

ULTRA CLEAN HOLDINGS INC

Form 424B3

March 10, 2006

Table of Contents

Filed Pursuant to Rule 424(b)(3)
 Registration No. 333-131613

Prospectus**5,750,000 shares****Common shares**

This is an offering of common stock of Ultra Clean Holdings, Inc. Of the 5,750,000 shares of common stock being sold in this offering, 1,600,000 shares are being sold by Ultra Clean Holdings, Inc., and 4,150,000 shares are being sold by the selling stockholders, including members of our management. We will not receive any of the proceeds from the sale of shares by the selling stockholders.

Our common stock is traded on The Nasdaq National Market under the symbol UCTT. The last reported sale price of our common stock on March 9, 2006 was \$7.34 per share.

	Per share	Total
Public offering price	\$ 7.100	\$ 40,825,000
Underwriting discounts and commissions	\$ 0.426	\$ 2,449,500
Proceeds to Ultra Clean, before expenses	\$ 6.674	\$ 10,678,400
Proceeds to selling stockholders, before expenses	\$ 6.674	\$ 27,697,100

The selling stockholders have granted the underwriters an option for a period of 30 days to purchase up to an aggregate of 862,500 additional shares of common stock.

Investing in our common shares involves a high degree of risk. See Risk factors beginning on page 7.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed on the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

Prospectus summary

This summary highlights information contained elsewhere in this prospectus. This summary may not contain all of the information that may be important to you. You should read this entire prospectus, including the section entitled Risk factors and our consolidated financial data and related notes, before making an investment decision. References in this prospectus to Ultra Clean, we, us, our and our company refer to Ultra Clean Holdings, Inc. and Ultra Clean Technology Systems and Service, Inc. unless otherwise specified. The Ultra Clean Technology logo is our registered trademark. In addition, this prospectus contains trademarks, service marks and trade names of companies and organizations other than Ultra Clean Holdings, Inc.

Ultra Clean Holdings, Inc.

We are a leading developer and supplier of critical subsystems, primarily for the semiconductor capital equipment industry. We develop, design, prototype, engineer, manufacture and test subsystems which are highly specialized and tailored to specific steps in the semiconductor manufacturing process. Currently, our revenue is derived primarily from the sale of gas delivery systems. We are increasing our revenue related to the sale of other subsystems, including chemical delivery modules, top-plate assemblies, frame assemblies and process modules. Our primary customers are semiconductor equipment manufacturers. Historically, the majority of semiconductor equipment manufacturers were vertically integrated. However, as they place greater emphasis on their core competencies, process development and innovation, they rely more heavily on outsourcing the design, development and manufacturing of many of the subsystems that comprise the semiconductor manufacturing equipment they produce. As the requirements they place on their subsystem suppliers increase and the scope of the subsystems they outsource expands, semiconductor equipment manufacturers seek to consolidate their supplier relationships into a reduced number of integrated solution providers.

We provide our customers complete subsystem solutions that combine our expertise in design, test, component characterization and highly flexible manufacturing operations with quality control and financial stability. This combination helps us to drive down total manufacturing costs, reduce design-to-delivery cycle times and maintain high quality standards for our customers. We believe these characteristics, as well as our standing as a leading supplier of gas delivery systems, place us in a strong position to benefit from the growing demand for subsystem outsourcing.

We had sales of \$147.5 million, \$184.2 million and \$77.5 million for the years ended December 31, 2005, 2004 and 2003, respectively. Our three largest customers in 2005 were Applied Materials, Inc., Lam Research Corporation and Novellus Systems, Inc.

Our solution

We are a leading developer and supplier of critical subsystems for the semiconductor capital equipment industry. Our products enable our original equipment manufacturer, or OEM, customers to realize lower manufacturing costs and reduced design-to-delivery cycle times while maintaining quality.

Table of Contents

We offer our customers:

An integrated outsourced solution for gas delivery systems and other subsystems. We provide our OEM customers a complete outsourced solution for the development, design, prototyping, engineering, manufacturing and testing of advanced gas delivery systems. We also provide outsourced solutions for chemical delivery modules, top-plate assemblies, frame assemblies and process modules. We combine highly specialized engineering and manufacturing capabilities to produce high performance products that are customized to meet the needs of our customers, as well as their respective end users. We manage supply chain logistics in an effort to reduce the overall number of suppliers and inventory levels that our customers would otherwise be required to manage. We also believe we are often in a position to negotiate reduced component prices due to our large volume orders.

Improved design-to-delivery cycle times. Our strong relationships with our customers and intimate familiarity with their products and requirements help us reduce design-to-delivery cycle times for gas delivery systems and other subsystems. We have optimized our supply chain management, design and manufacturing coordination and controls to respond rapidly to order requests, enabling us to decrease design-to-delivery cycle times for our customers.

Component neutral design and manufacturing. We do not manufacture any of the components within our gas delivery systems and other subsystems ourselves. Our component neutral position enables us to recommend components on the basis of technology, performance and cost and to optimize our customers overall designs based on these criteria. Furthermore, our neutral approach allows us to maintain close relationships with a wide range of component suppliers.

Component testing capabilities. We utilize our engineering expertise to test and characterize key components and subsystems. We have made significant investments in advanced analytical and automated test equipment to test and qualify key components. We can perform diagnostic tests, design verification and failure analysis for customers and suppliers. Our analytical and testing capabilities enable us to evaluate multiple supplier component technologies and provide customers with a wide range of appropriate component and design choices for their subsystems.

Increased integration with OEMs through local presence. Our local presence in close proximity to the facilities of most of our OEM customers enables us to remain closely integrated with their design, development and implementation teams. This level of integration enables us to respond quickly and efficiently to customer changes and requests.

Our strategy

Our objective is to maintain our position as a leading developer and supplier of gas delivery systems and become a leading developer and supplier of other critical subsystems, primarily for the semiconductor capital equipment industry.

Our strategy is comprised of the following key elements:

Continue to expand our market share with OEMs. We believe that the increase in outsourcing among OEMs creates a significant market opportunity for us to grow our business with existing and new customers. We believe that our continued focus on efficient manufacturing, reduced design-to-delivery cycle times and quality and reliability will also allow us to gain market share.

Table of Contents

Leverage our expanding geographic presence in lower cost manufacturing regions. In March 2005, we completed construction of a manufacturing facility in Shanghai, China, allowing us to expand production in a low cost region. This facility puts us in close proximity to the manufacturing facilities of potential customers and their end users.

Drive profitable growth with our flexible cost structure. We implement cost containment and capacity enhancement initiatives throughout the semiconductor capital equipment demand cycle and benefit greatly from our supply chain efficiencies. In addition, we believe our Shanghai facility positions us to respond effectively to future business demands.

Selectively pursue strategic acquisitions. We may choose to accelerate the growth of our business by selectively pursuing strategic acquisitions. We have in the past considered and will continue to consider acquisitions that will enable us to expand our geographic presence, secure new customers and diversify into complementary products and markets as well as broaden our technological capabilities in semiconductor capital equipment manufacturing.

Our history

Ultra Clean Holdings, Inc. was founded in November 2002 for the purpose of acquiring Ultra Clean Technology Systems and Service, Inc. Ultra Clean Technology Systems and Service, Inc. was founded in 1991 by Mitsubishi Corporation and was operated as a subsidiary of Mitsubishi until November 2002, when it was acquired by Ultra Clean Holdings, Inc. Ultra Clean Holdings, Inc. became a publicly traded company in March 2004. Prior to our initial public offering, we were principally owned by FP-Ultra Clean, L.L.C., a wholly-owned subsidiary of Francisco Partners, L.P. FP-Ultra Clean, L.L.C. currently owns approximately 55% of our outstanding common stock and after completion of this offering will own approximately 28% of our outstanding common stock, assuming no exercise of the underwriters' overallotment option. We conduct our operating activities primarily through our two wholly-owned subsidiaries, Ultra Clean Technology Systems and Service, Inc. and Ultra Clean Technology (Shanghai) Co., LTD.

Our principal executive offices are located at 150 Independence Drive, Menlo Park, California 94025 and our telephone number is (650) 323-4100. We maintain a web site at www.uct.com. The information on our web site is not part of this prospectus.

Risks associated with our business

Our business is subject to numerous risks, which are highlighted in the section entitled "Risk factors" immediately following this prospectus summary, including:

The semiconductor capital equipment industry is highly cyclical and recurring periods of over-supply of semiconductor products have caused customer orders for our products to fluctuate significantly from period to period.

We rely on a small number of customers for a significant portion of our sales, and any impairment to our customer relationships would adversely affect our business. If these or other customers do not continue to outsource gas delivery systems or other subsystems for their capital equipment, our revenue would be reduced.

We recently established operations in China, which exposes us to new risks associated with operating in a foreign country.

Table of Contents

We do not have long-term purchase contracts with any of our customers and, as a result, our sales are difficult to forecast. Any significant reductions, cancellations or delays in customer orders could cause our sales to decline and our operating results to suffer.

Third parties have claimed and may in the future claim that we are infringing their intellectual property, which could subject us to litigation or licensing expenses, and we may be prevented from selling our products if any such claims prove successful.

We are controlled by Francisco Partners, L.P. and therefore our other stockholders are unable to affect the outcome of stockholder voting. In addition, for so long as Francisco Partners, L.P. beneficially owns at least 25% of our outstanding common stock, our board of directors may not take certain actions without the approval of Francisco Partners, L.P.

Table of Contents**The offering**

Common stock offered by Ultra Clean	1,600,000 shares
Common stock offered by the selling stockholders	4,150,000 shares
Common stock to be outstanding after the offering	18,101,363 shares
Overallotment option granted by the selling stockholders	862,500 shares
Nasdaq National Market symbol	UCTT
Use of proceeds	We intend to use the net proceeds to us from this offering for working capital and other general corporate purposes, including potential acquisitions of companies or technologies that complement our business. We will not receive any of the proceeds from the sale of common stock by the selling stockholders. See Use of proceeds on page 21.

The number of shares of our common stock to be outstanding after the offering is based on 16,501,363 shares outstanding as of December 31, 2005, and excludes:

2,120,437 shares subject to outstanding options at a weighted average exercise price of \$4.17 per share;

1,213,939 additional shares reserved for issuance under our Amended and Restated 2003 Stock Incentive Plan; and

424,075 shares reserved for issuance under our Employee Stock Purchase Plan.

Unless otherwise indicated, all information in this prospectus assumes no exercise of the underwriters overallotment option.

Table of Contents**Summary consolidated financial information**

The following summary consolidated financial data should be read together with our consolidated financial statements and related notes and Management's discussion and analysis of financial condition and results of operations. The following financial information may not be indicative of our results for future periods.

	Successor			Predecessor

(1) On an as adjusted basis to reflect the sale by us of 1,600,000 shares of common stock in this offering at the public offering price of \$7.10 per share, after deducting underwriting discounts and commissions and estimated offering expenses. The pro-rata portion of the offering expenses of the selling stockholders in the offering, other than underwriting discounts and commissions, will be charged to operations in the quarter in which the offering is completed.

Table of Contents

Risk factors

The purchase of our common stock involves significant investment risks. You should carefully consider the following risks before making a decision to invest in our common stock. If any of the events or circumstances described below actually occur, our business, financial condition and results of operations could suffer, the trading price of our common stock could decline and you could lose part or all of your investment.

Risks related to our business

The highly cyclical nature of the semiconductor capital equipment industry and general economic slowdowns could harm our operating results.

Our business and operating results depend in significant part upon capital expenditures by manufacturers of semiconductors, which in turn depend upon the current and anticipated market demand for semiconductors. Historically, the semiconductor industry has been highly cyclical, with recurring periods of over-supply of semiconductor products that have had a severe negative effect on the demand for capital equipment used to manufacture semiconductors. We have experienced and anticipate that we will continue to experience significant fluctuations in customer orders for our products. Our sales were \$147.5 million in 2005, \$184.2 million in 2004 and \$77.5 million in 2003. Beginning in the third quarter of 2004, we started to experience a weakening in new orders and an increase in customer requests for cancellations and postponements of existing orders that continued through the third quarter of 2005. Historically, semiconductor industry slowdowns have had, and future slowdowns may have, a material adverse effect on our operating results.

In addition, uncertainty regarding the growth rate of economies throughout the world has caused companies to reduce capital investment and may cause further reduction of such investments. These reductions have been particularly severe in the semiconductor capital equipment industry. A potential rebound in the worldwide economy in the near future will not necessarily mean that our business will experience similar effects.

We rely on a small number of customers for a significant portion of our sales, and any impairment of our relationships with these customers would adversely affect our business.

A relatively small number of OEM customers has historically accounted for a significant portion of our sales, and we expect this trend to continue. Applied Materials, Inc., Lam Research Corporation and Novellus Systems, Inc. as a group accounted for 89% of our sales in 2005, 93% of our sales in 2004 and 92% of our sales in 2003. Because of the small number of OEMs in our industry, most of whom are already our customers, it would be difficult to replace lost revenue resulting from the loss of, or the reduction, cancellation or delay in purchase orders by, any one of these customers. Consolidation among our customers or a decision by any one or more of our customers to outsource all or a substantial portion of their manufacturing and assembly work to a single equipment manufacturer may further concentrate our business in a limited number of customers and expose us to increased risks relating to dependence on a small number of customers.

In addition, by virtue of our customers' size and the significant portion of our revenue that we derive from them, they are able to exert significant influence and pricing pressure in the negotiation of our commercial agreements and the conduct of our business with them. We may also be asked to accommodate customer requests that extend beyond the express terms of

Table of Contents

our agreements in order to maintain our relationships with our customers. If we are unable to retain and expand our business with these customers on favorable terms, our business and operating results will be adversely affected.

We have had to qualify, and are required to maintain our status, as a supplier for each of our customers. This is a lengthy process that involves the inspection and approval by a customer of our engineering, documentation, manufacturing and quality control procedures before that customer will place volume orders. Our ability to lessen the adverse effect of any loss of, or reduction in sales to, an existing customer through the rapid addition of one or more new customers is minimal because of these qualification requirements. Consequently, our business, operating results and financial condition would be adversely affected by the loss of, or any reduction in orders by, any of our significant customers.

We recently established operations in China, which exposes us to new risks associated with operating in a foreign country.

We are exposed to political, economic, legal and other risks associated with operating in China, including:

foreign currency exchange fluctuations;

political, civil and economic instability;

tariffs and other barriers;

timing and availability of export licenses;

disruptions to our and our customers' operations due to the outbreak of communicable diseases, such as SARS and avian flu;

disruptions in operations due to the weakness of China's domestic infrastructure, including transportation and energy;

difficulties in developing relationships with local suppliers;

difficulties in attracting new international customers;

difficulties in accounts receivable collections;

difficulties in staffing and managing a distant international subsidiary and branch operations;

the burden of complying with foreign and international laws and treaties; and

potentially adverse tax consequences.

In addition, while over the past several years the Chinese government has pursued economic reform policies, including the encouragement of private economic activity and greater economic decentralization, the Chinese government may not continue these policies or may significantly alter them to our detriment from time to time without notice. Changes in laws and regulations or their interpretation, the imposition of confiscatory taxation policies, new restrictions on currency conversion or limitations on sources of supply could materially and adversely affect our operations in China, which could result in a total loss of our investment in that country and materially and adversely affect our future operating results.

Table of Contents

Our quarterly revenue and operating results fluctuate significantly from period to period, and this may cause volatility in our common stock price.

Our quarterly revenue and operating results have fluctuated significantly in the past, and we expect them to continue to fluctuate in the future for a variety of reasons which may include:

demand for and market acceptance of our products as a result of the cyclical nature of the semiconductor industry or otherwise, often resulting in reduced sales during industry downturns and increased sales during periods of industry recovery;

changes in the timing and size of orders by our customers;

cancellations and postponements of previously placed orders;

pricing pressure from either our competitors or our customers, resulting in the reduction of our product prices;

disruptions or delays in the manufacturing of our products or in the supply of components or raw materials that are incorporated into or used to manufacture our products, thereby causing us to delay the shipment of products;

decreased margins for several or more quarters following the introduction of new products, especially as we introduce new subsystems;

delays in ramp-up in production, low yields or other problems experienced at our new manufacturing facility in China;

changes in design-to-delivery cycle times;

inability to reduce our costs quickly in step with reductions in our prices or in response to decreased demand for our products;

changes in our mix of products sold;

write-offs of excess or obsolete inventory;

one-time expenses or charges associated with failed acquisition negotiations or completed acquisitions;

announcements by our competitors of new products, services or technological innovations, which may, among other things, render our products less competitive; and

geographic mix of worldwide earnings.

As a result of the foregoing, we believe that quarter-to-quarter comparisons of our revenue and operating results may not be meaningful and that these comparisons may not be an accurate indicator of our future performance. Changes in the timing or terms of a small number of transactions could disproportionately affect our operating results in any particular quarter. Moreover, our operating results in one or more future quarters may fail to meet the expectations of securities analysts or investors. If this occurs, we would expect to experience an immediate and significant decline in the trading price of our common stock.

Third parties have claimed and may in the future claim we are infringing their intellectual property, which could subject us to litigation or licensing expenses, and we may be prevented from selling our products if any such claims prove successful.

We have received a claim of infringement from Celerity, Inc. that is currently pending and we may receive notices of other such claims in the future. In addition, we may be unaware of

Table of Contents

intellectual property rights of others that may be applicable to our products. Any litigation regarding patents or other intellectual property could be costly and time-consuming and divert the attention of our management and key personnel from our business operations, any of which could have a material adverse effect on our business and results of operations. The complexity of the technology involved in our products and the uncertainty of intellectual property litigation increase these risks. Claims of intellectual property infringement may also require us to enter into costly license agreements. However, we may not be able to obtain licenses on terms acceptable to us, or at all. We also may be subject to significant damages or injunctions against the development, manufacture and sale of certain of our products if any such claims prove successful. See Business Legal proceedings.

Because we are subject to order and shipment uncertainties, any significant reductions, cancellations or delays in customer orders could cause our revenue to decline and our operating results to suffer.

Our revenue is difficult to forecast because we generally do not have a material backlog of unfilled orders and because of the short time frame within which we are often required to design, produce and deliver products to our customers. Most of our revenue in any quarter depends on customer orders for our products that we receive and fulfill in the same quarter. We do not have long-term purchase orders or contracts that contain minimum purchase commitments from our customers. Instead, we receive non-binding forecasts of the future volume of orders from our customers. Occasionally, we order and build component inventory in advance of the receipt of actual customer orders. Customers may cancel order forecasts, change production quantities from forecasted volumes or delay production for reasons beyond our control. Furthermore, reductions, cancellations or delays in customer order forecasts occur without penalty to, or compensation from, the customer. Reductions, cancellations or delays in forecasted orders could cause us to hold inventory longer than anticipated, which could reduce our gross profit, restrict our ability to fund our operations and cause us to incur unanticipated reductions or delays in revenue. If we do not obtain orders as we anticipate, we could have excess component inventory for a specific product that we would not be able to sell to another customer, likely resulting in inventory write-offs, which could have a material adverse affect on our business, financial condition and operating results. In addition, because many of our costs are fixed in the short term, we could experience deterioration in our gross profit when our production volumes decline.

The manufacturing of our products is highly complex, and if we are not able to manage our manufacturing and procurement process effectively, our business and operating results will suffer.

The manufacturing of our products is a highly complex process that involves the integration of multiple components and requires effective management of our supply chain while meeting our customers design-to-delivery cycle time requirements. Through the course of the manufacturing process, our customers may modify design and system configurations in response to changes in their own customers requirements. In order to rapidly respond to these modifications and deliver our products to our customers in a timely manner, we must effectively manage our manufacturing and procurement process. If we fail to manage this process effectively, we risk losing customers and damaging our reputation. In addition, if we acquire inventory in excess of demand or that does not meet customer specifications, we would incur excess or obsolete inventory charges. These risks are even greater as we expand our business beyond gas delivery systems into new subsystems. As a result, this could limit our

Table of Contents

growth and have a material adverse effect on our business, financial condition and operating results.

OEMs may not continue to outsource gas delivery systems and other subsystems, which would adversely impact our operating results.

The success of our business depends on OEMs continuing to outsource the manufacturing of gas delivery systems and other subsystems for their semiconductor capital equipment. Most of the largest OEMs have already outsourced production of a significant portion of their gas delivery systems and other subsystems. If OEMs do not continue to outsource gas delivery systems and other subsystems for their capital equipment, our revenue would be significantly reduced, which would have a material adverse affect on our business, financial condition and operating results. In addition, if we are unable to obtain additional business from OEMs, even if they continue to outsource their production of gas delivery systems and other subsystems, our business, financial condition and operating results could be adversely affected.

If our new products are not accepted by OEMs or if we are unable to maintain historical margins on our new products, our operating results would be adversely impacted.

We design, develop and market gas delivery systems and other subsystems to OEMs. Sales of these new products are expected to make up an increasing part of our total revenue. The introduction of new products is inherently risky because it is difficult to foresee the adoption of new standards, to coordinate our technical personnel and strategic relationships and to win acceptance of new products by OEMs. We may not be able to recoup design and development expenditures if our new products are not accepted by OEMs. Gross margins on newly introduced products typically carry lower gross margins for several or more quarters following their introduction. If any of our new subsystems is not successful, or if we are unable to obtain gross margins on new products that are similar to the gross margins we have historically achieved, our business, operating results and financial condition could be adversely affected.

We may not be able to manage our future growth successfully.

Our ability to execute our business plan successfully in a rapidly evolving market requires an effective planning and management process. We have increased, and plan to continue to increase, the scope of our operations. Due to the cyclical nature of the semiconductor industry, however, future growth is difficult to predict. Our expansion efforts could be expensive and may strain our managerial and other resources. To manage future growth effectively, we must maintain and enhance our financial and operating systems and controls and manage expanded operations. Although we occasionally experience reductions in force, over time the number of people we employ has generally grown and we expect this number to continue to grow when our operations expand. The addition and training of new employees may lead to short-term quality control problems and place increased demands on our management and experienced personnel. If we do not manage growth properly, our business, operating results and financial condition could be adversely affected.

We may experience difficulties and incur significant costs as a result of evaluating or completing acquisitions of companies, assets, businesses or technologies, and the anticipated benefits of any completed or contemplated acquisitions may never be realized.

We frequently evaluate acquisitions of, or significant investments in, complementary companies, assets, businesses and technologies. Even if an acquisition or other investment is not

Table of Contents

completed, we may incur significant costs in evaluating such acquisition or investment, which has in the past had, and could in the future have, an adverse effect on our results of operations. Any future acquisitions would be accompanied by risks such as:

difficulties in assimilating the operations and personnel of acquired companies or businesses;

difficulties in integrating information systems of acquired companies or businesses;

diversion of management's attention from ongoing business concerns;

inability to maximize our financial and strategic position through the successful incorporation of acquired technology into our products;

additional expense associated with amortization or depreciation of acquired assets;

maintenance of uniform standards, controls, procedures and policies;

impairment of existing relationships with employees, suppliers and customers as a result of the integration of new personnel;

dilution to our stockholders in the event we issue stock as consideration to finance an acquisition; and

increased leverage if we incur debt to finance an acquisition.

We may not be successful in integrating any business, products, technologies or personnel that we acquire, and our failure to do so could have a material adverse effect on our business, operating results and financial condition.

Our business is largely dependent on the know-how of our employees, and we generally do not have a protected intellectual property position.

Our business is largely dependent upon our design, engineering, manufacturing and testing know-how. We rely on a combination of trade secrets and contractual confidentiality provisions and, to a much lesser extent, patents, copyrights and trademarks, to protect our proprietary rights. Accordingly, our intellectual property position is more vulnerable than it would be if it were protected by patents. If we fail to protect our proprietary rights successfully, our competitive position could suffer, which could harm our operating results. We may be required to spend significant resources to monitor and protect our proprietary rights, and, in the event we do not detect infringement of our proprietary rights, we may lose our competitive position in the market if any such infringement occurs. In addition, competitors may design around our technology or develop competing technologies and know-how.

If we do not keep pace with developments in the semiconductor industry and with technological innovation generally, our products may not be competitive.

Rapid technological innovation in semiconductor manufacturing requires the semiconductor capital equipment industry to anticipate and respond quickly to evolving customer requirements and could render our current product offerings and technology obsolete. Technological innovations are inherently complex. We must devote resources to technology development in order to keep pace with the rapidly evolving technologies used in semiconductor manufacturing. We believe that our future success will depend upon our ability to design, engineer and manufacture products that meet the changing needs of our customers. This requires that we successfully anticipate and respond to technological changes in design, engineering and manufacturing processes in a cost-effective and timely manner. If we are unable to integrate

Table of Contents

new technical specifications into competitive product designs, develop the technical capabilities necessary to manufacture new products or make necessary modifications or enhancements to existing products, our business prospects could be harmed.

The timely development of new or enhanced products is a complex and uncertain process which requires that we:

design innovative and performance-enhancing features that differentiate our products from those of our competitors;

identify emerging technological trends in the semiconductor industry, including new standards for our products;

accurately identify and design new products to meet market needs;

collaborate with OEMs to design and develop products on a timely and cost-effective basis;

ramp up production of new products, especially new subsystems, in a timely manner and with acceptable yields;

successfully manage development production cycles; and

respond effectively to technological changes or product announcements by others.

The industry in which we participate is highly competitive and rapidly evolving, and if we are unable to compete effectively, our operating results would be harmed.

Our competitors are primarily companies that design and manufacture gas delivery systems for semiconductor capital equipment. Although we have not faced competition in the past from the largest subsystem and component manufacturers in the semiconductor capital equipment industry, these suppliers could compete with us in the future. Increased competition has in the past resulted, and could in the future result, in price reductions, reduced gross margins or loss of market share, any of which would harm our operating results. We are subject to pricing pressure as we attempt to increase market share with our existing customers. Competitors may introduce new products for the markets currently served by our products. These products may have better performance, lower prices and achieve broader market acceptance than our products. Further, OEMs typically own the design rights to their products and may provide these designs to other subsystem manufacturers. If our competitors obtain proprietary rights to these designs such that we are unable to obtain the designs necessary to manufacture products for our OEM customers, our business, financial condition and operating results could be adversely affected.

Our competitors may have greater financial, technical, manufacturing and marketing resources than we do. As a result, they may be able to respond more quickly to new or emerging technologies and changes in customer requirements, devote greater resources to the development, promotion, sale and support of their products, and reduce prices to increase market share. Moreover, there may be merger and acquisition activity among our competitors and potential competitors that may provide our competitors and potential competitors an advantage over us by enabling them to expand their product offerings and service capabilities to meet a broader range of customer needs. Further, if one of our customers develops or acquires the internal capability to develop and produce gas delivery systems or other subsystems that we produce, the loss of that customer could have a material adverse effect on our business, financial condition and operating results. The introduction of new technologies and new market entrants may also increase competitive pressures.

Table of Contents

We must achieve design wins to retain our existing customers and to obtain new customers.

New semiconductor capital equipment typically has a lifespan of several years, and OEMs frequently specify which systems, subsystems, components and instruments are to be used in their equipment. Once a specific system, subsystem, component or instrument is incorporated into a piece of semiconductor capital equipment, it will likely continue to be incorporated into that piece of equipment for at least several months before the OEM switches to the product of another supplier. Accordingly, it is important that our products are designed into the new semiconductor capital equipment of OEMs, which we refer to as a design win, in order to retain our competitive position with existing customers and to obtain new customers. We incur technology development and sales expenses with no assurance that our products will ultimately be designed into an OEM's semiconductor capital equipment. Further, developing new customer relationships, as well as increasing our market share at existing customers, requires a substantial investment of our sales, engineering and management resources without any assurance from prospective customers that they will place significant orders. We believe that OEMs often select their suppliers and place orders based on long-term relationships. Accordingly, we may have difficulty achieving design wins from OEMs that are not currently our customers. Our operating results and potential growth could be adversely affected if we fail to achieve design wins with leading OEMs.

We may not be able to respond quickly enough to increases in demand for our products.

Demand shifts in the semiconductor industry are rapid and difficult to predict, and we may not be able to respond quickly enough to an increase in demand. Our ability to increase sales of our products depends, in part, upon our ability to:

mobilize our supply chain in order to maintain component and raw material supply;

optimize the use of our design, engineering and manufacturing capacity in a timely manner;

deliver our products to our customers in a timely fashion;

expand, if necessary, our manufacturing capacity; and

maintain our product quality as we increase production.

If we are unable to respond to rapid increases in demand for our products on a timely basis or to manage any corresponding expansion of our manufacturing capacity effectively, our customers could increase their purchases from our competitors, which would adversely affect our business.

Our dependence on our suppliers may prevent us from delivering an acceptable product on a timely basis.

We rely on both single-source and sole-source suppliers, some of whom are relatively small, for many of the components we use in our products. In addition, our customers often specify components of particular suppliers that we must incorporate into our products. Our suppliers are under no obligation to provide us with components. As a result, the loss of or failure to perform by any of these providers could adversely affect our business and operating results. In addition, the manufacturing of certain components and subsystems is an extremely complex process. Therefore, if a supplier were unable to provide the volume of components we require on a timely basis and at acceptable prices, we would have to identify and qualify replacements from alternative sources of supply. The process of qualifying new suppliers for these complex

Table of Contents

components is lengthy and could delay our production, which would adversely affect our business, operating results and financial condition. We may also experience difficulty in obtaining sufficient supplies of components and raw materials in times of significant growth in our business. For example, we have in the past experienced shortages in supplies of various components, such as mass flow controllers, valves and regulators, and certain prefabricated parts, such as sheet metal enclosures, used in the manufacture of our products. In addition, one of our competitors manufactures mass flow controllers that may be specified by one or more of our customers. If we are unable to obtain these particular mass flow controllers from our competitor or convince a customer to select alternative mass flow controllers, we may be unable to meet that customer's requirements, which could result in a loss of market share.

Defects in our products could damage our reputation, decrease market acceptance of our products, cause the unintended release of hazardous materials and result in potentially costly litigation.

A number of factors, including design flaws, material and component failures, contamination in the manufacturing environment, impurities in the materials used and unknown sensitivities to process conditions, such as temperature and humidity, as well as equipment failures, may cause our products to contain undetected errors or defects. Problems with our products may:

cause delays in product introductions and shipments;

result in increased costs and diversion of development resources;

cause us to incur increased charges due to unusable inventory;

require design modifications;

decrease market acceptance of, or customer satisfaction with, our products, which could result in decreased sales and product returns; or

result in lower yields for semiconductor manufacturers.

If any of our products contain defects or have reliability, quality or compatibility problems, our reputation might be damaged and customers might be reluctant to buy our products. We may also face a higher rate of product defects as we increase our production levels. Product defects could result in the loss of existing customers, or impair our ability to attract new customers. In addition, we may not find defects or failures in our products until after they are installed in a semiconductor manufacturer's fabrication facility. We may have to invest significant capital and other resources to correct these problems. Our current or potential customers also might seek to recover from us any losses resulting from defects or failures in our products. Hazardous materials flow through and are controlled by our products and an unintended release of these materials could result in serious injury or death. Liability claims could require us to spend significant time and money in litigation or pay significant damages.

The technology labor market is very competitive, and our business will suffer if we are unable to hire and retain key personnel.

Our future success depends in part on the continued service of our key executive officers, as well as our research, engineering, sales, manufacturing and administrative personnel, most of whom are not subject to employment or non-competition agreements. In addition, competition for qualified personnel in the technology industry is intense, and we operate in geographic locations in which labor markets are particularly competitive. Our business is particularly

Table of Contents

dependent on expertise which only a very limited number of engineers possess. The loss of any of our key employees and officers, including our Chief Executive Officer, Vice President of Engineering, Vice President of Sales and Vice President of Technology, or the failure to attract and retain new qualified employees, would adversely affect our business, operating results and financial condition.

We may not be able to fund our future capital requirements from our operations, and financing from other sources may not be available on favorable terms or at all.

We made capital expenditures of \$1.1 million in 2005, most of which was for facility leasehold improvements and equipment in connection with the establishment of our Shanghai facility, and we made capital expenditures of \$3.3 million in 2004 and \$0.2 million in 2003. The amount of our future capital requirements will depend on many factors, including:

- the cost required to ensure access to adequate manufacturing capacity;
- the timing and extent of spending to support product development efforts;
- the timing of introductions of new products and enhancements to existing products;
- changing manufacturing capabilities to meet new customer requirements; and
- market acceptance of our products.

Although we currently have a credit facility, we may need to raise additional funds through public or private equity or debt financing if our current cash, together with the proceeds to us from this offering, and cash flow from operations are insufficient to fund our future activities. Our credit facility matures on June 30, 2006 and we may not be able to renew it on favorable terms. Future equity financings could be dilutive to holders of our common stock, and debt financings could involve covenants that restrict our business operations. If we cannot raise funds on acceptable terms, if and when needed, we may not be able to develop or enhance our products, take advantage of future opportunities, grow our business or respond to competitive pressures or unanticipated requirements, any of which could adversely affect our business, operating results and financial condition.

Fluctuations in currency exchange rates may adversely affect our financial condition and results of operations.

Our international sales are denominated primarily, though not entirely, in U.S. dollars. Many of the costs and expenses associated with our Shanghai facility are paid in Chinese Renminbi, and we expect our exposure to the Renminbi to increase as we ramp up production in that facility. In addition, purchases of some of our components are denominated in Japanese Yen. Changes in exchange rates among other currencies in which our revenue or costs are denominated and the U.S. dollar may affect our revenue, cost of sales and operating margins. While fluctuations in the value of our revenue, cost of sales and operating margins as measured in U.S. dollars have not materially affected our results of operations historically, we do not currently hedge our exchange exposure, and exchange rate fluctuations could have an adverse effect on our financial condition and results of operations in the future.

Table of Contents

If environmental contamination were to occur in one of our manufacturing facilities, we could be subject to substantial liabilities.

We use substances regulated under various foreign, domestic, federal, state and local environmental laws in our manufacturing facilities. Our failure or inability to comply with existing or future environmental laws could result in significant remediation liabilities, the imposition of fines or the suspension or termination of the production of our products. In addition, we may not be aware of all environmental laws or regulations that could subject us to liability.

If our facilities were to experience catastrophic loss due to natural disasters, our operations would be seriously harmed.

Our facilities could be subject to a catastrophic loss caused by natural disasters, including fires and earthquakes. We have facilities in areas with above average seismic activity, such as our manufacturing and headquarters facilities in Menlo Park, California. If any of our facilities were to experience a catastrophic loss, it could disrupt our operations, delay production and shipments, reduce revenue and result in large expenses to repair or replace the facility. In addition, we have in the past experienced, and may in the future experience, extended power outages at our Menlo Park, California facilities. We do not carry insurance policies that cover potential losses caused by earthquakes or other natural disasters or power loss.

We may not be able to continue to secure adequate facilities to house our operations, and any move to a new facility could be disruptive to our operations.

On January 19, 2006, we extended the lease for our Menlo Park, California, headquarters and manufacturing facility through December 31, 2007. If we are unable to renew our lease on favorable terms after this date we will be forced to relocate all manufacturing, engineering, sales and marketing and administrative functions currently housed in Menlo Park to new facilities. This move could disrupt our operations and we would incur additional costs associated with relocation to new facilities, which could have a material adverse effect on our results of operations.

We must maintain effective controls, and our auditors will report on them.

The Sarbanes-Oxley Act of 2002 requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. We anticipate being classified as an accelerated filer, as defined in Rule 12b-2 of the Securities Exchange Act of 1934, as amended, or Exchange Act, as of the end of the second quarter of fiscal 2006. As a result, our auditors will be required to audit and report on the effectiveness of our internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act, beginning with our Annual Report on Form 10-K for the year ending December 31, 2006. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, our management's attention might be diverted from other business concerns, which could have a material adverse effect on our business, financial condition and operating results. Any failure by us to maintain adequate controls or to adequately implement new controls could harm our operating results or cause us to fail to meet our reporting obligations. Inferior internal controls could also cause investors to lose confidence in our reported financial information, which could adversely affect the trading price of our common stock. In addition, we might need to hire additional accounting and financial staff with

Table of Contents

appropriate public company experience and technical accounting knowledge, and we might not be able to do so in a timely fashion. We will also experience additional costs, especially in 2006, as we complete documentation of our internal control procedures in anticipation of our Section 404 compliance.

Risks related to our ownership by Francisco Partners

We will continue to be controlled by FP-Ultra Clean, L.L.C. as long as FP-Ultra Clean, L.L.C. owns a significant percentage of our common stock, and therefore our other stockholders will be unable to affect the outcome of stockholder voting during such time.

FP-Ultra Clean, L.L.C., an entity controlled by Francisco Partners, L.P., owns approximately 55% of our outstanding common stock and will own approximately 28% of our outstanding common stock upon completion of this offering. Pursuant to a stockholders' agreement, FP-Ultra Clean, L.L.C. has the right to nominate for election a majority of the members of our board of directors for so long as it holds at least 25% of our outstanding common stock.

The stockholders' agreement also provides that our board of directors may not take certain significant actions without the approval of FP-Ultra Clean, L.L.C. as long as FP-Ultra Clean, L.L.C. owns at least 25% of our outstanding common stock. These actions include:

mergers, acquisitions or certain sales of assets;

any liquidation, dissolution or bankruptcy;

issuances of securities;

determination of compensation and benefits for our chief executive officer and chief financial officer;

appointment or dismissal of any of the chairman of our board of directors, chief executive officer, chief financial officer or any other executive officer in any similar capacity;

amendments to the stockholders' agreement or exercise or waiver of rights under the stockholders' agreement;

amendments to our charter or bylaws;

any increase or decrease in the number of directors that comprise our board of directors;

the declaration of dividends or other distributions;

any incurrence or refinancing of indebtedness in excess of \$10 million;

approval of our business plan, budget and strategy; and

modification of our long-term business strategy.

Such power could have the effect of delaying, deterring or preventing a change of control, business combination or other transaction that might otherwise be beneficial to our stockholders. FP-Ultra Clean, L.L.C. also is not prohibited from selling a controlling interest in us to a third party or a participant in our industry.

FP-Ultra Clean, L.L.C. and its designees on our board of directors may have interests that conflict with our interests and the interests of our other stockholders.

FP-Ultra Clean, L.L.C. and its designees on our board of directors may have interests that conflict with, or are different from, our own and those of our other stockholders. Francisco

Table of Contents

Partners, L.P., which controls FP-Ultra Clean, L.L.C., has invested in, or acquired other businesses that are involved in, the semiconductor industry and may invest in or acquire others in the future. Conflicts of interest between FP-Ultra Clean, L.L.C. and us or our other stockholders may arise. Our amended and restated certificate of incorporation does not contain any provisions designed to facilitate resolution of actual or potential conflicts of interest or to ensure that potential business opportunities that may become available to both FP-Ultra Clean, L.L.C. and us will be reserved for, or made available to, us. If an actual or potential conflict of interest develops involving one of our directors, our corporate governance guidelines provide that the director must report the matter immediately to our board of directors and audit committee for evaluation and appropriate resolution. Further, such director must recuse himself or herself from participation in the related discussion and abstain from voting on the matter. Nonetheless, conflicts of interest may not be resolved in a manner favorable to us or our other stockholders. In addition, FP-Ultra Clean, L.L.C. and its director designees could delay or prevent an acquisition, merger or other transaction even if the transaction would benefit our other stockholders. In addition, FP-Ultra Clean, L.L.C.'s significant concentration of share ownership may adversely affect the trading price of our common stock because investors often perceive disadvantages in owning stock in companies with controlling stockholders.

Risks related to the securities markets and ownership of our common stock

Future sales of our common stock by our controlling stockholder could depress our stock price.

Sales of substantial amounts of our common stock by FP-Ultra Clean, L.L.C., or the perception that these sales might occur, may depress prevailing market prices of our common stock. The shares owned by FP-Ultra Clean, L.L.C. are governed by an agreement with us that provides it demand and piggyback registration rights.

The market for our stock is subject to significant fluctuation.

The size of our public market capitalization is relatively small, and the volume of our shares that are traded is low. The market price of our common stock could be subject to significant fluctuations. Among the factors that could affect our stock price are:

quarterly variations in our operating results;

our ability to successfully introduce new products and manage new product transitions;

changes in revenue or earnings estimates or publication of research reports by analysts;

speculation in the press or investment community;

strategic actions by us or our competitors, such as acquisitions or restructurings;

announcements relating to any of our key customers, significant suppliers or the semiconductor manufacturing and capital equipment industry generally;

general market conditions;

the effects of war and terrorist attacks; and

domestic and international economic factors unrelated to our performance.

The stock markets in general, and the markets for technology stocks in particular, have experienced extreme volatility that has often been unrelated to the operating performance of

Table of Contents

particular companies. These broad market fluctuations may adversely affect the trading price of our common stock.

We have broad discretion in how we use our net proceeds from this offering, and we may not use these proceeds in a manner desired by our stockholders.

We expect to use the net proceeds to us from this offering for working capital and other general corporate purposes, including potential acquisitions of companies and technologies that complement our business. We have from time to time considered the acquisition of complementary companies, assets, businesses and technologies and expect to continue to evaluate such acquisition opportunities. Our management will have broad discretion with respect to the use of the net proceeds we receive from this offering. Investors will be relying on the judgment of our management regarding the application of these proceeds. Our management could spend these proceeds in ways which our stockholders may not desire or that do not yield a favorable return. You will not have the opportunity, as part of your investment in our common stock, to influence the manner in which the net proceeds of this offering are used.

Provisions of our charter documents could discourage potential acquisition proposals and could delay, deter or prevent a change in control.

In addition to the provisions of our stockholders' agreement with FP-Ultra Clean, L.L.C. described above, the provisions of our amended and restated certificate of incorporation and bylaws could deter, delay or prevent a third party from acquiring us, even if doing so would benefit our stockholders. These provisions include:

a requirement that special meetings of stockholders may be called only by our board of directors, the chairman of our board of directors, our president or our secretary;

advance notice requirements for stockholder proposals and director nominations; and

the authority of our board of directors to issue, without stockholder approval, preferred stock with such terms as our board of directors may determine.

Table of Contents

Forward-looking statements

This prospectus contains forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements reflect our current views with respect to future events and financial performance. In this prospectus, we use words such as anticipates, believes, plans, expects, future, intends, may, will, should, estimates, predicts, potential, continue and similar to identify these forward-looking statements. This prospectus also contains forward-looking statements attributed to third parties relating to their estimates regarding the growth of our markets. All forward-looking statements address matters that involve risks and uncertainties. Accordingly, you should not rely on forward-looking statements in this prospectus, as there are or will be important factors that could cause our actual results, results of the markets we serve, levels of activity, performance, achievements and prospects to differ materially from the results expressed or implied by these forward-looking statements. These risks, uncertainties and other factors include, among others, those listed in Risk factors, Management's discussion and analysis of financial condition and results of operations and elsewhere in this prospectus. We are under no obligation to update any forward-looking statements after the date of this prospectus, whether as a result of new information, future developments or otherwise.

Dividend policy

We have not paid any cash dividends on our common stock. We intend to retain any future earnings to fund the development and growth of our business and do not anticipate paying any cash dividends in the foreseeable future. Any determination to pay dividends in the future will be at the discretion of our board of directors and, under the terms of our stockholders' agreement, will require the approval of FP-Ultra Clean, L.L.C. for as long as it holds at least 25% of our common stock. In addition, our revolving credit facility contains certain restrictions on payments of cash dividends.

Use of proceeds

Our net proceeds from the sale by us of 1,600,000 shares of common stock in this offering are approximately \$10.2 million at the public offering price of \$7.10 per share, after deducting underwriting discounts and commissions and estimated offering expenses. We will not receive any of the proceeds from the sale of shares of common stock by the selling stockholders. We expect to use the net proceeds to us from this offering for working capital and other general corporate purposes, including potential acquisitions of companies and technologies that complement our business. We have from time to time considered the acquisition of complementary companies, assets, businesses and technologies and expect to continue to evaluate such opportunities. Our management will have broad discretion with respect to the use of the net proceeds we receive from this offering. Investors will be relying on the judgment of our management regarding the application of these proceeds. In addition, any investments, capital expenditures, cash acquisitions or other application of the proceeds may not produce the anticipated results.

Table of Contents**Capitalization**

The following table sets forth our capitalization as of December 31, 2005:

on an actual basis; and

on an as adjusted basis to reflect the sale by us of 1,600,000 shares of common stock in this offering at the public offering price of \$7.10 per share, after deducting underwriting discounts and commissions and estimated offering expenses.

You should read the information set forth below together with the sections of this prospectus entitled "Selected consolidated financial data" and "Management's discussion and analysis of financial condition and results of operations and our financial statements and related notes."

December 31, 2005**(in thousands, except share and per share data)**

	Actual	As adjusted(3)
Long-term debt(1)		
Stockholders' equity:		
Preferred stock, par value \$0.001 per share, 10,000,000 shares authorized; no shares issued and outstanding actual and as adjusted		
Common stock, par value \$0.001 per share, 90,000,000 shares authorized and 16,501,363 shares issued and outstanding actual; 18,101,363 shares issued and outstanding as adjusted(2)	46,819	57,372
Deferred stock-based compensation	(350)	(350)
Retained earnings	8,812	8,487
Total stockholders' equity	55,281	65,509
Total capitalization	55,281	65,509

(1) We have a revolving credit facility which provides for borrowings of up to \$20.0 million, none of which was drawn as of December 31, 2005.

(2) The number of shares of common stock issued and outstanding excludes 2,120,437 shares subject to outstanding options at a weighted average exercise price of \$4.17 per share; 1,213,939 additional shares reserved for issuance under our Amended and Restated 2003 Stock Incentive Plan; and 424,075 shares reserved for issuance under our Employee Stock Purchase Plan.

(3) As adjusted reflects the pro-rata portion of the offering expenses, other than underwriting discounts and commissions, of the selling stockholders in this offering. These expenses will be charged to operations in the quarter in which this offering is completed.

Table of Contents**Market price of common stock**

Our common stock has been traded on the Nasdaq National Market under the symbol UCTT since March 25, 2004. The following table sets forth for the periods indicated the high and low closing sales prices per share of our common stock as reported by the Nasdaq National Market:

	High	Low
Fiscal year 2004		
First quarter (commencing March 25, 2004)	\$7.50	\$7.25
Second quarter	\$8.30	\$7.25
Third quarter	\$7.49	\$4.16
Fourth quarter	\$6.19	\$4.23
Fiscal year 2005		
First quarter	\$6.80	\$5.79
Second quarter	\$7.96	\$6.03
Third quarter	\$7.41	\$5.55
Fourth quarter	\$7.63	\$5.95
Fiscal year 2006		
First quarter (through March 9, 2006)	\$9.80	\$7.15

On March 9, 2006 the closing price of our common stock, as reported on the Nasdaq National Market, was \$7.34. As of February 6, 2006 we had approximately 1,219 stockholders of record.

Table of Contents**Selected consolidated financial data**

The following table sets forth certain of our historical financial data and should be read together with our consolidated financial statements and related notes and Management's discussion and analysis of financial condition and results of operations included elsewhere in this prospectus. These financial data include the accounts of Ultra Clean Holdings, Inc., or Successor, for the years ended December 31, 2005, 2004 and 2003, and for the period from November 16, 2002 through December 31, 2002, and the accounts of Ultra Clean Systems Technology and Services, Inc., or Predecessor, for the period from January 1 through November 15, 2002 and for the year ended December 31, 2001. See Note 1 of our consolidated financial statements for a description of the Ultra Clean acquisition. The selected consolidated balance sheet data as of December 31, 2005 and 2004 and the selected consolidated statements of operations data for the years ended December 31, 2005, 2004 and 2003 have been derived from our audited consolidated financial statements which are included elsewhere in this prospectus. The selected consolidated balance sheet data as of December 31, 2003 and 2002, November 15, 2002 and December 31, 2001 and the selected consolidated statements of operations data for the periods from November 16, 2002 through December 31, 2002 and January 1, 2002 through November 15, 2002 and the year ended December 31, 2001 have been derived from our audited consolidated financial statements not included in this prospectus. Historical results are not necessarily indicative of the results to be expected in the future.

	Successor			Predecessor		
	2005	2004	2003	As of or for the Period from November 16, 2002 through December 31, 2002	As of or for the Period from January 1, 2002 through November 15, 2002	As of or for the Year Ended December 31, 2001

**Management's discussion and analysis of
financial condition and results of operations**

The following discussion should be read in conjunction with our consolidated financial statements included elsewhere in this prospectus. Except for the historical information contained herein, the discussions in this section contain forward-looking statements that involve risks and uncertainties. Actual results could differ materially from those discussed below. See Risk factors and Forward-looking statements for a discussion of these risks and uncertainties.

Overview

General

We are a leading developer and supplier of critical subsystems, primarily for the semiconductor capital equipment industry. We develop, design, prototype, engineer, manufacture and test subsystems which are highly specialized and tailored to specific steps in the semiconductor manufacturing process. Currently, our revenue is derived primarily from the sale of gas delivery systems. We are increasing our revenue related to the sale of other subsystems, including chemical delivery modules, top-plate assemblies, frame assemblies and process modules. Our primary customers are semiconductor equipment manufacturers. Historically the majority of semiconductor equipment manufacturers were vertically integrated. However, as they place greater emphasis on their core competencies, process development and innovation, they rely more heavily on outsourcing the design, development and manufacturing of many of the subsystems that comprise the semiconductor manufacturing equipment they produce. As the requirements they place on their subsystem suppliers increase and the scope of the subsystems they outsource expands, semiconductor equipment manufacturers seek to consolidate their supplier relationships into a reduced number of integrated solution providers.

We provide our customers complete subsystem solutions that combine our expertise in design, test, component characterization and highly flexible manufacturing operations with quality control and financial stability. This combination helps us drive down total manufacturing costs, reduce design-to-delivery cycle times and maintain high quality standards for our customers. We believe these characteristics, as well as our standing as a leading supplier of gas delivery systems, place us in a strong position to benefit from the growing demand for subsystem outsourcing.

A substantial majority of our products consists of gas delivery systems. Our other subsystems, related to semiconductor manufacturing equipment, include chemical delivery modules, top-plate assemblies, frame assemblies and process modules. We operate clean room manufacturing facilities in Menlo Park, California; Austin, Texas; Tualatin, Oregon; and Shanghai, China.

We have in the past considered and will continue to consider acquisitions that will enable us to expand our geographic presence, secure new customers and diversify into complementary products and markets as well as broaden our technological capabilities in semiconductor capital equipment manufacturing.

FP-Ultra Clean, L.L.C., an entity controlled by Francisco Partners, L.P., owns approximately 55% of our outstanding common stock and will own approximately 28% of our outstanding common stock upon completion of this offering. Pursuant to a stockholders' agreement with FP-Ultra Clean, L.L.C., our board of directors may not take certain significant actions without

Table of Contents

the approval of FP-Ultra Clean, L.L.C. as long as it owns at least 25% of our outstanding common stock, including mergers, acquisitions or sales of assets outside the ordinary course of business, the issuance of securities and the incurrence or refinancing of indebtedness in excess of \$10 million.

Cyclical business

Our business and operating results depend in significant part upon capital expenditures by manufacturers of semiconductors, which in turn depend upon the current and anticipated market demand for semiconductors. Historically, the semiconductor industry has been highly cyclical, with recurring periods of over-supply of semiconductor products that have had a severe negative effect on the demand for capital equipment used to manufacture semiconductors. During these periods, we have experienced significant fluctuations in customer orders for our products. Our sales were \$147.5 million in 2005, \$184.2 million in 2004 and \$77.5 million in 2003. In periods during which supply exceeds demand for semiconductor capital equipment, we generally experience significant reductions in customer orders for our products. Sharp decreases in demand for semiconductor capital equipment may lead our customers to cancel forecasted orders, change production quantities from forecasted volumes or delay production, each of which may negatively impact our gross profit as we may be unable to reduce costs quickly and may be required to hold inventory longer than anticipated. In periods during which demand for semiconductor capital equipment exceeds supply, we typically need to quickly increase our production of gas delivery and other subsystems, requiring us to order additional inventory, effectively manage our component supply chain, hire additional employees and expand, if necessary, our manufacturing capacity.

Outsourcing need

We generate a significant portion of our revenue from the sale of gas delivery systems as well as a growing portion from other subsystems. The success of our business and our ability to generate future sales depends on OEMs continuing to outsource the manufacturing of gas delivery systems and other subsystems for their semiconductor capital equipment. Most of the largest OEMs have already outsourced a significant portion of their gas delivery systems. If OEMs do not continue to outsource gas delivery systems for their capital equipment, our revenue would be reduced, which could have a material adverse affect on our business, financial condition and operating results. In addition, if we are unable to obtain additional business as OEMs outsource their production of gas delivery and other subsystems, our business, financial condition and operating results could be adversely affected.

Customer and geographic concentration

A relatively small number of OEM customers have historically accounted for a significant portion of our revenue, and we expect this trend to continue. Applied Materials, Inc., Lam Research Corporation and Novellus Systems, Inc. as a group accounted for 89% of our sales in 2005, 93% of our sales in 2004 and 92% of our sales in 2003. Because of the small number of OEMs in our industry, most of whom are already our customers, it would be difficult to replace lost revenue resulting from the loss of, reduction in, cancellation of or delay in purchase orders by, any one of these customers. Consolidation among our customers may further concentrate our business in a limited number of customers and expose us to increased risks relating to dependence on a small number of customers. In addition, any significant pricing pressure exerted by a key customer could adversely affect our operating results.

Table of Contents

We have had to qualify, and are required to maintain our status, as a supplier for each of our customers. This is a lengthy process that involves the inspection and approval by a customer of our engineering, documentation, manufacturing and quality control procedures before that customer will place volume orders. Our ability to lessen the adverse effect of any loss of or reduction in sales to an existing customer through the rapid addition of one or more new customers is minimal because of these qualification requirements. Consequently, our business, operating results and financial condition would be adversely affected by the loss of, or any reduction in orders by, any of our significant customers. In 2005, 2004 and 2003, 6%, 3% and 4%, respectively, of our total sales were derived from sales outside the United States, based upon the location to which our products were shipped.

Anticipated increased general and administrative costs

The Sarbanes-Oxley Act of 2002, as well as new rules subsequently implemented by the Securities and Exchange Commission, or SEC, the Public Company Accounting Oversight Board and the Nasdaq National Market, have required changes in the corporate governance practices of public companies. We expect these new rules and regulations to increase our legal and financial compliance costs and to make legal, accounting and administrative activities more time-consuming and costly. In particular, we anticipate being classified as an accelerated filer, as defined in Exchange Act Rule 12b-2, as of the end of the second quarter of 2006. As a result, beginning with our Annual Report on Form 10-K for the year ending December 31, 2006, assuming the completion of this offering, our auditors will be required to audit and report on the effectiveness of our internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. We will experience additional costs, especially in 2006, as we complete documentation of our internal control procedures in anticipation of our Section 404 compliance.

Currency fluctuations

Our international sales are denominated primarily, though not entirely, in U.S. dollars. Many of the costs and expenses associated with our Shanghai facility are paid in Chinese Renminbi, and we expect our exposure to the Renminbi to increase as we ramp up production in that facility. In addition, purchases of some of our components are denominated in Japanese Yen. Changes in exchange rates among other currencies in which our revenues or costs are denominated and the U.S. dollar may affect our revenues, cost of sales and operating margins. While fluctuations in the value of our revenues, cost of sales and operating margins as measured in U.S. dollars have not materially affected our results of operations historically, we do not currently hedge our exchange exposure and adverse exchange rate fluctuations could have an adverse effect on our financial condition and results of operations in the future.

Critical accounting policies, significant judgments and estimates

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States, which require us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses and related disclosure at the date of our financial statements. On an ongoing basis, we evaluate our estimates and judgments, including those related to sales, inventories, intangible assets, stock compensation and income taxes. We base our estimates and judgments on historical

Table of Contents

experience and on various other factors that we believe to be reasonable under the circumstances, the results of which form the basis of our judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. We consider certain accounting policies related to revenue recognition, inventory valuation, accounting for income taxes, valuation of intangible assets and goodwill and stock options to employees to be critical policies due to the estimates and judgments involved in each.

Revenue recognition

Our revenue is derived almost exclusively from a few OEM customers in the semiconductor capital equipment and flat panel display industries in the United States. Our standard arrangement for our customers includes a signed purchase order or contract, no right of return of delivered products and no customer acceptance provisions. Revenue from sales of products is recognized when:

we enter into a legally binding arrangement with a customer;

we ship the products;

customer payment is deemed fixed or determinable and free of contingencies or significant uncertainties; and

collection is probable.

Revenue is generally recognized upon shipment of the product. In arrangements which specify title transfer upon delivery, revenue is not recognized until the product is delivered. In addition, if we have not substantially completed a product or fulfilled the terms of the agreement at the time of shipment, revenue recognition is deferred until completion. Determination of criteria in the third and fourth bullet points above is based on our judgment regarding the fixed nature of the amounts charged for the products delivered and the collectability of those amounts.

We assess collectability based on the creditworthiness of the customer and past transaction history. We perform ongoing credit evaluations on, and do not require collateral from, our customers. We have not experienced collection losses in the past. A significant change in the liquidity or financial position of any one customer could make it more difficult for us to assess collectability.

Inventory valuation

We value our inventories at the lesser of standard cost, determined on a first-in, first-out basis, or market value. We assess the valuation of all inventories, including raw materials, work-in-process, finished goods and spare parts on a periodic basis. Obsolete inventory or inventory in excess of our estimated usage is written-down to its estimated market value less costs to sell, if less than its cost. The inventory write-downs are recorded as an inventory valuation allowance established on the basis of obsolete inventory or specific identified inventory in excess of established usage. Inherent in our estimates of market value in determining inventory valuation are estimates related to economic trends, future demand for our products and technological obsolescence of our products. If actual market conditions are less favorable than our projections, additional inventory write-downs may be required. If the inventory value is written down to its net realizable value, and subsequently there is an increased demand for

Table of Contents

the inventory at a higher value, the increased value of the inventory is not realized until the inventory is sold either as a component of a subsystem or as separate inventory.

Accounting for income taxes

The determination of our tax provision is subject to judgments and estimates. The carrying value of our net deferred tax assets, which is made up primarily of tax deductions, assumes we will be able to generate sufficient future income to fully realize these deductions. In determining whether the realization of these deferred tax assets may be impaired, we make judgments with respect to whether we are likely to generate sufficient future taxable income to realize these assets. We have not recorded any valuation allowance against our tax assets because, based on the available evidence, we believe it is more likely than not that we will be able to utilize all of our deferred tax assets in the future. If we do not generate sufficient future income, the realization of these deferred tax assets may be impaired, resulting in an additional income tax expense.

Valuation of intangible assets and goodwill

We periodically evaluate our intangible assets and goodwill in accordance with the Financial Accounting Standards Board, or FASB, Statement of Financial Accounting Standards, or SFAS, No. 142, *Goodwill and Other Intangible Assets*, for indications of impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Intangible assets include goodwill, purchased technology and trade names. Factors we consider important that could trigger an impairment review include significant underperformance relative to historical or projected future operating results, significant changes in the manner of our use of the acquired assets or the strategy for our overall business, or significant negative industry or economic trends. The provisions of SFAS No. 142 also require a goodwill impairment test annually or more frequently if impairment indicators arise. In testing for a potential impairment of goodwill, the provisions of SFAS No. 142 require the application of a fair value-based test at the reporting unit level. We operate in one segment and have one reporting unit as defined by SFAS No. 142. Therefore, all goodwill is considered enterprise goodwill, and the first step of the impairment test prescribed by SFAS No. 142 requires a comparison of our fair value to our book value. If our estimated fair value is less than our book value, SFAS No. 142 requires an estimate of the fair value of all identifiable assets and liabilities of the business in a manner similar to a purchase price allocation for an acquired business. This estimate requires valuations of certain internally generated and unrecognized intangible assets such as in-process research and development and developed technology. Potential goodwill impairment is measured based upon this two-step process. We performed the annual goodwill impairment test as of December 31, 2005 and 2004 and determined that goodwill was not impaired.

Stock options to employees

We account for our employee stock purchase plan and employee stock-based compensation plan in accordance with the provisions of Accounting Principles Board, or APB, Opinion No. 25, *Accounting for Stock Issued to Employees*, and FASB Interpretation, or FIN, No. 44, *Accounting for Certain Transactions Involving Stock Compensation*. Accordingly, no compensation is recognized for purchase rights issued through our employee stock purchase plan or employee stock-based awards granted with exercise prices greater than or equal to the fair value of the underlying common stock at the date of grant. We apply the disclosure provisions of

Table of Contents

SFAS No. 123, *Accounting for Stock-Based Compensation*, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*.

SFAS No. 123 requires the disclosure of pro forma net income as though we had adopted the fair value method since our inception. Under SFAS No. 123, the fair value of stock-based awards to employees is calculated through the use of certain option pricing models, including the Black-Scholes option pricing model. Such models were developed to estimate the fair value of freely tradable, fully transferable options with no vesting restrictions, conditions that differ significantly from our stock option awards. These models also require the use of subjective assumptions, including expected time to exercise, which greatly affect the calculated values.

In December 2004, the FASB issued SFAS No. 123(R), *Share-Based Payments*. SFAS No. 123(R) requires that compensation cost relating to share-based payment transactions be recognized in the financial statements based on the fair value of the equity or liability instruments issued. SFAS No. 123(R) covers a wide range of share-based compensation arrangements, including share options, restricted share plans, performance-based awards, share appreciation rights and employee share purchase plans. In April 2005, the SEC delayed the effective date of SFAS No. 123(R). SFAS No. 123(R) is effective for the Company as of the interim reporting period beginning January 1, 2006. Based on the unvested stock-based awards outstanding at December 31, 2005, we do not anticipate that the adoption of SFAS No. 123(R) will have a material impact on our financial position or results of operations. However, depending on valuation factors such as the price of our common stock, if we grant stock-based awards at a similar volume to what was granted in prior years, the application of SFAS No. 123(R) could have a material impact on our results of operations in future periods.

Results of operations

The following table sets forth statements of operations data for the periods indicated as a percentage of revenue.

	Year ended December 31,		
	2005	2004	2003
Net sales	100.0%	100.0%	100.0%
Cost of goods sold	86.4	84.1	86.8
Gross profit	13.6	15.9	13.2
Operating expenses:			
Research and development	1.6	1.3	1.5
Sales and marketing	2.3	2.0	2.9
General and administrative	7.9	4.9	6.0
Stock and other deferred compensation	0.1	0.4	0.4
Total operating expenses	11.9	8.6	10.8
Income from operations	1.7	7.3	2.4
Interest income (expense) and other, net	0.1	(0.2)	(1.9)
Income before income taxes	1.8	7.1	0.5
Income tax provision (benefit)	0.4	2.5	0.3
Net income	1.4%	4.6%	0.2%

Table of Contents**Year ended December 31, 2005 compared with year ended December 31, 2004*****Net sales***

Net sales for the year ended December 31, 2005 decreased 19.9% to \$147.5 million from \$184.2 million for the year ended December 31, 2004. The decrease reflected softening demand among semiconductor capital equipment manufacturers as the industry coped with weakness in end-market demand. Included in the \$147.5 million in sales for the year ended December 31, 2005 is \$11.5 million related to sales of products other than gas delivery systems, including chemical delivery modules, top-plate assemblies, frame assemblies and process modules as compared to approximately \$2.5 million in 2004.

Gross profit

Cost of goods sold consists primarily of purchased materials, labor and overhead, including depreciation, associated with the design and manufacture of products sold. Gross profit for the year ended December 31, 2005 decreased to \$20.1 million, or 13.6% of net sales, from \$29.2 million, or 15.9% of net sales, for the year ended December 31, 2004. The decrease in gross profit was due primarily to lower factory absorption.

Research and development expense

Research and development expense consists primarily of activities related to new component testing and evaluation, test equipment, design and implementation, new product design and testing and other product development activities. Research and development expense was \$2.4 million for each of the years ended December 31, 2005 and 2004. As a percentage of sales, research and development expense increased to 1.6% of net sales for the year ended December 31, 2005 compared to 1.3% of net sales for the year ended December 31, 2004. This increase was due primarily to a lower revenue base in 2005 as compared to 2004.

Sales and marketing expense

Sales and marketing expense consists primarily of salaries and commissions paid to our sales and service employees, salaries paid to our engineers who work with our sales and service employees to help determine the components and configuration requirements for new products and other costs related to the sales of our products. Sales and marketing expense was \$3.4 million and \$3.6 million for the years ended December 31, 2005 and 2004, respectively. As a percentage of sales, sales and marketing expense increased to 2.3% of net sales for the year ended December 31, 2005 compared to 2.0% of net sales for the year ended December 31, 2004. The increase was due primarily to a lower revenue base in 2005 as compared to 2004.

General and administrative expense

General and administrative expense consists primarily of salaries of our administrative staff and professional fees. General and administrative expense increased to \$11.6 million, or 7.9% of net sales, for the year ended December 31, 2005 from \$9.0 million, or 4.9% of net sales, for the year ended December 31, 2004. The increase was primarily due to \$0.1 million relating to the addition of administrative personnel in China, \$0.8 million in accounting and consulting costs relating to Sarbanes-Oxley 404 compliance, \$0.1 million in severance costs associated with the departure of our former Chief Financial Officer and \$0.7 million in expenses related to a potential acquisition, discussions for which were terminated in the fourth quarter of 2005.

Table of Contents

Stock and other deferred compensation

Stock and other deferred compensation for the year ended December 31, 2005 was \$0.2 million compared to \$0.8 million for the year ended December 31, 2004. This decrease was primarily attributable to the absence of stock charges relating to the vesting of our Series A Senior Notes following our initial public offering in 2004.

Interest and other income (expense), net

Interest and other income (expense) for the year ended December 31, 2005 increased to \$0.1 million from \$(0.4) million for the year ended December 31, 2004, an increase of \$0.5 million. The increase in interest and other income (expense), net over the comparable prior period is primarily attributable to increased income earned on higher cash balances and a decline in interest expense as a result of the retirement of all of our outstanding Series A Senior Notes in 2004.

Income tax provision

Our effective tax rate for the year ended December 31, 2005 was 26.0% compared to 34.5% for the year ended December 31, 2004. Our effective tax rate is substantially impacted by several items including the extraterritorial income exclusion, Section 199 deduction for domestic production activities and the effect of foreign operations. The decreased rate in 2005 primarily reflects a change in our geographic mix of worldwide earnings and tax benefits associated with the extraterritorial income exclusion.

Year ended December 31, 2004 compared with year ended December 31, 2003

Net sales

For the year ended December 31, 2004, net sales increased 137.6%, or \$106.7 million to \$184.2 million from \$77.5 million for the year ended December 31, 2003. An increase in end user demand for semiconductors during 2004 resulted in increased demand in the semiconductor capital equipment industry and therefore increased demand for our gas delivery systems. In addition, we began shipping frame assemblies in the second quarter of 2004 and top-plate assemblies in the fourth quarter of 2004. These new product shipments contributed \$2.5 million to revenue in 2004.

Gross profit

Gross profit for the year ended December 31, 2004 increased 186.2% to \$29.2 million from \$10.2 million for the year ended December 31, 2003, an increase of approximately \$19.0 million. Gross profit as a percentage of sales increased to 15.9% for the year ended December 31, 2004 compared to 13.2% for the year ended December 31, 2003. The increase in gross profit from the year ended December 31, 2003 was primarily attributable to sharply higher sales and production of gas delivery systems. In addition, the increased production resulted in significantly higher factory utilization and therefore we were able to absorb more fixed costs and costs of operations, resulting in higher gross profit as a percentage of sales. We also implemented several cost containment measures during the second half of 2004, including work force reductions and mandatory time-off.

Table of Contents***Research and development expense***

Research and development expense for the year ended December 31, 2004 increased 108.9% to \$2.4 million from \$1.2 million for the year ended December 31, 2003, an increase of approximately \$1.2 million. The increase in spending was due to an increase in engineering activity associated with new product design, test equipment and other product development activities including a new product design and customer-specific design modifications for our next-generation catalytic steam generator. As a percentage of sales, however, research and development expense decreased to 1.3% for the year ended December 31, 2004 compared to 1.5% for the year ended December 31, 2003. This decrease in research and development expense as a percentage of sales was attributable to the steep increase in total net sales.

Sales and marketing expense

Sales and marketing expense for the year ended December 31, 2004 increased 56.8% to \$3.6 million from \$2.3 million for the year ended December 31, 2003, an increase of approximately \$1.3 million. This increase in sales and marketing expense was primarily attributable to approximately \$0.9 million in additional compensation paid to our sales and service employees due to the higher revenue generated, and the balance of the increase was due to increased travel expense, approximately \$0.1 million in costs associated with evaluation units and product samples, and increased sales activities by our engineers. Sales and marketing expense as a percentage of sales decreased to 2.0% for the year ended December 31, 2004 compared to 2.9% for the year ended December 31, 2003 due to the significantly higher sales in 2004 compared to 2003.

General and administrative expense

General and administrative expense for the year ended December 31, 2004 increased 91.8% to \$9.0 million from \$4.7 million for the year ended December 31, 2003, an increase of \$4.3 million. General and administrative expense as a percentage of sales decreased to 4.9% for the year ended December 31, 2004 compared to 6.0% for the year ended December 31, 2003. We experienced higher general and administrative expense in 2004, primarily due to approximately \$1.9 million in costs attributable to the addition of new administrative employees as a result of our significantly higher levels of manufacturing activity, approximately \$1.4 million in costs related to legal, accounting, consulting, insurance and other fees associated with our becoming a public company, and approximately \$0.5 million for costs associated with the startup activities of our Shanghai facility. Also included in general and administrative expense in 2004 was \$0.5 million for costs associated with consideration of an acquisition that we decided not to pursue during the third quarter.

Stock and other deferred compensation

Stock and other deferred compensation expense for the year ended December 31, 2004 was \$0.8 million compared to \$0.3 million in 2003. This increase was primarily attributable to the vesting of our Series A Senior Notes following our initial public offering.

Interest expense

Interest expense for the year ended December 31, 2004 decreased to \$0.4 million from \$1.5 million for the year ended December 31, 2003, a decrease of \$1.1 million. This decrease in interest expense was attributable to the retirement of our Series A Senior Notes issued in the fourth quarter of 2002 in connection with the Ultra Clean acquisition. This retirement of debt occurred after our initial public offering in the first quarter of 2004.

Table of Contents**Provision for income taxes**

Provision for income taxes for the year ended December 31, 2004 was \$4.5 million compared to \$0.2 million for the year ended December 31, 2003. This increase was primarily attributable to the increase in taxable income for the year ended December 31, 2004. The effective tax rate for 2004 was 34.5% compared to 68.2% in 2003. The effective tax rate for the year ended December 31, 2004 was slightly less than the statutory rate of 35% primarily as a result of a tax benefit from exempt income, which was almost entirely offset by foreign operations, state income taxes and non-deductible expenses. For the year ended December 31, 2003, the effective tax rate was higher than the statutory rate due to the mix of state taxable income and losses in Texas combined with a consolidated net income of approximately breakeven.

Unaudited quarterly financial results

The following table sets forth our statement of operations data for the periods indicated. The information for each of these periods is unaudited and has been prepared on the same basis as our audited consolidated financial statements included elsewhere in this prospectus and includes all adjustments, consisting only of normal recurring adjustments, that we consider necessary for a fair presentation of our unaudited operations data for the periods presented. Historical results are not necessarily indicative of the results to be expected in the future.

	2005				2004				2003			
	March 31,	June 30,	September 30,	December 31,	March 31,	June 30,	September 30,	December 31,	March 31,	June 30,	September 30,	December 31,

Our operating results for 2005 reflect a slowdown in industry demand that began in late 2004. As a result, revenues and gross margins for the year ended December 31, 2005 declined in comparison with the year ended December 31, 2004. Net sales for the year ended December 31, 2005 decreased 19.9% to \$147.5 million from \$184.2 million for the year ended December 31, 2004. Gross profit for the year ended December 31, 2005 also decreased to \$20.1 million, or 13.6% of net sales, from \$29.2 million, or 15.9% of net sales, for the year ended December 31, 2004. As a result, net income for the year ended December 31, 2005 declined 76.5% to \$2.0 million from \$8.5 million for the year ended December 31, 2004.

Table of Contents

Liquidity and capital resources

We require capital principally to fund our working capital needs, satisfy our debt obligations, maintain our equipment and purchase new capital equipment. As of December 31, 2005, we had cash of \$10.7 million compared to \$11.4 million as of December 31, 2004. We estimate that our net proceeds from this offering will be approximately \$10.2 million at the public offering price of \$7.10 per share, after deducting underwriting discounts and commissions and estimated offering expenses. We expect to use the net proceeds for working capital and other general corporate purposes, including potential acquisitions of companies and technologies that complement our business. See Use of proceeds.

Net cash used in operating activities for the year ended December 31, 2005 was \$3.2 million compared to cash provided by operating activities of \$4.0 million for the year ended December 31, 2004. Cash flows were negatively impacted by a \$6.5 million reduction in net income and a \$0.7 million reduction in accounts payable as compared to the prior fiscal year.

Net cash used in investing activities for the year ended December 31, 2005 was \$0.5 million compared to \$3.3 million for the year ended December 31, 2004. The decrease was due primarily to higher levels of equipment purchases for our Shanghai facility in the prior year.

Net cash provided by financing activities for the year ended December 31, 2005 decreased \$1.9 million to \$2.9 million from \$4.7 million in the year ended December 31, 2004. We generated cash of \$2.3 million in fiscal 2005 through bank borrowings, which were used primarily to fund start-up costs at our Shanghai facility and \$0.6 million from the sale of our common stock. Net cash provided by financing activities for the year ended December 31, 2004 included the net proceeds from our initial public offering, partially offset by the retirement of our Series A Senior Notes.

We anticipate that our operating cash flow, together with the net proceeds to us from the offering and available borrowings under our revolving credit facility, will be sufficient to meet our working capital requirements, capital lease obligations, expansion plans and technology development projects for at least the next twelve months. The adequacy of these resources to meet our liquidity needs beyond that period will depend on our growth, the cyclical expansion or contraction of the semiconductor capital equipment industry and capital expenditures required to meet possible increased demand for our products.

Revolving credit facility

In November 2004, we entered into a loan and security agreement, which we have since amended, providing for revolving loans of up to \$20.0 million (with a \$5.0 million sublimit for letters of credit). The loan and security agreement contains certain financial covenants, including a tangible net worth target and minimum profitability and liquidity ratios. Borrowings under the loan and security agreement bear interest, at our option, at a rate equal to 1.5% per annum plus LIBOR or the reference rate established from time to time by the lender. Interest is payable monthly, and the loan and security agreement matures on June 30, 2006. At any time prior to the maturity date, we may elect to convert up to \$10.0 million of outstanding borrowings into a three-year term loan with quarterly payments of principal and interest. This term loan would bear interest, at our option, at a rate equal to 1.75% per annum plus LIBOR or 0.25% plus the reference rate. Obligations under the agreement are secured by a lien on substantially all of our assets. The obligations will be guaranteed by our domestic subsidiaries, and such guarantees will be secured by a lien on substantially all of their assets.

Table of Contents

During the first quarter of 2005, we entered into a loan and security agreement providing for a borrowing facility of up to \$3.0 million with a bank in China. The borrowing facility is secured by a standby letter of credit issued under our credit facility. The weighted average interest rate on borrowings under the facility was 5.2% per annum at December 31, 2005. As of December 31, 2005, the balance outstanding under the facility was \$2.3 million, a portion of which was repayable in Renminbi.

Capital expenditures

We made capital expenditures of \$1.1 million in the year ended December 31, 2005, most of which was for facility leasehold improvements and equipment in connection with the establishment of our Shanghai facility, \$3.3 million on capital expenditures for the year ended December 31, 2004 and \$0.2 million for the year ended December 31, 2003.

Contractual obligations and contingent liabilities and commitments

Other than operating leases for certain equipment and real estate, we have no off-balance sheet transactions, unconditional purchase obligations or similar instruments and, other than with respect to the revolving credit facility described above, we are not a guarantor of any other entities' debt or other financial obligations. The following table presents a summary of our future minimum lease payments:

(In thousands)	Year ending December 31,					Total
	2006	2007	2008	2009	2010	
Purchase obligations	\$26,040					\$26,040
Capital lease obligations	79	55	24	4		162
Operating lease obligations(1)	1,238	962	309	71		2,580
Total	\$27,357	\$1,017	\$333	\$75	\$	\$28,782

(1) Operating lease expense reflects the fact that (a) the lease for our headquarters facility in Menlo Park, California, expires on December 31, 2007 and (b) the lease for our manufacturing facility in Tualatin, Oregon, expires on November 7, 2007. We have an option to renew our lease in Tualatin, which we expect to exercise. Operating lease expense set forth above is expected to increase upon renewal of these leases.

Quantitative and qualitative disclosures about market risk

Market risk represents the risk of changes in value of a financial instrument caused by fluctuations in interest rates, foreign exchange rates or equity prices. During the first quarter of 2005, we entered into a loan and security agreement providing for revolving loans of up to \$3.0 million with a bank in China. As of December 31, 2005, the balance outstanding under the revolving loans was \$2.3 million, a portion of which is repayable in Renminbi. If we enter into future borrowing arrangements or borrow under our existing revolving credit facility, we may seek to manage our exposure to interest rate changes by using a mix of debt maturities and variable- and fixed-rate debt, together with interest rate swaps where appropriate, to fix or lower our borrowing costs. We do not make material sales in currencies other than the U.S. dollar or have material purchase obligations outside of the United States, except in China where we had purchase commitments totaling \$2.3 million in U.S. dollar equivalents. We have performed a sensitivity analysis assuming a hypothetical 10-percent movement in foreign currency exchange rates and interest rates applied to the underlying exposures described above. As of December 31, 2005, the analysis indicated that such market movements would not have a material effect on our business, financial condition or results of operations. Although we do not anticipate any significant fluctuations, there can be no assurance that foreign

Table of Contents

currency exchange risk will not have a material impact on our financial position, results of operations or cash flow in the future.

Recently adopted accounting standards

In November 2004, the FASB issued SFAS No. 151, *Inventory Costs – an amendment of ARB No. 43, Chapter 4*. SFAS No. 151 amends the guidance in ARB No. 43, Chapter 4, *Inventory Pricing*, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material (spoilage). This statement requires that these costs be recognized as current-period charges and requires that production overhead be based on the normal capacity of the production facilities. We do not expect the adoption of SFAS No. 151 in 2006 to have a material effect on our consolidated financial statements.

In December 2004, the FASB issued SFAS No. 123(R), *Share-Based Payments*. SFAS No. 123(R) requires that compensation cost relating to share-based payment transactions be recognized in the financial statements based on the fair value of the equity or liability instruments issued. SFAS No. 123(R) covers a wide range of share-based compensation arrangements, including share options, restricted share plans, performance-based awards, share appreciation rights and employee share purchase plans. In April 2005, the SEC delayed the effective date of SFAS No. 123(R). SFAS No. 123(R) is effective for the Company as of the interim reporting period beginning January 1, 2006. Based on the unvested stock-based awards outstanding at December 31, 2005, we do not anticipate that the adoption of SFAS No. 123(R) will have a material impact on our financial position or results of operations. However, depending on valuation factors such as the price of our common stock, if we grant stock-based awards at a similar volume to what was granted in prior years, then the application of SFAS No. 123(R) could have a material impact on our results of operations in future periods.

In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections*, which replaces APB 20, *Accounting Changes*, and SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements – an amendment of APB 28*. SFAS No. 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application, or the earliest practicable date, as the required method for reporting a change in accounting principle and restatement with respect to the reporting of a correction of an error. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We do not expect the adoption of SFAS No. 154 in the first quarter of fiscal 2006 to have a material effect on our financial position or results of operations.

In June 2005, the Emerging Issues Task Force, or EITF, reached a consensus on Issue No. 05-06, *Determining the Amortization Period for Leasehold Improvements*. EITF 05-06 provides guidance for determining the amortization period used for leasehold improvements acquired in a business combination or purchased after the inception of a lease (collectively referred to as subsequently acquired leasehold improvements). EITF 05-06 provides that the amortization period used for the subsequently acquired leasehold improvements to be the lesser of (a) the subsequently acquired leasehold improvements' useful lives, or (b) a period that reflects renewals that are reasonably assured upon the acquisition or the purchase. EITF 05-06 is effective on a prospective basis for subsequently acquired leasehold improvements purchased or acquired in periods beginning after the date of the FASB's ratification, which was on June 29, 2005. The adoption of EITF 05-06 did not have a material effect on our financial position or results of operations.

Table of Contents

Business

Overview

We are a leading developer and supplier of critical subsystems, primarily for the semiconductor capital equipment industry. We develop, design, prototype, engineer, manufacture and test subsystems which are highly specialized and tailored to specific steps in the semiconductor manufacturing process. Currently, our revenue is derived primarily from the sale of gas delivery systems. We are increasing our revenue related to the sale of other subsystems, including chemical delivery modules, top-plate assemblies, frame assemblies and process modules. Our primary customers are semiconductor equipment manufacturers. Historically, the majority of semiconductor equipment manufacturers were vertically integrated. However, as they place greater emphasis on their core competencies, process development and innovation, they rely more heavily on outsourcing the design, development and manufacturing of many of the subsystems that comprise the semiconductor manufacturing equipment they produce. As the requirements they place on their subsystem suppliers increase and the scope of the subsystems they outsource expands, semiconductor equipment manufacturers seek to consolidate their supplier relationships into a reduced number of integrated solution providers.

We provide our customers complete subsystem solutions that combine our expertise in design, test, component characterization and highly flexible manufacturing operations with quality control and financial stability. This combination helps us to drive down total manufacturing costs, reduce design-to-delivery cycle times and maintain quality standards for our customers. We believe these characteristics, as well as our standing as a leading supplier of gas delivery systems, place us in a strong position to benefit from the growing demand for subsystem outsourcing.

We had sales of \$147.5 million, \$184.2 million and \$77.5 million for the years ended December 31, 2005, 2004 and 2003, respectively. Our three largest customers in 2005 were Applied Materials, Inc., Lam Research Corporation and Novellus Systems, Inc.

Industry background

The manufacture of semiconductors is a highly complex process. Bare silicon wafers undergo a series of chemical, mechanical and physical process steps in order to form hundreds and often thousands of integrated circuits on a single wafer. During the manufacturing process, a wafer may cycle through each process step multiple times before manufacturing is complete and each integrated circuit is fully formed. As the manufacturing process becomes more complex, semiconductor manufacturers frequently add new capital equipment in order to reduce costs, add capacity or accommodate technologically advanced manufacturing processes for next-generation semiconductor devices. The introduction of new materials, as well as advances in manufacturing processes, including smaller line-width technologies, have enabled semiconductor manufacturers to increase dramatically the complexity and functionality of semiconductor devices. As new, more complex devices are developed, the manufacturing techniques used to produce them require greater focus on process development and innovation, and on the integration of processes into the overall process flow.

A semiconductor manufacturing tool typically consists of a reaction chamber, within which gases and chemicals react to deposit or etch thin films on the wafer, and multiple subsystems.

Table of Contents

Subsystems are highly specialized and tailored to each step in the manufacturing process as well as to the specific requirements of OEMs and of their end users, the semiconductor manufacturers. Examples of subsystems include:

Gas delivery systems which control the flow, pressure, sequencing and mixing of speciality gases into and out of the reaction chamber;

Chemical delivery modules which deliver gases and reactive chemicals from a centralized subsystem to the reaction chamber and may include gas delivery systems as well as liquid and vapor delivery systems;

Top-plate assemblies which form the top portion of the reaction chamber and include the various electrical and mechanical components used to control the process in the reaction chamber;

Frame assemblies which form the support structure to which all other assemblies are attached; and

Process modules which refer to the larger subsystems of a semiconductor manufacturing tool and include several of the smaller subsystems such as gas delivery systems, chemical delivery modules, top-plate assemblies, frame assemblies and process modules, as well as the reaction chamber and electronic, pneumatic and mechanical subsystems.

Historically, the majority of semiconductor equipment manufacturers were vertically integrated; they internally designed and manufactured the semiconductor manufacturing tool, including the reaction chamber and all associated subsystems. However, as semiconductor equipment manufacturers place greater emphasis on their core competencies, process development and innovation, they rely more heavily on outsourcing the design, development and manufacturing of many of the subsystems that comprise the semiconductor manufacturing equipment they produce. Outsourcing allows semiconductor equipment manufacturers to drive down total manufacturing costs, reduce design-to-delivery cycle times and maintain high quality standards. As the requirements they place on their subsystem suppliers increase and the scope of the subsystems they outsource expands, semiconductor equipment manufacturers seek to consolidate their supplier relationships into a reduced number of integrated solution providers. As a result, OEMs require their preferred suppliers to deliver:

Increased operational flexibility. To manage cyclical shifts in demand, OEMs increasingly look to augment the flexibility and scalability of their operations through outsourcing. Outsourcing allows OEMs to take advantage of subsystem suppliers' inventory and supply chain management capabilities, as well as their purchasing power and ability to manufacture in low cost regions.

Reduced design-to-delivery cycle times. Because of the complexity of semiconductor manufacturing processes, OEMs must produce highly customized equipment that meets the unique demands of semiconductor device manufacturers. This factor is complicated by the fact that semiconductor device manufacturers increasingly require shorter lead times from equipment manufacturers and frequently alter their design requirements. As a result, equipment manufacturers expect their suppliers to produce highly integrated subsystems, with very short lead times, that can be modified at any stage of the manufacturing process.

Engineering and manufacturing expertise. As OEMs increase their focus on process development and innovation and refine their integration and testing techniques, they require suppliers to develop technical excellence and deliver reliable, high quality subsystems. As a

Table of Contents

result, suppliers must develop design proficiency as well as component characterization and test capabilities in order to develop solutions that are easy to implement and capable of evolving at a pace consistent with technological change.

Integration of manufacturing processes. The complexities involved in the manufacture of semiconductor equipment require subsystem suppliers to remain closely integrated with their OEM customers. By maintaining a presence in close proximity to OEM facilities, suppliers enable OEMs to benefit from production efficiencies and improve design-to-delivery cycle times.

As the need for outsourcing becomes more prevalent, semiconductor equipment manufacturers increase their demands on subsystem suppliers and seek to consolidate their supplier relationships into a reduced number of integrated solution providers.

Our solution

We are a leading developer and supplier of critical subsystems for the semiconductor capital equipment industry. Our products enable our OEM customers to realize lower manufacturing costs and reduced design-to-delivery cycle times while maintaining high quality standards.

We offer our customers:

An integrated outsourced solution for gas delivery systems and other subsystems. We provide our OEM customers a complete outsourced solution for the development, design, prototyping, engineering, manufacturing and testing of advanced gas delivery systems, one of the most critical and technologically complex elements of semiconductor capital equipment. We also provide outsourced solutions for chemical delivery modules, top-plate assemblies, frame assemblies and process modules. We combine highly specialized engineering and manufacturing capabilities to produce high performance products that are customized to meet the needs of our customers, as well as their respective end users, and that comply with applicable safety and environmental regulations and industry standards. We also perform comprehensive testing and qualification of final subsystems and provide our customers with a consolidated report of the key components used and the range of performance features for each subsystem we manufacture. We manage supply chain logistics in an effort to reduce the overall number of suppliers and inventory levels that our customers would otherwise be required to manage. In addition, we believe we are often in a position to negotiate reduced component prices due to our large volume orders. As a result, we are able to help our customers improve their level of manufacturing efficiency, capital utilization and product operating characteristics.

Improved design-to-delivery cycle times. Our strong relationships with our customers and intimate familiarity with their products and requirements help us reduce design-to-delivery cycle times for gas delivery systems and other subsystems. Our design teams are highly integrated with customer design teams and we have optimized our supply chain management, design and manufacturing coordination and controls to respond rapidly to order requests. These steps have enabled us to decrease design-to-delivery cycle times for our customers and reduce the amount of inventory we carry, allowing us to modify product designs quickly in response to end users' frequent design changes and lower total manufacturing costs.

Component neutral design and manufacturing. A typical gas delivery system consists of one or more gas lines, comprised of several filters, mass flow controllers, regulators, pressure

Table of Contents

transducers and valves, associated interconnect tubing and an integrated electronic and/or pneumatic control system. Other subsystems are equally complex and may consist of several disparate components or subsystems. We do not manufacture any of the components within our gas delivery systems and other subsystems ourselves and are therefore component neutral. This enables us to work with our customers to select the most appropriate components for incorporation into their subsystems. Our component neutral position also enables us to recommend components on the basis of technology, performance and cost and to optimize our customers' overall designs based on these criteria. In addition, our component neutral approach allows us to maintain close relationships with a wide range of component suppliers.

Component testing capabilities. We utilize our engineering expertise to test and characterize key components and subsystems, including mass flow controllers, regulators, pressure transducers, filters, liquid flow controllers and valves that we incorporate into our subsystems. We have made significant investments in advanced analytical and automated test equipment to test and qualify key components. We can perform diagnostic tests, design verification and failure analysis for customers and suppliers. Because we are component neutral, we can objectively test and assess a wide range of components. In addition, our analytical and testing capabilities enable us to evaluate multiple supplier component technologies and provide customers with a wide range of appropriate component and design choices for their subsystems. This approach also helps us anticipate technological changes and drive requirements for next-generation components.

Increased integration with OEMs through local presence. As technologies surrounding the manufacture of semiconductors evolve at a rapid pace, manufacturers demand faster response times from OEMs in order to provide next-generation equipment within constrained timeframes. Our local presence in close proximity to the facilities of most of our OEM customers enables us to remain closely integrated with their design, development and implementation teams. This level of integration enables us to respond quickly and efficiently to customer changes and requests.

Our strategy

Our objective is to maintain our position as a leading developer and supplier of gas delivery systems and become a leading developer and supplier of other critical subsystems, primarily for the semiconductor capital equipment industry.

Our strategy is comprised of the following key elements:

Continue to expand our market share with OEMs. We have been able to expand our addressable market by leveraging our experience with gas delivery systems to provide other subsystems, such as chemical delivery modules, top-plate assemblies, frame assemblies and process modules. We believe that the increase in outsourcing among OEMs creates a significant market opportunity for us to grow our business with existing and new customers. We believe that our continued focus on efficient manufacturing, reduced design-to-delivery cycle times and quality and reliability will also allow us to gain market share.

Leverage our expanding geographic presence in lower cost manufacturing regions. In March 2005, we completed construction of a manufacturing facility in Shanghai, China, allowing us to expand production in a low cost region. This facility puts us in close proximity to the manufacturing facilities of potential customers and their end users.

Table of Contents

Drive profitable growth with our flexible cost structure. The demand characteristics of the semiconductor capital equipment industry require that we maintain a lean, highly flexible cost structure. We implement cost containment and capacity enhancement initiatives throughout the semiconductor capital equipment demand cycle and benefit greatly from our supply chain efficiencies. In addition, we believe our Shanghai facility positions us to respond effectively to future business demands.

Selectively pursue strategic acquisitions. We may choose to accelerate the growth of our business by selectively pursuing strategic acquisitions. We have in the past considered and will continue to consider acquisitions that will enable us to expand our geographic presence, secure new customers and diversify into complementary products and markets as well as broaden our technological capabilities in semiconductor capital equipment manufacturing.

Products

We develop, design, prototype, engineer, manufacture and test subsystems, primarily for the semiconductor capital equipment industry. A substantial majority of our products consist of gas delivery systems that enable the precise delivery of numerous specialty gases used in a majority of the key steps in the semiconductor manufacturing process, including deposition, etch, chemical mechanical planarization (a process used to polish off high spots on wafers or films deposited on wafers), cleaning and annealing. Our gas delivery systems control the flow, pressure, sequencing and mixing of specialty gases into and out of the reaction chambers of semiconductor manufacturing tools. Our products also include other subsystems, including chemical delivery modules, top-plate assemblies, frame assemblies and process modules.

Gas delivery systems. A typical gas delivery system consists of one or more gas lines, comprised of several filters, mass flow controllers, regulators, pressure transducers and valves, associated interconnect tubing and an integrated electronic and/or pneumatic control system. These systems are mounted on a pallet and are typically enclosed in a sheet metal encasing.

The following diagram depicts a typical gas delivery system configuration:

Table of Contents

Mass flow controllers control the amount of gas flowing into the process chambers.

Pressure transducers display and transmit a signal of gas pressure.

Valves provide positive shut-off for the gas stream, either by pneumatic control or manual operation.

Our gas delivery system designs are developed in collaboration with our customers and are customized to meet the needs of specific OEMs. We do not sell standard systems. Our customers either specify the particular brands of components they want incorporated into a particular system or rely on our design expertise and component characterization capabilities to help them select the appropriate components for their particular system.

Chemical delivery modules. Chemical delivery modules deliver gases and reactive chemicals from a centralized subsystem to the reaction chamber and may include gas delivery systems, as well as liquid and vapor delivery systems.

Top-plate assemblies. Top-plate assemblies form the top portion of the reaction chamber within which gases controlled by our gas delivery systems react to form thin films or etch films on the wafer.

Frame assemblies. Frame assemblies are steel tubing that form the support structure to which all other assemblies are attached and include pneumatic harnesses and cables that connect other subsystems together.

Process modules. Process modules refer to the larger subsystems of semiconductor manufacturing tools that process integrated circuits onto wafers. Process modules include several smaller subsystems such as the frame assembly, top-plate assembly and gas and chemical delivery module, as well as the chamber and electronic, pneumatic and mechanical subsystems.

Table of Contents

We began shipping frame assemblies in the second quarter of 2004, top-plate assemblies in the fourth quarter of 2004 and chemical delivery modules in the first quarter of 2005. We began manufacturing process modules for a semiconductor equipment manufacturer in our Menlo Park facility in the second quarter of 2005 and from our Shanghai facility in the third quarter of 2005. We shipped a total of 30 process modules in 2005 from our Menlo Park and Shanghai facilities. In addition, we began shipping a catalytic steam generator in the first quarter of 2004.

Design, engineering and manufacturing

We are able to produce reliable, cost-effective systems as a result of our proven design, engineering, manufacturing and testing expertise and our attention to quality.

Design and engineering. We provide our customers design, configuration and engineering services for their gas delivery systems. As of December 31, 2005, our engineering department consisted of 52 engineers, drafters and configuration analysts. Our engineers work on-site at several of our customers facilities.

We help our customers develop new product designs and clarify and define their semiconductor manufacturing tool requirements. Our component neutral position allows us to recommend components on the basis of technology, performance and cost and to optimize our overall designs based on these criteria. Our engineers design customized subsystem solutions that address customer needs in a cost-effective manner. In addition, our engineers identify the appropriate components for a particular design and release the order for these components early in the development process so that material procurement can occur prior to the end of the development cycle. Our configuration analysts and drafters define and release to our customers a documentation package for each system. In addition, our design expertise helps ensure that new product designs will comply with applicable safety and environmental regulations and industry standards.

Manufacturing. Our manufacturing capabilities consist of precision welding, assembly and testing services. The breadth of our capabilities enables us rapidly to develop manufacturing specifications, provide precise and repeatable manufacturing and perform final assembly and test of complex integrated gas delivery systems and other subsystems. We operate clean room manufacturing facilities in Menlo Park, California; Austin, Texas; Tualatin, Oregon; and Shanghai, China. We selected these locations to be near our key customers, which facilitates regular interaction with these customers. In addition, our Shanghai facility enables us to access low cost manufacturing. Each of our manufacturing facilities is ISO 9001:2000 certified and has been qualified by our customers with respect to the products we build for them.

Our manufacturing process is highly flexible, which enables our customers to make alterations to their requirements throughout the design, engineering and manufacturing process. This results in decreased design-to-delivery cycle times for our customers. We use product data management software, which works directly with our manufacturing resource planning system, to streamline the procurement, inventory management and manufacturing processes.

Supply-chain management. We use a wide range of components and materials obtained from a large number of sources in the production of our gas delivery systems, including filters, mass flow controllers, regulators, pressure transducers and valves. We use consignment material and just-in-time stocking programs to manage our inventories in response to changing customer requirements. These approaches enable us to reduce our inventory levels and maintain flexibility in response to changes in product demand. We believe our close relationships with key suppliers allow us to receive a level of supplier support that substantially strengthens our

Table of Contents

competitive position. Furthermore, we believe we are often able to negotiate reduced component prices due to our large volume orders.

Testing. We design and build automated test equipment for use on the manufacturing floor to test finished subsystems for full functionality and reliability. The automated test fixtures are design-specific for gas delivery system and subsystem testing and provide a detailed data package on each system shipped. In addition, we qualify key components, such as mass flow controllers, valves, regulators and pressure transducers prior to integration into our gas delivery systems and each gas delivery system is verified to a zero particle level. During the manufacturing process, all functions of a subsystem are tested to ensure that components operate correctly and pneumatic logic is correct as designed and built. Test data are made available to customers and subsystems shipped from our manufacturing facilities are digitally photographed, providing a permanent inspection record of the product.

Quality control. Each of our manufacturing facilities is ISO 9001:2000 certified. Our quality management system allows us to access real-time corrective action reports, nonconformance reports, customer complaints and controlled documentation. In addition, each quarter our senior management reviews the effectiveness of our quality control systems, and we survey our customers to measure satisfaction.

As a result of our commitment to, and strict compliance with, quality standards, we have received several service and quality awards from key customers for our performance and quality business processes. We were awarded the Novellus Outstanding Services Award in 2001 and 2002, the Novellus Outstanding Quality Award in 2002 and 2003 and the Lam Research Supplier Excellence Award in 2003. In addition, we received Supplier Quality Certification from Applied Materials, Inc. in 2003 and 2004.

Customers

We sell our products to semiconductor capital equipment manufacturers. This industry is highly concentrated and we are therefore highly dependent upon a small number of customers. Our three largest customers in 2005 were Applied Materials, Inc., Lam Research Corporation and Novellus Systems, Inc. The following table sets forth the percentages of our total net sales to our three largest customers in each period presented:

	Year ended December 31,		
	2005	2004	2003
Customer A	40%	49%	47%
Customer B	31%	28%	21%
Customer C	18%	16%	24%
Three largest customers as a group	89%	93%	92%

We have successfully qualified as a supplier with each of our customers. This lengthy qualification process involves the inspection and audit of our facilities and evaluation by our customers of our engineering, documentation, manufacturing and quality control processes and procedures before that customer places orders for our products. Our customers generally place orders with suppliers who have met and continue to meet their qualification criteria.

Table of Contents

Sales and support

We sell our products through our direct sales force which, as of December 31, 2005, consisted of a total of 17 sales directors, account managers and sales support staff. Our sales directors are responsible for establishing sales strategy and setting the objectives for specific customer accounts. Each account manager is dedicated to a specific customer account and is responsible for the day-to-day management of that customer. Account managers work closely with customers and in many cases provide on-site support. Account managers often attend customers' internal meetings related to production, engineering design and quality to ensure that customer expectations are interpreted and communicated properly to our operations group. Account managers also work with our customers to identify and meet their cost and design-to-delivery cycle time objectives.

We have dedicated account managers responsible for new business development for gas delivery systems and other subsystems. Our new business development account managers initiate and develop long-term, multi-level relationships with customers and work closely with customers on new business opportunities throughout the design-to-delivery cycle.

Our sales force includes technical sales support for order placement, spare parts quotes and production status updates. We have a technical sales representative located at each of our manufacturing facilities. In addition, we have developed a service and support infrastructure to provide our customers with service and support 24 hours a day, seven days a week. Our dedicated field service engineers provide customer support through the performance of on-site installation, servicing and repair of our subsystems.

Technology development

We engage in ongoing technology development efforts in order to remain a technology leader for gas delivery systems and to develop other subsystems. We have a technology development group which, as of December 31, 2005, consisted of three individuals, two of whom hold doctoral degrees. In addition, our design engineering and new product engineering groups support our technology development activities. Our technology development group works closely with our customers to identify and anticipate changes and trends in next-generation semiconductor manufacturing equipment. Our technology development group participates in customer technology partnership programs that focus on process application requirements for gas delivery systems and other subsystems. These development efforts are designed to meet specific customer requirements in the areas of subsystem design, materials, component selection and functionality. Our technology development group also works directly with our suppliers to help them identify new component technologies and make necessary changes in, and enhancements to, the components that we integrate into our products. Our analytical and testing capabilities enable us to evaluate multiple supplier component technologies and provide customers with a wide range of appropriate component and design choices for their gas delivery systems and other subsystems. Our analytical and testing capabilities also help us anticipate technological changes and the requirements in component features for next-generation gas delivery systems and other subsystems. We are also developing additional features to improve the performance and functionality of our gas delivery systems and other subsystems.

Our self-funded technology development and new product engineering expenses were approximately \$2.4 million, \$2.4 million and \$1.2 million for 2005, 2004 and 2003, respectively.

Table of Contents

We perform our technology development activities principally at our facilities in Menlo Park, California.

Intellectual property

Our success depends in part on our ability to maintain and protect our proprietary technology and to conduct our business without infringing the proprietary rights of others. Our business is largely dependent upon our design, engineering, manufacturing and testing know-how. We also rely on a combination of trade secrets and confidentiality provisions, and to a much lesser extent, patents, copyrights and trademarks, to protect our proprietary rights. As of December 31, 2005, we had four issued United States patents, all of which expire in 2018 or later, and six United States patent applications pending. None of our patents is material to our business. Intellectual property that we develop on behalf of our customers is generally owned exclusively by those customers.

We routinely require our employees, suppliers and potential business partners to enter into confidentiality and non-disclosure agreements before we disclose to them any sensitive or proprietary information regarding our products, technology or business plans. We require employees to assign to us proprietary information, inventions and other intellectual property they create, modify or improve.

Competition

Our industry is highly fragmented. When we compete for new business, we face competition from other suppliers of gas delivery systems and other subsystems as well as an OEM's internal manufacturing group. In addition, OEMs that have elected to outsource their gas delivery systems and other subsystems could elect in the future to develop and manufacture these subsystems internally, leading to further competition. Our principal competitors for our gas delivery systems are Celerity Group, Inc., Integrated Flow Systems, LLC, Matheson Tri-Gas, Inc. and Wolfe Engineering, Inc., and our principal competitors for other subsystems are Allegro MicroSystems, Inc., Flextronics International Ltd., Fox Semicon Integrated Tech Inc. and Sanmina-SCI Corporation. Some of these competitors have substantially greater financial, technical, manufacturing and marketing resources than we do. We expect our competitors to continue to improve the performance of their current products and to introduce new products or new technologies that could adversely affect sales of our current and future products. In addition, the limited number of potential customers in our industry further intensifies competition.

The primary competitive factors in our industry are price, technology, quality, design-to-delivery cycle time, reliability in meeting product demand, service and historical customer relationships. We anticipate that increased competitive pressures will cause intensified price-based competition and we may have to reduce the prices of our products. In addition, we expect to face new competitors as we enter new markets.

Employees

As of December 31, 2005, we had 378 employees, of which 72 were temporary employees. Of our total employees, 52 were in engineering, three in technology development, 17 in sales and support, 160 in direct manufacturing, 104 in indirect manufacturing and 42 in executive and administrative functions. These figures include 60 employees in Shanghai, China. None of our employees is represented by a labor union and we have not experienced any work stoppages.

Table of Contents

Facilities

Our headquarters are located in Menlo Park, California, where we lease approximately 32,000 square feet of commercial space under a lease that expires on December 31, 2007. We use this space for our principal administrative, sales and support, engineering and technology development facilities and for manufacturing purposes. Approximately 6,500 square feet at our Menlo Park facility is a clean room manufacturing facility. We also have manufacturing facilities in Austin, Texas; Tualatin, Oregon; and Shanghai, China. In Austin, we lease approximately 22,080 square feet of manufacturing space under a lease that expires on October 31, 2008, subject to renewal for up to two years at our option. Approximately 3,500 square feet in Austin is a clean room manufacturing facility. In Tualatin, we lease approximately 22,000 square feet of manufacturing space under a lease that expires on November 7, 2007, subject to renewal for up to five years at our option. Approximately 4,000 square feet in Tualatin is a clean room manufacturing facility. In Shanghai, we lease approximately 52,000 square feet of manufacturing space under a lease that expires on June 30, 2009. Approximately 6,500 square feet in Shanghai is a clean room manufacturing facility.

Governmental regulation and environmental matters

Our operations are subject to federal, state and local regulatory requirements and foreign laws relating to environmental, waste management and health and safety matters, including measures relating to the release, use, storage, treatment, transportation, discharge, disposal and remediation of contaminants, hazardous substances and waste, as well as practices and procedures applicable to the construction and operation of our facilities. Our past or future operations may result in exposure to injury or claims of injury by employees or the public which may result in material costs and liabilities to us. Although some risk of costs and liabilities related to these matters is inherent in our business, we believe that our business is operated in substantial compliance with applicable regulations. However, new, modified or more stringent requirements or enforcement policies could be adopted, which could adversely affect us.

Legal proceedings

On September 2, 2005, we filed suit in the federal court for the Northern District of California against Celerity, Inc., or Celerity, seeking a declaratory judgment that our new substrate technology does not infringe certain of Celerity's patents and/or that Celerity's patents are invalid. On September 13, 2005, Celerity filed suit in the federal court of Delaware alleging that we have infringed seven patents by developing and marketing products that use Celerity's fluid distribution technology. The Delaware litigation was transferred to the Northern District of California on October 19, 2005 and on December 12, 2005 was consolidated with our previously filed declaratory judgment action. The complaint by Celerity seeks an injunction against future infringement of its patents and compensatory and treble damages. We believe that the claims made by Celerity are without merit and intend to defend the lawsuit vigorously. However, litigation can be costly and time consuming regardless of the outcome.

From time to time, we are also subject to various legal proceedings and claims, either asserted or unasserted, that arise in the ordinary course of business.

Table of Contents**Management**

Set forth below is information concerning our executive officers and directors:

Name	Age	Position
Clarence L. Granger	57	President, Chief Executive Officer, Chief Operating Officer and Director
Jack Sexton	42	Vice President and Chief Financial Officer
Bruce Wier	58	Vice President of Engineering
Deborah Hayward	44	Vice President of Sales
Sowmya Krishnan, Ph.D	37	Vice President of Technology and Chief Technology Officer
Brian R. Bachman	61	Director
Sue Billat	55	Director
Dipanjan Deb	36	Director
Kevin C. Eichler	46	Director
David T. ibnAle	34	Director
Thomas M. Rohrs	55	Director

Clarence L. Granger has served as our Chief Executive Officer since November 2002, as our President and Chief Operating Officer since March 1999 and as a director since May 2002. Mr. Granger served as our Executive Vice President and Chief Operating Officer from January 1998 to March 1999 and as our Executive Vice President of Operations from April 1996 to January 1998. Prior to joining Ultra Clean in April 1996, he served as Vice President of Media Operations for Seagate Technology from 1994 to 1996. Prior to that, Mr. Granger worked for HMT Technology as Chief Executive Officer from 1993 to 1994, as Chief Operating Officer from 1991 to 1993 and as President from 1989 to 1994. Prior to that, Mr. Granger worked for Xidex as Vice President and General Manager, Thin Film Disk Division, from 1988 to 1989, as Vice President, Santa Clara Oxide Disk Operations, from 1987 to 1988, as Vice President, U.S. Tape Operations, from 1986 to 1987 and as Director of Engineering from 1983 to 1986. Mr. Granger holds a master of science degree in industrial engineering from Stanford University and a bachelor of science degree in industrial engineering from the University of California at Berkeley.

Jack Sexton has served as our Vice President and Chief Financial Officer since May 2005. Before joining Ultra Clean, Mr. Sexton was Corporate Controller of Credence Systems Corporation, a manufacturer of test equipment and diagnostics and failure analysis products used for testing semiconductor integrated circuits. He was Controller and Chief Accounting Officer of NPTest from May 2002 until its sale to Credence in May 2004. Prior to joining NPTest, Mr. Sexton was Worldwide Controller for Schlumberger Resource Management Services, now Actaris Metering Systems. Mr. Sexton joined Schlumberger in 1990, prior to which he was a plant operations controller for Texas Instruments. Mr. Sexton holds two Bachelor of Science degrees, in finance and accounting, from the Carroll School of Management at Boston College, where he graduated magna cum laude. He is also a Certified Public Accountant.

Bruce Wier has served as our Vice President of Engineering since February 2000. Mr. Wier served as our Director of Design Engineering from July 1997 to February 2000. Prior to joining Ultra Clean in July 1997, Mr. Wier was the Engineering Manager for the Oxide Etch Business Unit at Lam Research from April 1993 to June 1997. Prior to that, Mr. Wier was the Senior

Table of Contents

Project Engineering Manager at Genus from May 1990 to April 1993, the Mechanical Engineering Manager at Varian Associates from November 1985 to May 1990, and the Principal Engineer/ Project Manager at Eaton Corporation from February 1981 to November 1985. Mr. Wier is also on the board of directors of, and is the Chief Financial Officer for, Acorn Travel, a travel company formed by his wife in 1999. Mr. Wier holds a bachelor of science degree cum laude in mechanical engineering from Syracuse University.

Deborah Hayward has served as our Vice President of Sales since October 2002. Ms. Hayward served as our Senior Sales Director from May 2001 to October 2002, as Sales Director from February 1998 to May 2001 and as a major account manager from October 1995 to February 1998. Prior to joining Ultra Clean in 1995, she was a customer service manager and account manager at Brooks Instruments from 1985 to 1995.

Sowmya Krishnan, Ph.D., has served as our Vice President of Technology since January 2004 and as our Chief Technology Officer since February 2001. Dr. Krishnan served as our Director of Technology Development from January 1998 to January 2001, as Manager of Technology Development from January 1995 to December 1997 and as manager of a joint evaluation program between Ultra Clean and VLSI Technology from February 1994 to December 1994. Dr. Krishnan holds a master of science degree in chemical engineering and a doctorate degree in chemical engineering from Clarkson University.

Brian R. Bachman has served as a director of Ultra Clean since March 2004. Mr. Bachman was the Chief Executive Officer and Vice Chairman of Axcelis Technologies, Inc. from May 2000 to January 2002. Prior to that, he was Senior Vice President and Group Executive-Hydraulics, Semiconductor Equipment and Specialty Controls of Eaton Corporation from December 1995 to July 2000 and Vice President and general manager for the Standard Products Business Group of Philips Semiconductors B.V. from 1991 to 1995. Prior to that, Mr. Bachman held various positions with FMC Corporation, General Electric Co. and TRW Inc. and was president of General Semiconductor, Inc., a subsidiary of Square D Co., and was a group General Manager with ITT Industries Inc. Mr. Bachman is on the board of directors of Keithley Instruments, Inc. and Kulicke and Soffa Industries, Inc.

Sue Billat has served as a director of Ultra Clean since March 2004. Since 2002, Ms. Billat has been a Principal at Benchmark Strategies, which she founded in 1990. Prior to that, she was a Managing Director and Senior Research Analyst for semiconductor equipment and foundries at Robertson Stephens & Company from 1996 to 2002 and Senior Vice President of Marketing for Ultratech Stepper from 1994 to 1996. Prior to 1994, Ms. Billat spent eight years in executive positions in the semiconductor equipment industry and twelve years in operations management, engineering management and process engineering in the semiconductor industry. Ms. Billat is on the board of directors of PDF Solutions, Inc. Ms. Billat holds bachelor and masters of science degrees in physics from Georgia Tech and completed further graduate studies in electrical engineering and engineering management at Stanford University.

Dipanjan Deb has served as a director of Ultra Clean since November 2002. Mr. Deb is a founder and managing partner of Francisco Partners and has been a partner since its formation in August 1999. Prior to joining Francisco Partners, Mr. Deb was a Principal with Texas Pacific Group. Earlier in his career, Mr. Deb was Director of Semiconductor Banking at Robertson Stephens & Company and a management consultant at McKinsey & Company. Mr. Deb is also on the board of directors of AMIS Holdings, Inc., Conexant Systems, Inc., SMART Modular Technologies, Inc., MagnaChip Semiconductor Ltd. and Credence Systems Corp.

Table of Contents

Kevin C. Eichler has served as a director of Ultra Clean since March 2004. Mr. Eichler served as the Vice President and Chief Financial Officer of MIPS Technologies, Inc. from June 1998 to February 2006. Prior to that, he was Vice President of Operations and Chief Financial Officer of Visigenic Software Inc. from 1996 to 1998, Executive Vice President of Finance and Chief Financial Officer of National Information Group from 1995 to 1996 and Executive Vice President of Finance and Chief Financial Officer of Mortgage Quality Management, Inc. from 1991 to 1995. Prior to 1991, Mr. Eichler held management positions with NeXT Software and Microsoft. Mr. Eichler is on the board of directors of SupportSoft, Inc. and Magma Design Automation, Inc. Mr. Eichler holds a bachelor of science degree in accounting from St. John's University.

David T. ibnAle has served as a director of Ultra Clean since November 2002 and as our lead director since February 2005. Mr. ibnAle is a Principal of Francisco Partners and has been an investment professional with Francisco Partners since December 1999, when he joined as a Vice President. Prior to joining Francisco Partners, Mr. ibnAle was an associate with Summit Partners. Prior to that he worked in the Corporate Finance Department of Morgan Stanley & Co. from 1994 to 1996. Mr. ibnAle has also worked in the Fixed Income Division of Goldman Sachs & Co. Mr. ibnAle holds an A.B. in public policy and an A.M. in international development policy from Stanford University and a masters degree in business administration from the Stanford University Graduate School of Business.

Thomas M. Rohrs has served as a director of Ultra Clean since January 2003. Mr. Rohrs currently serves as an independent advisor to a number of companies and served as an independent advisor to Applied Materials, Inc., one of our largest customers, from August 2004 to April 2005. Mr. Rohrs served as Vice President, Strategic Development, of Applied Global Services, a division of Applied Materials, Inc., from October 2003 to August 2004. Prior to that, he was a senior advisor to Applied Materials, Inc. from May 2002 to September 2003 and Senior Vice President, Global Operations, at Applied Materials, Inc. from November 1997 to April 2002. Prior to that, he was Vice President, Worldwide Operations, for Silicon Graphics from 1992 to 1997 and Senior Vice President, Manufacturing and Customer Service, at MIPS Computer Systems from 1989 to 1992. Prior to 1989, Mr. Rohrs was employed by Hewlett Packard in a number of managerial positions. Mr. Rohrs is on the board of directors of Magma Design Automation, Inc. and Electroglas, Inc. Mr. Rohrs has a bachelor of science in mechanical engineering from the University of Notre Dame and a masters degree in business administration from Harvard Business School. He serves on the Engineering Advisory Council for the University of Notre Dame.

Composition of our board of directors

Pursuant to a stockholders' agreement, our principal stockholder, FP-Ultra Clean, L.L.C., which is controlled by Francisco Partners, L.P., has the right to nominate for election a majority of the members of our board of directors as long as it holds at least 25% of our outstanding common stock. However, as FP-Ultra Clean, L.L.C.'s ownership interest in us decreases, its right to nominate directors will be reduced as follows:

Percentage stock ownership	Percent of nominees for election to our board of directors
25% or more	50%
Less than 25%	25%
Less than 20%	20%
Less than 10%	10%
Less than 5%	0%

Table of Contents

Our board of directors currently consists of seven directors. All of our directors stand for election at each annual meeting of stockholders. Non-employee directors are paid a \$20,000 annual fee, a \$5,000 annual fee per committee on which a non-employee director serves and a \$5,000 annual fee per committee on which a non-employee director serves as the chairperson. Upon joining our board, non-employee directors are also granted options to purchase 15,000 shares of our common stock under our Amended and Restated 2003 Stock Incentive Plan that vest over four years, and each year, immediately following our annual meeting, non-employee directors are granted options to purchase 7,500 shares (or, if the director has served less than one year, a pro rata amount) of our common stock that will vest over four years. Beginning in 2005, Messrs. ibnAle and Deb waived their right to receive annual retainer and committee fees.

Committees of our board of directors

Our board of directors has the following committees:

Audit committee. The audit committee of our board of directors reviews our financial statements and accounting practices and makes recommendations to our board of directors regarding the selection of independent auditors. In addition, any transaction in which one of our directors has a conflict of interest must be disclosed to our board of directors and reviewed by the audit committee. Under our corporate governance guidelines, if a director has a conflict of interest, the director must disclose the interest to the audit committee and our board of directors and must recuse himself or herself from participation in the discussion and must not vote on the matter. In addition, the audit committee is authorized to retain special legal, accounting or other advisors in order to seek advice or information with respect to all matters under consideration, including potential conflicts of interest. Our audit committee consists of Messrs. Bachman and Eichler and Ms. Billat. Our board of directors has determined that each current member of the committee is independent as defined under Nasdaq National Market and SEC rules. Our board of directors has concluded that all members of the audit committee qualify as audit committee financial experts as defined by SEC rules.

Compensation committee. The compensation committee of our board of directors makes recommendations to our board of directors concerning salaries and incentive compensation for our officers and employees and administers our employee benefit plans. Our compensation committee consists of Messrs. Bachman, Deb, ibnAle and Rohrs. Our board of directors has determined that Messrs. Bachman and Rohrs are independent as defined under Nasdaq National Market and the SEC rules. Messrs. Deb and ibnAle are not independent, as permitted by Nasdaq National Market rules applicable to controlled companies.

Nominating and corporate governance committee. The nominating and corporate governance committee of our board of directors identifies and recommends nominees to our board of directors, oversees and sets compensation for our directors and oversees compliance with our corporate governance guidelines. Our nominating and corporate governance committee consists of Messrs. Deb, ibnAle, Eichler and Rohrs. Our board of directors has determined that Messrs. Eichler and Rohrs are independent as defined under Nasdaq National Market and SEC rules. Messrs. Deb and ibnAle are not independent, as permitted by Nasdaq National Market rules applicable to controlled companies.

Compensation committee interlocks and insider participation

No member of the compensation committee of our board of directors is one of our officers or employees. None of our executive officers serves as a member of the board of directors or

Table of Contents

compensation committee of any entity that has one or more executive officers serving as a member of our board of directors or compensation committee. Additional information concerning transactions between us and entities affiliated with members of the compensation committee is included in this prospectus under the caption Certain relationships and related party transactions.

Executive compensation

The following table sets forth certain information regarding the annual and long-term compensation we paid to or for our President and Chief Executive Officer and each of our other executive officers named in the table, or the named executive officers, for each of our last three fiscal years:

Summary compensation table

Name and principal position	Year	Annual compensation		Other annual compensation (\$)(2)(3)	Long-term compensation(1)	All other compensation (\$)
		Salary(\$)	Bonus(\$)		Number of securities underlying options(#)	
Clarence L. Granger President, Chief Executive Officer and Chief Operating Officer	2005	332,692		968	400,000	6,139(4)
	2004	298,846	126,837	968		508,589(5)
	2003	233,077	33,932	1,055	385,000	10,480(6)
Jack Sexton(7) Vice President and Chief Financial Officer	2005	128,461			165,000	
Bruce Wier Vice President of Engineering	2005	194,151		836	25,000	7,195(8)
	2004	196,834	43,960	723	5,000	109,805(9)
	2003	180,838	19,138	837	88,750	9,643(10)
Deborah Hayward Vice President of Sales	2005	157,401	86,509(11)		25,000	3,481(12)
	2004	141,350	118,468(11)		31,250	3,164(12)
	2003	110,298	70,415(11)		62,500	2,956(12)
Sowmya Krishnan, Ph.D. Vice President of Technology and Chief Technology Officer	2005	165,268			25,000	5,822(12)
	2004	165,383	33,823	244	25,000	39,894(13)
	2003	123,654	8,551		31,250	3,700(12)

(1) In addition, on December 31, 2005, Messrs. Granger and Weir and Dr. Krishnan held 39,825, 7,963 and 2,844 shares of restricted stock, respectively, with values of \$288,333, \$57,652, \$20,591, respectively, based on the closing price of our common stock of \$7.24 on December 30, 2005.

- (2) Amounts represent tax gross-up reimbursements for executives' life insurance premiums.
- (3) Excludes small amounts of perquisites such as executive disability insurance and car allowance, which do not exceed \$50,000 or 10% of executive's annual salary.
- (4) Amount includes company contribution of \$4,399 under Ultra Clean's 401(k) plan and \$1,740 reimbursed for executive's life insurance premium.
- (5) Amount includes company contribution of \$9,750 under Ultra Clean's 401(k) Plan, \$1,740 reimbursed for executive's life insurance premium and \$497,099 paid to executive for redemption of notes, including interest.
- (6) Amount includes company contribution of \$8,740 under Ultra Clean's 401(k) Plan and \$1,740 reimbursed for executive's life insurance premium.
- (7) Mr. Sexton joined us as our Vice President and Chief Financial Officer on May 17, 2005.
- (8) Amount includes company contribution of \$5,690 under Ultra Clean's 401(k) plan and \$1,505 reimbursed for executive's life insurance premium.
- (9) Amount includes company contribution of \$8,858 under Ultra Clean's 401(k) Plan, \$1,505 reimbursed for executive's life insurance premium and \$99,442 paid to executive for redemption of notes, including interest.

Table of Contents

(10) Amount includes company contribution of \$8,138 under Ultra Clean's 401(k) Plan and \$1,505 reimbursed for executive's life insurance premium.

(11) This amount reflects sales commissions paid to executive.

(12) This amount reflects company contribution under Ultra Clean's 401(k) Plan.

(13) Amount includes company contribution of \$4,054 to Ultra Clean's 401(k) Plan, \$35,470 paid to executive for redemption of notes, including interest, and \$370 reimbursed for executive's life insurance premium.

Stock option grants in the year ended December 31, 2005

The following table sets forth information concerning grants of options to acquire shares of our common stock granted to our named executive officers for the year ended December 31, 2005. All options listed in the table become vested and exercisable over a four year period from the grant date, with the first 25% vesting on the first anniversary of the grant date and 1/48 of the shares vesting monthly thereafter. The options were granted at an exercise price equal to the fair market value of our common stock on the grant date. No stock appreciation rights were granted during 2005 to our named executive officers.

Individual grants

Name	Number of securities underlying options granted	Percentage of total options granted to employees in 2005	Exercise price (\$/share)	Expiration date	Potential realizable value at assumed annual rates of stock price appreciation for option term (1)	
					5%	10%
Clarence Granger	400,000	48.3%	\$ 6.55	5/8/2015	\$ 1,647,704	\$ 4,175,605
Jack Sexton	165,000	19.9%	\$ 7.05	6/19/2015	\$ 731,562	\$ 1,853,921
Wier, Bruce	25,000	3%	\$ 6.55	5/8/2015	\$ 102,981	\$ 260,975
Deborah Hayward	25,000	3%	\$ 6.55	5/8/2015	\$ 102,981	\$ 260,975
Krishnan, Sowmya	25,000	3%	\$ 6.55	5/8/2015	\$ 102,981	\$ 260,975

(1) This represents hypothetical gains that would exist for the options at the end of their respective terms based on assumed annualized rates of compound stock price appreciation from the date grant of 5% and 10%. The disclosure of 5% and 10% assumed rates is required by the rules of the SEC and does not represent our estimate or projection of future common stock prices or stock price growth.

Table of Contents**Aggregate option exercises in 2005 and year-end option values**

The following table sets forth information regarding unexercised options held as of December 31, 2005 by each of our named executive officers. None of our named executive officers exercised any stock options in the year ended December 31, 2005.

Name	Number of securities underlying unexercised options at December 31, 2005		Value of unexercised in-the-money options at December 31, 2005(\$)(1)	
	Exercisable	Unexercisable	Exercisable	Unexercisable
Clarence L. Granger	272,708	512,292	1,701,698	976,702
Jack Sexton		165,000		31,350
Bruce Wier	65,051	53,699	392,796	179,454
Deborah Hayward	56,249	62,501	268,962	145,788
Sowmya Krishnan	33,072	48,178	140,747	77,503

(1) The value of unexercised in-the-money options is based on the closing price of our common stock on December 30, 2005 of \$7.24 per share, minus the exercise price of the option, multiplied by the number of shares issuable upon the exercise of the option.

Employment agreements

Clarence L. Granger. We entered into an employment agreement with Clarence L. Granger dated November 15, 2002, as amended on March 2, 2004 and May 9, 2005, pursuant to which he agreed to serve as our President and Chief Executive Officer through March 2009. His amended employment agreement provides for a base salary of \$350,000. Pursuant to his original employment agreement, he received a signing bonus, of which approximately \$74,000 was paid in cash, \$88,000 was paid in cash but used to purchase our common stock, and approximately \$265,000 was placed in a deferred compensation arrangement payable after seven years (or earlier in the discretion of our board of directors). Under this deferred compensation arrangement, we agreed to pay interest of 2.7% per year on the deferred amount, payable on June 30 and December 31 of each year. Under his employment agreement, Mr. Granger is eligible to receive an annual bonus of up to \$175,000, subject to the satisfaction of performance goals as may be set by our board of directors. In the event that Mr. Granger is terminated by us without cause at any time or Mr. Granger resigns within six months after a change of control with good reason, he is entitled to continue to receive 12 months of base salary (offset by any income earned by him during such 12 months), health coverage and accelerated vesting of stock options.

Jack Sexton. We entered into an employment agreement with Jack Sexton dated June 21, 2005, pursuant to which he agreed to serve as our Vice President and Chief Financial Officer. His employment agreement provides for a base salary of \$200,000. Under his employment agreement, Mr. Sexton is eligible to receive an annual bonus with a target bonus of 40% of base salary, subject to the satisfaction of performance goals as may be set by our board of directors. In the event that Mr. Sexton is terminated by us without cause, he is entitled to receive 12 months of base salary, health coverage and accelerated vesting of stock options.

Table of Contents

Certain relationships and related party transactions

Relationship with Francisco Partners

FP-Ultra Clean, L.L.C. owns approximately 55% of our outstanding common stock and will own approximately 28% of our outstanding common stock upon completion of this offering. Two of our directors, Messrs. Deb and ibnAle, are employees of Francisco Partners, L.P., which controls FP-Ultra Clean, L.L.C. Set forth below is a brief description of the existing relationships and agreements between us and Francisco Partners.

Stockholders agreement

We and FP-Ultra Clean, L.L.C. have entered into a stockholders agreement. The stockholders agreement covers matters of corporate governance, restrictions on transfer of our securities and information rights.

Corporate governance. The stockholders agreement provides that FP-Ultra Clean, L.L.C. has the right to nominate for election members of our board of directors as set forth under Management Board structure and compensation.

The stockholders agreement also provides that our board of directors may not take certain significant actions without the approval of FP-Ultra Clean, L.L.C. as long as it owns at least 25% of our outstanding common stock. These actions include:

mergers, acquisitions or certain sales of assets;

any liquidation, dissolution or bankruptcy;

issuances of securities;

determination of compensation and benefits for our chief executive officer and chief financial officer;

appointment or dismissal of any of the chairman of our board of directors, chief executive officer, chief financial officer or any other executive officer in any similar capacity;

amendments to the stockholders agreement or exercise or waiver of rights under the stockholders agreement;

amendments to our charter or bylaws;

any increase or decrease in the number of directors that comprise our board of directors;

the declaration of dividends or other distributions;

any incurrence or refinancing of indebtedness in excess of \$10 million;

approval of our business plan, budget and strategy; and

modification of our long-term business strategy.

All provisions of the stockholders agreement are expressly subject to any requirements as to governance imposed by rules of the SEC, The Nasdaq National Market or any other exchange on which our securities are listed.

Restrictions on transfer. Generally, FP-Ultra Clean, L.L.C. is prohibited from transferring its securities of Ultra Clean Holdings, Inc. without complying with restrictions relating to the

Table of Contents

timing of the transfer, the number of securities subject to the transfer and the transferee of such securities. *Information rights.* So long as FP-Ultra Clean, L.L.C. holds any of our securities, it has the right to receive from us financial information, monthly management reports, reports from our independent public accountants and such additional information regarding our financial position or business as it reasonably requests.

Registration rights agreement

FP-Ultra Clean, L.L.C. has registration rights with respect to our common stock pursuant to a registration rights agreement dated December 2, 2002.

Demand Registration. The registration rights agreement provides that we can be required to effect additional registration statements, or demand registrations, registering the securities held by FP-Ultra Clean, L.L.C. We are required to pay the registration expenses in connection with each demand registration. We may decline to honor any of these demand registrations if the aggregate gross proceeds expected to be received does not equal or exceed \$5.0 million or if we have effected a demand registration within the preceding 90 days. If a demand registration is underwritten and the managing underwriter advises us that the number of securities offered to the public needs to be reduced, priority of inclusion in the demand registration shall be such that first priority shall be given to FP-Ultra Clean, L.L.C. and its permitted transferees.

Incidental Registration. In addition to our obligations with respect to demand registrations, if we propose to register any of our securities, other than a registration on Form S-8 or S-4 or successor forms to these forms, whether or not such registration is for our own account, FP-Ultra Clean, L.L.C. will have the opportunity to participate in such registration. Expenses relating to these incidental registrations are required to be paid by us.

If an incidental registration is underwritten and the managing underwriter advises us that the number of securities offered to the public needs to be reduced, priority of inclusion shall be such that first priority shall be given to us and second priority shall be given to FP-Ultra Clean, L.L.C. and its permitted transferees. We and the stockholders selling securities under a registration statement are required to enter into customary indemnification and contribution arrangements with respect to each registration statement.

Transactions with management

The wife of Bruce Weir, our Vice President of Engineering, is the sole owner of Acorn Travel, Inc., our primary travel agency. We incurred fees for travel-related services, including the cost of airplane tickets, provided by Acorn Travel to Ultra Clean for a total of \$185,610 in the year ended December 31, 2005.

Table of Contents**Principal and selling stockholders**

The following table sets forth information with respect to the beneficial ownership of our common stock outstanding as of December 31, 2005 and on an as adjusted basis to reflect the sale of shares in this offering for:

each person or group known by us to beneficially own more than 5% of our common stock;

each of our directors and executive officers;

all of our directors and executive officers as a group; and

each of the selling stockholders, including members of management.

In accordance with the rules of the SEC, beneficial ownership includes voting or investment power with respect to securities and includes the shares issuable pursuant to stock options that are exercisable within 60 days of February 27, 2006. Shares issuable pursuant to stock options are deemed outstanding for computing the ownership percentage of the person holding such options but are not outstanding for computing the ownership percentage of any other person. The number of shares of common stock outstanding after this offering reflects the sale by us of 1,600,000 shares of common stock in this offering. The percentage of beneficial ownership for the following table is based on 16,501,363 shares of common stock outstanding as of December 31, 2005.

Unless otherwise indicated, the address of each of the named entities or individuals is c/o Ultra Clean Holdings, Inc., 150 Independence Drive, Menlo Park, California 94025. To our knowledge, except as indicated in the footnotes to this table and pursuant to applicable community property laws, the persons named in the table have sole voting and investment power with respect to all shares of common stock.

(1) The shares are owned beneficially and of record by FP-Ultra Clean, L.L.C. A majority of the membership interests of FP-Ultra Clean, L.L.C. are held by Francisco Partners, L.P. and Francisco Partners GP, LLC is the general partner of Francisco Partners, L.P. and the managing member of FP-Ultra Clean, L.L.C. Voting and investment power belongs to a group of managing directors (including Mr. Deb) of Francisco Partners GP, LLC. The voting and investment power belongs to a group and not to any individual managing director. Each of these managing directors disclaims beneficial ownership of the securities held by the forgoing entities. Messrs. Deb and ibnAle are members of management of Francisco Partners GP, LLC and disclaim beneficial ownership of the securities held by the foregoing entities.

(2) Based on a Schedule 13G filed with the SEC on February 8, 2006.

(3) Based on a Schedule 13G/A filed with the SEC on February 7, 2006. Includes 937,315 shares owned by Discovery Equity Partners, LP, an investment partnership managed by Discovery Group I, LLC.

(4) Includes 304,791 shares subject to common stock options exercisable within 60 days of February 27, 2006.

(5) Includes 63,723 shares subject to common stock options exercisable within 60 days of February 27, 2006.

(6) Includes 37,759 shares subject to common stock options exercisable within 60 days of February 27, 2006.

(7) Includes 72,864 shares subject to common stock options exercisable within 60 days of February 27, 2006.

(8) Represents shares subject to common stock options that are exercisable within 60 days of February 27, 2006.

(9) Includes 30,493 shares subject to common stock options exercisable within 60 days of February 27, 2006.

Table of Contents

Description of our capital stock

The following description summarizes the material terms of our capital stock. This information does not purport to be complete and is subject in all respects to the applicable provisions of our amended and restated certificate of incorporation and bylaws.

General

Our authorized capital stock consists of 90,000,000 shares of common stock, \$0.001 par value per share, and 10,000,000 shares of undesignated preferred stock, \$0.001 par value per share.

Common stock

As of December 31, 2005, we had 16,501,363 shares of common stock outstanding. As of February 6, we had approximately 1,219 stockholders of record. As of December 31, 2005, after giving effect to the offering and assuming no exercise of any stock options, we would have had 18,101,363 shares of common stock outstanding. The holders of our common stock are entitled to one vote for each share held of record on all matters submitted to a vote of the stockholders. Pursuant to a stockholders' agreement, our principal stockholder FP-Ultra Clean, L.L.C., which is controlled by Francisco Partners, L.P., has the right to nominate for election a majority of the members of our board of directors so long as it holds at least 25% of our outstanding common stock. All shares of our common stock are entitled to share equally in any dividends our board of directors may declare from legally available sources. Our common stock trades on The Nasdaq National Market under the symbol UCTT. Our common stock has no preemptive, subscription or conversion rights, and there are no redemption or sinking fund provisions applicable to our common stock. The rights, preferences and privileges of holders of our common stock are subject to, and may be adversely affected by, the rights of holders of shares of any series of preferred stock that we may designate and issue in the future. All outstanding shares of our common stock are fully paid and nonassessable, and the shares of common stock offered hereby will be fully paid and nonassessable.

Preferred stock

Our board of directors is authorized, subject to any limitations imposed by law, without stockholder approval, from time to time to issue up to 10,000,000 shares of preferred stock in one or more series, each series to have rights and preferences, including voting rights, dividend rights, conversion rights, redemption privileges and liquidation preferences, as our board of directors may determine. The issuance of preferred stock, while providing desirable flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, a majority of our voting stock outstanding. We have no shares of preferred stock outstanding, and we have no present plans to issue any shares of preferred stock.

Anti-takeover measures

Delaware law and provisions of our charter documents could discourage potential acquisition proposals and could delay, deter or prevent a change in control. The anti-takeover provisions of Delaware law impose various impediments to the ability of a third party to acquire control of us, even if a change in control would be beneficial to our existing stockholders. However, we have elected not to be governed by Section 203 of Delaware law, which means that we

Table of Contents

have elected not to take advantage of anti-takeover protection related to transactions with interested stockholders. Additionally, provisions of our amended and restated certificate of incorporation and bylaws could deter, delay or prevent a third party from acquiring us, even if doing so would benefit our stockholders. These provisions include:

a requirement that special meetings of stockholders may be called only by the chairman of our board of directors or our president or, upon the written request of two directors, our secretary;

advance notice requirements for stockholder proposals and nominations; and

the authority of our board of directors to issue, without stockholder approval, preferred stock with such terms as our board of directors may determine.

In addition to the anti-takeover measures described above, provisions of our stockholders' agreement with FP-Ultra Clean, L.L.C. could deter, delay or prevent a third party from acquiring us. See "Certain relationships and related party transactions" Relationship with Francisco Partners' Stockholders' agreement.

Transfer agent and registrar

Wells Fargo Shareowner Services serves as the transfer agent and registrar for our common stock. The transfer agent's address is 161 North Concord Exchange, South St. Paul, Minnesota 55075-1139 and the telephone number is (800) 468-9716.

Table of Contents

Shares eligible for future sale

Future sales of substantial amounts of our common stock in the public market, or the perception that such sales may occur, could adversely affect the prevailing market price of our common stock. As of December 31, 2005, after giving effect to the offering and assuming no exercise of any stock options, we would have had 18,101,363 shares of common stock outstanding. Of these shares, 12,387,375 shares of common stock, including the 5,750,000 shares sold in this offering, will be freely transferable without restriction or further registration under the Securities Act, except for any shares purchased by one of our affiliates, as that term is defined in Rule 144 under the Securities Act. The remaining shares of common stock are restricted shares as defined in Rule 144. Restricted shares may be sold in the public market only if registered or if they qualify for an exemption from registration under Rules 144 or 701 of the Securities Act. The remaining 5,713,990 shares will be available for sale in the public market following termination of the lockup agreement entered into by each of the holders of those shares with the underwriters of this offering.

Rule 144

In general, under Rule 144 as currently in effect, beginning 90 days after this offering, a person, or persons whose shares are aggregated, who owns shares that were purchased from us, or any affiliate, at least one year previously, is entitled to sell within any three-month period a number of shares that does not exceed the greater of 1% of our then-outstanding shares of common stock, which will equal approximately 181,014 shares immediately after this offering, assuming no exercise of any stock options outstanding as of December 31, 2005, or the average weekly trading volume of our common stock on The Nasdaq National Market during the four calendar weeks preceding the filing of a notice of the sale on Form 144. Sales under Rule 144 are also subject to manner of sale provisions, notice requirements and the availability of current public information about us. We are unable to estimate the number of shares that will be sold under Rule 144 since this will depend on the market price for our common stock, the personal circumstances of the stockholder and other factors.

Rule 144(k)

Under Rule 144(k), a person who is not deemed to have been one of our affiliates at any time during the three months preceding a sale, and who owns shares within the definition of restricted securities under Rule 144 that were purchased from us, or any affiliate, at least two years previously, would be entitled to sell shares under Rule 144(k) without regard to the volume limitations, manner of sale provisions, public information requirements or notice requirements described above.

Registration rights

FP-Ultra Clean, L.L.C. or its transferees are entitled to various rights with respect to the registration under the Securities Act of the 4,994,900 shares of common stock that it will hold upon completion of this offering. Registration of these shares under the Securities Act would result in these shares becoming freely tradable without restriction under the Securities Act immediately upon the effectiveness of the registration, except for shares purchased by affiliates. For further information regarding these registration rights, see Certain relationships and related party transactions Relationship with Francisco Partners Registration rights agreement.

Table of Contents

Stock options

As of December 31, 2005, options to purchase a total of 2,120,437 shares of common stock were outstanding. Of these, 486,764 options are subject to lockup agreements. An additional 1,213,939 shares of common stock are available for future option grants under our option plan.

On March 30, 2004 and April 4, 2005, we filed registration statements on Form S-8 under the Securities Act covering all shares of common stock subject to outstanding options or issuable pursuant to our Amended and Restated 2003 Stock Incentive Plan. Subject to Rule 144 volume limitations applicable to affiliates, shares registered under the Form S-8 registration statement are for sale in the open market, except to the extent that the shares are subject to vesting restrictions with us or the contractual restrictions described below.

Employee stock purchase plan

As of December 31, 2005, 424,075 shares were reserved for issuance under our Employee Stock Purchase Plan.

Lockup agreements

Our executive officers, directors and the selling stockholders have entered into the lockup agreements described in Underwriting.

Table of Contents

**Certain United States tax consequences to
non-U.S. holders of common stock**

The following is a general discussion of the material U.S. federal income and estate tax consequences of the ownership and disposition of common stock by a beneficial owner that is a non-U.S. holder and that does not own, and is not deemed to own, more than 5% of our common stock. A non-U.S. holder is a person or entity that, for U.S. federal income tax purposes, is a:

non-resident alien individual, other than certain former citizens and residents of the United States subject to tax as expatriates,

foreign corporation or

foreign estate or trust.

A non-U.S. holder does not include an individual who is present in the United States for 183 days or more in the taxable year of disposition and is not otherwise a resident of the United States for U.S. federal income tax purposes. Such an individual is urged to consult his or her own tax advisor regarding the U.S. federal income tax consequences of the sale, exchange or other disposition of common stock.

This discussion is based on the Internal Revenue Code of 1986, as amended, or the Code, and administrative pronouncements, judicial decisions, and final and temporary Treasury Regulations, changes to any of which subsequent to the date of this prospectus may affect the tax consequences described herein. This discussion does not address all aspects of U.S. federal income and estate taxation that may be relevant to non-U.S. holders in light of their particular circumstances and does not address any tax consequences arising under the laws of any state, local or foreign jurisdiction. Prospective holders are urged to consult their tax advisors with respect to the particular tax consequences to them of owning and disposing of common stock, including the consequences under the laws of any state, local or foreign jurisdiction.

Dividends

As discussed under Dividend Policy above, we do not currently expect to pay dividends. In the event that we do make distributions, however, distributions made to a non-U.S. holder of common stock out of our current or accumulated earnings and profits generally will constitute dividends for U.S. tax purposes and generally will be subject to withholding tax at a 30% rate or a reduced rate specified by an applicable income tax treaty. In order to obtain a reduced rate of withholding, a non-U.S. holder will be required to provide an Internal Revenue Service, or IRS, Form W-8BEN certifying its entitlement to benefits under a treaty. To the extent distributions exceed our current and accumulated earnings and profits, they will constitute a return of capital and will first reduce your basis in our common stock (but not below zero) and then will be treated as gain from the sale of common stock.

The withholding tax does not apply to dividends paid to a non-U.S. holder who provides a Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. holder's conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the non-U.S. holder were a U.S. resident. A non-U.S. corporation receiving effectively connected dividends may also be subject to an additional branch profits tax imposed at a rate of 30% (or a lower treaty rate).

Table of Contents

Gain on disposition of common stock

A non-U.S. holder generally will not be subject to U.S. federal income tax on gain realized on a sale or other disposition of common stock unless:

the gain is effectively connected with a trade or business of the non-U.S. holder in the United States, subject to an applicable treaty providing otherwise, or

we are or have been a U.S. real property holding corporation, as defined in the Code, at any time within the five-year period preceding the disposition or the non-U.S. holder's holding period, whichever period is shorter, and our common stock has ceased to be traded on an established securities market prior to the beginning of the calendar year in which the sale or disposition occurs.

We believe that we are not, and do not anticipate becoming, a U.S. real property holding corporation.

Information reporting requirements and backup withholding

Information returns will be filed with the IRS in connection with payments of dividends. Unless you comply with certification procedures to establish that you are not a United States person, information returns may be filed with the IRS in connection with the proceeds from a sale or other disposition of common stock and you may be subject to backup withholding tax on payments of dividends or on the proceeds from a sale or other disposition of common stock. The certification procedures required to claim a reduced rate of withholding under a treaty will satisfy the certification requirements necessary to avoid the backup withholding tax as well. The amount of any backup withholding from a payment to you will be allowed as a credit against your United States federal income tax liability and may entitle you to a refund, provided that the required information is furnished to the IRS.

Federal estate tax

An individual non-U.S. holder who is treated as the owner of, or has made certain lifetime transfers of, an interest in the common stock will be required to include the value of the stock in his gross estate for U.S. federal estate tax purposes, and may be subject to U.S. federal estate tax, unless an applicable estate tax treaty provides otherwise.

Table of Contents**Underwriting**

We are offering the shares of common stock described in this prospectus through a number of underwriters. J.P. Morgan Securities Inc. is acting as book running manager of the offering. J.P. Morgan Securities Inc., Piper Jaffray & Co. and Needham & Company, LLC are acting as representatives of the underwriters. We have entered into an underwriting agreement with the underwriters. Subject to the terms and conditions of the underwriting agreement, we have agreed to sell to the underwriters, and each underwriter has severally agreed to purchase, at the public offering price less the underwriting discounts and commissions set forth on the cover page of this prospectus, the number of shares of common stock listed next to its name in the following table:

Underwriters	Number of Shares
J.P. Morgan Securities Inc.	3,450,000
Piper Jaffray & Co.	1,437,500
Needham & Company, LLC	862,500
Total	5,750,000

The underwriters are committed to purchase all the common shares offered if they purchase any shares. The underwriting agreement also provides that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may also be increased or the offering may be terminated.

The underwriters propose to offer the common shares directly to the public at the public offering price set forth on the cover page of this prospectus and to certain dealers at that price less a concession not in excess of \$0.256 per share. Any such dealers may resell shares to certain other brokers or dealers at a discount of up to \$0.10 per share from the public offering price. After the public offering of the shares, the offering price and other selling terms may be changed by the underwriters.

The selling stockholders have granted the underwriters an option to purchase up to 862,500 additional shares of common stock to cover sales of shares by the underwriters which exceed the number of shares specified in the table above. The underwriters have 30 days from the date of this prospectus to exercise this overallotment option. If any shares are purchased with this overallotment option, the underwriters will purchase shares in approximately the same proportion as shown in the table above. If any additional shares of common stock are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered.

The underwriting fee is equal to the public offering price per share of common stock less the amount paid by the underwriters to us per share of common stock. The underwriting fee is \$0.426 per share. The following table shows the per share and total underwriting discounts and commissions to be paid to the underwriters assuming both no exercise and full exercise of the underwriters' option to purchase additional shares.

Underwriting discounts and commissions	Without overallotment exercise	With full overallotment exercise
Per share	\$ 0.426	\$ 0.426
Total	\$2,449,500	\$2,816,925

Table of Contents

We estimate that the total expenses of this offering, including registration, filing and listing fees, printing fees and legal and accounting expenses, but excluding the underwriting discounts and commissions, will be approximately \$450,000.

A prospectus in electronic format may be made available on the web sites maintained by one or more underwriters, or selling group members, if any, participating in the offering. The underwriters may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representatives to underwriters and selling group members that may make Internet distributions on the same basis as other allocations.

We have agreed that we will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, or file with the SEC a registration statement under the Securities Act relating to, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, or publicly disclose the intention to make any offer, sale, pledge, disposition or filing, without the prior written consent of J.P. Morgan Securities Inc., for a period of 90 days after the date of this prospectus. We may, however, contract to issue shares of our common stock in connection with an acquisition by us and issue up to an aggregate of 820,000 shares of our common stock during the 90-day restricted period in connection with any such acquisition; provided that, in any such case, prior to entering into such contract, each person who would be entitled to receive shares of common stock agrees to be bound by the terms of the lock up agreement described in the next paragraph. Notwithstanding the foregoing, if (1) during the last 17 days of the 90-day restricted period, we issue an earnings release or material news or a material event relating to our Company occurs; or (2) prior to the expiration of the 90-day restricted period, we announce that we will release earnings results during the 16-day period beginning on the last day of the 90-day period, the restrictions described above shall continue to apply until the expiration of the 18-day period beginning on the issuance of the earnings release or the occurrence of the material news or material event.

Our directors and executive officers and the selling stockholders have entered into lockup agreements with the underwriters prior to the commencement of this offering pursuant to which each of these persons or entities, with limited exceptions, for a period of 90 days after the date of this prospectus, may not, without the prior written consent of J.P. Morgan Securities Inc., (1) offer, pledge, announce the intention to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, any shares of our common stock (including, without limitation, common stock which may be deemed to be beneficially owned by such directors, executive officers, managers and members in accordance with the rules and regulations of the SEC and securities which may be issued upon exercise of a stock option or warrant) or (2) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of the common stock, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of common stock or such other securities, in cash or otherwise. Notwithstanding the foregoing, if (1) during the last 17 days of the 90-day restricted period, we issue an earnings release or material news or a material event relating to our Company occurs; or (2) prior to the expiration of the 90-day restricted period, we announce that we will release earnings results during the 16-day period beginning on the last day of the 90-day period, the restrictions described above shall continue to apply until the expiration of the 18-day period beginning on the issuance of the earnings release or the occurrence of the material news or material event. In addition, these restrictions shall not apply (a) to an aggregate of 15,000 shares of our common stock held by certain of our officers, and (b) to the entry by any of our directors or

Table of Contents

executive officers into any written trading plan designed to comply with Rule 10b5-1 of the Exchange Act, provided that no sales or other dispositions may be made during the 90-day restricted period.

We and the selling stockholders have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act of 1933.

Our common stock is traded on the Nasdaq National Market under the symbol UCTT.

In connection with this offering, the underwriters may engage in stabilizing transactions, which involves making bids for, purchasing and selling shares of common stock in the open market for the purpose of preventing or retarding a decline in the market price of the common stock while this offering is in progress.

These stabilizing transactions may include making short sales of the common stock, which involves the sale by the underwriters of a greater number of shares of common stock than they are required to purchase in this offering, and purchasing shares of common stock on the open market to cover positions created by short sales. Short sales may be covered shorts, which are short positions in an amount not greater than the underwriters overallotment option referred to above, or may be naked shorts, which are short positions in excess of that amount. The underwriters may close out any covered short position either by exercising their overallotment option, in whole or in part, or by purchasing shares in the open market. In making this determination, the underwriters will consider, among other things, the price of shares available for purchase in the open market compared to the price at which the underwriters may purchase shares through the overallotment option. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the common stock in the open market that could adversely affect investors who purchase in this offering. To the extent that the underwriters create a naked short position, they will purchase shares in the open market to cover the position.

The underwriters have advised us that, pursuant to Regulation M of the Securities Act of 1933, they may also engage in other activities that stabilize, maintain or otherwise affect the price of the common stock, including the imposition of penalty bids. This means that if the representatives of the underwriters purchase common stock in the open market in stabilizing transactions or to cover short sales, the representatives can require the underwriters that sold those shares as part of this offering to repay the underwriting discount received by them.

These activities may have the effect of raising or maintaining the market price of the common stock or preventing or retarding a decline in the market price of the common stock, and, as a result, the price of the common stock may be higher than the price that otherwise might exist in the open market. If the underwriters commence these activities, they may discontinue them at any time. The underwriters may carry out these transactions on the Nasdaq National Market, in the over-the-counter market or otherwise. Certain of the underwriters and their affiliates have provided in the past to us and our affiliates and may provide from time to time in the future certain commercial banking, financial advisory, investment banking and other services for us and such affiliates in the ordinary course of their business, for which they have received and may continue to receive customary fees and commissions. In addition, from time to time, certain of the underwriters and their affiliates may effect transactions for their own account or the account of customers, and hold on behalf of themselves or their customers, long or short positions in our debt or equity securities or loans, and may do so in the future.

Table of Contents

An affiliate of Piper Jaffray & Co., Discovery Group I, LLC, has an ownership position in our common stock as a result of open market purchases. Discovery Group I, LLC, together with an investment partnership which it manages, Discovery Equity Partners, LP, previously reported on a Schedule 13G/A dated December 31, 2005 an aggregate beneficial ownership percentage of our common stock of 6.7 percent. The 6.7 percent reported by Discovery Group I, LLC includes the 5.7 percent reported by Discovery Equity Partners, LP.

Legal matters

The validity of the shares of common stock being offered will be passed upon for us by Davis Polk & Wardwell, Menlo Park, California. Selected legal matters in connection with this offering will be passed on for the underwriters by Wilson Sonsini Goodrich & Rosati, Professional Corporation, Palo Alto, California.

Experts

The consolidated financial statements included in this prospectus have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report appearing herein, and are included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

Where you can find more information

We have filed a registration statement regarding this offering on Form S-1, including all amendments and supplements thereto, with the SEC under the Securities Act of 1933, as amended. This prospectus, which constitutes a part of the registration statement, does not contain all of the information included in the registration statement, certain items of which are contained in schedules and exhibits to the registration statement as permitted by the rules and regulations of the SEC. You should refer to the registration statement and its exhibits to read that information. Statements made in this prospectus as to any of our contracts, agreements or other documents referred to are not necessarily complete and you should refer to the exhibits attached to the registration statement for copies of the actual contract, agreement or other document.

You may read and copy information omitted from this prospectus but contained in the registration statement at the public reference facilities maintained by the SEC at Room 1024, Judiciary Plaza, 100 F Street, N.W., Washington, D.C. 20549. You may also request copies of all or any portion of such material from the Public Reference Section of the SEC at Judiciary Plaza, 100 F Street, N.W., Washington, D.C. 20549 at prescribed rates. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference room. In addition, materials filed electronically with the SEC are available at the SEC's web site at <http://www.sec.gov>. You may also request a copy of these filings, at no cost, by writing or telephoning us at: Ultra Clean Technology, 150 Independence Drive, Menlo Park, California 94025, (650) 323-4100.

We intend to furnish to our stockholders annual reports containing audited financial statements and quarterly reports for the first three quarters of each fiscal year containing unaudited interim financial information, in each case prepared in accordance with generally accepted accounting principles.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Ultra Clean Holdings, Inc.:

We have audited the accompanying consolidated balance sheets of Ultra Clean Holdings, Inc. and subsidiaries (the Company) as of December 31, 2005 and 2004, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Ultra Clean Holdings, Inc. and subsidiaries as of December 31, 2005 and 2004, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America.

Table of Contents

Ultra Clean Holdings, Inc.
Notes to consolidated financial statements

1. Organization and significant accounting policies

Organization Ultra Clean Holdings, Inc. (the Company) is a developer and supplier of critical subsystems for the semiconductor capital equipment industry, producing primarily gas delivery systems and other subsystems, including frame and top plate assemblies and process modules. The Company's products improve efficiency and reduce the costs of our customers' design and manufacturing processes. The Company's customers are primarily original equipment manufacturers (OEMs) of semiconductor capital equipment.

Principles of Consolidation The accompanying financial statements include the accounts of the Company. All intercompany accounts and transactions are eliminated in consolidation.

Certain Significant Risks and Uncertainties The Company operates in a dynamic industry and, accordingly, can be affected by a variety of factors. For example, any of the following areas could have a negative effect on the Company in terms of its future financial position, results of operations or cash flows: the highly cyclical nature of the semiconductor industry; reliance on a small number of customers; ability to obtain additional financing; regulatory changes; fundamental changes in the technology underlying semiconductor manufacturing processes or semiconductor manufacturing equipment; the hiring, training and retention of key employees; successful and timely completion of product design efforts; and new product design introductions by competitors.

Concentration of Credit Risk Financial instruments which subject the Company to concentrations of credit risk consist principally of cash and cash equivalents and accounts receivable. The Company sells its products to semiconductor capital equipment manufacturers in the United States. The Company performs credit evaluations of its customers' financial condition and generally requires no collateral.

The Company had significant sales to three customers, each accounting for 10% or more of sales: Applied Materials, Inc., Lam Research Corporation and Novellus Systems, Inc. Sales to each of these customers as a percentage of total sales were as follows:

	Year ended December 31,		
	2005	2004	2003
Customer A	40%	49%	47%
Customer B	31%	28%	21%
Customer C	18%	16%	24%

When combined, these same significant customers represented 72% and 92% of accounts receivable at December 31, 2005 and 2004, respectively.

Fair Value of Financial Instruments Our financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and bank borrowings. The carrying value of these instruments approximates their fair value because of their short-term nature.

Table of Contents

Notes to consolidated financial statements (Continued)

Use of Accounting Estimates The presentation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company bases its estimates and judgments on historical experience and on various other assumptions that it believes are reasonable under the circumstances. However, future events are subject to change and the best estimates and judgments routinely require adjustment. Actual amounts may differ from those estimates.

Fiscal Year Although the Company uses a 52-53 week fiscal year ending on the Friday nearest December 31, for presentation purposes, the Company presents each fiscal year as if it ended on December 31. Using the 52-53 year end, fiscal year 2005 ended on December 30, 2005, representing 52 weeks. Fiscal year 2004 ended on December 31, 2004, representing 53 weeks. All references to years refer to fiscal years.

Inventories Inventories are stated at the lower of standard cost (which approximates actual cost on a first-in, first-out basis) or market. The Company evaluates the valuation of all inventories, including raw materials, work-in-process, finished goods and spare parts on a periodic basis. Obsolete inventory or inventory in excess of management's estimated usage is written-down to its estimated market value less costs to sell, if less than its cost. Inherent in the estimates of market value are management's estimates related to economic trends, future demand for products, and technological obsolescence of the Company's products.

At December 31, 2005 and 2004, inventory balances of \$19,106,000 and \$15,133,000, respectively, were net of write-downs of \$2,523,000 and \$1,504,000, respectively. The inventory write-downs are recorded as an inventory valuation allowance established on the basis of obsolete inventory or specific identified inventory in excess of estimated usage.

Equipment and Leasehold Improvements Equipment and leasehold improvements are stated at cost, or, in the case of equipment under capital leases, the present value of future minimum lease payments at inception of the related lease. Depreciation and amortization are computed using the straight-line method over the lesser of the estimated useful lives of the assets or the terms of the leases. Useful lives range from three to seven years.

Product Warranty The Company provides a warranty on its products for a period of up to two years, and provides for warranty costs at the time of sale based on historical activity. The determination of such provisions requires the Company to make estimates of product return rates and expected costs to repair or replace the products under warranty. If actual return rates and/or repair and replacement costs differ significantly from these estimates, adjustments to

Table of Contents**Notes to consolidated financial statements (Continued)**

recognize additional cost of sales may be required in future periods. Components of the reserve for warranty costs consisted of the following (in thousands):

	Year ended December 31,	
	2005	2004
Beginning balance	\$ 127	\$ 88
Additions related to sales	57	122
Warranty costs incurred	(108)	(83)
Ending balance	\$ 76	\$ 127

Income Taxes Income taxes are reported under Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*, (SFAS 109) and, accordingly, deferred taxes are recognized using the asset and liability method, whereby deferred tax assets and liabilities are recognized for the future tax consequence attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax base, and operating loss and tax credit carry-forwards. Valuation allowances are provided if it is more likely than not that some or all of the deferred tax assets will not be recognized.

Stock-Based Compensation The Company accounts for its employee stock purchase plan and employee stock option plan in accordance with the provisions of Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 44, *Accounting for Certain Transactions Involving Stock Compensation*. Accordingly, no compensation is recognized for purchase rights issued through the employee stock purchase plan or employee stock options granted with exercise prices greater than or equal to the fair value of the underlying common stock at the date of grant. The Company complies with the disclosure provisions of FASB Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation*, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*.

SFAS No. 123, *Accounting for Stock-Based Compensation*, requires the disclosure of pro forma net income as though the Company had adopted the fair value method since the inception of the Company. Under SFAS No. 123, the fair value of stock-based awards to employees is calculated through the use of option pricing models, even though such models were developed to estimate the fair value of freely tradable, fully transferable options without vesting restrictions, which differ significantly from the Company's stock option awards. These models also require the use of subjective assumptions, including expected time to exercise, which greatly affect the calculated values.

The Company amortizes deferred stock-based compensation on the straight-line method over the vesting periods of the stock options, generally four years. Had compensation expense been determined based on the fair value at the grant date for all employee awards, consistent with

Table of Contents**Notes to consolidated financial statements (Continued)**

the provisions of SFAS No. 123, the Company's pro forma net income and net income per share would have been as follows (in thousands, except per share data):

	Year ended December 31,		
	2005	2004	2003
Net income as reported	\$ 2,003	\$ 8,550	\$ 108
Add: stock-based employee compensation included in reported net income, net of tax	151	119	24
Less: total stock-based compensation determined under the fair value-based method for all awards, net of tax	(828)	(423)	(36)
Pro forma net income	\$ 1,326	\$ 8,246	\$ 96
Basic net income per share:			
As reported	\$ 0.12	\$ 0.59	\$ 0.01
Pro forma	\$ 0.08	\$ 0.56	\$ 0.01
Diluted net income per share:			
As reported	\$ 0.12	\$ 0.55	\$ 0.01
Pro forma	\$ 0.08	\$ 0.53	\$ 0.01

The pro forma amounts reflected above may not be representative of the effects on our reported net income or loss in future years because the number of future shares to be issued under these plans is not known and the assumptions used to determine the fair value can vary significantly. See Recently issued accounting standards below for further discussion of SFAS No. 123(R), *Share Based Payments* (SFAS No. 123(R)). Based on the Black-Scholes option pricing model, the weighted average estimated fair value per share of employee stock option grants was \$3.51 for fiscal 2005, \$3.98 for fiscal 2004 and \$0.25 for 2003. The weighted average estimated fair value of purchase rights granted under the Employee Stock Purchase Plan (ESPP) was \$1.28 and \$1.62 for fiscal 2005 and 2004, respectively.

The Company's calculations in accordance with SFAS 123 were made using the Black-Scholes option pricing model with the following weighted average assumptions for options granted:

	Year ended December 31,		
	2005	2004	2003
Dividend yield	0%	0%	0%
Expected volatility	57.9%	66.0%	0.0%
Risk-free interest rate	3.9%	3.3%	2.8%
Expected life (in years)	5.0	5.0	5.0

Under SFAS 123, pro forma compensation cost is calculated for the fair market value of the stock purchase rights granted under the ESPP. In anticipation of the required implementation of SFAS 123(R) in January

2006, the Company modified the terms of its ESPP plan in November 2005 to eliminate the look-back feature and reduce the discount on purchased shares from 15% to 5%. The fair value of each stock purchase right granted under the ESPP is estimated

F-10

Table of Contents**Notes to consolidated financial statements (Continued)**

using the Black-Scholes option pricing model with the following weighted average assumptions:

	Year ended December 31,	
	2005	2004
Dividend yield	0%	0%
Expected volatility	46.5%	47.9%
Risk-free interest rate	3.5%	2.1%
Expected life (in years)	0.5	0.5

The Company's calculations are based on a single option valuation approach, and forfeitures are recognized as they occur.

Goodwill and Trade name As part of the Ultra Clean acquisition in November 2002, the Company allocated the purchase price to the tangible and intangible assets acquired, liabilities assumed, and in-process research and development based on their estimated fair values. A third-party appraisal firm assisted management in determining the fair values of the assets acquired and the liabilities assumed. Such valuations required management to make significant estimates and assumptions, especially with respect to intangible assets.

Critical estimates in valuing certain intangible assets include, but are not limited to: future expected cash flows from customer contracts; acquired developed technologies and patents; expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed; the market position of the acquired products; and assumptions about the period of time the trade name will continue to be used in Ultra Clean's product portfolio. Based upon these estimates, the trade name asset was assigned an indefinite life. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain.

SFAS No. 141, *Business Combinations*, and SFAS No. 142, *Goodwill and Other Intangible Assets* requires that all business combinations be accounted for under the purchase method and addresses the initial recognition and measurement of goodwill and other intangible assets acquired in a business combination. The provisions of SFAS No. 142 also require an annual goodwill impairment test or more frequently if impairment indicators arise. In testing for a potential impairment of goodwill, the provisions of SFAS No. 142 require the application of a fair value based test at the reporting unit level. The Company operates in one reporting segment which has one reporting unit as defined by SFAS No. 142. Therefore, all goodwill is considered enterprise goodwill and the first step of the impairment test prescribed by SFAS No. 142 requires a comparison of fair value to book value of the Company. If the estimated fair value of the Company is less than the book value, SFAS No. 142 requires an estimate of the fair value of all identifiable assets and liabilities of the business, in a manner similar to a purchase price allocation for an acquired business. This estimate requires valuations of certain internally generated and unrecognized intangible assets such as in-process research and development and developed technology. Potential goodwill impairment is measured based upon this two-step process. Management performed the annual goodwill impairment test as of December 31, 2005 and 2004 and determined that goodwill was not impaired.

Table of Contents**Notes to consolidated financial statements (Continued)**

Long-Lived Assets In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the Company evaluates the impairment of long-lived assets, based on the projection of undiscounted cash flows whenever events or changes in circumstances indicate that the carrying amounts of such assets may not be recoverable. In the event such cash flows are not expected to be sufficient to recover the recorded value of the assets, the assets are written down to their estimated fair values.

Revenue Recognition Revenue from the sale of gas delivery systems is generally recorded upon shipment. In arrangements which specify title transfer upon delivery, revenue is not recognized until the product is delivered. The Company recognizes revenue when persuasive evidence of an arrangement exists, shipment has occurred, price is fixed or determinable and collectability is reasonably assured. If the Company has not substantially completed a product or fulfilled the terms of a sales agreement at the time of shipment, revenue recognition is deferred until completion. Our standard arrangement for our customers includes a signed purchase order or contract, no right of return of delivered products and no customer acceptance provisions.

The Company assesses collectability based on the credit worthiness of the customer and past transaction history. The Company performs on-going credit evaluations of customers and does not require collateral from customers.

Research and Development Costs Research and development costs are expensed as incurred.

Net Income per Share Basic net income per share is computed by dividing net income by the weighted average number of shares outstanding for the period. Diluted net income per share earnings is calculated by dividing net income by the weighted average number of common shares outstanding and common equivalent shares from dilutive stock options and restricted stock using the treasury stock method, except when antidilutive (see Note 5).

Comprehensive Income In accordance with SFAS No. 130, *Reporting Comprehensive Income*, the Company reports by major components and as a single total, the change in its net assets during the period from non-owner sources. Comprehensive income for all periods presented was the same as net income.

Recently Issued Accounting Standards In November 2004, the FASB issued SFAS No. 151, *Inventory Costs* an amendment of ARB No. 43, Chapter 4. SFAS No. 151 amends the guidance in ARB No. 43, Chapter 4, *Inventory Pricing*, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). This Statement requires that these costs be recognized as current-period charges and requires that production overhead be based on the normal capacity of the production facilities. The Company does not expect the adoption of SFAS No. 151 in 2006 to have a material effect on the Company's consolidated financial statements.

In December 2004, the FASB issued SFAS No. 123(R), *Share-Based Payments*. SFAS No. 123(R) requires that compensation cost relating to share-based payment transactions be recognized in the financial statements based on the fair value of the equity or liability instruments issued. SFAS No. 123(R) covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights and employee share purchase plans. In April 2005, the SEC delayed the effective date of SFAS No. 123(R). SFAS No. 123(R) is effective for the Company as of the interim reporting period beginning

Table of Contents**Notes to consolidated financial statements (Continued)**

January 1, 2006. Based on the unvested stock-based awards outstanding at December 31, 2005, we do not anticipate that the adoption of SFAS No. 123(R) will have a material impact on our financial position or results of operations. However, depending on valuation factors such as the price of our common stock, if we grant stock-based awards at a similar volume to what was granted in prior years, then the application of SFAS No. 123(R) could have a material impact on our results of operations in future periods.

In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections* (SFAS No. 154) which replaces APB 20 *Accounting Changes* and SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements - an amendment of APB 28*. SFAS No. 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application, or the earliest practicable date, as the required method for reporting a change in accounting principle and restatement with respect to the reporting of a correction of an error. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005.

In June 2005, the EITF reached a consensus on Issue No. 05-06, *Determining the Amortization Period for Leasehold Improvements* (EITF 05-06). EITF 05-06 provides guidance for determining the amortization period used for leasehold improvements acquired in a business combination or purchased after the inception of a lease, (collectively referred to as subsequently acquired leasehold improvements). EITF 05-06 provides that the amortization period used for the subsequently acquired leasehold improvements to be the lesser of (a) the subsequently acquired leasehold improvements' useful lives, or (b) a period that reflects renewals that are reasonably assured upon the acquisition or the purchase. EITF 05-06 is effective on a prospective basis for subsequently acquired leasehold improvements purchased or acquired in periods beginning after the date of the FASB's ratification, which was on June 29, 2005.

2. Inventory

Inventory consisted of the following (in thousands):

	Year ended December 31,	
	2005	2004
Raw materials	\$ 12,853	\$ 9,659
Work in process	5,796	4,830
Finished goods	457	644
Total	\$ 19,106	\$ 15,133

3. Notes payable and borrowing arrangements

Series A Senior Notes The Company issued Series A Senior Notes in aggregate principal amounts of \$24,130,000, \$2,730,000 and \$3,733,000 on November 15, 2002, November 26, 2002 and December 2, 2002, respectively. These notes accrued interest at a rate of 5% per annum, were not redeemable by the holder and could be repaid, in whole or in part, with outstanding accrued interest at any time without penalty. All Series A Senior Notes were held by FP-Ultra Clean, L.L.C. and employees of the Company.

Table of Contents**Notes to consolidated financial statements (Continued)**

Of the Series A Senior Notes issued on November 26, 2002, \$1,342,000 was issued to employees of the Company for \$536,000 in cash and \$806,000 in deferred compensation. The deferred compensation amount vested, in equal annual installments, over four years from the grant date. Compensation expense was recognized and the corresponding debt amounts were accreted on a straight line basis over four years from the grant date. In connection with the IPO, the balance of \$580,000 in deferred compensation vested on March 24, 2004 and was recognized as of that date.

During the years ended December 31, 2004 and 2003, approximately \$580,000 and \$201,000, respectively, was charged to compensation expense related to the accretion of such debt amounts. At December 31, 2003, approximately \$580,000 of deferred compensation was recorded, thereby reducing the principal amount of debt outstanding to \$30,013,000.

As of April 2, 2004, the Company had redeemed all of the outstanding Series A Senior Notes plus accrued interest.

Bank Line of Credit The Company's secured line of credit arrangement, which permitted borrowing of up to \$10,000,000 based upon a defined borrowing base and bearing interest, at its option, at a rate equal to 2% per annum plus LIBOR or 0.25% per annum plus the reference rate established from time to time by the lender, expired on September 15, 2004.

In November 2004, we entered into a loan and security agreement, which we have since amended, providing for revolver loans of up to \$20.0 million (with a \$5.0 million sublimit for letters of credit). The loan and security agreement contains certain financial covenants, including a tangible net worth target and minimum profitability and liquidity ratios. Revolver loans under the loan and security agreement bear interest, at our option, at a rate equal to 1.5% per annum plus LIBOR or the reference rate established from time to time by the lender. Interest on the revolving loans is payable monthly, and the revolving facility matures on June 30, 2006. At any time prior to the revolving maturity date, we may elect to convert up to \$10.0 million of outstanding revolving borrowings into a three-year term loan with quarterly payments of principal and interest. This term loan would bear interest, at our option, at a rate equal to 1.75% per annum plus LIBOR or 0.25% plus the reference rate. Obligations under the agreement are secured by a lien on substantially all of our assets. The obligations will be guaranteed by our domestic subsidiaries, and such guarantees will be secured by a lien on substantially all of their assets.

During the first quarter of 2005, we entered into a loan and security agreement providing for a borrowing facility of up to \$3.0 million with a bank in China. The borrowing facility is secured by our standby letter of credit issued under the Company's credit facility. The weighted average interest rate on borrowings under the facility was 5.2% per annum at December 31, 2005. As of December 31, 2005, the balance outstanding under the facility was \$2.3 million, a portion of which was repayable in Renminbi.

Table of Contents**Notes to consolidated financial statements (Continued)****4. Income taxes**

The provision for taxes on income consisted of the following (in thousands):

	Year ended December 31,		
	2005	2004	2003
Current:			
Federal	\$ 707	\$ 4,099	\$ (58)
State	324	987	77
Total current	1,031	5,086	19
Deferred:			
Federal	(226)	(579)	152
State	(100)	4	61
Total deferred	(326)	(575)	213
Total provision	\$ 705	\$ 4,511	\$ 232

Significant components of net deferred tax assets for federal and state income taxes were as follows (in thousands):

	Year ended December 31,	
	2005	2004
Net deferred tax asset:		
Current:		
Inventory valuation and basis difference	\$2,048	\$1,756
Other accrued expenses	109	238
State taxes	137	346
	2,294	2,340
Non-current:		
Deferred rent	5	6
Other accrued expenses	144	108
Depreciation	2,308	1,922
State taxes	(325)	(268)
	2,132	1,768
Net deferred tax assets	\$4,426	\$4,108

Table of Contents**Notes to consolidated financial statements (Continued)**

The effective tax rate differs from the federal statutory tax rate as follows:

	Year ended December 31,		
	2005	2004	2003
Federal income tax provision at statutory rate	34.0%	35.0%	35.0%
State income taxes, net of federal benefit	5.4	5.0	23.7
Effect of foreign operations	(4.2)	1.2	
Exempt income	(7.9)	(5.9)	
Goodwill			5.9
Other	(1.3)	(0.8)	3.6
Effective income tax rate	26.0%	34.5%	68.2%

All foreign earnings are considered to be permanently reinvested under APB 23.

5. Stockholders equity

Employee Stock Purchase Plan In 2004 the Company adopted an Employee Stock Purchase Plan (ESPP) and is authorized to issue 555,343 shares of common stock under the ESPP. The ESPP permits employees to purchase common stock at a discount through payroll withholdings at certain specified dates (purchase period) within a defined offering period. The purchase price is 95% of the fair market value of the common stock at the end of the purchase period and is intended to qualify as an employee stock purchase plan under Section 423 of the Internal Revenue Code. There were 86,717 shares issued under the ESPP during the one full offering period in the year ended December 31, 2005.

Stock Options On February 20, 2003, Ultra Clean adopted the 2003 Stock Incentive Plan (the 2003 Incentive Plan) which was subsequently amended and restated. The Company has reserved 3,444,756 shares of its common stock for issuance under the 2003 Incentive Plan, as amended and restated. The 2003 Incentive Plan provides for the issuance of options and other stock-based awards. Options are generally granted at fair value at the date of grant as determined by the Board of Directors, have terms up to ten years and generally vest over four years. At December 31, 2005, 1,213,939 shares were available for future grants under the 2003 Incentive Plan.

Table of Contents**Notes to consolidated financial statements (Continued)**

Option activity under the 2003 Incentive Plan is as follows:

	Shares	Weighted average exercise price
Outstanding, December 31, 2002		\$
Granted	1,067,000	\$ 1.00
Cancelled	(11,750)	\$ 1.00
Outstanding, December 31, 2003	1,055,250	\$ 1.00
Granted	569,000	\$ 6.64
Exercised	(14,020)	\$ 1.00
Cancelled	(37,816)	\$ 2.15
Outstanding, December 31, 2004	1,572,414	\$ 3.01
Granted	859,000	\$ 6.60
Exercised	(48,180)	\$ 1.10
Cancelled	(262,797)	\$ 5.76
Outstanding, December 31, 2005	2,120,437	\$ 4.17

The following table summarizes information with respect to options outstanding and exercisable at December 31, 2005:

Range of exercise price	Number outstanding	Weighted average remaining average life (years)	Weighted average exercise price	Number exercisable	Weighted average exercise price
\$0.01-\$1.00	927,588	7.16	\$1.00	668,845	\$ 1.00
\$1.01-\$5.00	28,500	8.81	\$4.36	8,303	4.36
\$5.01-\$6.00	35,000	8.87	\$5.35	9,479	5.35
\$6.01-\$6.99	709,500	9.35	\$6.49	7,436	6.29
\$7.00-\$8.99	419,849	8.72	\$7.13	110,301	7.18
\$0.01-\$8.99	2,120,437	8.25	\$4.17	804,364	\$ 1.98

Common Stock On March 24, 2004, the Company sold 6,000,000 shares of its common stock at a price to the public of \$7.00 per share in an initial public offering (IPO). After deducting the underwriting discount of \$0.49 per share, the net proceeds to the Company were approximately \$39.1 million. Of the net proceeds, approximately \$31.1 million was used to redeem the Company's outstanding Series A Senior Notes plus accrued interest.

F-17

Table of Contents**Notes to consolidated financial statements (Continued)**

On April 21, 2004, as part of the Company's IPO, FP-Ultra Clean, L.L.C., the Company's principle stockholder sold 720,350 shares of the Company's common stock in connection with the exercise by the underwriters of an over-allotment option. The Company did not receive any of the proceeds from the exercise of the over-allotment option. As of December 31, 2005, FP-Ultra Clean's ownership of the Company was approximately 55%.

The Company's expenses associated with the IPO totaled approximately \$3.9 million, including a \$2 million advisory fee paid to Francisco Partners Management LLC.

Restricted Stock On November 26, 2002, Ultra Clean granted 268,525 shares of common stock to certain key employees and on March 1, 2004, the Company granted 62,500 shares of common stock to a board member under the 2003 Incentive Plan. These restricted shares vest, in equal installments, over a four year period from the date of grant.

For the years ended December 31, 2005, 2004 and 2003, Ultra Clean charged \$205,000, \$149,000 and \$67,000, respectively, to compensation expense related to the vesting of such restricted stock. The unvested amount is subject to forfeiture, until the common stock is fully vested. At December 31, 2005, 228,392 shares were vested and 102,633 shares were subject to repurchase.

6. Net income per share

The following is a reconciliation of the numerators and denominators used in computing basic and diluted net income per share (in thousands):

	Year ended December 31,		
	2005	2004	2003
Numerator, basic and diluted Net income	\$ 2,003	\$ 8,550	\$ 108
Denominator:			
Shares used in computation basic:			
Weighted average common shares outstanding	16,417	14,851	10,239
Weighted average common shares outstanding subject to repurchase	(176)	(246)	(263)
Shares used in computing basic net income per share	16,241	14,605	9,976
Shares used in computation diluted:			
Weighted average common shares outstanding	16,241	14,605	9,976
Dilutive effect of common shares outstanding subject to repurchase	129	195	263
Dilutive effect of options outstanding	799	742	472
Shares used in computing diluted net income per share	17,169	15,542	10,711
Net income per share basic	\$ 0.12	\$ 0.59	\$ 0.01
Net income per share diluted	\$ 0.12	\$ 0.55	\$ 0.01

The Company had securities outstanding which could potentially dilute basic earnings per share in the future, but the incremental shares from the assumed exercise of these securities were

Table of Contents**Notes to consolidated financial statements (Continued)**

excluded in the computation of diluted net income per share, as their effect would have been anti-dilutive. Such outstanding securities consist of the following:

	Year ended December 31,		
	2005	2004	2003
Shares of common stock subject to repurchase	47	51	
Outstanding options	925	468	

Deferred Stock Compensation During the year ended December 31, 2003, the Company issued 1,067,000 common stock options to employees at a weighted average exercise price of \$1.00 per share. The weighted average exercise price was below the weighted average deemed fair value of the Company's common stock which ranged from \$1.00 to \$4.97 per share. In connection with these options, the Company recorded deferred stock-based compensation of approximately \$132,000 and amortized approximately \$29,000, \$33,000 and \$9,000 as an expense during the years ended December 31, 2005, 2004 and 2003, respectively.

7. Employee benefit plan

The Company sponsors a 401(k) savings and profit sharing plan (the 401(k) Plan) for all employees who meet certain eligibility requirements. Participants could elect to contribute to the 401(k) Plan, on a pre-tax basis, from 2-19% of their salary up to a maximum of \$14,000. The Company may make matching contributions up to 6% of employee contributions based upon eligibility. The Company made approximately \$315,000, \$310,000, and \$186,000 in discretionary employer contributions to the 401(k) Plan in the years ended December 31, 2005, 2004 and 2003, respectively.

8. Related party transaction

In addition to the related party transactions previously described, the Company entered into an agreement with a key executive of the Company on November 15, 2002 to defer payment of \$265,000 in compensation until November 15, 2009. Under this arrangement the Company pays interest of 2.7% per annum, payable on June 30 and December 31 of each year. The amounts owed under this arrangement may be prepaid by the Company at the discretion of the board of directors. The principal amount owed under this arrangement is contained within Capital lease obligations and other liabilities on the balance sheet of the Company.

During the years ended December 31, 2005, 2004 and 2003 the Company incurred approximately \$0, \$75,000 and \$0 for directors' fees provided by principals of Francisco Partners, L.P., an affiliate of FP-Ultra Clean, L.L.C. See Notes 3 and 5 for other amounts paid to affiliates of FP-Ultra Clean, L.L.C.

9. Industry and segment information

The Company operates in one reportable segment and is engaged in the development, manufacture and supply of critical subsystems for the semiconductor capital equipment industry. The nature of the Company's products and production processes as well as type of customers and distribution methods is consistent among all of the Company's products. The

Table of Contents**Notes to consolidated financial statements (Continued)**

Company's foreign operations are conducted primarily through its wholly-owned subsidiary in China. The Company's principal markets include North America, Europe and Asia. Net sales by geographic area represent sales to unaffiliated customers.

All information on sales by geographic area is based upon the location to which the products were shipped. The following table sets forth revenue by geographic area (in thousands):

	Year ended December 31,		
	2005	2004	2003
Net Sales			
United States	\$ 139,363	\$ 178,260	\$ 74,412
Export sales to Europe and Asia	8,172	5,944	3,108
Total Net sales	\$ 147,535	\$ 184,204	\$ 77,520

Prior to fiscal year 2004, all of the Company's long-lived assets were located in the United States. At December 31, 2005, approximately \$1,905,000 of the Company's long-lived assets were located in China and the balance were located in the United States.

10. Commitments and contingencies

The Company leases certain equipment under capital lease arrangements. In addition, the Company leases its corporate and regional offices as well as some of its office equipment under noncancelable operating leases. The Company has a renewal option for its leased facilities in Austin, Texas, Tualatin, Oregon and Shanghai, China. Future minimum lease payments under these leases are as follows (in thousands):

Year Ending December 31,	Capital Leases	Operating Leases
2006	\$ 79	\$ 1,238
2007	55	962
2008	24	309
2009	4	71
2010		
Total	162	\$ 2,580
Less interest	14	
Present value of net minimum lease payments	148	
Less current portion	70	
Long-term portion	\$ 78	

The cost of equipment under the capital leases included in property and equipment at December 31, 2005 and 2004 was approximately \$487,000. Net book value of leased equipment at December 31, 2005 and 2004 was approximately \$142,000 and \$273,000, respectively.

Table of Contents

Notes to consolidated financial statements (Continued)

Rental expense for the year ended December 31, 2005, 2004 and 2003 was \$1,316,000, \$1,061,000 and \$1,113,000, respectively. Included within capital lease obligations and other liabilities in 2005 and 2004 was \$11,000 and \$14,000 of deferred rent, respectively.

In connection with letters of credit required for the leases of certain facilities, the Company held \$150,000 and \$280,000 on deposit in restricted cash accounts as of December 31, 2005 and 2004, respectively. The restricted cash balance is included within prepaid expenses and other assets and other non-current assets. The Company had commitments to purchase inventory totaling approximately \$26,040,000 at December 31, 2005.

On September 2, 2005, the Company filed suit in the federal court for the Northern District of California against Celerity, Inc., or Celerity, seeking a declaratory judgment that our new substrate technology does not infringe certain of Celerity's patents and/or that Celerity's patents are invalid. On September 13, 2005, Celerity filed suit in the federal court of Delaware alleging that the Company has infringed seven patents by developing and marketing products that use Celerity's fluid distribution technology. The Delaware litigation was transferred to the Northern District of California on October 19, 2005 and on December 12, 2005 was consolidated with our previously filed declaratory judgment action. The complaint by Celerity seeks injunction against future infringement of its patents and compensatory and treble damages. The Company believes that claims made by Celerity are without merit and intends to defend the lawsuit vigorously.
