CHICAGO BRIDGE & IRON COMPANY N.V.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007
(in thousands, except per share data)
(Unaudited)

1. Significant Accounting Policies

Basis of Presentation The accompanying unaudited condensed consolidated financial statements for Chicago Bridge & Iron Company N.V. (CB&I or the Company) have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the SEC). In the opinion of management, our unaudited condensed consolidated financial statements include all adjustments, which are of a normal recurring nature, necessary for a fair presentation of our financial position as of June 30, 2007, our results of operations for each of the three-month and six-month periods ended June 30, 2007 and 2006, and our cash flows for each of the six-month periods ended June 30, 2007 and 2006. The condensed consolidated balance sheet at December 31, 2006 is derived from the December 31, 2006 audited consolidated financial statements. Certain prior year balances have been reclassified to conform to our current year presentation. Specifically, prepayment balances associated with our contracts have been reclassified from other current assets to contracts in progress balances on our December 31, 2006 condensed consolidated balance sheet. Although management believes the disclosures in these financial statements are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted pursuant to the rules and regulations of the SEC. The results of operations and cash flows for the interim periods are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited interim condensed consolidated financial statements should be read in conjunction with our consolidated financial statements and notes thereto included in our Form 10-K for the year ended December 31, 2006.

Revenue Recognition Revenue is primarily recognized using the percentage-of-completion method. A significant portion of our work is performed on a fixed-price or lump-sum basis. The balance of our work is performed on variations of cost reimbursable and target price approaches. Contract revenue is accrued based on the percentage that actual costs-to-date bear to total estimated costs. We utilize this cost-to-cost approach as we believe this method is less subjective than relying on assessments of physical progress. We follow the guidance of the Statement of Position 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts, (SOP 81-1) for accounting policies relating to our use of the percentage-of-completion method, estimating costs, revenue recognition, including the recognition of profit incentives, combining and segmenting contracts and unapproved change order/claim recognition. Under the cost-to-cost approach, while the most widely recognized method used for percentage-of-completion accounting, the use of estimated cost to complete each contract is a significant variable in the process of determining income earned and is a significant factor in the accounting for contracts. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates.

Contract revenue reflects the original contract price adjusted for approved change orders and estimated minimum recoveries of unapproved change orders and claims. We recognize revenue associated with unapproved change orders and claims to the extent that related costs have been incurred when recovery is probable and the value can be reliably estimated. At June 30, 2007, we had an outstanding unapproved change order of \$46,099 factored into the determination of revenue and estimated costs for the associated project. At December 31, 2006, we had no material outstanding unapproved change orders/claims.

Losses expected to be incurred on contracts in progress are charged to earnings in the period such losses are known. Provisions for additional costs associated with a contract projected to be in a significant loss position at June 30,

Table of Contents

2007 resulted in a \$15,355 charge to earnings in the three-month period and \$25,165 during the six-month period ended June 30, 2007. This contract is now substantially complete. There were no significant provisions for additional costs associated with contracts projected to be in a material loss position in the comparable periods of 2006.

Costs and estimated earnings to date in excess of progress billings on contracts in progress represent the cumulative revenue recognized less the cumulative billings to the customer. Any billed revenue that has not been collected is reported as accounts receivable. Unbilled revenue is reported as contracts in progress with costs and estimated earnings exceeding related progress billings on the condensed consolidated balance sheets. The timing of when we bill our customers is generally based on advance billing terms or contingent upon completion of certain phases of the work as stipulated in the contract. Progress billings in accounts receivable at June 30, 2007 and December 31, 2006 include retentions totaling \$66,453 and \$62,723, respectively, to be collected within one year. Contract retentions collectible beyond one year are included in non-current contract retentions on the condensed consolidated balance sheets. Cost of revenue includes direct contract costs such as material and construction labor, and indirect costs which are attributable to contract activity.

Foreign Currency The nature of our business activities involves the management of various financial and market risks, including those related to changes in currency exchange rates. The effects of translating financial statements of foreign operations into our reporting currency are recognized in shareholders' equity within accumulated other comprehensive loss as cumulative translation adjustment, net of tax, which includes tax credits associated with the translation adjustment. Foreign currency exchange gains/losses are included in the condensed consolidated statements of income within cost of revenue.

New Accounting Standards On January 1, 2007, we adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of SFAS No. 109, Accounting for Income Taxes (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. As a result of our adoption of FIN 48, we recognized an approximate \$1,800 increase in our liability for unrecognized tax benefits, which was accounted for as a cumulative-effect adjustment to our beginning retained earnings balance. Including the impact of adoption of FIN 48, our unrecognized tax benefits totaled approximately \$16,400.

We are subject to taxation in the United States and various states and foreign jurisdictions. We have significant operations in the United States, The Netherlands, Canada and the United Kingdom. Tax years remaining subject to examination by worldwide tax jurisdictions vary by country and legal entity, but are generally open for tax years ending after 2001, and in certain cases back to 1997.

To the extent penalties, if any, would be assessed on any underpayment of income tax, such amounts are accrued and classified as a component of income tax expense in our financial statements. Interest is included in interest expense on our consolidated statement of income.

We do not anticipate significant changes in the balance of our unrecognized tax benefits in the next twelve months. In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosure of fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements, and accordingly, does not require any new fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. We are currently evaluating the effect, if any, that the adoption of this standard will have on our consolidated financial position, results of operations or cash flows.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159). SFAS No. 159 provides companies with an option to report selected financial assets

Table of Contents

and liabilities at fair value. The objective of SFAS No. 159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. U.S. GAAP has required different measurement attributes for different assets and liabilities that can create artificial volatility in earnings. The FASB has indicated it believes that SFAS No. 159 helps to mitigate this type of accounting-induced volatility by enabling companies to report related assets and liabilities at fair value, which would likely reduce the need for companies to comply with detailed rules for hedge accounting. SFAS No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities.

SFAS No. 159 does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in SFAS No. 157 and SFAS No. 107,

Disclosures about Fair Value of Financial Instruments. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We are currently evaluating the impact, if any, that the adoption of this standard will have on our consolidated financial position, results of operations or cash flows.

Per Share Computations Basic earnings per share (EPS) is calculated by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the assumed conversion of dilutive securities, consisting of employee stock options, restricted shares, performance shares (where performance criteria have been met) and directors' deferred fee shares.

The following schedule reconciles the income and shares utilized in the basic and diluted EPS computations:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Net income	\$26,116	\$32,618	\$62,711	\$45,954
Weighted average shares outstanding basic	95,638	97,216	95,586	97,302
Effect of stock options/restricted shares/performance shares	943	1,656	1,042	1,710
Effect of directors' deferred fee shares	63	95	63	103
Weighted average shares outstanding diluted	96,644	98,967	96,691	99,115
Net income per share				
Basic	\$ 0.27	\$ 0.34	\$ 0.66	\$ 0.47
Diluted	\$ 0.27	\$ 0.33	\$ 0.65	\$ 0.46

2. Stock Plans

During the three and six months ended June 30, 2007, we recognized \$3,030 and \$9,901, respectively, of compensation expense reported as selling and administrative expense in the accompanying condensed consolidated statements of income versus \$2,718 and \$10,566 in the comparable periods of 2006. See Note 12 of our Consolidated Financial Statements in our 2006 Form 10-K for additional information related to our stock-based compensation plans.

During the six months ended June 30, 2007, we granted 153,929 stock options with a weighted-average fair value and exercise price per share of \$13.64 and \$30.27, respectively. Using the Black-Scholes option-pricing model, the fair value of each option grant is estimated on the date of grant based on the following weighted-average assumptions: risk-free interest rate of 4.59%, expected dividend yield of 0.53%, expected volatility of 41.69% and an expected life of 6 years.

Table of Contents

Expected volatility is based on historical volatility of our stock. We use historical data to estimate option exercise and employee termination within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

During the six months ended June 30, 2007, 413,938 restricted shares and 192,655 performance shares were granted with a weighted-average per share grant-date fair value of \$31.11 and \$30.48, respectively.

The changes in common stock, additional paid-in capital, stock held in trust and treasury stock since December 31, 2006 primarily relate to activity associated with our stock plans. Our treasury stock also reflects the impact of our share repurchase program.

3. Comprehensive Income

Comprehensive income for the three and six months ended June 30, 2007 and 2006 is as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Net income	\$26,116	\$32,618	\$62,711	\$45,954
Other comprehensive income (loss), net of tax:				
Currency translation adjustment	5,219	3,588	5,854	3,369
Change in unrealized loss on debt securities	6	18	16	37
Change in unrealized fair value of cash flow hedges ⁽¹⁾	(369)	46	174	3,134
Change in unrecognized net prior service pension credits	(45)		(91)	
Change in unrecognized net actuarial pension losses	19		38	
Comprehensive income	\$30,946	\$36,270	\$68,702	\$52,494

(1) Recorded under the provisions of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS No. 133). Offsetting the unrealized gain/loss on cash flow hedges is an unrealized loss/gain on the underlying

transactions, to
be recognized
when settled.

Accumulated other comprehensive loss reported on our balance sheet at June 30, 2007 includes the following, net of tax: \$2,543 of currency translation adjustment loss, \$473 of unrealized fair value gain on cash flow hedges, \$1,105 of unrecognized net prior service pension credits and \$4,861 of unrecognized net actuarial pension losses. The total unrealized fair value gain on cash flow hedges recorded in accumulated other comprehensive loss as of June 30, 2007 totaled \$473, net of tax of \$203. Of this amount, \$351 of unrealized fair value gain, net of tax of \$150, is expected to be reclassified into earnings during the next twelve months due to settlement of the related contracts.

4. Goodwill and Other Intangibles

Goodwill

At June 30, 2007 and December 31, 2006, our goodwill balances were \$228,648 and \$229,460, respectively, attributable to the excess of the purchase price over the fair value of assets acquired relative to acquisitions within our North America and Europe, Africa, Middle East (EAME) segments.

The decrease in goodwill primarily relates to a reduction in accordance with SFAS No. 109, Accounting for Income Taxes, where tax goodwill exceeded book goodwill in our North America segment, partially offset by the impact of foreign currency translation within our EAME segment.

Table of Contents

The change in goodwill by segment for the six months ended June 30, 2007 is as follows:

	North America	EAME	Total
Balance at December 31, 2006	\$201,150	\$28,310	\$229,460
Adjustments associated with tax goodwill in excess of book goodwill and foreign currency translation	(959)	147	(812)
Balance at June 30, 2007	\$200,191	\$28,457	\$228,648

Impairment Testing SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142), states that goodwill and indefinite-lived intangible assets are no longer amortized to earnings, but instead are reviewed for impairment at least annually via a two-phase process, absent any indicators of impairment. The first phase screens for impairment, while the second phase (if necessary) measures impairment. We have elected to perform our annual analysis during the fourth quarter of each year based upon goodwill and indefinite-lived intangible balances as of the beginning of the fourth quarter. Impairment testing of goodwill is accomplished by comparing an estimate of discounted future cash flows to the net book value of each reporting unit. Impairment testing of indefinite-lived intangible assets, which consist of tradenames, is accomplished by demonstrating recovery of the underlying intangible assets, utilizing an estimate of discounted future cash flows. No indicators of goodwill or other intangible asset impairment have been identified during 2007. There can be no assurance that future goodwill or other intangible asset impairment tests will not result in charges to earnings.

Other Intangible Assets

In accordance with SFAS No. 142, the following table provides information concerning our other intangible assets for the periods ended June 30, 2007 and December 31, 2006:

	June 30, 2007		December 31, 2006	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets				
Technology (10 years)	\$ 1,276	\$ (667)	\$ 1,276	\$ (603)
Non-compete agreements (8 years)	3,100	(2,600)	3,100	(2,400)
Total	\$ 4,376	\$ (3,267)	\$ 4,376	\$ (3,003)
Unamortized intangible assets				
Tradenames	\$ 24,717		\$ 24,717	
	\$ 24,717		\$ 24,717	

The change in other intangibles relates to additional amortization.

Table of Contents**5. Financial Instruments**

Although we do not engage in currency speculation, we periodically use hedges, primarily forward contracts, to mitigate certain operating exposures, as well as hedge intercompany loans utilized to finance non-U.S. subsidiaries. At June 30, 2007, our outstanding contracts to hedge intercompany loans and certain operating exposures are summarized as follows:

Currency Sold	Currency Purchased	Contract Amount (1)	Weighted Average Contract Rate
Forward contracts to hedge intercompany loans: (2)			
U.S. Dollar	British Pound	\$ 43,470	0.50
U.S. Dollar	Canadian Dollar	\$ 36,500	1.05
U.S. Dollar	South African Rand	\$ 2,654	7.13
U.S. Dollar	Australian Dollar	\$ 61,345	1.19
Contracts to hedge certain operating exposures: (3)			
U.S. Dollar	Euro	\$ 56,726	0.74
U.S. Dollar	Swiss Francs	\$ 2,059	1.21
British Pound	U.S. Dollar	\$ 2,311	0.47
British Pound	Euro	£ 12,555	1.44

(1) Represents the notional U.S. dollar equivalent at inception of the contract, with the exception of forward contracts to sell 12,555 British Pounds for 18,124 Euros. These contracts are denominated in British Pounds and equate to approximately \$25,220 at June 30, 2007.

(2) These contracts, for which we do not seek hedge accounting treatment under SFAS No. 133, generally mature within seven days

of quarter-end and are marked-to-market within cost of revenue in the condensed consolidated income statement, generally offsetting any translation gains/losses on the underlying transactions.

- (3) Represent primarily forward contracts which hedge forecasted transactions and firm commitments and generally mature within two years of quarter-end. Certain of these hedges were designated as cash flow hedges under SFAS No. 133. We exclude forward points, which represent the time value component of the fair value of our derivative positions, from our hedge assessment analysis. This time value component is recognized as ineffectiveness within cost of revenue in the condensed consolidated statement of income and was an unrealized loss

totaling approximately \$1,196 during the six months ended June 30, 2007. Additionally, certain of these hedges have become ineffective as it has become probable that their underlying forecasted transactions will not occur within their originally specified periods of time, or at all. The unrealized hedge fair value loss associated with these ineffective instruments, as well as instruments for which we do not seek hedge accounting treatment, totaled \$137 and was recognized within cost of revenue in the 2007 condensed consolidated statement of income. The total unrealized hedge fair value loss recognized within cost of revenue for the six months ended June 30, 2007 was \$1,333. At June 30, 2007, the total fair value of our outstanding contracts was \$395, including

the total foreign
currency exchange
loss related to
ineffectiveness. Of
the total
mark-to-market,
\$962 was recorded
in other current
assets, \$29 was
recorded in other
non-current assets
and \$1,386 was
recorded in
accrued liabilities
on the condensed
consolidated
balance sheet.

Table of Contents**6. Retirement Benefits**

We previously disclosed in our financial statements for the year ended December 31, 2006 that in 2007, we expected to contribute \$6,339 and \$1,502 to our defined benefit and other postretirement plans, respectively. The following table provides updated contribution information for our defined benefit and postretirement plans as of June 30, 2007:

	Defined Benefit Plans	Other Postretirement Benefits
Contributions made through June 30, 2007	\$ 2,425	\$ 259
Remaining contributions expected for 2007	3,898	752
Total contributions expected for 2007	\$ 6,323	\$ 1,011

Components of Net Periodic Benefit Cost

	Defined Benefit Plans		Other Postretirement Benefits	
	2007	2006	2007	2006
Three months ended June 30,				
Service cost	\$ 1,220	\$ 1,202	\$ 321	\$ 385
Interest cost	1,842	1,481	498	564
Expected return on plan assets	(2,441)	(1,979)		
Amortization of prior service costs	6	6	(67)	(30)
Recognized net actuarial loss	25	39	3	73
Net periodic benefit cost	\$ 652	\$ 749	\$ 755	\$ 992
Six months ended June 30,				
Service cost	\$ 2,452	\$ 2,396	\$ 642	\$ 770
Interest cost	3,653	2,910	995	1,126
Expected return on plan assets	(4,846)	(3,887)		
Amortization of prior service costs	12	12	(134)	(62)
Recognized net actuarial loss	47	77	6	146
Net periodic benefit cost	\$ 1,318	\$ 1,508	\$ 1,509	\$ 1,980

Table of Contents**7. Segment Information**

We manage our operations by four geographic segments: North America; Europe, Africa, Middle East; Asia Pacific; and Central and South America. Each geographic segment offers similar services.

The Chief Executive Officer evaluates the performance of these four segments based on revenue and income from operations. Each segment's performance reflects the allocation of corporate costs, which were based primarily on revenue. Intersegment revenue is eliminated in consolidation.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Revenue				
North America	\$ 456,386	\$407,475	\$ 886,530	\$ 765,707
Europe, Africa, Middle East	339,499	245,810	622,483	459,689
Asia Pacific	97,949	61,621	183,370	109,332
Central and South America	117,533	29,281	176,289	56,055
Total revenue	\$1,011,367	\$744,187	\$1,868,672	\$1,390,783

Income (Loss) From Operations

North America	\$ 18,742	\$ 21,233	\$ 48,258	\$ 24,363
Europe, Africa, Middle East	(7,402)	13,139	614	29,106
Asia Pacific	8,628	5,864	14,425	6,308
Central and South America	10,151	3,159	13,619	3,782
Total income from operations	\$ 30,119	\$ 43,395	\$ 76,916	\$ 63,559

8. Commitments and Contingencies

We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites. Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment, design or other engineering services or project construction services provided by our subsidiaries. Management does not currently believe that pending contractual, employment-related personal injury or property damage claims will have a material adverse effect on our earnings or liquidity.

Antitrust Proceedings In October 2001, the U.S. Federal Trade Commission (the "FTC" or the "Commission") filed an administrative complaint (the "Complaint") challenging our February 2001 acquisition of certain assets of the Engineered Construction Division of Pitt-Des Moines, Inc. ("PDM") that we acquired together with certain assets of the Water Division of PDM (the Engineered Construction and Water Divisions of PDM are hereafter sometimes referred to as the "PDM Divisions"). The Complaint alleged that the acquisition violated Federal antitrust laws by threatening to substantially lessen competition in four specific business lines in the United States: liquefied nitrogen, liquefied oxygen and liquefied argon (LIN/LOX/LAR) storage tanks; liquefied petroleum gas (LPG) storage tanks; liquefied natural gas (LNG) storage tanks and associated facilities; and field erected thermal vacuum chambers (used for the testing of satellites) (the "Relevant Products").

In June 2003, an FTC Administrative Law Judge ruled that our acquisition of PDM assets threatened to substantially lessen competition in the four business lines identified above and ordered us to divest within 180 days of a final order all physical assets, intellectual property and any uncompleted construction contracts of the PDM

Table of Contents

Divisions that we acquired from PDM to a purchaser approved by the FTC that is able to utilize those assets as a viable competitor.

We appealed the ruling to the full FTC. In addition, the FTC Staff appealed the sufficiency of the remedies contained in the ruling to the full FTC. On January 6, 2005, the Commission issued its Opinion and Final Order. According to the FTC's Opinion, we would be required to divide our industrial division, including employees, into two separate operating divisions, CB&I and New PDM, and to divest New PDM to a purchaser approved by the FTC within 180 days of the Order becoming final. By order dated August 30, 2005, the FTC issued its final ruling substantially denying our petition to reconsider and upholding the Final Order as modified.

We believe that the FTC's Order and Opinion are inconsistent with the law and the facts presented at trial, in the appeal to the Commission, as well as new evidence following the close of the record. We have filed a petition for review of the FTC Order and Opinion with the United States Court of Appeals for the Fifth Circuit. Oral arguments occurred on May 2, 2007. In addition to the legal proceedings, we also continue to explore a negotiated resolution of this matter with the FTC. We are not required to divest any assets until we have exhausted all appeal processes available to us, including appeal to the United States Supreme Court. Because (i) the remedies described in the Order and Opinion are neither consistent nor clear, (ii) the needs and requirements of any purchaser of divested assets could impact the amount and type of possible additional assets, if any, to be conveyed to the purchaser to constitute it as a viable competitor in the Relevant Products beyond those contained in the PDM Divisions, and (iii) the demand for the Relevant Products is constantly changing, we have not been able to definitively quantify the potential effect on our financial statements. The divested entity could include, among other things, certain fabrication facilities, equipment, contracts and employees of CB&I. The remedies contained in the Order, depending on how and to the extent they are ultimately implemented to establish a viable competitor in the Relevant Products, could have an adverse effect on us, including the possibility of a potential write-down of the net book value of divested assets, a loss of revenue relating to divested contracts and costs associated with a divestiture.

Securities Class Action A class action shareholder lawsuit was filed on February 17, 2006 against us, Gerald M. Glenn, Robert B. Jordan, and Richard E. Goodrich in the United States District Court for the Southern District of New York entitled *Welmon v. Chicago Bridge & Iron Co. NV, et al.* (No. 06 CV 1283). The complaint was filed on behalf of a purported class consisting of all those who purchased or otherwise acquired our securities from March 9, 2005 through February 3, 2006 and were damaged thereby.

The action asserts claims under the U.S. securities laws in connection with various public statements made by the defendants during the class period and alleges, among other things, that we misapplied percentage-of-completion accounting and did not follow our publicly stated revenue recognition policies.

Since the initial lawsuit, other suits containing substantially similar allegations and with similar, but not exactly the same, class periods were filed.

On July 5, 2006, a single Consolidated Amended Complaint was filed in the *Welmon* action in the Southern District of New York consolidating all previously filed actions. We and the individual defendants filed a motion to dismiss the Complaint, which was denied by the Court. On March 2, 2007, the lead plaintiffs filed a motion for class certification, and we and the individual defendants filed an opposition to class certification on April 2, 2007. After an initial hearing on the motion for class certification held on May 29, 2007, the Court scheduled another hearing to be held on November 19-20, 2007, to resolve factual issues regarding the typicality and adequacy of the proposed class representatives. Although we believe that we have meritorious defenses to the claims made in the above action and intend to contest it vigorously, an adverse resolution of the action could have a material adverse effect on our financial position and results of operations in the period in which the lawsuit is resolved.

Asbestos Litigation We are a defendant in lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed at various locations. We have never been a manufacturer, distributor or supplier of asbestos products. As of June 30, 2007, we have been named a defendant in lawsuits alleging exposure to asbestos involving approximately 4,592 plaintiffs, and of those claims, approximately 1,950 claims were pending and 2,642 have been closed through dismissals or settlements. As of June 30, 2007, the claims alleging exposure to asbestos that have

Table of Contents

been resolved have been dismissed or settled for an average settlement amount per claim of approximately one thousand dollars. With respect to unasserted asbestos claims, we cannot identify a population of potential claimants with sufficient certainty to determine the probability of a loss and to make a reasonable estimate of liability, if any. We review each case on its own merits and make accruals based on the probability of loss and our ability to estimate the amount of liability and related expenses, if any. We do not currently believe that any unresolved asserted claims will have a material adverse effect on our future results of operations or financial position and at June 30, 2007 we had accrued \$930 for liability and related expenses. While we continue to pursue recovery for recognized and unrecognized contingent losses through insurance, indemnification arrangements or other sources, we are unable to quantify the amount, if any, that may be expected to be recoverable because of the variability in the coverage amounts, deductibles, limitations and viability of carriers with respect to our insurance policies for the years in question.

Other We were served with subpoenas for documents on August 15, 2005 and January 24, 2006 by the Securities and Exchange Commission in connection with its investigation titled *In the Matter of Halliburton Company*, File No. HO-9968, relating to an LNG construction project on Bonny Island, Nigeria, where we served as one of several subcontractors to a Halliburton affiliate. We are cooperating fully with such investigation.

Environmental Matters Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as laws of other nations, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties to whom we have sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred. We are not aware of any manifestation by a potential claimant of its awareness of a possible claim or assessment with respect to any such facility.

We believe that we are currently in compliance, in all material respects, with all environmental laws and regulations. We do not anticipate that we will incur material capital expenditures for environmental controls or for investigation or remediation of environmental conditions during the remainder of 2007 or 2008.

Table of Contents**Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following Management's Discussion and Analysis of Financial Condition and Results of Operations is provided to assist readers in understanding our financial performance during the periods presented and significant trends which may impact our future performance. This discussion should be read in conjunction with our condensed consolidated financial statements and the related notes thereto included elsewhere in this quarterly report.

We are a global engineering, procurement and construction (EPC) company serving customers in a number of key industries including oil and gas; petrochemical and chemical; power; water and wastewater; and metals and mining. We have been helping our customers produce, process, store and distribute the world's natural resources for more than 100 years by supplying a comprehensive range of engineered steel structures and systems. We offer a complete package of design, engineering, fabrication, procurement, construction and maintenance services. Our projects include hydrocarbon processing plants, LNG terminals and peak shaving plants, offshore structures, pipelines, bulk liquid terminals, water storage and treatment facilities, and other steel structures and their associated systems. We have been continuously engaged in the engineering and construction industry since our founding in 1889.

Results of Operations

New Awards/Backlog During the three months ended June 30, 2007, new awards, representing the value of new project commitments received during a given period, were \$2.0 billion, compared with \$636.8 million in the same 2006 period. These commitments are included in backlog until work is performed and revenue is recognized or until cancellation. Approximately 38% of the new awards during the second quarter of 2007 were for contracts awarded in the Central and South America (CSA) segment, while 31% were for contracts awarded in the EAME segment. Significant awards during the quarter included the engineering, procurement and construction of an LNG regasification terminal in Chile, valued at approximately \$775.0 million, and approximately \$500.0 million for an LNG import terminal expansion in the United Kingdom. New awards for the six months ended June 30, 2007 was \$4.1 billion compared with \$1.5 billion in the same period last year. The increase over the comparable prior year period was primarily due to awards within our CSA segment.

Backlog increased \$3.4 billion or 102% to \$6.8 billion at June 30, 2007 compared with the year-earlier period, primarily due to new awards in our CSA segment.

Revenue Revenue during the three months ended June 30, 2007 of \$1.0 billion increased \$267.2 million, or 36%, compared with the corresponding period in 2006. Revenue grew \$48.9 million, or 12%, in the North America segment. Revenue increased \$93.7 million, or 38%, in the EAME segment due mainly to continued progress on two LNG projects in the United Kingdom. These two projects accounted for approximately 21% of the Company's total revenue for the three months ended June 30, 2007. Revenue increased 59% in the Asia Pacific (AP) segment as a result of higher backlog going into the year, and revenue was 301% higher in the CSA segment, mainly due to the higher level of new awards. Revenue during the six months ended June 30, 2007 of \$1.9 billion increased \$477.9 million or 34% compared with the corresponding period in 2006. We anticipate that a higher volume of our revenue will be generated in the CSA segment as a result of the significant increase in new awards.

Gross Profit Gross profit in the second quarter of 2007 was \$62.2 million, or 6.1% of revenue, compared with \$73.7 million, or 9.9% of revenue, for the same period in 2006. The decrease in gross profit level as a percentage of revenue in the second quarter of 2007 compared with the comparable period of 2006 is due to the factors described below. Gross profit in the first six months of 2007 was \$145.5 million, or 7.8% of revenue, versus \$132.9 million, or 9.6% of revenue, for the same period in 2006.

Our North America segment recognized a \$15.4 million charge to earnings during the three months ended June 30, 2007 for a project in a loss position, which is now substantially complete. For the six months ended June 30, 2007, we recognized \$25.2 million of charges to earnings associated with this project. These charges related primarily to higher than anticipated labor costs and modifications to our field execution approach.

Table of Contents

Also impacting the North America segment was an increase in the forecasted costs to complete a project that required additional engineering costs for extensive customer modifications and an overall schedule extension.

Our EAME segment was unfavorably impacted by increased forecasted construction costs on two projects in the United Kingdom. We increased our forecasted costs to complete these projects as a result of lower than expected labor productivity and schedule impacts, which increased our project management and field labor estimates and associated subcontract costs. Partially offsetting the above noted impact, an unapproved change order of \$46.1 million was factored into the determination of revenue for one project. This unapproved change order, which is anticipated to be settled within the next six months, relates to additional costs attributable to a change in customer specifications for materials.

As a result of the above noted factors, we recognized a \$35.0 million charge to earnings during the second quarter associated with these two projects. If the final settlement is less than the unapproved change order, labor productivity does not improve, as expected, or subcontractor issues are not resolved for amounts currently included in our estimates, our future results of operations would be negatively impacted.

Both our AP and CSA segments were favorably impacted by the higher level of new awards in these regions.

Selling and Administrative Expenses Selling and administrative expenses for the three months ended June 30, 2007 were \$31.7 million, or 3.1% of revenue, compared with \$29.5 million, or 4.0% of revenue, for the comparable period in 2006. Selling and administrative expenses for the six months ended June 30, 2007 were \$68.5 million, or 3.7% of revenue, versus \$68.5 million, or 4.9% of revenue, for the comparable period in 2006.

Income from Operations Income from operations for the three and six months ended June 30, 2007 was \$30.1 million and \$76.9 million, respectively, compared with \$43.4 million and \$63.6 million for the corresponding 2006 periods. As described above, our second quarter 2007 results were favorably impacted by higher revenue volume, offset by lower gross profit levels and higher selling and administrative costs.

Interest Expense and Interest Income Interest expense for the second quarter 2007 was \$0.9 million, compared with \$2.3 million for the corresponding 2006 period. The \$1.4 million decrease was primarily due to lower interest expense on our senior notes, resulting from a scheduled principal installment payment of \$25.0 million in the third quarter of 2006 and lower interest resulting from the favorable settlement of contingent tax obligations in the second half of 2006. Interest income for the second quarter 2007 of \$8.1 million increased \$3.9 million compared to the prior year period due to higher short-term investment levels and higher associated yields.

Income Tax Expense Income tax expense for the three months ended June 30, 2007 was \$9.4 million, or 25.1% of pre-tax income, compared with an income tax expense of \$11.3 million, or 25.0%, in the prior year period. Income tax expense for the six months ended June 30, 2007 was \$25.5 million, or 28.0% of pre-tax income, compared with income tax expense of \$17.8 million, or 27.0% in the prior year period.

Minority Interest in Income Minority interest in income for the three months ended June 30, 2007 was \$1.8 million compared with \$1.3 million for the comparable period in 2006. Minority interest in income for the six months ended June 30, 2006 was \$2.8 million versus \$2.1 million for the comparable period in 2006. The increase compared with 2006 relates to higher operating income for certain entities.

Liquidity and Capital Resources

At June 30, 2007, cash and cash equivalents totaled \$661.3 million.

Operating-During the first six months of 2007, our operations generated \$117.2 million of cash flows as a result of profitability and increased accounts payable levels. The increase in accounts payable primarily resulted from projects within our CSA segment.

Table of Contents

Investing-In the first six months of 2007, we incurred \$49.4 million for capital expenditures, primarily in support of projects in our North America and EAME segments.

We continue to evaluate and selectively pursue opportunities for expansion of our business through acquisition of complementary businesses. These acquisitions, if they arise, may involve the use of cash or may require debt or equity financing.

Financing-During the first six months of 2007, net cash flows utilized in financing activities were \$27.7 million. Purchases of treasury stock totaled \$30.9 million (approximately 1.0 million shares at an average price of \$31.62 per share) that included cash payments of \$3.2 million for withholding taxes on taxable share distributions, for which we withheld approximately 0.1 million shares, and approximately \$27.7 million for the repurchase of 0.9 million shares of our stock. These were partly offset by a \$5.4 million reclassification of benefits of tax deductions in excess of recognized compensation cost from an operating to a financing cash flow as required by SFAS No. 123(R). Uses of cash also included \$7.7 million for the payment of dividends. Our annual 2007 dividend is expected to be in the \$15.0 to \$16.0 million range. Cash provided by financing activities included \$4.8 and \$1.3 million from the issuance of treasury and common shares, respectively, primarily as a result of the exercise of stock options. On July 15, 2007, we paid the final of three annual installments of \$25.0 million on our senior notes.

Our primary internal source of liquidity is cash flow generated from operations. Capacity under our revolving credit facility is also available, if necessary, to fund our operating and investing activities. We have a five-year \$850.0 million, committed and unsecured revolving credit facility, which terminates in October 2011. As of June 30, 2007, no direct borrowings were outstanding under the revolving credit facility, but we had issued \$339.7 million of letters of credit and \$510.3 million of available capacity remained under this five-year facility. Such letters of credit are generally issued to customers in the ordinary course of business to support advance payments, as performance guarantees, or in lieu of retention on our contracts. The facility contains certain restrictive covenants, including a maximum leverage ratio, a minimum fixed charge coverage ratio and a minimum net worth level, among other restrictions. The facility also places restrictions on us with regard to subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, and mergers and acquisitions, among other restrictions.

In addition to the revolving credit facility, we have three committed and unsecured letter of credit and term loan agreements (the "LC Agreements") with Bank of America, N.A., as administrative agent, JPMorgan Chase Bank, National Association, and various private placement note investors. Under the terms of the LC Agreements, either banking institution can issue letters of credit (the "LC Issuers"). In the aggregate, the LC Agreements provide up to \$275.0 million of capacity. As of June 30, 2007, no direct borrowings were outstanding under the LC Agreements, but we had issued \$274.5 million of letters of credit among all three tranches of LC Agreements. Tranche A, a \$50.0 million facility, and Tranche B, a \$100.0 million facility, were fully utilized. Tranche C, a \$125.0 million facility, had \$0.5 million of available capacity remaining at June 30, 2007. Both Tranche A and Tranche B are five-year uncommitted facilities which terminate in November 2011. Tranche C is an eight-year facility expiring in November 2014. The LC Agreements contain certain restrictive covenants, such as a minimum net worth level, a minimum fixed charge coverage ratio and a maximum leverage ratio. The LC Agreements also include restrictions with regard to subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, affiliate transactions, sales and leasebacks, and mergers and acquisitions, among other restrictions. In the event of default under the LC Agreements, including our failure to reimburse a draw against an issued letter of credit, the LC Issuer could transfer its claim against us, to the extent such amount is due and payable by us under the LC Agreements, to the private placement note investors, creating a term loan that is due and payable no later than the stated maturity of the respective LC Agreement. In addition to quarterly letter of credit fees and, to the extent that a term loan is in effect, we would be assessed a floating rate of interest over LIBOR.

We also have various short-term, uncommitted revolving credit facilities across several geographic regions of approximately \$760.0 million. These facilities are generally used to provide letters of credit or bank guarantees to customers in the ordinary course of business to support advance payments, as performance guarantees or in lieu of retention on our contracts. At June 30, 2007, we had available capacity of \$281.0 million under these uncommitted facilities. In addition to providing letters of credit or bank guarantees, we also issue surety bonds in the ordinary course of business to support our contract performance.

Table of Contents

In addition, as of June 30, 2007, we had \$25.0 million of senior notes outstanding that contained a number of restrictive covenants, including a maximum leverage ratio and minimum levels of net worth and fixed charge ratios, among other restrictions. The notes also placed restrictions on us with regard to investments, other debt, subsidiary indebtedness, sales of assets, liens, nature of business conducted and mergers, among other restrictions. The final \$25.0 million installment of senior notes was paid on July 13, 2007.

As of June 30, 2007, the following commitments were in place to support our ordinary course obligations:

<i>(In thousands)</i>	Amounts of Commitments by Expiration Period				
	Total	Less than 1 Year	1-3 Years	4-5 Years	After 5 Years
Letters of Credit/Bank Guarantees	\$ 1,093,207	\$ 291,924	\$ 621,650	\$ 160,025	\$ 19,608
Surety Bonds	277,003	218,181	58,767	55	
Total Commitments	\$ 1,370,210	\$ 510,105	\$ 680,417	\$ 160,080	\$ 19,608

Note: Letters of credit include \$37,893 of letters of credit issued in support of our insurance program.

We believe cash on hand, funds generated by operations, amounts available under existing credit facilities and external sources of liquidity, such as the issuance of debt and equity instruments, will be sufficient to finance capital expenditures, the settlement of commitments and contingencies (as fully described in Note 8 to our condensed consolidated financial statements) and working capital needs for the foreseeable future. However, there can be no assurance that such funding will be available, as our ability to generate cash flows from operations and our ability to access funding under the revolving credit facility may be impacted by a variety of business, economic, legislative, financial and other factors which may be outside of our control. Additionally, while we currently have significant, uncommitted bonding facilities, primarily to support various commercial provisions in our engineering and construction contracts, a termination or reduction of these bonding facilities could result in the utilization of letters of credit in lieu of performance bonds, thereby reducing our available capacity under the revolving credit facility.

Although we do not anticipate a reduction or termination of the bonding facilities, there can be no assurance that such facilities will be available at reasonable terms to service our ordinary course obligations.

We are a defendant in a number of lawsuits arising in the normal course of business and we have in place appropriate insurance coverage for the type of work that we have performed. As a matter of standard policy, we review our litigation accrual quarterly and as further information is known on pending cases, increases or decreases, as appropriate, may be recorded in accordance with SFAS No. 5, Accounting for Contingencies (SFAS No. 5). For a discussion of pending litigation, including lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed, matters involving the FTC and securities class action lawsuits against us, see Note 8 to our condensed consolidated financial statements.

Off-Balance Sheet Arrangements

We use operating leases for facilities and equipment when they make economic sense. In 2001, we entered into a sale (for approximately \$14.0 million) and leaseback transaction of our Plainfield, Illinois administrative office with a lease term of 20 years, which is accounted for as an operating lease. Minimum lease payments over the next five years of the lease, from 2007 through 2011, for this facility are expected to be approximately \$1.6 million per year. Other than the commitments to support our ordinary course obligations, as described above, we have no other significant off-balance sheet arrangements.

New Accounting Standards

For a discussion of new accounting standards, see the applicable section included within Note 1 to our condensed consolidated financial statements.

Table of Contents**Critical Accounting Estimates**

The discussion and analysis of financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis, based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Our management has discussed the development and selection of our critical accounting estimates with the Audit Committee of our Supervisory Board of Directors. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our condensed consolidated financial statements:

Revenue Recognition Revenue is primarily recognized using the percentage-of-completion method. A significant portion of our work is performed on a fixed-price or lump sum basis. The balance of our work is performed on variations of cost reimbursable and target price approaches. Contract revenue is accrued based on the percentage that actual costs-to-date bear to total estimated costs. We utilize this cost-to-cost approach as we believe this method is less subjective than relying on assessments of physical progress. We follow the guidance of SOP 81-1, for accounting policies relating to our use of the percentage-of-completion method, estimating costs, revenue recognition, including the recognition of profit incentives, combining and segmenting contracts and unapproved change order/claim recognition. Under the cost-to-cost approach, while the most widely recognized method used for percentage-of-completion accounting, the use of estimated cost to complete each contract is a significant variable in the process of determining income earned and is a significant factor in the accounting for contracts. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates.

Contract revenue reflects the original contract price adjusted for approved change orders and estimated minimum recoveries of unapproved change orders and claims. We recognize revenue associated with unapproved change orders and claims to the extent that related costs have been incurred when recovery is probable and the value can be reliably estimated. At June 30, 2007, we had an outstanding unapproved change order of \$46.1 million factored into the determination of revenue and estimated costs for the associated project. At December 31, 2006, we had no material outstanding unapproved change orders/claims. If the final settlement is less than the unapproved change order, our results of operations could be negatively impacted.

Losses expected to be incurred on contracts in progress are charged to earnings in the period such losses are known. Provisions for additional costs associated with a contract projected to be in a significant loss position at June 30, 2007 resulted in a \$15.4 million charge to earnings in the three-month period and \$25.2 million during the six-month period ended June 30, 2007. The contract is now substantially complete. There were no significant provisions for additional costs associated with contracts projected to be in a material loss position in the comparable periods of 2006.

Credit Extension We extend credit to customers and other parties in the normal course of business only after a review of the potential customer's creditworthiness. Additionally, management reviews the commercial terms of all significant contracts before entering into a contractual arrangement. We regularly review outstanding receivables and provide for estimated losses through an allowance for doubtful accounts. In evaluating the level of established reserves, management makes judgments regarding the parties' ability to make required payments, economic events and other factors. As the financial condition of these parties changes, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts may be required.

Financial Instruments Although we do not engage in currency speculation, we periodically use hedges, primarily forward contracts, to mitigate certain operating exposures, as well as hedge intercompany loans utilized to

Table of Contents

finance non-U.S. subsidiaries. Hedge contracts utilized to mitigate operating exposures are generally designated as cash flow hedges under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS No. 133). Therefore, gains and losses, exclusive of forward points, associated with marking highly effective instruments to market are included in accumulated other comprehensive loss on the condensed consolidated balance sheets, while the gains and losses associated with instruments deemed ineffective during the period and instruments for which we do not seek hedge accounting treatment are recognized within cost of revenue in the condensed consolidated statements of income. Changes in the fair value of forward points are recognized within cost of revenue in the condensed consolidated statements of income. Additionally, gains or losses on forward contracts to hedge intercompany loans are included within cost of revenue in the condensed consolidated statements of income. Our other financial instruments are not significant.

Income Taxes Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using tax rates in effect for the years in which the differences are expected to reverse. A valuation allowance is provided to offset any net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The final realization of the deferred tax asset depends on our ability to generate sufficient taxable income of the appropriate character in the future and in appropriate jurisdictions. Under the guidance of FIN 48, we provide for income taxes in situations where we have and have not received tax assessments. Taxes are provided in those instances where we consider it probable that additional taxes will be due in excess of amounts reflected in income tax returns filed worldwide. As a matter of standard policy, we continually review our exposure to additional income taxes due and as further information is known, increases or decreases, as appropriate, may be recorded in accordance with FIN 48.

Estimated Reserves for Insurance Matters We maintain insurance coverage for various aspects of our business and operations. However, we retain a portion of anticipated losses through the use of deductibles and self-insured retentions for our exposures related to third-party liability and workers compensation. Management regularly reviews estimates of reported and unreported claims through analysis of historical and projected trends, in conjunction with actuaries and other consultants, and provides for losses through insurance reserves. As claims develop and additional information becomes available, adjustments to loss reserves may be required. If actual results are not consistent with our assumptions, we may be exposed to gains or losses that could be material.

Recoverability of Goodwill and Indefinite-Lived Intangible Assets Effective January 1, 2002, we adopted SFAS No. 142 which states that goodwill and indefinite-lived intangible assets are no longer to be amortized but are to be reviewed annually for impairment.

The goodwill impairment analysis required under SFAS No. 142 requires us to allocate goodwill to our reporting units, compare the fair value of each reporting unit with our carrying amount, including goodwill, and then, if necessary, record a goodwill impairment charge in an amount equal to the excess, if any, of the carrying amount of a reporting unit's goodwill over the implied fair value of that goodwill. The primary method we employ to estimate these fair values is the discounted cash flow method. This methodology is based, to a large extent, on assumptions about future events which may or may not occur as anticipated, and such deviations could have a significant impact on the estimated fair values calculated. These assumptions include, but are not limited to, estimates of future growth rates, discount rates and terminal values of reporting units. Our goodwill balance at June 30, 2007 was \$228.6 million. SFAS No. 142 also requires us to compare the fair value of our indefinite-lived intangible assets to the carrying amount. Impairment testing of our indefinite-lived intangible assets, which consist of tradenames, is accomplished by demonstrating recovery of the underlying intangible assets, also utilizing an estimate of discounted future cash flows. Our indefinite-lived intangible asset balance at June 30, 2007 was \$24.7 million.

Table of Contents

Forward-Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements. You should read carefully any statements containing the words expect, believe, anticipate, project, estimate, predict, intend, should, could, similar expressions or the negative of any of these terms.

Forward-looking statements involve known and unknown risks and uncertainties. In addition to the material risks listed under Item 1A. Risk Factors, as set forth in our Form 10-K for the year ended December 31, 2006 filed with the SEC, that may cause our actual results, performance or achievements to be materially different from those expressed or implied by any forward-looking statements, the following factors could also cause our results to differ from such statements:

our ability to realize cost savings from our expected execution performance of contracts;

the uncertain timing and the funding of new contract awards, and project cancellations and operating risks;

cost overruns on fixed price, target price or similar contracts whether as the result of improper estimates or otherwise;

risks associated with percentage-of-completion accounting;

our ability to settle or negotiate unapproved change orders and claims;

changes in the costs or availability of, or delivery schedule for, equipment, components, materials, labor or subcontractors;

adverse impacts from weather may affect our performance and timeliness of completion, which could lead to increased costs and affect the costs or availability of, or delivery schedule for, equipment, components, materials, labor or subcontractors;

increased competition;

fluctuating revenue resulting from a number of factors, including the cyclical nature of the individual markets in which our customers operate;

lower than expected activity in the hydrocarbon industry, demand from which is the largest component of our revenue;

lower than expected growth in our primary end markets, including but not limited to LNG and refining and related processes;

risks inherent in acquisitions and our ability to obtain financing for proposed acquisitions;

our ability to integrate and successfully operate acquired businesses and the risks associated with those businesses;

adverse outcomes of pending claims or litigation or the possibility of new claims or litigation, including, but not limited to, pending securities class action litigation, and the potential effect on our business, financial condition and results of operations;

the ultimate outcome or effect of the pending FTC order on our business, financial condition and results of operations;

Table of Contents

lack of necessary liquidity to finance expenditures prior to the receipt of payment for the performance of contracts and to provide bid and performance bonds and letters of credit securing our obligations under our bids and contracts;

proposed and actual revisions to U.S. and non-U.S. tax laws, and interpretation of said laws, and U.S. tax treaties with non-U.S. countries (including The Netherlands), that seek to increase income taxes payable;

political and economic conditions including, but not limited to, war, conflict or civil or economic unrest in countries in which we operate; and

a downturn or disruption in the economy in general.

Although we believe the expectations reflected in our forward-looking statements are reasonable, we cannot guarantee future performance or results. We are not obligated to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. You should consider these risks when reading any forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk from changes in foreign currency exchange rates, which may adversely affect our results of operations and financial condition. One exposure to fluctuating exchange rates relates to the effects of translating the financial statements of our non-U.S. subsidiaries, which are denominated in currencies other than the U.S. dollar, into the U.S. dollar. The foreign currency translation adjustments are recognized in shareholders' equity within accumulated other comprehensive loss as cumulative translation adjustment, net of any applicable tax. We generally do not hedge our exposure to potential foreign currency translation adjustments.

Another form of foreign currency exposure relates to our non-U.S. subsidiaries' normal contracting activities. We generally try to limit our exposure to foreign currency fluctuations in most of our engineering, procurement and construction contracts through provisions that require customer payments in U.S. dollars or other currencies corresponding to the currency in which costs are incurred. As a result, we generally do not need to hedge foreign currency cash flows for contract work performed. However, where construction contracts do not contain foreign currency provisions, we primarily use forward exchange contracts to hedge foreign currency exposure of forecasted transactions and firm commitments. Our primary foreign currency exchange rate exposure hedged includes the Euro, Swiss Franc and U.S. Dollar. The gains and losses on these contracts are intended to offset changes in the value of the related exposures. However, certain of these hedges have become ineffective as it has become probable that their underlying forecasted transaction will not occur within their originally specified periods of time, or at all. The unrealized hedge fair value loss associated with these ineffective instruments as well as instruments for which we do not seek hedge accounting treatment totaled \$0.1 million and was recognized within cost of revenue in the condensed consolidated statement of income for the six months ended June 30, 2007. As of June 30, 2007, the notional amount of cash flow hedge contracts outstanding was \$81.7 million. The total unrealized hedge fair value loss recognized within cost of revenue for the six months ended June 30, 2007 was \$1.3 million. The terms of our contracts extend up to two years.

In circumstances where intercompany loans and/or borrowings are in place with non-U.S. subsidiaries, we will also use forward contracts which generally offset any translation gains/losses of the underlying transactions. If the timing or amount of foreign-denominated cash flows vary, we incur foreign exchange gains or losses, which are included within cost of revenue in the condensed consolidated statements of income. We do not use financial instruments for trading or speculative purposes.

The carrying value of our cash and cash equivalents, accounts receivable, accounts payable and notes payable approximates their fair values because of the short-term nature of these instruments. See Note 5 to our condensed consolidated financial statements for quantification of our financial instruments.

Table of Contents**Item 4. Controls and Procedures**

Disclosure Controls and Procedures As of the end of the period covered by this quarterly report on Form 10-Q, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based upon such evaluation, the CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures are effective to ensure information required to be disclosed in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time period specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Controls There were no changes in our internal controls over financial reporting that occurred during the three-month period ended June 30, 2007, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites.

Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment, design or other engineering services or project construction services provided by our subsidiaries. Management does not currently believe that pending contractual, employment-related personal injury or property damage claims will have a material adverse effect on our earnings or liquidity.

Antitrust Proceedings In October 2001, the FTC filed an administrative complaint (the Complaint) challenging our February 2001 acquisition of certain assets of the Engineered Construction Division of Pitt-Des Moines, Inc. (PDM) that we acquired together with certain assets of the Water Division of PDM (the Engineered Construction and Water Divisions of PDM are hereafter sometimes referred to as the PDM Divisions). The Complaint alleged that the acquisition violated Federal antitrust laws by threatening to substantially lessen competition in four specific business lines in the United States: liquefied nitrogen, liquefied oxygen and liquefied argon (LIN/LOX/LAR) storage tanks; liquefied petroleum gas (LPG) storage tanks; liquefied natural gas (LNG) storage tanks and associated facilities; and field erected thermal vacuum chambers (used for the testing of satellites) (the Relevant Products).

In June 2003, an FTC Administrative Law Judge ruled that our acquisition of PDM assets threatened to substantially lessen competition in the four business lines identified above and ordered us to divest within 180 days of a final order all physical assets, intellectual property and any uncompleted construction contracts of the PDM Divisions that we acquired from PDM to a purchaser approved by the FTC that is able to utilize those assets as a viable competitor.

We appealed the ruling to the full FTC. In addition, the FTC Staff appealed the sufficiency of the remedies contained in the ruling to the full FTC. On January 6, 2005, the Commission issued its Opinion and Final Order. According to the FTC's Opinion, we would be required to divide our industrial division, including employees, into two separate operating divisions, CB&I and New PDM, and to divest New PDM to a purchaser approved by the FTC within 180 days of the Order becoming final. By order dated August 30, 2005, the FTC issued its final ruling substantially denying our petition to reconsider and upholding the Final Order as modified.

Table of Contents

We believe that the FTC's Order and Opinion are inconsistent with the law and the facts presented at trial, in the appeal to the Commission, as well as new evidence following the close of the record. We have filed a petition for review of the FTC Order and Opinion with the United States Court of Appeals for the Fifth Circuit. Oral arguments occurred on May 2, 2007. In addition to the legal proceedings, we also continue to explore a negotiated resolution of this matter with the FTC. We are not required to divest any assets until we have exhausted all appeal processes available to us, including appeal to the United States Supreme Court. Because (i) the remedies described in the Order and Opinion are neither consistent nor clear, (ii) the needs and requirements of any purchaser of divested assets could impact the amount and type of possible additional assets, if any, to be conveyed to the purchaser to constitute it as a viable competitor in the Relevant Products beyond those contained in the PDM Divisions, and (iii) the demand for the Relevant Products is constantly changing, we have not been able to definitively quantify the potential effect on our financial statements. The divested entity could include, among other things, certain fabrication facilities, equipment, contracts and employees of CB&I. The remedies contained in the Order, depending on how and to the extent they are ultimately implemented to establish a viable competitor in the Relevant Products, could have an adverse effect on us, including the possibility of a potential write-down of the net book value of divested assets, a loss of revenue relating to divested contracts and costs associated with a divestiture.

Securities Class Action A class action shareholder lawsuit was filed on February 17, 2006 against us, Gerald M. Glenn, Robert B. Jordan, and Richard E. Goodrich in the United States District Court for the Southern District of New York entitled *Welmon v. Chicago Bridge & Iron Co. NV, et al.* (No. 06 CV 1283). The complaint was filed on behalf of a purported class consisting of all those who purchased or otherwise acquired our securities from March 9, 2005 through February 3, 2006 and were damaged thereby.

The action asserts claims under the U.S. securities laws in connection with various public statements made by the defendants during the class period and alleges, among other things, that we misapplied percentage-of-completion accounting and did not follow our publicly stated revenue recognition policies.

Since the initial lawsuit, other suits containing substantially similar allegations and with similar, but not exactly the same, class periods were filed.

On July 5, 2006, a single Consolidated Amended Complaint was filed in the *Welmon* action in the Southern District of New York consolidating all previously filed actions. We and the individual defendants filed a motion to dismiss the Complaint, which was denied by the Court. On March 2, 2007, the lead plaintiffs filed a motion for class certification, and we and the individual defendants filed an opposition to class certification on April 2, 2007. After an initial hearing on the motion for class certification held on May 29, 2007, the Court scheduled another hearing to be held on November 19-20, 2007, to resolve factual issues regarding the typicality and adequacy of the proposed class representatives. Although we believe that we have meritorious defenses to the claims made in the above action and intend to contest it vigorously, an adverse resolution of the action could have a material adverse effect on our financial position and results of operations in the period in which the lawsuit is resolved.

Asbestos Litigation We are a defendant in lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed at various locations. We have never been a manufacturer, distributor or supplier of asbestos products. As of June 30, 2007, we have been named a defendant in lawsuits alleging exposure to asbestos involving approximately 4,592 plaintiffs, and of those claims, approximately 1,950 claims were pending and 2,642 have been closed through dismissals or settlements. As of June 30, 2007, the claims alleging exposure to asbestos that have been resolved have been dismissed or settled for an average settlement amount per claim of approximately one thousand dollars. With respect to unasserted asbestos claims, we cannot identify a population of potential claimants with sufficient certainty to determine the probability of a loss and to make a reasonable estimate of liability, if any. We review each case on its own merits and make accruals based on the probability of loss and our ability to estimate the amount of liability and related expenses, if any. We do not currently believe that any unresolved asserted claims will have a material adverse effect on our future results of operations or financial position and at June 30, 2007 we had accrued \$0.9 million for liability and related expenses. While we continue to pursue recovery for recognized and unrecognized contingent losses through insurance, indemnification arrangements or other sources, we are unable to quantify the amount, if any, that may be expected to be recoverable because of the

Table of Contents

variability in the coverage amounts, deductibles, limitations and viability of carriers with respect to our insurance policies for the years in question.

Other We were served with subpoenas for documents on August 15, 2005 and January 24, 2006 by the Securities and Exchange Commission in connection with its investigation titled *In the Matter of Halliburton Company*, File No. HO-9968, relating to an LNG construction project on Bonny Island, Nigeria, where we served as one of several subcontractors to a Halliburton affiliate. We are cooperating fully with such investigation.

Environmental Matters Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as laws of other nations, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties to whom we have sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred. We are not aware of any manifestation by a potential claimant of its awareness of a possible claim or assessment with respect to any such facility.

We believe that we are currently in compliance, in all material respects, with all environmental laws and regulations.

We do not anticipate that we will incur material capital expenditures for environmental controls or for investigation or remediation of environmental conditions during the remainder of 2007 or 2008.

Item 1A. Risk Factors

There have been no material changes to the Risk Factors disclosure included in our 2006 Form 10-K filed on March 1, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities ⁽³⁾**

Period	a) Total Number of Shares Purchased	b) Average Price Paid per Share	c) Total Number of Shares Purchased as Part of Publicly Announced Plan	d) Maximum Number of Shares that May Yet Be Purchased Under the Plan ⁽²⁾
April 2007 ⁽¹⁾ (4/1/07-4/30/07)	75,000	\$ 30.9713	2,717,200	
Subtotal	75,000	\$ 30.9713	2,717,200	
May 2007 ⁽²⁾ (5/1/07-5/31/07)	37,500	\$ 37.9838	37,500	9,562,500
June 2007 ⁽²⁾ (6/1/07 - 6/30/07)	157,500	\$ 38.1213	195,000	9,405,000
Subtotal	195,000	\$ 38.0949	195,000	9,405,000

Total	270,000	\$	36.1161	2,912,200	9,405,000
-------	---------	----	---------	-----------	-----------

Table of Contents

- (1) During the month of April, we continued to purchase shares under our stock repurchase program which was announced on June 1, 2006 (the 2006 Repurchase Program) and was originally initiated on May 16, 2005. Under the 2006 Repurchase Program, the authorized amount of the repurchase totaled up to 10% of our issued share capital on June 1, 2006 (or approximately 9,700,000 shares). On May 10, 2007, our shareholders voted on and we announced the resumption and extension through November 10, 2008 of our existing stock repurchase program (the 2007 Stock Repurchase Program). The 2006 Repurchase Program expired on May 10,

2007 at such time when our shareholders voted on and approved the 2007 Stock Repurchase Program and no further purchases were made under the 2006 Repurchase Program after such time.

- (2) Under the 2007 Stock Repurchase Program, the authorized amount of the repurchase totals up to 10% of our issued share capital (or approximately 9,600,000 shares).

- (3) Table does not include shares withheld for tax purposes or forfeitures under our equity plans.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

The Annual General Meeting of Shareholders of Chicago Bridge & Iron Company N.V. was held on May 10, 2007. The following matters were voted upon and adopted at the meeting:

- (i) Reappointment of Jerry H. Ballengee and appointment of Michael L. Underwood as members of the Supervisory Board to serve until the Annual General Meeting of Shareholders in 2010 and until their successors have been duly appointed.

	First Nominee	Second Nominee		Broker
