Forward Looking Statements

Safe Harbor statement under the Private Securities Litigation Reform Act of 1995: This Form 10-Q contains forward-looking statements that are subject to risks and uncertainties, including, but not limited to, changes in economic conditions in our market areas, changes in policies by regulatory agencies, the impact of competitive loan products, loan demand risks, the quality or composition of our loan or investment portfolios, fluctuations in interest rates and changes in the relative differences between short and long term interest rates, levels of nonperforming assets and operating results, the impact of terrorist actions and other risks detailed from time to time in our filings with the Securities and Exchange Commission. We caution readers not to place undue reliance on forward-looking statements. We do not undertake and specifically disclaim any obligation to revise any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements. These risks could cause our actual results for 2003 and beyond to differ materially from those expressed in any forward-looking statements by, or on behalf of, us.

As used throughout this report, the terms "we", "our", "ITLA Capital" or the "Company" refer to ITLA Capital Corporation and its consolidated subsidiaries.

ITLA CAPITAL CORPORATION AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The unaudited consolidated financial statements of ITLA Capital Corporation (the Company) included herein reflect all normal recurring adjustments which are, in the opinion of management, necessary to present fairly the results of operations and financial position of the Company, as of and for the interim period indicated. The unaudited consolidated financial statements include the accounts of ITLA Capital and its wholly-owned subsidiaries, Imperial Capital Bank (the Bank), Imperial Capital Real Estate Investment Trust (Imperial Capital REIT), ITLA Capital Statutory Trust I (Trust I), ITLA Capital Statutory Trust II (Trust II), ITLA Capital Statutory Trust III (Trust III), ITLA Capital Statutory Trust IV (Trust IV), and ITLA Capital Statutory Trust V (Trust V). All intercompany transactions and balances have been eliminated. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to the rules and regulations of the U.S. Securities and Exchange Commission. The results of operations for the three months ended March 31, 2003 are not necessarily indicative of the results of operations for the remainder of the year.

These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our annual report on Form 10-K for the year ended December 31, 2002.

NOTE 2 - EARNINGS PER SHARE

Basic Earnings Per Share (Basic EPS) is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted Earnings Per Share (Diluted EPS) reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock which shared in the Company's earnings.

The following is a reconciliation of the calculation of Basic EPS and Diluted EPS:

	For the Three Months Ended March 31,		
	Net Income	Weighted- Average Shares Outstanding	Per Share Amount
	(in thousands, except per share data)		
2003			
Basic EPS	\$ 13,021	6,011	\$ 2.17
Effect of dilutive stock options		437	(0.15)
	\$ 13,021	6,448	\$ 2.02
2002			
Basic EPS	\$ 4,719	6,007	\$ 0.79
Effect of dilutive stock options		331	(0.05)
	\$ 4,719	6,338	\$ 0.74

Table of Contents**NOTE 3 - COMPREHENSIVE INCOME**

Comprehensive income, which encompasses net income and the net change in unrealized gains (losses) on investment securities available for sale, is presented below:

	Three Months Ended March 31,	
	2003	2002
	(in thousands)	
Net income	\$ 13,021	\$ 4,719
Other comprehensive (loss) gain:		
Unrealized (loss) gain on investment securities available for sale, net of tax (benefit) expense of (\$76) and \$87 for the three months ended March 31, 2003 and 2002, respectively	(120)	131
Comprehensive income	<u>\$ 12,901</u>	<u>\$ 4,850</u>

NOTE 4 - IMPAIRED LOANS RECEIVABLE

As of March 31, 2003 and December 31, 2002, the recorded investment in impaired loans and impaired real estate loans held in trust was \$16.9 million and \$16.0 million, respectively. The average recorded investment in impaired loans was \$17.1 million for the three months ended March 31, 2003 and \$15.0 million for the same period last year. Interest income recognized on impaired loans totaled \$141,000 for the three months ended March 31, 2003 as compared to \$44,000 for the same period last year.

Table of Contents

NOTE 5 RESIDUAL INTEREST IN SECURITIZATION

During the first quarter of 2002, the Company formed a limited liability company to issue \$86.3 million of asset-backed notes in a securitization of substantially all of its residential loan portfolio. The Company recognized a gain of \$3.7 million on the securitization of these loans, which is included in other non-interest income within the consolidated statement of income. Concurrent with recognizing such gain on sale, the Company recorded a residual interest of \$5.6 million, which represents the present value of future cash flows (spread and fees) that are anticipated to be received over the life of the loans. The residual interest is recorded on the consolidated balance sheet in the Investment securities available for sale, at fair value. The value of the residual interest is subject to substantial credit, prepayment, and interest rate risk on the sold residential loans. In accordance with the provisions of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, the residual interest is classified as available-for-sale and, as such, recorded at fair value with the resultant changes in fair value recorded as unrealized gain or loss in a separate component of shareholders' equity in accumulated other comprehensive income or loss, until realized. Fair value is determined on a monthly basis based on a discounted cash flow analysis. These cash flows are projected over the lives of the receivables using prepayment, default, and interest rate assumptions that we believe market participants would use for similar financial instruments.

During the quarter ended March 31, 2003, the Company recognized an other than temporary impairment of \$250,000 in connection with its residual interest. Impairments that are deemed to be other than temporary are charged to income, as an other expense. In evaluating impairments as other than temporary the Company considers credit risk, as well as the magnitude and trend of default rates and prepayment speeds of the underlying residential loans.

Table of Contents

At March 31, 2003, key economic assumptions and the sensitivity of the current fair value of the residual interest based on projected cash flows to immediate adverse changes in those assumptions is as follows:

	March 31, 2003
Dollars in thousands, except percentages	
Fair value of retained interest	\$5,368
Weighted average life (in years)	1.34
Weighted average annual prepayment speed	35.0%
Impact of 10% adverse change	\$ (3)
Impact of 25% adverse change	\$ (8)
Weighted average annual discount rate	15.0%
Impact of 10% adverse change	\$ (301)
Impact of 25% adverse change	\$ (716)
Weighted average lifetime credit losses	3.3%
Impact of 10% adverse change	\$ (214)
Impact of 25% adverse change	\$ (535)

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in the fair value of the residual are based on a variation in assumptions and generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the above table, the effect of a variation in a particular assumption on the fair value of the residual interest is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments but increased credit losses), which might magnify or counteract the sensitivities, and depending on the severity of such changes, the results of operations may be materially affected.

NOTE 6 ACCOUNTING FOR STOCK-BASED COMPENSATION

In December 2002, the Financial Accounting Standards Board (FASB) issued SFAS No. 148, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The transition guidance and annual disclosure provisions are effective for fiscal years ending after December 15, 2002. The interim disclosure provisions are effective for financial reports containing financial statements for interim periods beginning after December 15, 2002. The Company adopted the provisions of SFAS No. 148 effective in the first quarter of 2003.

The Company has stock-based compensation plans. These plans are accounted for under APB Opinion No. 25 Accounting for Stock Issued to Employees and, accordingly, no compensation costs have been recognized in the accompanying unaudited consolidated statements of income. The Company applies SFAS No. 123, Accounting for Stock-Based Compensation (SFAS 123) for disclosure purposes only. SFAS 123 disclosures include pro forma net income and earnings per share as if the fair value-based method of accounting had been used. If compensation had been determined based on SFAS 123, the Company's pro forma net income would have been \$12.7 million and \$4.6 million, basic earnings per share would have been \$2.11 and \$0.76, and diluted earnings per share would have been \$1.97 and \$0.72 for the three-months ended March 31, 2003 and 2002, respectively.

The fair value of each option grant was estimated on the date of grant using an option pricing model with the following weighted-average assumptions for option grants:

	Weighted-Average Assumptions for Options Grants	
	2003	2002
Dividend Yield	0.00%	0.00%
Expected Volatility	31.36%	29.38%
Risk-Free Interest Rates	4.62%-4.88%	4.79%-4.88%

Expected Lives

Seven Years

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to identify the major factors that influenced the financial condition and results of operations for the three months ended March 31, 2003.

RESULTS OF OPERATIONS

Three Months Ended March 31, 2003 Compared to Three Months Ended March 31, 2002

General

Consolidated net income was at \$13.0 million and \$4.7 million for the three months ended March 31, 2003 and 2002, respectively. The increase in net income was primarily due to increases in interest income and non-interest income, partially offset by an increase in non-interest expense. Non-interest income increased significantly as a result of the Bank's refund anticipation loan (RAL) program with Household International, Inc. (Household), as discussed below. Diluted EPS was \$2.02 for the three months ended March 31, 2003 compared to \$0.74 for the same period last year, an increase of \$1.28 per diluted share.

The return on average assets was 1.81% for the three months ended March 31, 2003 compared to 1.37% for the same period last year. The return on average shareholders' equity was 31.72% for the three months ended March 31, 2003, compared to 13.13% for the same period last year.

Total loan production was \$101.7 million for the three months ended March 31, 2003, consisting of the origination of \$84.5 million of commercial real estate loans, \$15.3 million of film finance loans, and \$1.8 million of franchise loans. Loan production during the same period last year totaled \$102.7 million, consisting of the origination and/or purchase of \$102.7 million of commercial real estate loans, including \$36.8 million of loans from our acquisition of Asahi Bank of California completed on January 31, 2002.

Substantially all RAL loans originated during the quarter were sold to Household. At March 31, 2003, the Company held \$4.1 million in RAL participation interests and \$4.7 million of RAL loans held for sale that were subsequently sold on April 1, 2003. Because the RAL program relates to the filing of income tax returns, transaction activity is concentrated during the tax season. This results in the Company earning substantially all of its RAL program income in the first quarter of the year. The Company expects that its financial results for the remaining quarters of 2003 will not be significantly impacted by the RAL program due to the seasonal nature of the business.

Table of Contents**Net Interest Income and Margin**

The following table presents, for the three months ended March 31, 2003 and 2002, our condensed average balance sheet information, together with interest income and yields earned on average interest-earning assets and interest expense and rates paid on average interest-bearing liabilities. Average balances are computed using daily average balances. Nonaccrual loans are included in loans receivable.

Table of Contents

The following table sets forth a summary of the changes in interest income and interest expense resulting from changes in average interest-earning asset and interest-bearing liability balances and changes in average interest rates. The change in interest due to both volume and rate has been allocated to change due to volume and rate in proportion to the relationship of absolute dollar amounts of each.

	For the Three Months Ended March 31, 2003 and 2002 Increase (Decrease) Due to:		
	Rate	Volume	Total
	(In thousands)		
Interest and fees earned from:			
Loans receivable	\$(1,573)	\$6,671	\$ 5,098
Real estate loans held in trust	(4)	(663)	(667)
Cash and investment securities	(531)	2,589	2,058
	<u> </u>	<u> </u>	<u> </u>
Total increase (decrease) in interest income	(2,108)	8,597	6,489
	<u> </u>	<u> </u>	<u> </u>
Interest paid on:			
Deposit accounts	(2,024)	579	(1,445)
FHLB advances	(256)	(87)	(343)
Collateralized mortgage obligations	13	(281)	(268)
	<u> </u>	<u> </u>	<u> </u>
Total increase (decrease) in interest expense	(2,267)	211	(2,056)
	<u> </u>	<u> </u>	<u> </u>
Increase in net interest income	\$ 159	\$8,386	\$ 8,545
	<u> </u>	<u> </u>	<u> </u>

Total interest income increased \$6.5 million to \$33.5 million in the first quarter of 2003 compared to \$27.0 million for the same period last year. The net increase in interest income was primarily attributable to the improvement in the Bank's net interest spread, the additional interest income earned on increased liquidity maintained in connection with the RAL program, partially offset by a decline in the net interest income of the REIT.

The average balance of loans held by the Bank was \$1.4 billion and \$1.1 billion for the three months ended March 31, 2003 and 2002, respectively. Loans secured by income producing properties and construction loans had an average balance of \$1.2 billion during the quarter ended March 31, 2003 compared to \$1.1 billion during the same period last year. The average balance of franchise loans was \$56.7 million and \$57.3 million during the quarter ended March 31, 2003 and 2002, respectively. The average balance of film finance loans was \$115.0 million during the quarter ended March 31, 2003. The Company acquired the Lewis Horwitz Organization (LHO) during the fourth quarter of 2002 to originate film finance loans.

The average balance of real estate loans held in trust was \$121.0 million for the three months ended March 31, 2003 as compared to \$158.1 million for the same period last year. This decrease was due to loan prepayments and principal amortization.

The average balance of our cash and investments increased to \$1.3 billion in the first quarter of 2003 compared to \$75.1 million during the same period last year. The increase in our average cash and investments was attributable to the increased liquidity maintained in connection with the RAL program. The decline in the yield from 3.67% during the first quarter 2002 to 0.80% during 2003 was caused by lower yields earned on short-term and overnight investments as a significant portion of the Company's excess liquidity was maintained in overnight investments in connection with the RAL program.

Table of Contents

The average yield earned on loans remained virtually unchanged for the quarter ended March 31, 2003 as compared to the same period last year. Our commercial real estate loan portfolio is primarily comprised of adjustable rate mortgages indexed to the six month LIBOR. Approximately 92.0% of our real estate loan portfolio (including real estate loans held in trust) are adjustable rate mortgages at March 31, 2003. These adjustable rate mortgages generally reprice on a quarterly basis and approximately \$1.1 billion or 87.4% of our real estate loan portfolio contain interest rate floors, below which the loans' contractual interest rate may not adjust. At March 31, 2003, the weighted average floor interest rate of these loans was 7.7%. At that date, approximately \$1.1 million or 98.2% of those loans were at the floor interest rate, approximately \$6.9 million or 0.6% were within 50 basis points of their floor interest rate, and approximately \$3.0 million or 0.3% were greater than 50 but less than 100 basis points from their floor interest rate. If market interest rates decline, because most of our portfolio has reached the floor interest rates, our loans may be susceptible to prepayment.

Total interest expense decreased by \$2.1 million to \$8.4 million in the first quarter of 2003, compared to \$10.5 million for the same period last year. This decrease was primarily attributable to lower interest rates paid on all interest bearing liabilities and lower average balances on our Collateralized Mortgage Obligations (CMOs) and Federal Home Loan Bank (FHLB) advances.

Our cost of funds decreased to 2.72% during the three month period ended March 31, 2003, compared to 3.47% for the same period last year. This decrease in funding costs was due primarily to lower rates being paid on our deposit accounts and CMOs as compared to the same period last year due to the general decline in market interest rates. The average rate paid on deposit accounts was 2.70% during the three months ended March 31, 2003 compared to 3.57% for the same period last year. The average rate paid on the CMOs was 2.58% during the three months ended March 31, 2003 compared to 2.59% for the same period last year. The average balance of deposit accounts increased \$87.0 million to \$1.0 billion for the three months ended March 31, 2003, compared to \$943.2 million for the same period last year. The average balance of our CMOs was \$59.9 million during the first quarter of 2003, compared to \$103.1 million for the same period last year corresponding to the reduction in real estate loans held in trust. FHLB advances averaged \$166.6 million in the current quarter, compared to \$178.8 million for the same period last year.

Net interest margin decreased to 3.55% for the three months ended March 31, 2003 as compared to 4.97% for the same period last year. This decrease was primarily due to the significant increase in average assets during the quarter and the 338 basis point decrease in the yield on total average interest-earning assets as a result of the liquidity maintained in connection with the RAL program, our overnight investments at relatively low yields increased significantly.

Provision for Loan Losses

Management periodically assesses the adequacy of the allowance for loan losses by reference to many factors which may be weighted differently at various times depending on prevailing conditions. These factors include, among other elements;

- general portfolio trends relative to asset and portfolio size;
- asset categories;
- credit and geographic concentrations;
- delinquency trends and nonaccrual loan levels;
- historical loss experience; and
- risks associated with changes in economic, social and business conditions.

Table of Contents

Accordingly, the calculation of the adequacy of the allowance for loan losses is not based solely on the level of nonperforming assets. Management believes that the allowance for loan losses as of March 31, 2003 was adequate to absorb the known and inherent risks of loss in the loan portfolio at that date. While management believes the estimates and assumptions used in its determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will not be proven incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. In addition, the determination of the amount of the Bank's allowance for loan losses is subject to review by the Bank's regulators, as part of the routine examination process, which may result in the establishment of additional reserves based upon their judgment of information available to them at the time of their examination.

The consolidated provision for loan losses totaled \$4.5 million for the first quarter of 2003, compared to \$1.3 million for the same period last year. The current period provision for loan losses was recorded to provide for reserves based on an analysis of the factors referred to above and the valuation of certain nonperforming loans and other loans of concern. The allowance for loan losses was 2.3% of total loans and real estate loans held in trust at March 31, 2003 as compared to 2.1% at December 31, 2002. During the quarters ended March 31, 2003 and 2002, the Company had net loan charge-offs of \$5.0 million and \$1.0 million, respectively. The charge-offs during the current quarter primarily relate to one commercial real estate loan. See also [Financial Condition](#) [Credit Risk](#) .

Non-interest Income

Non-interest income increased to \$12.5 million for the three months ended March 31, 2003, compared to \$125,000 for the same period last year. The increase was primarily related to income earned in connection with the RAL program, consisting of \$8.7 million of net premiums earned on the sale of RAL loans and \$3.6 million of processing and administrative fees.

Non-interest Expense

Non-interest expense totaled \$10.3 million for the three months ended March 31, 2003, compared to \$6.8 million for the same period last year. The increase was attributable to an increase in compensation and benefits expense, which totaled \$5.4 million during the three months ended March 31, 2003, compared to \$3.3 million for the same period last year. The increase in compensation and benefits expense was primarily due to the acquisition of the Lewis Horwitz Organization, additions relating to the Bank's franchise lending origination staff, and the development of Imperial Capital Express, the Bank's small balance commercial real estate lending platform. Non-interest expense also increased due to infrastructure costs incurred in connection with the Bank's charter conversion.

For the three months ended March 31, 2003, our ratio of consolidated general and administrative expense to average assets, on an annualized basis, decreased to 1.39% compared to 1.81% for the same period last year as a result of the increase in average assets due to increased liquidity maintained in connection with the RAL program. Our efficiency ratio (excluding real estate owned expense), which is defined as general and administrative expenses as a percentage of net interest income and non-interest income declined to 26.7% for the quarter ended March 31, 2003, compared to 37.9% for the same period last year primarily as a result of the increased income earned in connection with the RAL program.

Table of Contents

Minority Interest in Income of Subsidiary

Minority interest in income of subsidiary, consisting of accrued distributions payable on our Trust Preferred securities, was \$1.5 million during the three month period ended March 31, 2003 as compared to \$799,000 for the same period last year. On a period-to-period comparison, the increase was primarily due to the issuance of the \$55.0 million of additional Trust Preferred securities during the fourth quarter of fiscal year 2002.

FINANCIAL CONDITION

Total assets decreased \$109.2 million to \$1.6 billion at March 31, 2003 as compared to \$1.7 billion at December 31, 2002. At March 31, 2003, loans, net totaled \$1.3 billion, including approximately \$1.1 billion of commercial real estate loans, \$56.8 million of franchise loans and \$115.3 million of film finance loans. During the three months ended March 31, 2003, the Bank's loan portfolio decreased \$51.6 million due to prepayments experienced during the quarter. Real estate loans held in trust decreased by \$7.2 million during the current three month period. Additionally, cash and cash equivalents decreased \$68.4 million, primarily the result of reducing excess liquidity that was retained to fund anticipated loan production at December 31, 2002. Total deposit accounts, which are concentrated in time certificates, remained stable at \$1.1 billion at March 31, 2003 and December 31, 2002. FHLB advances decreased \$172.7 million to \$166.0 million at March 31, 2003, compared to \$338.7 million at December 31, 2002. Management believes that a significant portion of deposits will remain with us upon maturity based on our historical experience regarding retention of deposits. CMOs decreased \$7.2 million to \$61.8 million at March 31, 2003 compared to \$69.1 million at December 31, 2002. Accounts payable and other liabilities increased \$54.0 million primarily as a result of outstanding checks and other liabilities related to the RAL program.

Residual Interest

In the first quarter of 2002, the Company formed a limited liability company to issue the \$86.3 million of asset-backed notes in a securitization of substantially all of its residential loan portfolio. These notes were rated AAA by Standard & Poor's, Aaa by Moody's, and are insured by Financial Security Assurance. In the securitization, residential loans were sold to the limited liability company for a cash purchase price and an interest in the loans securitized in the form of the excess spread. The cash purchase price was raised through an offering of the asset-backed notes issued by the limited liability company. Noteholders are entitled to receive the principal collected on the loans and the stated interest rate on the notes. We are entitled to receive the excess spread. The excess spread generally represents, over the estimated life of the loans, the excess of the weighted average coupon on the loans sold over the sum of the note interest rate less other expenses including a trustee fee and an insurance fee. Valuation of the excess spread includes an estimate of annual future credit losses related to the loans securitized. These reported cash flows are discounted when computing the value of the residual interest.

We recognized a gain on the sale of these loans, although cash (representing the excess spread and servicing fees) is received by us over the lives of the loans. Concurrent with recognizing such gain on sale, we recorded the excess spread as a residual interest of \$5.6 million which is indicated on our consolidated balance sheets as Investment securities available for sale, at fair value section. The value of the residual interest is subject to substantial credit, prepayment and interest rate risk on the sold residential loans.

Table of Contents

In accordance with the provisions of Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities, we classified our residual interest as available-for-sale asset and, as such, they are recorded at fair value with the resultant changes in fair value recorded as accumulated unrealized gain or loss in a separate component of shareholders equity entitled accumulated other comprehensive income or loss, until realized. We determine fair value on a monthly basis based on a discounted cash flow analysis. These cash flows are projected over the lives of the receivables using prepayment, default, and interest rate assumptions that we believe market participants would use for similar financial instruments.

During the quarter ended March 31, 2003, the Company recognized an other than temporary impairment of \$250,000 in connection with its residual interest. Impairments that are deemed to be other than temporary are charged to income, as an other expense. In evaluating impairments as other than temporary, the Company considers credit risk, as well as the magnitude and trend of default rates and prepayment speeds of the underlying residential loans.

At March 31, 2003, key economic assumptions and the sensitivity of the current fair value of the residual interest based on projected cash flows to immediate adverse changes in those assumptions is as follows:

	March 31, 2003
Dollars in thousands, except percentages	
Fair value of retained interest	\$5,368
Weighted average life (in years)	1.34
Weighted average annual prepayment speed	35.0%
Impact of 10% adverse change	\$ (3)
Impact of 25% adverse change	\$ (8)
Weighted average annual discount rate	15.0%
Impact of 10% adverse change	\$ (301)
Impact of 25% adverse change	\$ (716)
Weighted average lifetime credit losses	3.3%
Impact of 10% adverse change	\$ (214)
Impact of 25% adverse change	\$ (535)

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in the fair value of our residual based on a variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the above table, the effect of a variation in a particular assumption on the fair value of the residual interest is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments but increased credit losses), which might magnify or counteract the sensitivities, and depending on the severity of such changes, the results of operations may be materially affected.

Table of Contents**CREDIT RISK****Nonperforming Assets, Other Loans of Concern and Allowance for Loan Losses**

The following table sets forth our nonperforming assets by category, accruing loans past due 90 days or more and troubled debt restructurings as of the dates indicated.

	<u>March 31, 2003</u>	<u>December 31, 2002</u>
	(dollars in thousands)	
Nonaccrual loans:		
Real estate	\$ 9,421	\$ 3,913
Franchise	1,715	1,986
	<u>11,136</u>	<u>5,899</u>
Other real estate owned, net	10,862	12,593
	<u>21,998</u>	<u>18,492</u>
Total nonperforming assets	21,998	18,492
Performing troubled debt restructurings	7,768	7,858
	<u>\$ 29,766</u>	<u>\$ 26,350</u>
Nonaccrual loans to total loans and real estate loans held in trust	0.79%	0.36%
Allowance for loan losses to nonaccrual loans	291.65%	555.61%
Nonperforming assets to total assets	1.36%	1.08%

At March 31, 2003, other real estate owned consisted of four income producing properties totaling \$10.9 million.

As of March 31, 2003 and December 31, 2002, other loans of concern totaled \$26.6 million and \$35.5 million, respectively. Other loans of concern consist of loans with respect to which known information concerning possible credit problems with the borrowers or the cash flows of the properties securing the respective loans has caused management to be concerned about the ability of the borrowers to comply with present loan repayment terms, which may result in the future inclusion of such loans in the nonaccrual category. The decrease in other loans of concern for the three months ended March 31, 2003 was primarily due to \$2.8 million of loans being sold or paid-off, and \$12.4 million of loans migrating to nonaccrual status, partially offset by \$6.5 million of new other loans of concern.

Table of Contents

The following table provides certain information with respect to our allowance for loan losses, including charge-offs, recoveries and selected ratios for the periods indicated.

	For Three Months Ended March 31, 2003	For the Year Ended December 31, 2002
	(dollars in thousands)	
Balance at beginning of period	\$ 31,081	\$ 24,722
Provision for loan losses	4,500	9,030
Additions related to acquisitions		2,048
Charge-offs:		
Real estate loans	(4,773)	(4,730)
Franchise loans	(261)	
	<u>(5,034)</u>	<u>(4,730)</u>
Recoveries:		
Real estate loans	3	11
	<u>3</u>	<u>11</u>
Net charge-offs	<u>(5,031)</u>	<u>(4,719)</u>
	<u>\$ 30,550</u>	<u>\$ 31,081</u>
Allowance for loan losses as a percentage of real estate loans and loans held in trust, net	2.30%	2.11%

Liquidity

Liquidity refers to our ability to maintain cash flow adequate to fund operations and meet obligations and other commitments on a timely basis, including the payment of maturing deposits and the origination or purchase of new real estate loans. We maintain a cash and investment securities portfolio designed to satisfy operating liquidity requirements while preserving capital and maximizing yield. As of March 31, 2003, we held \$92.4 million of cash and cash equivalents (consisting primarily of short-term investments with original maturities of 90 days or less) and \$59.4 million of investment securities classified as available for sale.

Short-term fixed income investments classified as cash equivalents consisted of interest-bearing deposits at financial institutions, government money market funds and short-term government agency securities, while investment securities available for sale consisted primarily of fixed income instruments, which were rated AAA, or equivalent by nationally recognized rating agencies. As of March 31, 2003 and December 31, 2002, the Bank's liquidity ratios were 12.4% and 19.0%, respectively. In addition, our liquidity position is supported by a credit facility with the Federal Home Loan Bank of San Francisco. As of March 31, 2003, we had remaining available borrowing capacity under this credit facility of \$329.3 million, net of the \$17.3 million of additional Federal Home Loan Bank Stock that we would be required to purchase to support those additional borrowings, and \$30.0 million of unused federal funds credit facilities under established lines of credit with two banks.

Table of Contents

Capital Resources

As of March 31, 2003, the Bank's Leverage (Core), Tier I and Total Risk-Based capital ratios were 7.11%, 14.53% and 15.79%, respectively. These ratios were 13.02%, 13.18% and 14.44%, respectively, as of December 31, 2002. The decrease in the leverage ratio from December 31, 2002 to March 31, 2003 was due primarily to the increase in total average tangible assets during the current quarter as a result of the increased liquidity maintained in connection with the RAL program. The minimum regulatory requirement for Leverage (Core), Tier I and Total Risk-Based capital are 4.0%, 4.0% and 8.0%, respectively. As of March 31, 2003, the Bank's capital position was designated as well capitalized for regulatory purposes.

At March 31, 2003, shareholders' equity totaled \$169.7 million or 10.52 percent of total assets. The Company's book value per share of common stock was \$29.37 as of March 31, 2003, as compared to \$27.11 as of December 31, 2002, and \$24.34 as of March 31, 2002.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our estimated sensitivity to interest rate risk, as measured by the estimated interest earnings sensitivity profile and the interest sensitivity gap analysis, has not materially changed from the information disclosed in our annual report on Form 10-K for the year ended December 31, 2002.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures: An evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-14(c) under the Securities Exchange Act of 1934 (the Act)) was carried out under the supervision and with the participation of the Company's Chief Executive Officer, Chief Financial Officer and several other members of the Company's senior management within the 90-day period preceding the filing date of this quarterly report. The Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures as currently in effect are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company's management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

(b) Changes in Internal Controls: There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their most recent evaluation.

Table of Contents

Part II - OTHER INFORMATION

- Item 1** **Legal Proceedings**
We are party to certain legal proceedings incidental to our business. Management believes that the outcome of such proceedings, in the aggregate, will not have a material effect on our financial condition or results of operations.
- Item 2** **Changes in Securities**
Not applicable.
- Item 3** **Defaults Upon Senior Securities**
Not applicable.
- Item 4** **Submission of Matters to a Vote of Security Holders**
None.
- Item 5** **Other Information**
None.
- Item 6** **Exhibits and Reports on Form 8-K**
(a) See exhibit Index
(b) On February 5, 2003, we filed a Current Report on Form 8-K under Items 5 and 7 and filing as exhibits to the report the material contracts relating to our business relationship with Household International, Inc.

CERTIFICATIONS

I, George W. Haligowski, certify that:

1. I have reviewed this quarterly report on Form 10-Q of ITLA Capital Corporation;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Date: May 15, 2003
