mix in Asian origin sales combined with increases in U.S. average sales prices, offset by decreased average sales prices in Europe. The decrease in volume reflected the significant delay in shipping Africa origin tobaccos from the Southern Africa port in Beira, Mozambique. The magnitude of the issues in Beira will continue to potentially impact our ability to ship tobacco in the next quarter. The decrease in volume also reflected diminished prior year low margin sales from Thailand and China, and the exit from certain European markets. Partially offsetting the decrease in volume in the current year was the U.S. opportunistic sale resulting in revenues of \$45.3 million as well as the impact of U.S. shipments that had been delayed in the prior year. Other region processing and other revenues increased \$10.0 million primarily related to greater quantities of U.S. customer-owned tobacco processed

Gross profit as a percentage of sales. The \$79.9 million increase in gross profit, or 49.3%, from \$162.2 million in 2005 to \$242.1 million in 2006, as well as the increase in gross profit percentage from 10.6% in 2005 to 15.7% in 2006 is primarily attributable to two factors:

First, gross profit in the South American region increased approximately \$60.0 million. As previously disclosed, gross profit in Brazil was impacted by the poor quality of the 2005 crop, the strength of the local currency against the U.S. dollar on prices paid to growers and related processing costs, and increased costs from the absorption of local intrastate trade taxes from a change in local laws. In the first quarter we entered into an agreement with the government of Rio Grande do Sul allowing us to transfer accumulated intrastate trade tax credits related to the 2005 crop. As a result, intrastate trade taxes related to the 2005 crop of \$19.2 million previously recorded as expense in fiscal 2006 have been reversed during the current year. The impact of this agreement in the current year coupled with 2006 crop sales price increases resulted in an increase in gross profit. On January 1, 2007, a new government took office in the State of Rio Grande do Sul. The new government has requested a review of the terms of the agreement and discussions have begun. See Note 17 *Subsequent Events* to the *Notes to Condensed Consolidated Financial Statements* for further information. Offsetting the increase in gross profit in the South American region is the quality of the 2006 crop and decreased demand. While the 2006 Brazilian crop had been expected to be of average quality, weather related growing conditions in the latter part of the season significantly impacted quality and demand declined. As a result, we increased the provision for grower bad debt, impacting the current year gross profit by \$7.2 million compared to the prior year, as well as future quarters relative to 2006 crop sales.

Second, purchase accounting adjustments on gross profit on sales of inventory acquired in the merger were reduced by \$16.0 million from \$17.4 million in 2005 compared to \$1.4 million in 2006, primarily in the Other Regions operating segment. The absence of such adjustments in the current year will continue to improve gross profit as well as gross profit percentages in the fourth quarter.

Selling, administrative and general expenses decreased \$5.1 million or 4.1% from \$124.0 million in 2005 to \$118.9 million in 2006. As a percent of sales, selling, administrative and general expenses decreased from 8.1% in 2005 to 7.7% in 2006. The decrease is primarily due to lower compensation costs combined with a significant reduction in travel expenses as a result of merger and integration related reductions and the deconsolidation of Zimbabwe.

Other Income of \$5.0 million in 2006 is primarily related to the final collection of pre-1991 Gulf War Iraqi receivables written off in prior years by former DIMON and former Standard and fixed asset sales. The \$0.9 million in 2005 primarily relates to fixed asset sales.

Restructuring, asset impairment and integration charges were \$28.1 million in 2006 compared to \$30.3 million in 2005. The 2006 costs relate to additional impairment charges of \$13.2 million to write down our Zimbabwe cost method investment to zero. Other asset impairment charges of \$5.5 million related to assets in the United States, Thailand and Greece, primarily machinery and equipment. Asset impairment charges of \$13.9 million in 2005 relate primarily to the potential sale of the dark air-cured operations including intangibles of the Indonesian dark air-cured operation. The remaining \$9.4 million of 2006 costs and the \$16.4 million of 2005 costs relate primarily to employee severance and other integration related charges as a result of the merger. See Notes 2 *Merger of Standard and DIMON* and 3 *Restructuring and Asset Impairment Charges* to the *Notes to Condensed Consolidated Financial Statements* for further information.

Alliance One International, Inc. and Subsidiaries

RESULTS OF OPERATIONS: *(Continued)*

Nine Months Ended December 31, 2006 Compared to Nine Months Ended December 31, 2005 *(Continued)*

Debt retirement expense of \$66.5 million in 2005 relates to one time costs of retiring DIMON debt as a result of the merger. These costs include tender premiums paid for the redemption of senior notes and convertible subordinated debentures, the expense recognition of debt issuance costs associated with former DIMON debt instruments, termination of certain interest rate swap agreements and other related costs.

Interest expense decreased \$2.0 million from \$83.7 million in 2005 to \$81.7 million in 2006 due to lower average borrowings offset by higher average rates.

Interest income decreased \$3.1 million from \$7.5 million in 2005 to \$4.4 million in 2006 primarily due to the deconsolidation of Zimbabwe.

Derivative financial instruments resulted in a benefit of \$0.3 million in 2006 and \$4.0 million in 2005. These items are derived from changes in the fair value of non-qualifying interest rate swap agreements.

Effective tax rates were an expense of 98.5% in 2006 and a benefit of 16.8% in 2005. The effective tax rates for these periods are based on the current estimate of full year results after the effect of taxes related to specific events which are recorded in the interim period in which they occur. The Company forecasts the tax rate for the year ended March 31, 2007 will be 1600.6% after absorption of discrete items. The significant difference from the statutory rate is primarily due to the inability to recognize the benefit of losses in certain jurisdictions, reduction of tax rates in Turkey and the additional income tax accrual for the tax audit in Germany. The increase in the forecasted income tax rate from the quarter ended September 30, 2006 is due primarily to \$7.1 million additional taxes accrued in the third quarter related to the tax audit in Germany. For the nine months ended December 31, 2006, we recorded a specific event adjustment expense of \$5,676 bringing the effective tax rate estimate for the nine months ended December 31, 2006 from 74.0% to 98.5%. During the nine months ended December 31, 2005, adjustments of \$29.0 million related to valuation allowance adjustments as a result of changes in judgment about the ability to realize certain deferred tax assets were recorded as specific events. The net effect of these adjustments on the tax provision was to decrease the effective tax rate for the nine months ended December 31, 2005 from a benefit of 39.1% to 16.8%. The Company continuously updates its estimates and forecasts of tax expense and adjusts the effective tax rate accordingly.

Losses from discontinued operations were \$15.6 million in 2006 and \$16.2 million in 2005. The decrease of \$0.6 million is due to a \$12.0 million assessment in 2005 related to an administrative investigation into tobacco buying and selling practices within the leaf tobacco industry in Italy by the Directorate General for Competition. Substantially offsetting this decrease is \$9.3 million in charges in 2006 related to finalizing our exit from the Italian market, a \$1.1 million fair value adjustment to inventory in Mozambique and \$1.0 million from the discontinuation of our non-tobacco, Italian and Mozambique operations as well as the wool operations of Standard. See Note 5 Discontinued Operations to the Notes to Condensed Consolidated Financial Statements for further information.

FACTORS THAT MAY AFFECT FUTURE RESULTS:

Readers are cautioned that the statements contained herein regarding expectations for our performance are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These statements are based on current expectations of future events. If underlying assumptions prove inaccurate or unknown risks or uncertainties materialize, actual results could vary materially from our expectations and projections. Risks and uncertainties include changes in the timing of anticipated shipments, changes in anticipated geographic product sourcing, political instability in sourcing locations, currency and interest rate fluctuations, shifts in the global supply and demand position for our tobacco products, and the impact of regulation and litigation on our customers. A further list and description of these risks, uncertainties and other factors can be found in our Annual Report on Form 10-K for the fiscal year ended March 31, 2006 and other filings with the Securities and Exchange Commission. We assume no obligation to update any forward-looking statements as a result of new information or future events or developments, except as required by law.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Derivatives policies: Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps or forwards, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific debt instrument, contract, or invoice determines the amount, maturity, and other specifics of the hedge. See Note 12 Derivative Financial Instruments to the Notes to Condensed Consolidated Financial Statements for further information.

Foreign exchange rates: Our business is generally conducted in U.S. dollars, as is the business of the tobacco industry as a whole. However, local country operating costs, including the purchasing and processing costs for tobaccos, are subject to the effects of exchange fluctuations of the local currency against the U.S. dollar. We attempt to minimize such currency risks by matching the timing of our working capital borrowing needs against the tobacco purchasing and processing funds requirements in the currency of the country where the tobacco is grown. Also, in some cases, our sales pricing arrangements with our customers allow adjustments for the effect of currency exchange fluctuations on local purchasing and processing costs. Fluctuations in the value of foreign currencies can significantly affect our operating results. We have recognized exchange losses in our statements of income of \$4.9 million and \$0.7 million for the three months ended December 31, 2006 and 2005, respectively. For the nine months ended December 31, 2006 and 2005, we have recognized an exchange loss of \$5.0 million and an exchange gain of \$3.4 million, respectively in our statements of income.

Our consolidated selling, administrative and general expenses denominated in foreign currencies are subject to translation risks from currency exchange fluctuations. These foreign denominated expenses are primarily

denominated in the euro, sterling and Brazilian real. The weakening U.S. dollar against the real may continue to significantly impact translated results.

Interest rates: We manage our exposure to interest rate risk through the proportion of fixed rate and variable rate debt in our total debt portfolio. A 1% change in interest rates would increase or decrease our reported interest cost by approximately \$2.5 million and \$8.0 million for the three months and nine months ended December 31, 2006, respectively. A substantial portion of our borrowings are denominated in U.S. dollars and bear interest at commonly quoted rates.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer, Chief Operating Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In conjunction with the filing of this amended Form 10-Q, as a result of the restatement described in Note 16 to the Condensed Consolidated Financial Statements, our Chief Executive Officer, Chief Operating Officer and Chief Financial Officer, with the participation of other members of management, have re-evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of December 31, 2006, and, based on this re-evaluation, have determined that disclosure controls and procedures were not effective due to a material weakness in internal control over financial reporting that existed at the end of the fourth quarter with respect to accounting for income taxes.

Accounting for Income Taxes

Subsequent to the completion of the Quarterly Report on Form 10-Q for the quarter ended December 31, 2006 filed on February 8, 2007 the Company identified material errors in its accounting for income taxes which impact the financial statements in its December 31, 2006 Quarterly Report on Form 10-Q. The details of the restatement are more fully described in Note 16 in the Notes to Condensed Consolidated Financial Statements. The Company believes this error resulted from insufficient review of tax workpapers by management on an interim basis. Management has concluded that these control deficiencies in accounting for income taxes constitute a material weakness in the Company's internal controls over financial reporting as defined by the Public Company Accounting Oversight Board, or PCAOB. The PCAOB defines a material weakness in internal controls over financial reporting as a significant deficiency, or a combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected.

Changes in Internal Control Over Financial Reporting

In addition, as required by Rule 13a-15(d) under the Exchange Act, the Company's management, including the Company's Chief Executive Officer, Chief Operating Officer and Chief Financial Officer, have evaluated the Company's internal control over financial reporting to determine whether any changes occurred during the quarter covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Alliance One International, Inc. and Subsidiaries

Item 4. Controls and Procedures. *(Continued)*

Changes in Internal Control Over Financial Reporting *(Continued)*

As noted above management identified a material weakness related to accounting for income taxes which was discovered during the fourth quarter. Specifically, there was insufficient review of the tax workpapers by management on an interim basis.

In connection with the material weakness in internal controls over financial reporting the Company has taken or plans to take the following remedial measures subsequent to December 31, 2006:

- Review and approval of effective tax rates and reconciliation of these rates by the local preparers and their supervisor.
- Review and approval of effective tax rates and reconciliation of these rates by the Corporate Foreign Tax Manager and their supervisor.
- Increased rate reconciliation procedure, including a checklist of specific steps to be followed by subsidiaries and reviewers.
- Increase the visibility of statutory write-offs through changes in local accounting systems.

Part II. Other Information

Item 1. Legal Proceedings.

In March 2004, the Company discovered potential irregularities with respect to certain bank accounts in southern Europe and central Asia. The Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of activity relating to these accounts. That investigation revealed that, although the amounts involved were not material and had no material impact on the Company's historical financial statements, there were payments from these accounts that may have violated the U.S. Foreign Corrupt Practices Act (the "FCPA"). In May 2004, the Company voluntarily reported the matter to the U.S. Department of Justice. Soon thereafter, the Company closed the accounts in question, implemented personnel changes and other measures designed to prevent similar situations in the future, including the addition of new finance and internal audit staff and enhancement of existing training programs, and disclosed these circumstances in its filings with the U.S. Securities and Exchange Commission (the "SEC"). In August 2006, the Company learned that the SEC has issued a formal order of investigation of the Company and others to determine if these or other actions may have violated certain provisions of the Securities

Exchange Act of 1934 and rules thereunder. The Company is cooperating fully with the SEC with respect to the investigation.

If the U.S. authorities determine that there have been violations of federal laws, they may seek to impose sanctions on the Company that may include, among other things, injunctive relief, disgorgement, fines, penalties and modifications to business practices. It is not possible to predict at this time whether the authorities will determine that violations have occurred, and if they do, what sanctions they might seek to impose. It is also not possible to predict how the government's investigation or any resulting sanctions may impact the Company's business, results of operations or financial performance, although any monetary penalty assessed may be material to the Company's results of operations in the quarter in which it is imposed.

Item 1A. Risk Factors.

No changes.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

Item 5. Other Information.

None.

Item 6. Exhibits.
