FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED DECEMBER 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FROM THE TRANSITION PERIOD FROM TO

COMMISSION FILE NUMBER 1-7521

FRIEDMAN INDUSTRIES, INCORPORATED

(Exact name of registrant as specified in its charter)

TEXAS
(State or other jurisdiction of
incorporation or organization)

74-1504405
(I.R.S. Employer Identification
Number)

4001 HOMESTEAD ROAD, HOUSTON, TEXAS 77028-5585
(Address of principal executive office) (zip code)
Registrant's telephone number, including area code (713) 672-9433

Former name, former address and former fiscal year, if changed since last report

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer () Accelerated filer () Non-accelerated filer (X)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At December 31, 2006, the number of shares outstanding of the issuer's only class of stock was 6,712,108 shares of Common Stock.

FRIEDMAN INDUSTRIES, INCORPORATED

**CONDENSED NOTES TO QUARTERLY REPORT UNAUDITED
THREE MONTHS ENDED DECEMBER 31, 2006**

NOTE A BASIS OF PRESENTATION

The accompanying unaudited condensed, consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the financial statements and footnotes included in the Company's annual report on Form 10-K for the year ended March 31, 2006.

NOTE B INVENTORIES

Inventories consist of prime coil, non-standard coil and tubular materials. Prime coil inventory consists primarily of raw materials, non-standard coil inventory consists primarily of finished goods and tubular inventory consists of both raw materials and finished goods. Inventories are valued at the lower of cost or replacement market. Cost for prime coil inventory is determined under the last-in, first-out (LIFO) method. Cost for non-standard coil inventory is determined using the specific identification method. Cost for tubular inventory is determined using the weighted average method.

During the nine months ended December 31, 2006, LIFO inventories were reduced but are expected to be replaced by March 31, 2007. A deferred credit of \$53,235 was recorded at December 31, 2006 to reflect replacement costs in excess of LIFO cost.

A summary of inventory values follows:

	December 31, 2006	March 31, 2006
Prime Coil Inventory	\$ 8,834,609	\$ 10,525,848
Non-Standard Coil Inventory	684,594	788,266
Tubular Raw Material	8,923,724	3,889,206
Tubular Finished Goods	13,692,582	12,753,601
	\$ 32,135,509	\$ 27,956,921

NOTE C LONG-TERM DEBT

The Company has a \$6 million revolving credit facility which expires April 1, 2008. There were no amounts outstanding pursuant to the facility at December 31 and March 31, 2006. Subsequent to December 31, 2006, the Company borrowed \$4,500,000 pursuant to this revolving facility to support cash requirements. Subject to cash requirements, these borrowings are expected to be repaid by March 31, 2007.

NOTE D STOCK BASED COMPENSATION

The Company followed Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), for its employee stock options through March 31, 2006. Under APB 25, because the exercise price of the Company's employee stock options was equal to the market price of the underlying stock on the date of grant, no compensation expense was recognized.

If the Company had applied the fair value recognition provisions of Statements of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*, to stock-based employee compensation for each of the periods ended December 31, 2006 and December 31, 2005, net income and earnings per common share would be the same as reported income and earnings per common share as no options were granted or unvested in the nine months ended December 31, 2006 or December 31, 2005.

Edgar Filing: FRIEDMAN INDUSTRIES INC - Form 10-Q

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment* (SFAS 123(R)). SFAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. The Company adopted SFAS 123(R) effective April 1, 2006. SFAS 123(R) permits adoption using one of two methods, a modified prospective method (Prospective Method) or a modified retrospective method (Retrospective Method). With the Prospective Method, costs are recognized beginning with the effective date based on the requirements of SFAS 123(R) for (i) all share-based payments granted after the effective date of SFAS 123(R), and (ii) all awards granted to employees prior to the effective date of SFAS 123(R) that remain unvested on the effective date. The Retrospective Method applies the

Table of Contents

requirements of the Prospective Method but further permits entities to restate all prior periods presented based on the amounts previously recognized under SFAS 123 for purposes of pro forma disclosures. The Company adopted the Prospective Method on April 1, 2006 and there was no impact on the financial statements as all of the options were vested as of April 1, 2006.

Under the Company's 1989 and 1996 Stock Option Plans, options were granted to certain officers and key employees to purchase common stock of the Company. Pursuant to the terms of the plans, no additional options may be granted. All options have ten-year terms and become fully exercisable at the end of six months of continued employment. The following is a summary of activity relative to options outstanding during each of the periods ended December 31:

	2006		2005	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding at beginning of period	137,212	\$ 2.35	224,718	\$ 2.62
Granted				
Exercised	(45,482)	\$ 2.33	(29,000)	\$ 3.13
Canceled or expired	(2,894)	\$ 3.13	(10,979)	\$ 2.40
Outstanding at end of period	88,836	\$ 2.33	184,739	\$ 2.55
Exercisable at the end of the period	88,836	\$ 2.33	184,739	\$ 2.55
Weighted average fair value of options granted during the period		N/A		N/A

Outstanding and exercisable stock options at December 31, 2006, were as follows:

Range of Exercise Price	Weighted Average Remaining Years	Outstanding		Exercisable	
		Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
\$2.33	6.2	88,836	\$ 2.33	88,836	\$ 2.33

The aggregate intrinsic value of exercisable and outstanding options at December 31, 2006 was \$867,928.

NOTE E NEW ACCOUNTING PRONOUNCEMENTS

The FASB issued Statement Financial Accounting Standards No. 151, *Inventory Costs, an Amendment of ARB No. 43, Chapter 4*, (SFAS 151) regarding current period expenses generated from abnormal inventory costs associated with idle facility expense, freight, handling costs and spoilage. Effective in fiscal 2007, SFAS 151 was adopted by the Company. SFAS 151 did not have a material impact in the period ended December 31, 2006 and the Company does not expect that SFAS 151 will have a material impact in future periods.

In June 2006 the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), regarding the clarification of accounting for uncertainty in income taxes recognized in an enterprise's financial statements. On April 1, 2007, FIN 48 will be applicable to the Company and is not expected to have a material impact upon adoption or in future periods.

See also note D regarding the adoption of SFAS 123(R).

Interest & other income	(57)	(97)	(181)	(192)
Total earnings before taxes	\$ 2,178	\$ 2,643	\$ 9,017	\$ 6,996

	December 31,	March 31,
	2006	2006
Segment assets		
Coil	\$ 22,797	\$ 24,528
Tubular	38,769	28,684
	61,566	53,212
Corporate assets	1,176	2,719
Total assets	\$ 62,742	\$ 55,931

Segment amounts reflected above are stated in thousands. General corporate expenses reflect general and administrative expenses not directly associated with segment operations and consist primarily of corporate executive and accounting salaries, professional fees and services, bad debts, accrued profit sharing expense, corporate insurance expenses and office supplies. Corporate assets consists primarily of cash and cash equivalents and the cash value of officers' life insurance.

NOTE G SALE OF ASSETS

In September 2006, the Company closed on the sale of real property owned by the Company in Houston, Texas. This sale resulted in a before tax gain of \$1,312,839. The proceeds from the sale of this property were used to purchase and improve real property associated with the new coil facility to be located in Decatur, Alabama.

NOTE H DECATUR COIL FACILITY

Included in fixed assets are certain purchases totaling approximately \$4,550,000 related to the Company's new coil facility to be located in Decatur, Alabama. This coil facility is expected to be operational in fiscal 2008.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Results of Operations****Nine Months Ended December 31, 2006 Compared to Nine Months Ended December 31, 2005**

During the nine months ended December 31, 2006, sales, costs of goods sold and gross profit increased \$18,411,734, \$17,552,126 and \$859,608, respectively, from the comparable amounts recorded during the nine months ended December 31, 2005. The increase in sales was related to an increase in tons sold as well as an increase in the average per ton selling price. Tons shipped increased from approximately 217,000 tons in the 2005 period to 229,000 tons in the 2006 period and the average per ton selling price increased from approximately \$615 per ton in the 2005 period to approximately \$661 per ton in the 2006 period. The increase in costs of goods sold was primarily related to the increase in sales. Average per ton costs of goods sold increased from approximately \$566 in the 2005 period to \$611 in the 2006 period. Gross profit as a percentage of sales decreased from approximately 8.0% in the 2005 period to 7.6% in the 2006 period. This decrease in margins earned was related primarily to the coil product segment which incurred increased material costs that could not be passed along to customers in the short term.

Coil product segment sales increased approximately \$7,436,000 during the 2006 period. This increase was primarily associated with an increase in average per ton selling prices which increased from approximately \$629 per ton in the 2005 period to \$694 per ton in the 2006 period. Tons of coil products sold remained approximately the same at 109,000 tons in both periods. Coil operating profit decreased approximately \$178,000 as increased costs of material could not be passed along in total to customers in the short term. Coil operating profit as a percentage of coil segment sales decreased from approximately 4.8% in the 2005 period to 4.1% in the 2006 period.

In the 2006 period, the Company phased out the Lone Star coil facility (LSCF). LSCF accounted for approximately 1% of total sales and generated a small loss in the 2006 period. Certain LSCF assets will be redeployed to the Company's new coil operation to be located in Decatur, Alabama.

The Company is dependent on Nucor Steel Company (NSC) for its supply of coil inventory. In the 2006 period, NSC continued to supply steel coils in amounts that were adequate for the Company's purposes. The Company does not currently anticipate any significant change in such supply from NSC.

Tubular product segment sales increased approximately \$10,976,000 during the 2006 period. This increase was primarily related to an increase in tons shipped in the 2006 period. Tons shipped increased from approximately 108,000 tons in the 2005 period to 120,000 tons in the 2006 period. Tubular product segment operating profit as a percentage of segment sales was approximately 8.5% and 8.7% in the 2006 and 2005 periods, respectively.

During the 2006 period, Lone Star Steel Company (LSS), the Company's primary supplier of tubular products and coil material used in pipe manufacturing, continued to supply such products in amounts that were adequate for the Company's purposes. The Company does not currently anticipate any significant change in such supply from LSS.

In September 2006, the Company sold the real property owned by the Company in Houston, Texas and signed a 12 month rental agreement to rent corporate office space at this location for \$1,400 per month. This sale resulted in a before tax gain of \$1,312,839. Proceeds received from the sale were used to purchase and improve real property associated with the Company's new coil operation to be located in Decatur, Alabama.

Federal income taxes increased \$597,478 from the comparable amount recorded during the 2005 period. This increase was primarily related to the increase in earnings before taxes. Effective tax rates were 37.6% and 35.8% in the 2005 and 2006 periods, respectively. In the 2006 period, the Company benefited from a reduction in state taxes and from a tax decrease available to manufacturing companies.

Three Months Ended December 31, 2006 Compared to Three Months Ended December 31, 2005

During the three months ended December 31, 2006, sales and costs of goods sold increased \$2,945,690 and \$3,516,535, respectively, and gross profit decreased \$570,845 from the comparable amounts recorded during the three months ended December 31, 2005. The increase in sales was related primarily to an increase in the average selling price per ton as the average increased from approximately \$606 per ton in the 2005 quarter to \$655 per ton in the 2006 quarter. In the 2005 quarter the Company sold approximately 73,000 tons compared to approximately 72,000 tons in the 2006 quarter. The increase in costs of goods sold was primarily related to increased material cost. The average per ton cost of goods increased from approximately \$554 in the 2005 quarter to \$610 in the 2006 quarter. The decrease in gross profit resulted primarily from a reduction in margins earned on sales as average selling prices increased at a

lower rate than did the average cost of material. The Company could not pass along all of the increased material costs to customers in the short term. Gross profit as a percentage of sales declined from approximately 8.6% in the 2005 quarter to approximately 6.9% in the 2006 quarter.

Coil product segment sales decreased approximately \$2,656,000 during the 2006 quarter. This decrease was related primarily to a decrease in tons sold which declined from approximately 38,000 tons in the 2005 quarter to 31,000 tons in the 2006 quarter. Partially offsetting the effect of the decrease in tons sold was an increase in the average per ton selling prices which increased from approximately \$625 per ton in the 2005 quarter to \$680 per ton in the 2006 quarter. Coil operating profit increased approximately \$152,000 from the amount recorded in the 2005 quarter. Coil operations benefited from improved average selling prices and coil operating profits as a percentage of sales increased from approximately 3.9% in the 2005 quarter to 5.1% in the 2006 quarter.

Tubular product segment sales increased approximately \$5,602,000 during the 2006 quarter. Tubular operations experienced an increase in tons sold and an increase in average selling prices in the 2006 quarter. The average per ton selling price increased from approximately \$585 per ton in the 2005 quarter to \$636 per ton in the 2006 quarter. Tons sold increased from approximately 36,000 tons in the 2005 quarter to 41,000 tons in the 2006 quarter. Tubular product segment operating profits as a percentage of segment sales were approximately 10.8% and 5.7% in the 2005 and 2006 quarters, respectively. In the 2006 quarter, the Company experienced an increase in material costs and expenses that could not be passed along to customers in the short term.

During the 2006 quarter, general, selling and administrative costs decreased \$145,464 from the amount recorded during the 2005 period. This decrease was related primarily to reduced bonuses associated with the decline in earnings and volume and a reduction in remuneration associated with a retired executive.

Interest and other income decreased \$39,719 from the comparable amount recorded in the 2005 quarter. This decrease was associated primarily with a decrease in the average invested cash position in the 2006 quarter.

Federal income taxes decreased \$175,562 from the comparable amount recorded during the 2005 quarter. This decrease was primarily related to the decrease in earnings before taxes. Effective tax rates were 36.9% and 36.7% in the 2005 and 2006 quarters, respectively.

FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES

The Company remained in a strong, liquid position at December 31, 2006. Current ratios were 2.4 and 2.6 at December 31, 2006 and March 31, 2006, respectively. Working capital was \$29,633,413 at December 31, 2006 and \$29,167,810 at March 31, 2006.

During the nine months ended December 31, 2006, the Company maintained assets and liabilities at levels it believed were commensurate with operations. Changes in current assets and liabilities during the 2006 period were related primarily to the ordinary course of business of the Company. An increase in inventories and related increase in accounts payable during the period was related primarily to a pipe production cycle. The Company expects to continue to monitor, evaluate and manage balance sheet components depending on changes in market conditions and the Company's operations.

During the nine months ended December 31, 2006, the Company purchased approximately \$4,900,000 in fixed assets. These assets were related primarily to improvements to the small diameter pipe mill located in Lone Star, Texas and to land, land improvements and equipment associated with the new coil operation to be located in Decatur, Alabama. In connection with this planned new operation, the Company phased out the Lone Star coil facility (LSCF) in the six months ended September 30, 2006. At the Decatur site, the Company intends to construct a coil processing facility using, in part, assets used at LSCF. The Company expects that the Decatur processing facility will initially operate a hot roll steel temper mill and a hot roll steel cut-to-length and leveling line. The Company expects that the Decatur facility will commence operations in fiscal 2008. In addition to \$680,480 used to purchase the real property in Alabama, the Company has authorized up to \$16 million to be used, if necessary, for capital expenditures and working capital related to the acquisition and improvement of the Decatur facility. At December 31, 2006, the Company had invested approximately \$4,550,000 at the Decatur location.

In September 2006, the Company sold the real property owned by the Company in Houston, Texas and signed a 12 month rental agreement to rent corporate office space at this location for \$1,400 per month. This sale resulted in a before tax gain of \$1,312,839. The proceeds of the sale were used to purchase and improve real property associated with the new coil operation to be located in Decatur, Alabama.

The Company has an arrangement with a bank which provides for a revolving line of credit facility (the revolving facility). Pursuant to the revolving facility, which expires April 1, 2008, the Company may borrow up to \$6 million at the bank's prime rate or 1.5% over LIBOR. The Company uses the revolving facility to support cash flow and will borrow and repay the note as working capital is required. At December 31, 2006 and March 31, 2006, the Company had no borrowings outstanding under the revolving facility. Subsequent to December 31, 2006, the Company borrowed \$4,500,000 pursuant to the revolving facility to support cash requirements. Subject to cash requirements, these borrowings are expected to be repaid by March 31, 2007.

The Company has in the past and may in the future borrow funds on a term basis to build or improve facilities. The Company currently has no plans to borrow funds on a term basis.

Notwithstanding the current market conditions, the Company believes its cash flows from operations and borrowing capability under its revolving facility are adequate to fund its expected cash requirements for the next 24 months.

CRITICAL ACCOUNTING POLICIES

The preparation of consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. One such accounting policy which requires significant estimates and judgments is the valuation of LIFO inventories in the Company's quarterly reporting. The quarterly valuation of LIFO inventory requires estimates of the year end quantities and is inherently difficult. Historically, these estimates have been materially correct. In addition, the Company maintains an allowance for doubtful accounts receivable by providing for specifically identified accounts where collectibility is doubtful. On an ongoing basis, the Company evaluates estimates and judgments. The Company bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances.

FORWARD-LOOKING STATEMENTS

From time to time, the Company may make certain statements that contain forward-looking information (as defined in the Private Securities Litigation Reform Act of 1996) and that involve risk and uncertainty. These

forward-looking statements may include, but are not limited to, future results of operations, future production capacity, product quality and proposed expansion plans. Forward-looking statements may be made by management orally or in writing including, but not limited to, this Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of the Company's filings with the Securities and Exchange Commission under the Securities Act of 1933 and the Securities Exchange Act of 1934. Actual results and trends in the future may differ materially depending on a variety of factors including but not limited to changes in the demand and prices of the Company's products, changes in the demand for steel and steel products in general and the Company's success in executing its internal operating plans, including any proposed expansion plans.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the normal course of business the Company is exposed to market risks primarily from changes in the cost of steel in inventory and in interest rates. The Company closely monitors exposure to market risks and develops appropriate strategies to manage risk. With respect to steel purchases, there is no recognized market to purchase derivative financial instruments to reduce the inventory exposure risk on changing commodity prices. The exposure to market risk associated with interest rates relates primarily to debt. Recent debt balances are minimal and, as a result, direct exposure to interest rate changes is not significant.

Item 4. Controls and Procedures

The Company's management, with the participation of the Company's principal executive officer (CEO) and principal financial officer (CFO), evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the fiscal quarter ended December 31, 2006. Based on this evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures were effective as of the end of the fiscal quarter ended December 31, 2006 to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the fiscal quarter ended December 31, 2006 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
