

MORGAN STANLEY QUALITY MUNICIPAL SECURITIES

Form N-CSR

January 23, 2007

Welcome, Shareholder:

In this report, you'll learn about how your investment in Morgan Stanley Quality Municipal Securities performed during the annual period. We will provide an overview of the market conditions, and discuss some of the factors that affected performance during the reporting period. In addition, this report includes the Trust's financial statements and a list of Trust investments.

Market forecasts provided in this report may not necessarily come to pass. There is no assurance that the Trust will achieve its investment objective. The Trust is subject to market risk, which is the possibility that market values of securities owned by the Trust will decline and, therefore, the value of the Trust's shares may be less than what you paid for them. Accordingly, you can lose money investing in this Trust. Income earned by certain securities in the portfolio may be subject to the federal alternative minimum tax (AMT).

Fund Report
For the year ended October 31, 2006

Market Conditions

Against the backdrop of strong economic growth, good employment data and inflationary pressures stemming from rising oil prices, the Federal Open Market Committee (the "Fed") continued its tightening campaign during the first eight months of the reporting period, raising the federal funds target rate six times to 5.25 percent at the end of June. In the months that followed, however, economic growth moderated as consumer spending and housing weakened while inflation concerns eased, prompting the Fed to keep its target rate unchanged for the remainder of the period.

Short-term municipal bonds posted the lowest returns as Fed rate hikes pushed yields in this portion of the market higher. Representative yields on two-year AAA municipals increased from 3.10 percent to 3.50 percent during the

period. In contrast, long-term municipal bonds earned the best returns, with yields on 30-year AAA-rated municipal bonds declining from 4.60 percent to 4.10 percent. Accordingly, the spread between long-term and short-term interest rates narrowed and the slope of the municipal yield curve flattened dramatically. Many investors continued to favor the higher income of lower-quality bonds and as a result, credit spreads remained tight. Credit spreads measure the incremental yield investors are willing to accept to assume additional credit risk. When credit spreads tighten, lower-quality issues typically outperform high-grade issues.

Continued interest in the municipal market by institutional investors and non-traditional buyers such as hedge funds strengthened demand for municipal bonds. However, municipal bond issuance lagged last year's record pace by 12 percent in the first 10 months of 2006. The overall decline was due in great part to a slowdown of refunding activity to roughly one half of the previous year's rate. Issuers in California, Texas, Florida, New York and Illinois accounted for about 40 percent of 2006 year-to-date underwriting volume. Bond issues backed by insurance had close to a 50 percent market share.

Strong demand and lower supply helped municipal bond performance keep pace with that of Treasuries. The municipal-to-Treasury yield ratio measures the relative attractiveness of the two sectors. A decline in this ratio indicates that while municipals outperformed Treasuries for the period measured, they also became richer (less attractive) on a relative basis. During the 12-month reporting period, the 30-year municipal-to-Treasury yield ratio declined from 92 to 87 percent. In comparison, this yield ratio reached a high of 102 percent in 2005.

Performance Analysis

For the 12-month period ended October 31, 2006, the net asset value (NAV) of Morgan Stanley Quality Municipal Securities (IQM) increased from \$15.86 to \$16.04 per share. Based on this change plus reinvestment of tax-free dividends totaling \$0.803 per share, a short-term capital gain distribution of \$0.013 and a long-term capital gain distribution of \$0.213 per share, the Trust's total NAV return was 8.68 percent. IQM's value on the New York Stock Exchange (NYSE)

2

moved from \$14.09 to \$14.70 per share during the same period. Based on this change plus reinvestment of dividends and distributions, the Trust's total market return was 12.11 percent. IQM's NYSE market price was at a 8.35 percent discount to its NAV. During the fiscal period, the Trust purchased and retired 510,900 shares of common stock at a weighted average market discount of 8.81 percent. *Past performance is no guarantee of future results.*

Monthly dividends for the fourth quarter of 2006, declared in September, decreased from \$0.0675 to \$0.06 per share. The dividend reflects the current level of the Trust's net investment income. IQM's level of undistributed net investment income was \$0.067 per share on October 31, 2006, versus \$0.128 per share 12 months earlier.¹

During the reporting period, the Trust's interest-rate posture continued to reflect the anticipation of higher rates. As a result, at the end of October the Trust's option-adjusted duration* including leverage was positioned at 10.7 years. To implement this strategy of reducing the portfolio's duration, a U.S. Treasury futures hedge was used. This positioning helped total returns as interest rates rose but tempered performance when rates declined. Purchases during the period favored bonds with maturities of 20 years or longer. The Trust benefited from this emphasis on the long end of the yield curve, as this segment of the market performed strongly.

The Trust maintained its high quality bias with more than 90 percent of the portfolio rated A or better. However, exposure to investment grade bonds rated BBB was modestly increased by purchases of tobacco securitization bonds in the industrial development/pollution control sector. This had a positive impact on performance as lower-rated issues outperformed. Another boost to performance came from issues that appreciated when they were pre-refunded. Reflecting a commitment to diversification, the Trust's net assets of approximately \$320 million, including preferred shares, were invested among 15 long-term sectors and 83 credits. As of the close of the period, the Trust's largest allocations were to the transportation, water and sewer, and IDR/PCR sectors.

As discussed in previous reports, the total income available for distribution to holders of common shares includes incremental income provided by the Trust's outstanding Auction Rate Preferred Shares (ARPS). ARPS dividends reflect prevailing short-term interest rates on maturities ranging from one week to two years. Incremental income to holders of common shares depends on two factors: the amount of ARPS outstanding and the spread between the portfolio's cost yield and its ARPS auction rate and expenses. The greater the spread and the higher the amount of ARPS outstanding, the greater the amount of incremental income available for distribution to holders of common shares. The level of net investment income available for distribution to holders of common shares varies with the level of short-term interest rates. ARPS leverage also increases the price volatility of common shares and has the effect of extending portfolio duration.

The Fed's policy of raising interest rates throughout much of the period increased the cost of ARPS borrowing to the common shareholder, which reduced the benefits of leverage. During this 12-month period,

3

ARPS leverage contributed approximately \$0.08 per share to common-share earnings. The Trust had 5 ARPS series totaling \$97 million, representing 30 percent of net assets, including preferred shares. ARPS rates ranged from 1.59 to 3.96 percent during the fiscal period.

The Trust's procedure for reinvesting all dividends and distributions in common shares is through purchases in the open market. This method helps support the market value of the Trust's shares. In addition, we would like to remind you that the Trustees have approved a procedure whereby the Trust may, when appropriate, purchase shares in the open market or in privately negotiated transactions at a price not above market value or net asset value, whichever is

lower at the time of purchase. The Trust may also utilize procedures to reduce or eliminate the amount of ARPS outstanding, including their purchase in the open market or in privately negotiated transactions.

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. Investment return, net asset value and common share market price will fluctuate and Trust shares, when sold, may be worth more or less than their original cost.

There is no guarantee that any sectors mentioned will continue to perform as discussed herein or that securities in such sectors will be held by the Trust in the future.

¹ *Income earned by certain securities in the portfolio may be subject to the federal alternative minimum tax (AMT).*

** A measure of the sensitivity of a bond's price to changes in interest rates, expressed in years. Each year of duration represents an expected 1 percent change in the price of a bond for every 1 percent change in interest rates. The longer a bond's duration, the greater the effect of interest-rate movements on its price. Typically, trusts with shorter durations perform better in rising-interest-rate environments, while trusts with longer durations perform better when rates decline. Duration calculations are adjusted for leverage.*

For More Information
About Portfolio Holdings

Each Morgan Stanley trust provides a complete schedule of portfolio holdings in its semiannual and annual reports within 60 days of the end of the trust's second and fourth fiscal quarters. The semiannual reports and the annual reports are filed electronically with the Securities and Exchange Commission (SEC) on Form N-CSRS and Form N-CSR, respectively. Morgan Stanley also delivers the semiannual and annual reports to trust shareholders and makes these reports available on its public web site, www.morganstanley.com. Each Morgan Stanley trust also files a complete schedule of portfolio holdings with the SEC for the trust's first and third fiscal quarters on Form N-Q. Morgan Stanley does not deliver the reports for the first and third fiscal quarters to shareholders, nor are the reports posted to the Morgan Stanley public web site. You may, however, obtain the Form N-Q filings (as well as the Form N-CSR and N-CSRS filings) by accessing the SEC's web site, <http://www.sec.gov>. You may also review and copy them at the SEC's public reference room in Washington, DC. Information on the operation of the SEC's public reference room may be obtained by calling the SEC at (800) SEC-0330. You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC's e-mail address (publicinfo@sec.gov) or by writing the public reference section of the SEC, Washington, DC 20549-0102.

Morgan Stanley Quality Municipal Securities

Notes to Financial Statements October 31, 2006

1. Organization and Accounting Policies

Morgan Stanley Quality Municipal Securities (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The Trust’s investment objective is to provide current income which is exempt from federal income tax. The Trust was organized as a Massachusetts business trust on March 3, 1993 and commenced operations on September 29, 1993.

The following is a summary of significant accounting policies:

A. Valuation of Investments — (1) portfolio securities are valued by an outside independent pricing service approved by the Trustees. The pricing service uses both a computerized grid matrix of tax-exempt securities and evaluations by its staff, in each case based on information concerning market transactions and quotations from dealers which reflect the mean between the last reported bid and asked price. The portfolio securities are thus valued by reference to a combination of transactions and quotations for the same or other securities believed to be comparable in quality, coupon, maturity, type of issue, call provisions, trading characteristics and other features deemed to be relevant. The Trustees believe that timely and reliable market quotations are generally not readily available for purposes of valuing tax-exempt securities and that the valuations supplied by the pricing service are more likely to approximate the fair value of such securities; (2) futures are valued at the latest sale price on the commodities exchange on which they trade unless it is determined that such price does not reflect their market value, in which case they will be valued at their fair value as determined in good faith under procedures established by and under the supervision of the Trustees; and (3) short-term debt securities having a maturity date of more than sixty days at time of purchase are valued on a

mark-to-market basis until sixty days prior to maturity and thereafter at amortized cost based on their value on the 61st day. Short-term debt securities having a maturity date of sixty days or less at the time of purchase are valued at amortized cost.

B. Accounting for Investments — Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses on security transactions are determined by the identified cost method. Discounts are accreted and premiums are amortized over the life of the respective securities. Interest income is accrued daily.

C. Futures Contracts — A futures contract is an agreement between two parties to buy and sell financial instruments or contracts based on financial indices at a set price on a future date. Upon entering into such a contract, the Trust is required to pledge to the broker cash, U.S. Government securities or other liquid portfolio securities equal to the minimum initial margin requirements of the applicable futures exchange. Pursuant to the contract, the Trust agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments known as variation margin are recorded by the Trust as unrealized gains and losses. Upon closing of the contract, the Trust realizes a gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

17

Morgan Stanley Quality Municipal Securities

Notes to Financial Statements October 31, 2006 continued

D. Floating Rate Note Obligations Related to Securities Held — The Trust enters into transactions in which it transfers to Dealer Trusts (“Dealer Trusts”), fixed rate bonds in exchange for cash and residual interests in the Dealer Trusts’ assets and cash flows, which are in the form of inverse floating rate investments. The Dealer Trusts fund the purchases of the fixed rate bonds by issuing floating rate notes to third parties and allowing the Trust to retain residual interest in the bonds. The Trust enters into shortfall agreements with the Dealer Trusts which commit the Trust to pay the Dealer Trusts, in certain circumstances, the difference between the liquidation value of the fixed rate bonds held by the Dealer Trusts and the liquidation value of the floating rate notes held by third parties, as well as any shortfalls in interest cash flows. The residual interests held by the Trust (inverse floating rate investments) include the right of the Trust (1) to cause the holders of the floating rate notes to tender their notes at par at the next interest rate reset date, and (2) to transfer the municipal bond from the Dealer Trusts to the Trust, thereby collapsing the Dealer Trusts. The Trust accounts for the transfer of bonds to the Dealer Trusts as secured borrowings, with the securities transferred remaining in the Trust’s investment assets, and the related floating rate notes reflected as Trust liabilities under the caption “floating rate note obligations” on the “Statement of Assets and Liabilities”. The Trust records the interest income from the fixed rate bonds under the caption “Interest Income” and records the expenses related to floating rate note obligations and any administrative expenses of the dealer trusts under the caption “Interest and residual trust expenses” in the Trust’s “Statement of Operations”. The notes issued by the Dealer Trusts have interest rates that reset weekly and the floating rate note holders have the option to tender their notes to the Dealer Trusts for redemption at par at each reset date. At October 31, 2006, Trust investments with a value of \$23,588,320 are held by the Dealer Trusts and serve as collateral for the \$15,228,700 in floating rate note obligations outstanding at that date. Contractual maturities of the floating rate note obligations and interest rates in effect at October 31, 2006 are presented in the “Portfolio of Investments”.

E. Federal Income Tax Policy — It is the Trust’s policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable and nontaxable income to its shareholders. Accordingly, no federal income tax provision is required.

F. Dividends and Distributions to Shareholders — Dividends and distributions to shareholders are recorded on the ex-dividend date.

G. Use of Estimates — The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

2. Investment Advisory/Administration Agreements

Pursuant to an Investment Advisory Agreement with Morgan Stanley Investment Advisors Inc. (the “Investment Adviser”), the Trust pays an advisory fee, calculated weekly and payable monthly, by applying the annual rate of 0.27% to the Trust’s weekly total net assets including preferred shares.

18

Morgan Stanley Quality Municipal Securities

Notes to Financial Statements October 31, 2006 continued

Pursuant to an Administration Agreement with Morgan Stanley Services Company Inc. (the “Administrator”), an affiliate of the Investment Adviser, the Trust pays an administration fee, calculated weekly and payable monthly, by applying the annual rate of 0.08% to the Trust’s weekly total net assets including preferred shares.

3. Security Transactions and Transactions with Affiliates

The cost of purchases and proceeds from sales of portfolio securities, excluding short-term investments, for the year ended October 31, 2006, aggregated \$47,073,869 and \$57,682,249, respectively.

Morgan Stanley Trust, an affiliate of the Investment Adviser and Administrator, is the Trust’s transfer agent.

The Trust has an unfunded noncontributory defined benefit pension plan covering certain independent Trustees of the Trust who will have served as independent Trustees for at least five years at the time of retirement. Benefits under this plan are based on factors which include years of service and compensation. The Trustees voted to close the plan to new participants and eliminate the future benefits growth due to increases to compensation after July 31, 2003. Aggregate pension costs for the year ended October 31, 2006, included in Trustees’ fees and expenses in the Statement of Operations amounted to \$3,740. At October 31, 2006, the Trust had an accrued pension liability of \$52,183 which is included in accrued expenses in the Statement of Assets and Liabilities.

The Trust has an unfunded Deferred Compensation Plan (the “Compensation Plan”) which allows each independent Trustee to defer payment of all, or a portion, of the fees he or she receives for serving on the Board of Trustees. Each eligible Trustee generally may elect to have the deferred amounts credited with a return equal to the total return on one or more of the Morgan Stanley funds that are offered as investment options under the Compensation Plan. Appreciation/depreciation and distributions received from these investments are recorded with an offsetting

increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Trust.

4. Preferred Shares of Beneficial Interest

The Trust is authorized to issue up to 1,000,000 non-participating preferred shares of beneficial interest having a par value of \$.01 per share, in one or more series, with rights as determined by the Trustees, without approval of the common shareholders. The Trust has issued Series 1 through 5, Auction Rate Preferred Shares (“preferred shares”) which have a liquidation value of \$50,000 per share plus the redemption premium, if any, plus accumulated but unpaid dividends, whether or not declared, thereon to the date of distribution. The Trust may redeem such shares, in whole or in part, at the original purchase price of \$50,000 per share plus accumulated but unpaid dividends, whether or not declared, thereon to the date of redemption.

19

Morgan Stanley Quality Municipal Securities

Notes to Financial Statements October 31, 2006 continued

Dividends, which are cumulative, are reset through auction procedures.

SERIES	SHARES*	AMOUNT		RESET DATE	RANGE OF DIVIDEND RATES**
		IN THOUSANDS*	RATE*		
1	340	\$ 17,000	3.42%	11/07/06	2.33% – 3.80%
2	300	15,000	3.50	11/01/06	2.36 – 3.95

4	600	30,000	3.50	11/07/06	1.59 – 3.80
5	400	20,000	3.50	11/07/06	2.25 – 3.80

* As of October 31, 2006.

** For the year ended October 31, 2006.

Subsequent to October 31, 2006 and up through December 1, 2006, the Trust paid dividends to Series 1 through 5 at rates ranging from 3.10% to 3.60%, in the aggregate amount of \$274,222.

The Trust is subject to certain restrictions relating to the preferred shares. Failure to comply with these restrictions could preclude the Trust from declaring any distributions to common shareholders or purchasing common shares and/or could trigger the mandatory redemption of preferred shares at liquidation value.

The preferred shares, which are entitled to one vote per share, generally vote with the common shares but vote separately as a class to elect two Trustees and on any matters affecting the rights of the preferred shares.

5. Common Shares of Beneficial Interest

Transactions in common shares of beneficial interest were as follows:

	SHARES	PAR VALUE	CAPITAL PAID IN EXCESS OF PAR VALUE
Balance, October 31, 2004	14,890,258	\$148,903	\$219,195,911
Treasury shares purchased and retired (weighted average discount 11.33%)*	(466,757)	(4,668)	(6,659,808)
Balance, October 31, 2005	14,423,501	144,235	212,536,103
Treasury shares purchased and retired (weighted average discount 8.81%)*	(510,900)	(5,109)	(7,310,075)
Balance, October 31, 2006	13,912,601	\$139,126	\$205,226,028

*

The Trustees have voted to retire the shares purchased.

20

Morgan Stanley Quality Municipal Securities

Notes to Financial Statements October 31, 2006 continued

6. Dividends to Common Shareholders

On September 26, 2006, the Trust declared the following dividends from net investment income:

AMOUNT PER SHARE	RECORD DATE	PAYABLE DATE
\$0.06	November 3, 2006	November 17, 2006
\$0.06	December 8, 2006	December 22, 2006

7. Expense Offset

The expense offset represents a reduction of the fees and expenses for interest earned on cash balances maintained by the Trust with the transfer agent and custodian.

8. Purposes of and Risks Relating to Certain Financial Instruments

The Trust may invest a portion of its assets in inverse floating rate instruments, either through outright purchases of inverse floating rate securities or through the transfer of bonds to a dealer trust in exchange for cash and residual interests in the dealer trust. These investments are typically used by the Trust in seeking to enhance the yield of the portfolio. These instruments typically involve greater risks than a fixed rate municipal bond. In particular, these instruments are acquired through leverage or may have leverage embedded in them and therefore involve many of the risks associated with leverage. Leverage is a speculative technique that may expose the Trust to greater risk and increased costs. Leverage may cause the Trust's net asset value to be more volatile than if it had not been leveraged

because leverage tends to magnify the effect of any increases or decreases in the value of the Trust's portfolio securities. The use of leverage may also cause the Trust to liquidate portfolio positions when it may not be advantageous to do so in order to satisfy its obligations with respect to inverse floating rate instruments.

To hedge against adverse interest rate changes, the Trust may invest in financial futures contracts or municipal bond index futures contracts ("futures contracts").

These futures contracts involve elements of market risk in excess of the amount reflected in the Statement of Assets and Liabilities. The Trust bears the risk of an unfavorable change in the value of the underlying securities. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

9. Federal Income Tax Status

The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations which may differ from generally accepted accounting principles. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification.

21

Morgan Stanley Quality Municipal Securities

Notes to Financial Statements October 31, 2006 continued

Dividends and distributions which exceed net investment income and net realized capital gains for tax purposes are reported as distributions of paid-in-capital.

The tax character of distributions paid was as follows:

	FOR THE YEAR ENDED OCTOBER 31, 2006	FOR THE YEAR ENDED OCTOBER 31, 2005
Tax-exempt income	\$ 14,548,942	\$ 14,111,658
Ordinary income	180,171	—
Long-term capital gains	3,074,083	213,483
Total distributions	\$ 17,803,196	\$ 14,325,141

As of October 31, 2006, the tax-basis components of accumulated earnings were as follows:

Undistributed tax-exempt income	\$ 993,615
Undistributed long-term gains	1,046,937

Edgar Filing: MORGAN STANLEY QUALITY MUNICIPAL SECURITIES - Form N-CSR

Net accumulated earnings	2,040,552
Temporary differences	(62,982)
Net unrealized appreciation	15,842,250
Total accumulated earnings	\$17,819,820

As of October 31, 2006, the Trust had temporary book/tax differences primarily attributable to book amortization of discounts on debt securities, mark-to-market of open futures contracts and dividend payable.

10. New Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued Interpretation 48, Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement 109 (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position must meet before being recognized in the financial statements. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Trust will adopt FIN 48 for the fiscal year ending 2008 and the impact to the Trust’s financial statements, if any, is currently being assessed.

In addition, in September 2006, Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS 157), was issued and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Management is currently evaluating the impact the adoption of SFAS 157 will have on the Trust’s financial statement disclosures.

Morgan Stanley Quality Municipal Securities

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Trustees of
Morgan Stanley Quality Municipal Securities:

We have audited the accompanying statement of assets and liabilities of Morgan Stanley Quality Municipal Securities (the "Trust"), including the portfolio of investments, as of October 31, 2006, and the related statements of operations for the year then ended and changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of October 31, 2006, by correspondence with the custodian and brokers. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Morgan Stanley Quality Municipal Securities as of October 31, 2006, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

Shareholder Voting Results (unaudited)

On June 20, 2006, an annual meeting of the Trust's shareholders was held for the purpose of voting on the following matter, the results of which were as follows:

Election of Trustees by all Shareholders:

	# of Shares		
	For	Withheld	Abstain
Frank L. Bowman	8,914,421	145,623	—
Kathleen A. Dennis	8,907,145	152,899	—
Edwin J. Garn	8,860,155	199,889	—
Michael F. Klein	8,917,314	142,730	—
Michael E. Nugent	8,896,242	163,802	—
W. Allen Reed	8,906,947	153,097	—

No broker "non-votes" were cast in connection with this proposal. Broker "non-votes" are shares held in street name for which the broker indicates that instructions have not been received from the beneficial owners or other persons entitled to vote and for which the broker does not have discretionary voting authority.

The following Trustees were not standing for reelection at this meeting: Michael Bozic, Wayne E. Hedien, James F. Higgins, Dr. Manuel H. Johnson, Joseph J. Kearns and Fergus Reid.

Morgan Stanley Quality Municipal Securities

Revised Investment Policy (unaudited)

The Trustees approved the following investment policy:

Interest Rate Transactions. The Trust may enter into interest rate swaps and may purchase or sell interest rate caps, floors and collars. The Trust expects to enter into these transactions primarily to manage interest rate risk, hedge portfolio positions and preserve a return or spread on a particular investment or portion of its portfolio. The Trust may also enter into these transactions to protect against any increase in the price of securities the Trust anticipates purchasing at a later date. The Trust does not intend to use these transactions as speculative investments and will not enter into interest rate swaps or sell interest rate caps or floors where it does not own or have the right to acquire the underlying securities or other instruments providing the income stream the Trust may be obligated to pay. Interest rate swaps involve the exchange by the Trust with another party of their respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed-rate payments. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest on a contractually-based principal amount from the party selling the interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a contractually-based principal amount from the party selling the interest rate floor. An interest rate collar combines the elements of purchasing a cap and selling a floor. The collar protects against an interest rate rise above the maximum amount but foregoes the benefit of an interest rate decline below the minimum amount.

The Trust may enter into interest rate swaps, caps, floors and collars on either an asset-based or liability-based basis, and will usually enter into interest rate swaps on a net basis, i.e., the two payment streams are netted out, with the Trust receiving or paying, as the case may be, only the net amount of the two payments. The net amount of the excess, if any, of the Trust's obligations over its entitlements with respect to each interest rate swap will be accrued on a daily basis and the Trust segregates an amount of cash and/or liquid securities having an aggregate net asset value at least equal to the accrued excess. If the Trust enters into an interest rate swap on other than a net basis, the Trust would segregate the full amount accrued on a daily basis of the Trust's obligations with respect to the swap. Interest rate transactions do not constitute senior securities under the 1940 Act when the Trust segregates assets to cover the obligations under the transactions. The Trust will enter into interest rate swap, cap or floor transactions only with counterparties approved by the Trust's Board of Trustees. The Adviser will monitor the creditworthiness of counterparties to the Trust's interest rate swap, cap, floor and collar transactions on an ongoing basis. If there is a default by the other party to such a transaction, the Trust will have contractual remedies pursuant to the agreements related to the transaction. To the extent the Trust sells (i.e., writes) caps, floors and collars, it will segregate cash and/or liquid securities having an aggregate net asset value at least equal to the full amount, accrued on a daily basis, of the Trust's net obligations with respect to the caps, floors or collars. The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those

26

Morgan Stanley Quality Municipal Securities

Revised Investment Policy (unaudited) continued

associated with ordinary portfolio securities transactions. If the Adviser is incorrect in its forecasts of the market values, interest rates and other applicable factors, the investment performance of the Trust would diminish compared with what it would have been if these investment techniques were not used. The use of interest rate swaps, caps, collars and floors may also have the effect of shifting the recognition of income between current and future periods.

These transactions do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that the Trust is contractually obligated to make. If the other party to an interest rate swap defaults, the Trust's risk of loss consists of the net amount of interest payments that the Trust contractually is entitled to receive.
