EXPLANATORY NOTE

We are filing this Amendment No. 1 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2005 for the purpose of amending and restating Item 8 of Part I, containing our audited consolidated financial statements and related notes as of September 30, 2005 and 2004 and for each of the three years in the period ended September 30, 2005. The restatement relates to the presentation of certain cash flow items that were improperly categorized as operating, investing or financing and is further discussed in Note 22 to the restated consolidated financial statements included herein. The restatement does not affect the total net change in cash and cash equivalents as of September 30, 2005 and has no impact on the Company's consolidated balance sheets, consolidated statements of income or the related earnings per share amounts. We have also updated Item 7 of Part II, Management Discussion and Analysis of Financial Condition and Results of Operations, Item 9A of Part II relating to Controls and Procedures and Management's Report on Internal Controls over Financial Reporting, and Item 15 of Part IV to give effect to the restatement. We have also filed updated certifications pursuant 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and certifications pursuant to Rules 13a-14(a) and 15d-14(a) under the Securities Exchange Act of 1933.

Other than the changes regarding the restatement and the related disclosures and the changes described in the preceding paragraph, no other information in this Amendment No. 1 has been updated to reflect any subsequent information or events since the original filing of this Form 10-K on December 14, 2005.

Table of Contents**PART I****Forward-Looking Statements**

This Form 10-K Report contains certain statements including, but not limited to, information regarding the replacement, deployment, and acquisition of certain numbers and types of aircraft, and projected expenses associated therewith; costs of compliance with Federal Aviation Administration regulations and other rules and acts of Congress; the passing of taxes, fuel costs, inflation, and various expenses to the consumer; the relocation of certain operations of Mesa; the resolution of litigation in a favorable manner and certain projected financial obligations. These statements, in addition to statements made in conjunction with the words expect, anticipate, intend, plan, believe, seek, estimate, and similar expressions, are forward-looking statements within the meaning of the Safe Harbor provision of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements relate to future events or the future financial performance of Mesa and only reflect management's expectations and estimates. The following is a list of factors, among others, that could cause actual results to differ materially from the forward-looking statements: changing business conditions in certain market segments and industries; changes in Mesa's code-sharing relationships; the inability of America West, Delta Air Lines, US Airways or United Airlines to pay their obligations under the code-share agreements; the inability of United Airlines to successfully restructure and emerge from bankruptcy; the ability of Delta Air Lines to reject our code-share agreements in bankruptcy; the inability to transition the planes we currently fly under our code-share agreement with US Airways without undue cost and expense; an increase in competition along the routes Mesa operates or plans to operate; material delays in completion by the manufacturer of the ordered and yet-to-be delivered aircraft; availability and cost of funds for financing new aircraft; changes in general economic conditions; changes in fuel price; changes in regional economic conditions; Mesa's relationship with employees and the terms of future collective bargaining agreements; the impact of current and future laws; additional terrorist attacks; Congressional investigations, and governmental regulations affecting the airline industry and Mesa's operations; bureaucratic delays; amendments to existing legislation; consumers unwilling to incur greater costs for flights; unfavorable resolution of negotiations with municipalities for the leasing of facilities; and risks associated with the outcome of litigation. One or more of these or other factors may cause Mesa's actual results to differ materially from any forward-looking statement. Mesa is not undertaking any obligation to update any forward-looking statements contained in this Form 10-K.

All references to we, our, us, or Mesa refer to Mesa Air Group, Inc. and its predecessors, direct and indirect subsidiaries and affiliates.

Item 1. Business**General**

Mesa Air Group, Inc. (Mesa or the Company) is a holding company whose principal subsidiaries operate as regional air carriers providing scheduled passenger and airfreight service. As of September 30, 2005, the Company served 176 cities in 43 states, the District of Columbia, Canada and Mexico and operated a fleet of 182 aircraft with approximately 1,100 daily departures.

Approximately 99% of our consolidated passenger revenues for the fiscal year ended September 30, 2005 were derived from operations associated with code-share agreements. Our subsidiaries have code-share agreements with America West Airlines, Inc. (America West), Midwest Airlines, Inc. (Midwest Airlines), United Airlines, Inc. (United Airlines or United) and US Airways, Inc. (US Airways). These code-share agreements allow use of the code-share partners' flight designator code to identify flights and fares in computer reservation systems, permit use of logos, service marks, aircraft paint schemes and uniforms similar to the code-share partner and provide coordinated schedules and joint advertising. The remaining passenger revenues are derived from our independent operations. On October 1, 2005, we commenced flight operations as Delta Connection under a code-share agreement with Delta Air Lines, Inc. (Delta).

In addition to carrying passengers, we carry freight and express packages on our passenger flights and have interline small cargo freight agreements with many other carriers. We also have contracts with the U.S. Postal Service for carriage of mail to the cities we serve and occasionally operate charter flights when our aircraft are not otherwise

used for scheduled service.

Table of Contents

Our airline operations are conducted by the following airline subsidiaries:

Mesa Airlines, Inc. (Mesa Airlines), a Nevada corporation, operates regional jet and turboprop aircraft as America West Express under a code-share agreement with America West, primarily at America West's operations hubs located in Phoenix and Las Vegas; as US Airways Express under a code-share agreement with US Airways, primarily at US Airways' hubs on the East Coast; and as United Express under a code-share agreement with United Airlines, at various United hubs across the country.

Air Midwest, Inc. (Air Midwest), a Kansas corporation, operates Beechcraft 1900D 19-seat turboprop aircraft as US Airways Express under a code-share agreement with US Airways at certain US Airways' hubs on the East Coast as well as Kansas City. Air Midwest's flights in Kansas City code-share with both Midwest Airlines and US Airways. Air Midwest operates as America West Express in Phoenix. Air Midwest also operates as Mesa Airlines in Albuquerque, New Mexico and in select Essential Air Service (EAS) markets. The Albuquerque flights and certain EAS markets are Independent Operations and are not subject to a code-sharing agreement with a major carrier.

Freedom Airlines, Inc. (Freedom), a Nevada corporation, commenced flight operations using ERJ-145 50-seat regional jets as Delta Connection on October 1, 2005 under a code-share agreement with Delta primarily between Orlando, Florida and designated outlying cities. Freedom previously operated Beechcraft 1900D 19-seat turboprop aircraft and CRJ-700 and 900 regional jets pursuant to the Company's code-share agreement with America West.

Unless the context indicates otherwise, the terms Mesa, the Company, we, us, or our, refer to Mesa Air Group and its subsidiaries.

Corporate Structure

Mesa is a Nevada corporation with its principal executive office in Phoenix, Arizona.

In addition to operating the airline subsidiaries listed above, we also have the following other subsidiaries:

MPD, Inc., a Nevada corporation, doing business as Mesa Pilot Development and MPD, operates training programs for student pilots in conjunction with San Juan College in Farmington, New Mexico and Arizona State University in Tempe, Arizona.

Regional Aircraft Services, Inc., (RAS) a California corporation, performs aircraft component repair, certain overhaul services, and ground handling services, primarily to Mesa subsidiaries.

MAGI Insurance, Ltd., a Barbados, West Indies based captive insurance company, was established for the purpose of obtaining more favorable aircraft liability insurance rates.

Ritz Hotel Management Corp., a Nevada Corporation, was established to facilitate the Company's acquisition and management of a Phoenix area hotel property used for crew-in-training accommodations.

Mesa Air Group Airline Inventory Management, LLC (MAG-AIM), an Arizona Limited Liability Company, was established to purchase, distribute and manage Mesa's inventory of spare rotatable and expendable parts.

Aircraft in Operation

The following table sets forth our aircraft fleet (owned and leased) in operation by aircraft type as of September 30, 2005:

Canadair Regional Jet-200	Canadair Regional Jet-700	Canadair Regional Jet-900	Embraer Regional Jet-145	Beechcraft 1900D	DeHavilland Dash 8-200	Total

Table of Contents**Code-Share Agreements**

Our airline subsidiaries have agreements with America West, Delta, US Airways, United Airlines and Midwest Airlines to use those carriers' designation codes (commonly referred to as code-share agreements). These code-share agreements allow use of the code-share partner's flight designator code to identify flights and fares in computer reservation systems, permit use of logos, service marks, aircraft paint schemes and uniforms similar to the code-share partner's and provide coordinated schedules and joint advertising. Our passengers traveling on flights operated pursuant to code-share agreements receive mileage credits in the respective frequent flyer programs of our code-share partners, and credits in those programs can be used on flights operated by us.

The financial arrangement with our code-share partners involves either a revenue-guarantee or pro-rate arrangement. The America West (regional jet and Dash-8), Delta (regional jet), United (regional jet and Dash-8), and US Airways (regional jet) code-share agreements are revenue-guarantee code-share agreements. Under the terms of these code-share agreements, the major carrier controls marketing, scheduling, ticketing, pricing and seat inventories. We receive a guaranteed payment based upon a fixed minimum monthly amount plus amounts related to departures and block hours flown in addition to direct reimbursement of expenses such as fuel, landing fees and insurance. Among other advantages, revenue-guarantee arrangements reduce the Company's exposure to fluctuations in passenger traffic and fare levels, as well as fuel prices. The US Airways, Midwest Airlines and America West Beechcraft 1900D turboprop code-share agreements are pro-rate agreements, for which we receive an allocated portion of each passenger's fare and pay all of the costs of transporting the passenger.

The following table summarizes our available seat miles (ASMs) flown and revenue recognized under our code-share agreements for the years ended September 30, 2005 and 2004:

	ASM s	Fiscal 2005			Fiscal 2004			
			Passenger Revenue		ASM s	Passenger Revenue		
(In thousands)								
America West (Revenue-Guarantee)	4,360,713	50%	\$ 487,221	44%	2,983,969	42%	\$ 323,889	37%
US Airways (Revenue-Guarantee)	2,401,808	28%	316,072	29%	2,471,476	35%	304,290	35%
United (Revenue-Guarantee)	1,748,466	20%	260,541	24%	1,269,454	18%	171,493	20%
US Airways (Pro-Rate)*	112,514	1%	25,101	2%	211,195	3%	47,177	5%

agreement.

America West Code-Sharing Agreement

Revenue-Guarantee

As of September 30, 2005, we operated 37 CRJ-900 (a 38(th) CRJ-900 entered service for America West in October), 18 CRJ-200, and six Dash-8 aircraft for America West under a revenue-guarantee code-share agreement. In exchange for providing flights and all other services under the agreement, we receive a fixed monthly minimum amount plus certain additional amounts based upon the number of flights flown and block hours performed during the month. America West also reimburses us for certain costs on an actual basis, including fuel costs, aircraft ownership and financing costs, landing fees, passenger liability and hull insurance, and aircraft property taxes, all as defined in the agreement. In addition, America West also provides, at no cost to Mesa, certain ground handling and customer service functions, as well as airport-related facilities and gates at America West hubs and cities where both carriers operate. We also receive a monthly payment from America West based on a percentage of revenue from flights that we operate under the code-share agreement. Under the amended code-share agreement, America West has the right to reduce the combined CRJ fleets utilized under the code-share agreement by one aircraft in any six-month period commencing in June 2006 (except during the calendar year 2007 in which 2 CRJ-200 can be eliminated in each six-month period). In addition, beginning in February 2007, America West may eliminate the Dash-8 aircraft upon 180 days prior written notice. The code-share agreement terminates on June 30, 2012 unless America West elects to extend the contract for two years or exercises options to increase fleet size. The code-share agreement is subject to termination prior to that date in various circumstances including:

Table of Contents

If our flight completion factor or arrival performance in the Phoenix Hub falls below a specified percentage for a specified period of time, subject to notice and cure rights;

If either America West or we become insolvent, file for bankruptcy or fail to pay our debts as they become due, the non-defaulting party may terminate the agreement;

Failure by us or America West to perform the covenants, conditions or provisions of the code-sharing agreement, subject to 15 days notice and cure rights;

If we or America West fails to make a payment when due, subject to ten business days notice and cure rights;
or

If we are required by the FAA or the U.S. Department of Transportation (DOT) to suspend operations and we have not resumed operations within three business days, except as a result of an emergency airworthiness directive from the FAA affecting all similarly equipped aircraft, America West may terminate the agreement.

On September 16, 2005, the merger of US Airways Group, Inc., the parent company of US Airways, Inc., and America West Holdings, the parent company of America West Airlines, Inc. was completed. The new US Airways Group will operate under a single brand name of US Airways through two principal operating subsidiaries, US Airways, Inc. and America West Airlines, Inc. We will continue to provide regional jet airline services for US Airways Group pursuant to our code-share agreement with America West Airlines.

Pro-Rate

Pursuant to a turboprop code-share agreement with America West, we operated two Beechcraft 1900D turboprop aircraft in the Phoenix hub under a pro-rate revenue-sharing arrangement as of September 30, 2005. We control scheduling, inventory and pricing. We are allocated a portion of each passenger's fare based on a standard industry formula and are required to pay all costs of transporting the passenger. The pro-rate agreement terminates on March 31, 2012 unless America West elects to extend the contract for successive one-year periods. The pro-rate agreement could also be terminated prior to the termination under similar circumstances as the revenue-guarantee agreement.

US Airways Code-Sharing Agreements

Revenue-Guarantee

As of September 30, 2005, we operated 23 CRJ-200 and 36 ERJ-145 aircraft for US Airways under a code-sharing agreement. As a result of US Airways' emergence from bankruptcy and their non-assumption of our code-share agreement, we began working with US Airways to provide for the orderly transition of these 59 jets to our United and Delta revenue-guarantee code-sharing arrangements. As of December 1, 2005, we had transitioned 32 of the 59 aircraft and operated 27 50-seat regional jets for US Airways under our code-sharing agreement. We expect to complete the transition of aircraft from US Airways to United in the first quarter of fiscal year 2006 and to Delta in the second quarter of fiscal year 2006. Under the jet code-share agreement, we provide US Airways Express service between US Airways hubs and cities designated by US Airways. In exchange for performing the flight services under the agreement, we receive from US Airways a fixed monthly minimum amount, plus certain additional amounts based upon the number of flights flown and block hours performed during the month. Additionally, certain costs incurred by us in performing the flight services are pass-through costs, whereby US Airways agrees to reimburse us for the actual amounts incurred for these items: insurance, property tax per aircraft, fuel and oil cost, catering cost and landing fees. We also receive a fixed profit margin based upon certain cost reimbursements under the agreement. In addition, US Airways also provides, at no cost to Mesa, certain ground handling and customer service functions, as well as, airport-related facilities and gates at US Airways hubs and cities.

Pro-Rate

Pursuant to a turboprop code-sharing agreement with US Airways, we operated 14 Beechcraft 1900D turboprop aircraft under a pro-rate revenue-sharing arrangement as of September 30, 2005. We control scheduling, inventory and pricing subject to US Airways' concurrence that such service does not adversely affect its other operations in the

region. We are allocated a portion of each passenger's fare based on a standard industry formula and are required to pay all the costs of transporting the passenger. Additionally, we are required to pay certain franchise, marketing and reservation fees to US Airways.

Table of Contents

US Airways may terminate the turboprop agreement at any time for cause upon not less than five days notice under any of the following conditions:

If we fail to utilize the aircraft as specified in the agreements.

If we fail to comply with the trademark license provisions of the agreement.

If we fail to perform the material terms, covenants or conditions of the code-sharing agreement.

Upon a change in our ownership or control without the written approval of US Airways.

The turboprop code-share agreement terminates in October 2006, provided, however, most of the turboprop flying hub markets can be terminated by US Airways for any reason upon 180 days prior advance written notice.

United Code-Sharing Agreement

As of September 30, 2005, we operated 15 CRJ-200, 15 CRJ-700 and 10 Dash-8 aircraft for United under a code-sharing arrangement. The code-share agreement provides that we can increase our fleet to 45 50-seat and 30 70-seat regional jet aircraft (15 of which would be replacements for 15 CRJ-200s). In exchange for performing the flight services under the agreement, we receive from United a fixed monthly minimum amount, plus certain additional amounts based upon the number of flights flown and block hours performed during the month. Additionally, certain costs incurred by us in performing the flight services are pass-through costs, whereby United agrees to reimburse us for the actual amounts incurred for these items: insurance, property tax per aircraft, fuel cost, oil cost, catering cost and landing fees. We also receive a profit margin based upon certain reimbursable costs under the agreement as well as our operational performance. The code-share agreement for (i) the ten Dash-8 aircraft terminates in July 2013 unless terminated by United by giving notice six months prior to April 30, 2010, (ii) the 15 50-seat CRJ-200s terminates no later than April 30, 2010, which can be accelerated up to two years at our discretion, (iii) the 15 70-seat regional jets (to be delivered upon the withdrawal of the 50-seat regional jets) terminates ten years from delivery date, but no later than October 31, 2018, and (iv) the remaining 15 70-seat regional jets terminates in three tranches between December 31, 2011 and December 31, 2013. The code-share agreement is subject to termination prior to these dates under various circumstances including:

If certain operational performance factors fall below a specified percentage for a specified time, subject to notice and cure rights;

Failure by us to perform the material covenants, agreements, terms or conditions of the code-share agreement or similar agreements with United, subject to thirty (30) days notice and cure rights; or

If either United or we become insolvent, file bankruptcy or fail to pay debts when due, the non-defaulting party may terminate the agreement.

Delta Code-Sharing Agreement

On October 1, 2005, we commenced flight operations for Delta under a code-sharing agreement. Flight operations for Delta are performed by our wholly-owned subsidiary, Freedom Airlines. The code-share agreement provides that we increase our fleet to 30 50-seat regional jet aircraft. In exchange for performing the flight services and our other obligations under the agreement, we receive from Delta monthly compensation made up of a fixed monthly amount, plus certain additional amounts based upon number of block hours flown and departures during the month. Additionally, certain costs incurred by Freedom are pass-through costs, whereby Delta agrees to reimburse us for the actual amounts incurred for these items: landing fees, hull insurance, passenger liability costs, fuel costs, catering costs and property taxes. Aircraft rent/ownership expenses are also considered a pass-through cost, but are limited to a specified amount for each type of aircraft. We are eligible to receive additional compensation based upon our completion rate and on-time arrival rate each month. Further, for each semi-annual period during the term of the agreement, we are eligible to receive additional compensation from Delta based upon performance. The fixed rates payable to us by Delta under the code-sharing agreement have been determined through the term of such agreement and are subject to annual revision.

The code-share agreement terminates on an aircraft-by-aircraft basis between 2017 and 2018. At the end of the term, Delta has the right to extend the agreement for additional one year successive terms on the same terms and conditions. Delta may terminate the code-sharing agreement at any time, with or without cause, upon twelve months prior written notice, provided such notice shall not be

Table of Contents

given prior to the earlier of (i) the sixth anniversary of the in-service date of the 30(th) aircraft added to the Delta Connection fleet by the Company, or (ii) November 2012. However, Delta has not yet assumed our code-share agreement in its bankruptcy proceedings and could choose to terminate this agreement at any time prior to its emergence from bankruptcy.

This agreement may be subject to early termination under various circumstances including:

If either Delta or we file for bankruptcy, reorganization or similar action or if either Delta or we make an assignment for benefit of creditors;

If either Delta or we commit a material breach of the code-share agreement, subject to 30 days notice and cure rights; or

Upon the occurrence of an event of force majeure that continues for a period of 30 or more consecutive days.

In addition, Delta may immediately terminate the code-share agreement upon the occurrence of one or more of the following events:

If there is a change of control of Freedom or Mesa;

If there is a merger involving Freedom or Mesa;

If we fail to maintain a specified completion rate with respect to the flights we operate for Delta during a specified period; or

If our level of safety is not reasonably satisfactory to Delta.

Fleet Plans and Aircraft Manufacturer Relationships

Interim Financing of Aircraft

Upon delivery of an aircraft from the manufacturer it is our customary business practice to enter into an interim financing arrangement with the manufacturer until such time as permanent financing as an operating lease or debt can be arranged. Under interim financing arrangements, we take delivery and title of the aircraft prior to securing permanent financing and the acquisition of the aircraft is accounted for as a purchase with debt financing. Accordingly, we reflect the aircraft and debt under interim financing on our balance sheet during the interim financing period. The interim financing period can be for up to six months after delivery of the aircraft. This practice allows us to take delivery and begin operating aircraft quicker while arranging permanent financing, either as an operating lease or with debt, with an independent third party.

At September 30, 2005, we had \$54.6 million in notes payable to an aircraft manufacturer for two aircraft on interim financing. These interim financing agreements are six months in length and provide for monthly interest only payments at LIBOR plus three percent. The current interim financing agreement with the manufacturer provides for the Company to have a maximum of 15 aircraft on interim financing at a given time.

ERJ Program

In June 1999, we entered into an agreement with Empresa Brasileira de Aeronautica SA (Embraer) to acquire 36 Embraer ERJ-145 50-passenger regional jets. Mesa introduced the ERJ-145 aircraft into revenue service in the third quarter of fiscal 2000. As of September 30, 2005, we have taken delivery of all 36 ERJ-145s, which have been financed as operating leases with initial terms of 16.5 to 18 years. We also have options for 45 additional aircraft. In May 2005, our contract with Embraer was amended to extend the option exercise date to December 2005 for deliveries beginning in May 2007.

CRJ Program

In August 1996, we entered into an agreement (the 1996 BRAD Agreement) with Bombardier Regional Aircraft Division (BRAD) to acquire 32 CRJ-200 50-passenger regional jet aircraft. The 32 aircraft have been delivered and are currently under permanent financing as operating leases with initial terms ranging from 16.5 to 18.5 years. The Company has also entered into operating leases for 24 previously-operated CRJ-200s under both short and long-term leases.

Table of Contents

In May 2001, we entered into a second agreement with BRAD (the 2001 BRAD Agreement) under which we committed to purchase a total of 15 CRJ-700s and 25 CRJ-900s. In January 2004, the Company exercised options to purchase 20 CRJ-900 aircraft (seven of which can be converted to CRJ-700 aircraft) reserved under the option provision of the 2001 BRAD Agreement. The transaction includes standard product support provisions, including training, preferred pricing on initial inventory provisioning, maintenance and technical publications. As of September 30, 2005, we have accepted delivery of 15 CRJ-700s and 37 CRJ-900 aircraft. The Company accepted its 38(th) CRJ-900 in October 2005. We also have firm orders for seven additional CRJ-900s (which can be converted to CRJ-700s). In addition to the firm orders, we have an option to acquire an additional 72 CRJ-700 or CRJ-900 regional jets that are exercisable through 2009 and 40 CRJ-700 and CRJ-900 regional jets that are exercisable in 2010 and beyond. In conjunction with the 2001 BRAD Agreement, we had \$15.0 million on deposit with BRAD, which was included with lease and equipment deposits at September 30, 2005.

Beechcraft 1900D

As of September 30, 2005, we owned 35 Beechcraft 1900D aircraft and were operating 22 of these aircraft. During fiscal year 2005, the Company leased four of its Beechcraft 1900D aircraft to Gulfstream International Airlines (Gulfstream), a regional turboprop air carrier based in Ft. Lauderdale, Florida for a term of five years. In January 2005, we entered into an agreement to lease ten of our Beechcraft 1900D aircraft to Big Sky Transportation Co. (Big Sky), a regional turboprop carrier based in Billings, Montana. As of September 30, 2005, we had leased nine aircraft to Big Sky and leased the tenth aircraft to Big Sky in the first quarter of fiscal 2006 for a term of five years.

Dash-8

As of September 30, 2005, we operated 16 leased Dash-8 aircraft.

Marketing

Our flight schedules are structured to facilitate the connection of our passengers with the flights of our code-share partners at their hub airports and to maximize local and connecting service to other carriers.

Under the America West, Delta, US Airways and United revenue-guarantee code-share agreements, market selection, pricing and yield management functions are performed by our respective partners. The market selection process for our B1900 turboprop operations, outside the Essential Air Service program flights, includes an in-depth analysis on a route-by-route basis and is followed by a review and approval process in a joint effort with US Airways or America West, as the case may be, regarding the level of service and fares. We believe that this selection process enhances the likelihood of profitability in a given market.

Under our code-share agreements, the code-share partner coordinates advertising and public relations within their respective systems. In addition, our traffic is impacted by the major airline partners' advertising programs in regions outside those served by us, with the major partners' customers becoming our customers as a result of through fares. Under pro-rate code-share arrangements, our passengers also benefit from through fare ticketing with the major airline partners and greater accessibility to our flights on computer reservation systems and in the Official Airline Guide.

Our pro-rate agreements and independent flights are promoted through, and our revenues are generally believed to benefit from, listings in computer reservation systems, the Official Airline Guide and through direct contact with travel agencies and corporate travel departments. Our independent operations utilize SABRE, a computerized reservation system widely used by travel agents, corporate travel offices and other airlines. The reservation systems of our code-share partners are also utilized in each of our other operations through their respective code-share agreements. We also pay booking fees to owners of other computerized reservation systems based on the number of independent and pro-rate passengers booked by travel agents using such systems. We believe that we have good relationships with the travel agents serving our passengers.

Competition

The airline industry is highly competitive and volatile. Airlines compete in the areas of pricing, scheduling (frequency and timing of flights), on-time performance, type of equipment, cabin configuration, amenities provided to passengers, frequent flyer plans, and the automation of travel agent reservation systems. Further, because of the Airline Deregulation Act, airlines are currently free to set prices and establish new routes without the necessity of seeking governmental approval. At the same time, deregulation has allowed airlines to abandon unprofitable routes where the affected communities may be left without air service.

Table of Contents

We believe that the Airline Deregulation Act facilitated our entry into scheduled air service markets and allows us to compete on the basis of service and fares, thus causing major carriers to seek out further contractual agreements with carriers like us as a way of expanding their respective networks. However, the Airline Deregulation Act makes the entry of other competitors possible, some of which may have substantial financial resources and experience, creating the potential for intense competition among regional air carriers in our markets.

Fuel

Historically, we have not experienced problems with the availability of fuel, and believe that we will be able to obtain fuel in quantities sufficient to meet our existing and anticipated future requirements at competitive prices. Standard industry contracts generally do not provide protection against fuel price increases, nor do they ensure availability of supply. However, our revenue-guarantee code-share agreements with America West, United and US Airways (regional jet) allow fuel used in the performance of the agreements to be reimbursed by our code-share partner, thereby reducing our exposure to fuel price fluctuations. In fiscal 2005, approximately 95% of our fuel purchases was associated with our America West, United and US Airways (regional jet) code-share agreements. A substantial increase in the price of jet fuel, to the extent our fuel costs are not reimbursed, or the lack of adequate fuel supplies in the future, could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Maintenance of Aircraft and Training

All mechanics and avionics specialists employed by us have the appropriate training and experience and hold the required licenses issued by the FAA. Using a combination of FAA-certified maintenance vendors and our own personnel and facilities, we maintain our aircraft on a scheduled and as-needed basis. We emphasize preventive maintenance and inspect our aircraft engines and airframes as required. We also maintain an inventory of spare parts specific to the aircraft types we fly. We provide periodic in-house and outside training for our maintenance and flight personnel and also take advantage of factory training programs that are offered when acquiring new aircraft.

Insurance

We carry types and amounts of insurance customary in the regional airline industry, including coverage for public liability, passenger liability, property damage, product liability, aircraft loss or damage, baggage and cargo liability and workers compensation.

As a result of the terrorist attacks on September 11, 2001, aviation insurers have significantly reduced the maximum amount of insurance coverage available to commercial air carriers for war-risk (terrorism) coverage, while at the same time, significantly increasing the premiums for this coverage as well as for aviation insurance in general. Given the significant increase in insurance costs, the federal government is currently providing insurance assistance under the Air Transportation Safety and System Stabilization Act. In addition, the federal government has issued war-risk coverage to U.S. air carriers that is generally renewable for 60-day periods. However, the availability of aviation insurance is not guaranteed and our inability to obtain such coverage at affordable rates may result in the grounding of our aircraft. Insurance costs are reimbursed under the terms of our revenue-guarantee code-share agreements.

Employees

As of September 30, 2005, we employed approximately 4,600 employees. Approximately 2,600 of our employees are represented by various labor organizations. Our continued success is partly dependent on our ability to continue to attract and retain qualified personnel. Historically, we have had no difficulty attracting qualified personnel to meet our requirements.

Relations between air carriers and labor unions in the United States are governed by the Railway Labor Act or RLA. Under the RLA, collective bargaining agreements generally contain amendable dates rather than expiration dates, and the RLA requires that a carrier maintain the existing terms and conditions of employment following the amendable date through a multi-stage and usually lengthy series of bargaining processes overseen by the National Mediation Board. Mesa Airline's flight attendants are represented by the Association of Flight Attendants (AFA). Mesa Airline's contract with the AFA becomes amendable in June 2006. Our pilots are represented by the Air Line Pilot Association (ALPA). Our contract with ALPA becomes amendable in September 2007.

Although not currently observing high turnover, pilot turnover at times is a significant issue among regional carriers when major

Table of Contents

carriers are hiring experienced commercial pilots away from regional carriers. The addition of aircraft, especially new aircraft types, can result in pilots upgrading between aircraft types and becoming unavailable for duty during the extensive training periods required. No assurances can be made that pilot turnover and unavailability will not be a significant problem in the future, particularly if major carriers expand their operations. Similarly, there can be no assurance that sufficient numbers of new pilots will be available to support any future growth.

No other Mesa subsidiaries are parties to any other collective bargaining agreement or union contracts.

Essential Air Service Program

The Essential Air Service (EAS) program administered by the DOT guarantees a minimum level of air service in certain communities, predicated on predetermined guidelines set forth by Congress. Based on these guidelines, the DOT subsidizes air service to communities that might not otherwise have air service. At September 30, 2005, we provided service to 24 such cities for an annualized subsidy of approximately \$19 million. EAS rates are normally set for two-year contract periods for each city. There is no guarantee that we will continue to receive subsidies for the cities we serve. The DOT may request competitive proposals from other airlines at the end of the contract period for EAS service to a particular city. Proposals, when requested, are evaluated on, among other things, level of service provided, subsidy requested, fitness of the applicant and comments from the communities served. If the funding under this program is terminated for any of the cities served by us, in all likelihood we would not continue to fly in these markets, and as a result, we would be forced to find alternative uses for the Beechcraft 1900D 19-seat turboprop aircraft affected.

Regulation

As an interstate air carrier, we are subject to the economic jurisdiction, regulation and continuing air carrier fitness requirements of the DOT. Such requirements include minimum levels of financial, managerial and regulatory fitness. The DOT is authorized to establish consumer protection regulations to prevent unfair methods of competition and deceptive practices, to prohibit certain pricing practices, to inspect a carrier's books, properties and records, and to mandate conditions of carriage. The DOT also has the power to bring proceedings for the enforcement of air carrier economic regulations, including the assessment of civil penalties, and to seek criminal sanctions.

We are subject to the jurisdiction of the FAA with respect to our aircraft maintenance and operations, including equipment, ground facilities, dispatch, communication, training, weather observation, flight personnel and other matters affecting air safety. To ensure compliance with its regulations, the FAA requires airlines to obtain an operating certificate, which is subject to suspension or revocation for cause, and provides for regular inspections.

We are subject to various federal and local laws and regulations pertaining to other issues of environmental protocol. We believe we are in compliance with all governmental laws and regulations regarding environmental protection.

We are also subject to the jurisdiction of the Federal Communications Commission with respect to the use of our radio facilities and the United States Postal Service with respect to carriage of United States mail.

Local governments in certain markets have adopted regulations governing various aspects of aircraft operations, including noise abatement and curfews.

Available Information

We maintain a website where additional information concerning our business can be found. The address of that website is www.mesa-air.com. We make available free of charge on our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, as soon as reasonably practicable after we electronically file or furnish such materials to the SEC.

Item 1A. Risk Factors

The following risk factors, in addition to the information discussed elsewhere herein, should be carefully considered in evaluating us and our business:

Table of Contents

Risks Related to Our Business

We are dependent on our agreements with our code-share partners.

We depend on relationships created by our code-share agreements. We derive a significant portion of our consolidated passenger revenues from our revenue guarantee code-share agreements with America West, United Airlines, and US Airways. Our code-share partners have certain rights to cancel the applicable code-share agreement upon the occurrence of certain events or the giving of appropriate notice, subject to certain conditions. No assurance can be given that one or more of our code-share partners will not serve notice at a later date of their intention to cancel our code-sharing agreement, forcing us to stop selling those routes with the applicable partner's code and potentially reducing our traffic and revenue.

Our code-share agreement with America West allows America West, subject to certain restrictions, to reduce the combined CRJ fleets utilized under the code-share agreement by one aircraft in any six-month period commencing in June 2006 (except during the calendar year 2007 in which 2 CRJ-200 can be eliminated in each six-month period). In addition, beginning in February 2007, America West may eliminate the Dash-8 aircraft upon 180 days prior written notice. America West has used this provision to reduce the number of aircraft covered by the code-share agreement and there can be no assurance that, commencing in January 2007, they will not continue to further reduce the number of covered aircraft.

In addition, because a majority of our operating revenues are currently generated under revenue-guarantee code-share agreements, if any one of them is terminated, our operating revenues and net income could be materially adversely affected unless we are able to enter into satisfactory substitute arrangements or, alternatively, fly under our own flight designator code, including obtaining the airport facilities and gates necessary to do so. For the year ended September 30, 2005, our America West code-share agreement accounted for 44% of our consolidated passenger revenues, our US Airways code-share agreement accounted for 31% of our consolidated passenger revenues and our United code-share agreement accounted for 24% of our consolidated passenger revenues. Following the transition of the 59 aircraft previously operated at US Airways, we currently anticipate that our America West code-share agreement will account for approximately 40% of our consolidated passenger revenues, our Delta code-share agreement will account for approximately 20% of our consolidated passenger revenues and our United code-share agreement will account for approximately 35% of our consolidated passenger revenues. Any material modification to, or termination of, our code-share agreements with any of these partners could have a material adverse effect on our financial condition, the results of our operations and the price of our common stock. Should America West, Delta or United's revenue-guarantee code-share agreements be terminated, we cannot assure you that we would be able to enter into substitute code-share arrangements, that any such arrangements would be as favorable to us as the current code-share agreements or that we could successfully fly under our own flight designator code.

As a result of the US Airways' emergence from bankruptcy and their non-assumption of our revenue-guarantee code-share agreement, we began working with US Airways to provide for the orderly transition of the aircraft flown under our US Airways code-share agreement. If we are unable to timely transition the jets flown under this agreement to other code-share arrangements, we may incur unexpected costs which could have a material adverse effect on our business, financial condition and results of operations.

If our code-share partners or other regional carriers experience events that negatively impact their financial strength or operations, our operations also may be negatively impacted.

We are directly affected by the financial and operating strength of our code-share partners. Any events that negatively impact the financial strength of our code-share partners or have a long-term effect on the use of our code-share partners by airline travelers would likely have a material adverse effect on our business, financial condition and results of operations. In the event of a decrease in the financial or operational strength of any of our code-share partners, such partner may seek to reduce, or be unable to make, the payments due to us under their code-share agreement. In addition, they may reduce utilization of our aircraft. Although there are certain monthly guaranteed payment amounts, there are no minimum levels of utilization specified in the code-share agreements. UAL Corp., the parent company of our code-share partner United Airlines, has not emerged from reorganization under Chapter 11 of the U.S. Bankruptcy Code. Additionally, US Airways, which accounted for 31% of our consolidated passenger revenue for the fiscal year ended September 30, 2005, filed for bankruptcy protection. On September 16, 2005, the

Bankruptcy court entered an order confirming the debtors (US Airways) plan of reorganization, which included the merger between US Airways Group and America West Holding Corporation, the parent company of America West Airlines. US Airways Group will operate under the single brand name of US Airways through two principal operating subsidiaries, US Airways, Inc. and America West Airlines, Inc. As a result of US Airways' emergence from bankruptcy and their non-assumption of our revenue-guarantee code-share agreement, we expanded our regional jet revenue-guarantee code-share agreement with United and entered into a new revenue-guarantee code-share agreement with Delta and are currently working to transition the jets flown under the US Airways code-share agreement to the United and Delta arrangements.

Table of Contents

In addition, on September 14, 2005, Delta Air Lines filed for reorganization under Chapter 11 of the US Bankruptcy Code. Delta has not yet assumed our code-share agreement in its bankruptcy proceeding and could choose to terminate this agreement or seek to renegotiate the agreement on terms less favorable to us. If any of our other current or future code-share partners become bankrupt, our code-share agreement with such partner may not be assumed in bankruptcy and would be terminated. This and other such events could have a material adverse effect on our business, financial condition and results of operations. We may also experience additional costs that could adversely affect our operations if we experience any delay in the transition of aircraft flying under our US Airways code-share agreement to United or Delta. In addition, any negative events that occur to other regional carriers and that affect public perception of such carriers generally could also have a material adverse effect on our business, financial condition and results of operations.

Our code-share partners may expand their direct operation of regional jets thus limiting the expansion of our relationships with them.

We depend on major airlines like America West, Delta, United Airlines and US Airways electing to contract with us instead of purchasing and operating their own regional jets. However, these major airlines possess the resources to acquire and operate their own regional jets instead of entering into contracts with us or other regional carriers. We have no guarantee that in the future our code-share partners will choose to enter into contracts with us instead of purchasing their own regional jets or entering into relationships with competing regional airlines. A decision by America West, Delta, United Airlines, or US Airways to phase out our contract-based code-share relationships or to enter into similar agreements with competitors could have a material adverse effect on our business, financial condition or results of operations. In addition to Mesa, Delta, US Airways and United Airlines have similar code-share agreements with other competing regional airlines.

If we experience a lack of labor availability or strikes, it could result in a decrease of revenues due to the cancellation of flights.

The operation of our business is significantly dependent on the availability of qualified employees, including, specifically, flight crews, mechanics and avionics specialists. Historically, regional airlines have periodically experienced high pilot turnover as a result of air carriers operating larger aircraft hiring their commercial pilots. Further, the addition of aircraft, especially new aircraft types, can result in pilots upgrading between aircraft types and becoming unavailable for duty during the required extensive training periods. There can be no assurance that we will be able to maintain an adequate supply of qualified personnel or that labor expenses will not increase.

At September 30, 2005, we had approximately 4,600 employees, a significant number of whom are members of labor unions, including ALPA and the AFA. Our collective bargaining agreement with ALPA becomes amendable in September 2007 and our collective bargaining agreement with the AFA becomes amendable in June 2006. The inability to negotiate acceptable contracts with existing unions as agreements expire or with new unions could result in work stoppages by the affected workers, lost revenues resulting from the cancellation of flights and increased operating costs as a result of higher wages or benefits paid to union members. We cannot predict which, if any, other employee groups may seek union representation or the outcome or the terms of any future collective bargaining agreement and therefore the effect, if any, on our business financial condition and results of operations. If negotiations with unions over collective bargaining agreements prove to be unsuccessful, following specified cooling off periods, the unions may initiate a work action, including a strike, which could have a material adverse effect on our business, financial condition and results of operations.

Increases in our labor costs, which constitute a substantial portion of our total operating costs, will cause our earnings to decrease.

Labor costs constitute a significant percentage of our total operating costs. Under our code-share agreements, our reimbursement rates contemplate labor costs that increase on a set schedule generally tied to an increase in the consumer price index or the actual increase in the contract. We are responsible for our labor costs, and we may not be entitled to receive increased payments under our code-share agreements if our labor costs increase above the assumed costs included in the reimbursement rates. As a result, a significant increase in our labor costs above the levels assumed in our reimbursement rates could result in a material reduction in our earnings.

If new airline regulations are passed or are imposed upon our operations, we may incur increased operating costs and experience a decrease in earnings.

Laws and regulations, such as those described below, have been proposed from time to time that could significantly increase the cost of our operations by imposing additional requirements or restrictions on our operations. We cannot predict what laws and

Table of Contents

regulations will be adopted or what changes to air transportation agreements will be effected, if any, or how they will affect us, and there can be no assurance that laws or regulations currently proposed or enacted in the future will not increase our operating expenses and therefore adversely affect our financial condition and results of operations.

As an interstate air carrier, we are subject to the economic jurisdiction, regulation and continuing air carrier fitness requirements of the DOT, which include required levels of financial, managerial and regulatory fitness. The DOT is authorized to establish consumer protection regulations to prevent unfair methods of competition and deceptive practices, to prohibit certain pricing practices, to inspect a carrier's books, properties and records, to mandate conditions of carriage and to suspend an air carrier's fitness to operate. The DOT also has the power to bring proceedings for the enforcement of air carrier economic regulations, including the assessment of civil penalties, and to seek criminal sanctions.

We are also subject to the jurisdiction of the FAA with respect to our aircraft maintenance and operations, including equipment, ground facilities, dispatch, communication, training, weather observation, flight personnel and other matters affecting air safety. To ensure compliance with its regulations, the FAA requires airlines to obtain an operating certificate, which is subject to suspension or revocation for cause, and provides for regular inspections.

We incur substantial costs in maintaining our current certifications and otherwise complying with the laws, rules and regulations to which we are subject. We cannot predict whether we will be able to comply with all present and future laws, rules, regulations and certification requirements or that the cost of continued compliance will not significantly increase our costs of doing business.

The FAA has the authority to issue mandatory orders relating to, among other things, the grounding of aircraft, inspection of aircraft, installation of new safety-related items and removal and replacement of aircraft parts that have failed or may fail in the future. A decision by the FAA to ground, or require time-consuming inspections of, or maintenance on, all or any of our turboprops or regional jets, for any reason, could negatively impact our results of operations.

In addition to state and federal regulation, airports and municipalities enact rules and regulations that affect our operations. From time to time, various airports throughout the country have considered limiting the use of smaller aircraft, such as Embraer or Canadair regional jets, at such airports. The imposition of any limits on the use of our regional jets at any airport at which we operate could interfere with our obligations under our code-share agreements and severely interrupt our business operations.

If additional security and safety measures regulations are adopted, we may incur increased operating costs and experience a decrease in earnings.

Congress has adopted increased safety and security measures designed to increase airline passenger security and protect against terrorist acts. Such measures have resulted in additional operating costs to the airline industry. The Aviation Safety Commission's report recommends the adoption of further measures aimed at improving the safety and security of air travel. We cannot forecast what additional security and safety requirements may be imposed on our operations in the future or the costs or revenue impact that would be associated with complying with such requirements, although such costs and revenue impact could be significant. To the extent that the costs of complying with any additional safety and security measures are not reimbursed by our code-share partners, our operating results and net income could be adversely affected.

If our operating costs increase as our aircraft fleet ages and we are unable to pass along such costs, our earnings will decrease.

As our fleet of aircraft age, the cost of maintaining such aircraft, if not replaced, will likely increase. There can be no assurance that costs of maintenance, including costs to comply with aging aircraft requirements, will not materially increase in the future. Any material increase in such costs could have a material adverse effect on our business, financial condition and results of operations. Because many aircraft components are required to be replaced after specified numbers of flight hours or take-off and landing cycles, and because new aviation technology may be required to be retrofitted, the cost to maintain aging aircraft will generally exceed the cost to maintain newer aircraft. We believe that the cost to maintain our aircraft in the long-term will be consistent with industry experience for these aircraft types and ages used by comparable airlines.

We believe that our aircraft are mechanically reliable based on the percentage of scheduled flights completed and as of September 30, 2005 the average age of our regional jet fleet is 3.2 years. However, there can be no assurance that such aircraft will continue to be sufficiently reliable over longer periods of time. Furthermore, any public perception that our aircraft are less than completely reliable could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

Our fleet expansion program has required a significant increase in our leverage.

The airline business is very capital intensive and, as a result, many airline companies are highly leveraged. For the year ended September 30, 2005, our debt service payments, including principal and interest, totaled \$74.6 million and our aircraft lease payments totaled \$206.2 million. We have significant lease obligations with respect to our aircraft and ground facilities, which aggregated approximately \$2.5 billion at September 30, 2005. As of September 30, 2005, our growth strategy involves the acquisition of one more Bombardier regional jet during fiscal 2006. As of September 30, 2005, we had permanently financed all but two CRJ-700 and CRJ-900 aircraft delivered under the 2001 BRAD agreement. We may utilize interim financing provided by the manufacturer and have the ability to fund up to 15 aircraft at any one time under this facility. There are no assurances that we will be able to obtain permanent financing for future aircraft deliveries.

There can be no assurance that our operations will generate sufficient cash flow to make such payments or that we will be able to obtain financing to acquire the additional aircraft necessary for our expansion. If we default under our loan or lease agreements, the lender/lessor has available extensive remedies, including, without limitation, repossession of the respective aircraft and, in the case of large creditors, the effective ability to exert control over how we allocate a significant portion of our revenues. Even if we are able to timely service our debt, the size of our long-term debt and lease obligations could negatively affect our financial condition, results of operations and the price of our common stock in many ways, including:

increasing the cost, or limiting the availability of, additional financing for working capital, acquisitions or other purposes;

limiting the ways in which we can use our cash flow, much of which may have to be used to satisfy debt and lease obligations; and

adversely affecting our ability to respond to changing business or economic conditions or continue our growth strategy.

Reduced utilization levels of our aircraft under the revenue-guarantee agreements would adversely impact our revenues and earnings.

Even though our revenue-guarantee agreements require a fixed amount per month to compensate us for our fixed costs, if our aircraft are underutilized (including taking into account the stage length and frequency of our scheduled flights) we will lose the opportunity to receive a margin on the variable costs of flights that would have been flown if our aircraft were more fully utilized.

If we incur problems with any of our third-party service providers, our operations could be adversely affected by a resulting decline in revenue or negative public perception about our services.

Our reliance upon others to provide essential services on behalf of our operations may result in the relative inability to control the efficiency and timeliness of contract services. We have entered into agreements with contractors to provide various facilities and services required for our operations, including aircraft maintenance, ground facilities, baggage handling and personnel training. It is likely that similar agreements will be entered into in any new markets we decide to serve. All of these agreements are subject to termination after notice. Any material problems with the efficiency and timeliness of contract services could have a material adverse effect on our business, financial condition and results of operations.

We are at risk of loss and adverse publicity stemming from any accident involving any of our aircraft.

If one of our aircraft were to crash or be involved in an accident, we could be exposed to significant tort liability.

There can be no assurance that the insurance we carry to cover damages arising from any future accidents will be adequate. Accidents could also result in unforeseen mechanical and maintenance costs. In addition, any accident involving an aircraft that we operate could create a public perception that our aircraft are not safe, which could result in air travelers being reluctant to fly on our aircraft. To the extent a decrease in air travelers is associated with our operations not covered by our code-share agreements, such a decrease could have a material adverse effect on our business, financial condition or results of operations.

If we become involved in any material litigation or any existing litigation is concluded in a manner adverse to us, our earnings may decline.

We are, from time to time, subject to various legal proceedings and claims, either asserted or unasserted. Any such claims, whether with or without merit, could be time-consuming and expensive to defend and could divert management's attention and resources. There can be no assurance regarding the outcome of current or future litigation.

Table of Contents

Our business would be harmed if we lose the services of our key personnel.

Our success depends to a large extent on the continued service of our executive management team. We have employment agreements with certain executive officers, but it is possible that members of executive management may leave us. Departures by our executive officers could have a negative impact on our business, as we may not be able to find suitable management personnel to replace departing executives on a timely basis. We do not maintain key-man life insurance on any of our executive officers.

We may experience difficulty finding, training and retaining employees.

Our business is labor intensive, we require large numbers of pilots, flight attendants, maintenance technicians and other personnel. The airline industry has from time to time experienced a shortage of qualified personnel, specifically pilots and maintenance technicians. In addition, as is common with most of our competitors, we have faced considerable turnover of our employees. Although our employee turnover has decreased significantly since September 11, 2001, our pilots, flight attendants and maintenance technicians often leave to work for larger airlines, which generally offer higher salaries and better benefit programs than regional airlines are financially able to offer. Should the turnover of employees, particularly pilots and maintenance technicians, sharply increase, the result will be significantly higher training costs than otherwise would be necessary. We cannot assure you that we will be able to recruit, train and retain the qualified employees that we need to carry out our expansion plans or replace departing employees. If we are unable to hire and retain qualified employees at a reasonable cost, we may be unable to complete our expansion plans, which could have a material adverse effect our financial condition, results of operations and the price of our common stock.

We may be unable to successfully launch or profitably operate our planned Hawaiian airline, which could negatively impact our business and operations.

We have announced plans to form an independent inter-island Hawaiian airline with service expected to begin in the first quarter of 2006. Launching service in Hawaii will require ongoing investments of working capital by Mesa, significant management attention and focus, regulatory approval by state and federal regulators, location of suitable facilities and may involve a partnership or venture with financial investors.

We have not had operations in Hawaii prior to this planned launch and we may be unable to begin service when planned, if at all, given the inherent risks in establishing and operating a new airline. If we are unable to begin service when planned or are unable to begin service at all, our operations may be negatively impacted. Additionally, given the costs and risks associated with operating an independent low fare regional jet airline, once service begins we may be unable to operate the Hawaiian airline profitably, which would negatively impact our financial results.

Risks Related to Our Industry

If competition in the airline industry increases, we may experience a decline in revenue.

Increased competition in the airline industry as well as competitive pressure on our code-share partners or in our markets could have a material adverse effect on our business, financial condition and results of operation. The airline industry is highly competitive. The earnings of many of the airlines have historically been volatile. The airline industry is susceptible to price discounting, which involves the offering of discount or promotional fares to passengers. Any such fares offered by one airline are normally matched by competing airlines, which may result in lower revenue per passenger, i.e., lower yields, without a corresponding increase in traffic levels. Also, in recent years several new carriers have entered the industry, typically with low cost structures. In some cases, new entrants have initiated or triggered price discounting. The entry of additional new major or regional carriers in any of our markets, as well as increased competition from or the introduction of new services by established carriers, could negatively impact our financial condition and results of operations.

Our reliance on our code-share agreements with our major airline partners for the majority of our revenue means that we must rely on the ability of our code-share partners to adequately promote their respective services and to maintain their respective market share. Competitive pressures by low-fare carriers and price discounting among major airlines could have a material adverse effect on our code-share partners and therefore adversely affect our business, financial condition and results of operations.

Table of Contents

The results of operations in the air travel business historically fluctuate in response to general economic conditions. The airline industry is sensitive to changes in economic conditions that affect business and leisure travel and is highly susceptible to unforeseen events, such as political instability, regional hostilities, economic recession, fuel price increases, inflation, adverse weather conditions or other adverse occurrences that result in a decline in air travel. Any event that results in decreased travel or increased competition among airlines could have a material adverse effect on our business, financial condition and results of operations.

In addition to traditional competition among airlines, the industry faces competition from ground and sea transportation alternatives. Video conferencing and other methods of electronic communication may add a new dimension of competition to the industry as business travelers seek lower-cost substitutes for air travel.

The airline industry is heavily regulated.

Airlines are subject to extensive regulatory and legal compliance requirements, both domestically and internationally, that involve significant costs. In the last several years, the FAA has issued a number of directives and other regulations relating to the maintenance and operation of aircraft that have required us to make significant expenditures. FAA requirements cover, among other things, retirement of older aircraft, security measures, collision avoidance systems, airborne wind shear avoidance systems, noise abatement, commuter aircraft safety and increased inspection and maintenance procedures to be conducted on older aircraft.

We incur substantial costs in maintaining our current certifications and otherwise complying with the laws, rules and regulations to which we are subject. We cannot predict whether we will be able to comply with all present and future laws, rules, regulations and certification requirements or that the cost of continued compliance will not significantly increase our costs of doing business, to the extent such costs are not reimbursed by our code-share partners.

The FAA has the authority to issue mandatory orders relating to, among other things, the grounding of aircraft, inspection of aircraft, installation of new safety-related items and removal and replacement of aircraft parts that have failed or may fail in the future. A decision by the FAA to ground, or require time consuming inspections of or maintenance on, all or any of our aircraft, for any reason, could negatively impact our results of operations.

In addition to state and federal regulation, airports and municipalities enact rules and regulations that affect our operations. From time to time, various airports throughout the country have considered limiting the use of smaller aircraft at such airports. The imposition of any limits on the use of our aircraft at any airport at which we operate could interfere with our obligations under our code-share agreements and severely interrupt our business operations.

Additional laws, regulations, taxes and airport rates and charges have been proposed from time to time that could significantly increase the cost of airline operations or reduce revenues. If adopted, these measures could have had the effect of raising ticket prices, reducing revenue and increasing costs. In addition, as a result of the terrorist attacks in New York and Washington, D.C. in September 2001, the FAA has imposed more stringent security procedures on airlines and imposed security taxes on each ticket sold. We cannot predict what other new regulations may be imposed on airlines and we cannot assure you that laws or regulations enacted in the future will not materially adversely affect our financial condition, results of operations and the price of our common stock.

The airline industry has been subject to a number of strikes which could affect our business.

The airline industry has been negatively impacted by a number of labor strikes. Any new collective bargaining agreement entered into by other regional carriers may result in higher industry wages and add increased pressure on us to increase the wages and benefits of our employees. Furthermore, since each of our code-share partners is a significant source of revenue, any labor disruption or labor strike by the employees of any one of our code-share partners could have a material adverse effect on our financial condition, results of operations and the price of our common stock.

Risks Related to Our Common Stock

Provisions in our charter documents might deter acquisition bids for us.

Our articles of incorporation and bylaws contain provisions that, among other things:

authorize our board of directors to issue preferred stock ranking senior to our common stock without any action on the part of the shareholders;

Table of Contents

establish advance notice procedures for shareholder proposals, including nominations of directors, to be considered at shareholders' meetings;

authorize a majority of our board of directors, in certain circumstances, to fill vacancies on the board resulting from an increase in the authorized number of directors or from vacancies;

restrict the ability of shareholders to modify the number of authorized directors; and

restrict the ability of stockholders to call special meetings of shareholders.

In addition, Section 78.438 of the Nevada general corporation law prohibits us from entering into some business combinations with interested stockholders without the approval of our board of directors. These provisions could make it more difficult for a third party to acquire us, even if doing so would benefit our stockholders.

Our stock price may continue to be volatile and could decline substantially.

The stock market has, from time to time, experienced extreme price and volume fluctuations. Many factors may cause the market price for our common stock to decline following this Form 10-K, including:

our operating results failing to meet the expectations of securities analysts or investors in any quarter;

downward revisions in securities analysts' estimates;

material announcements by us or our competitors;

public sales of a substantial number of shares of our common stock following this Form 10-K;

governmental regulatory action; or

adverse changes in general market conditions or economic trends.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our primary property consists of the aircraft used in the operation of our flights. The following table lists the aircraft owned and leased by the Company as of September 30, 2005.

Type of Aircraft	Number of Aircraft				Operating on Sept. 30, 2005	Passenger Capacity
	Owned	Interim Financing	Leased	Total		
CRJ-200/100 Regional Jet	2		54	56	56	50
CRJ-700 Regional Jet	5		10	15	15	64
CRJ-900 Regional Jet	11	2	24	37	37	86
Embraer 145 Regional Jet			36	36	36	50
Beechcraft 1900D	35			35	22	19
Dash 8-200			16	16	16	37
Embraer EMB-120			2	2		30
Total	53	2	142	197	182	

See Business Airline Operations and MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - Liquidity and Capital Resources for a discussion regarding the

Company's aircraft fleet commitments.

Table of Contents

In addition to aircraft, we have office and maintenance facilities to support our operations. Our facilities are summarized in the following table:

Type	Location	Ownership	Approximate Square Feet
Headquarters	Phoenix, AZ	Leased	36,000
Training/Administration	Phoenix, AZ	Leased	27,000
Hangar/Office	Phoenix, AZ	Leased	22,000
Engine Shop & Commissary	Phoenix, AZ	Leased	25,000
RAS Office/Component Overhaul Facility	Phoenix, AZ	Leased	19,000
Customer Service Training/Storage	Phoenix, AZ	Leased	10,000
Office (East Coast)	Charlotte, NC	Leased	5,500
Hangar	Charlotte, NC	Leased	30,000
Hangar	Columbia, SC	(1)	20,000
Hangar	Grand Junction, CO	(1)	25,000
Hangar/Office	Wichita, KS	(1)	20,000
Training/Administration	Farmington, NM	(1)	10,000
Hangar	Farmington, NM	(1)	24,000
Hangar/Office	Dubois, PA	(1)	23,000
Hangar	Little Rock, AR	Leased	10,000
Hangar	Philadelphia, PA	Leased	10,000
Hangar	Reading, PA	(1)	30,000
Hangar (RAS)	Reading, PA	(1)	32,000

(1) Building is owned, underlying land is leased.

We lease ticket counters, check-in and boarding and other facilities in the passenger terminal areas in the majority of the airports we serve and staff those facilities with our personnel. America West, US Airways and United also provide facilities, ticket handling and ground support services for us at certain airports.

Our corporate headquarters and training/administrative facilities in Phoenix, Arizona are subject to long-term leases expiring on August 31, 2012 and November 1, 2012, respectively.

We believe our facilities are suitable and adequate for our current and anticipated needs.

Item 3. Legal Proceedings

We are involved in various legal proceedings and FAA civil action proceedings that the Company does not believe will have a material adverse effect upon the Company's business, financial condition or results of operations, although no assurance can be given to the ultimate outcome of any such proceedings.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Executive Officers of the Registrant

The following table sets forth the names and ages of the executive officers of the Company and certain additional information:

Name	Age	Position
Jonathan G. Ornstein	48	Chief Executive Officer
Michael J. Lotz	45	President and Chief Operating Officer
George Murnane III	47	Executive Vice President and Chief Financial Officer
Michael Ferwerda	61	Senior Vice President Operations
Brian S. Gillman	36	Vice President, General Counsel and Secretary
F. Carter Leake	43	Senior Vice President Planning

Jonathan G. Ornstein was appointed President and Chief Executive Officer of Mesa Air Group, Inc. effective May 1, 1998. Mr.

Table of Contents

Ornstein relinquished his position as President of the Company in June 2000. From April 1996 to his joining the Company as Chief Executive Officer, Mr. Ornstein served as President and Chief Executive Officer and Chairman of Virgin Express S.A./N.V., a European airline. From 1995 to April 1996, Mr. Ornstein served as Chief Executive Officer of Virgin Express Holdings, Inc. Mr. Ornstein joined Continental Express Airlines, Inc., as President and Chief Executive Officer in July 1994 and, in November 1994, was named Senior Vice President, Airport Services at Continental Airlines, Inc. Mr. Ornstein was previously employed by the Company from 1988 to 1994, as Executive Vice President and as President of the Company's WestAir Holding, Inc. subsidiary.

Michael J. Lotz, President and Chief Operating Officer, joined the Company in July 1998. In January 1999, Mr. Lotz became Chief Operating Officer. In August 1999, Mr. Lotz became the Company's Chief Financial Officer and in January 2000 returned to the position of Chief Operating Officer. On June 22, 2000, Mr. Lotz was appointed President of the Company. Prior to joining the Company, Mr. Lotz served as Chief Operating Officer of Virgin Express, S.A./N.V., a position he held from October 1996 to June 1998. Previously, Mr. Lotz was employed by Continental Airlines, Inc., most recently as Vice President of Airport Operations, Properties and Facilities at Continental Express.

George Murnane III, Executive Vice President and Chief Financial Officer, was appointed Executive Vice President of the Company effective December 2001 and Chief Financial Officer in January 2003. Mr. Murnane served as a director of the Company from June 1999 until October 2003. From 1996 to December 2001, Mr. Murnane was a Director and Executive Vice President of International Airline Support Group, Inc., a redistributor of aftermarket commercial aircraft spare parts and lessor and trader of commercial aircraft and engines, most recently as its Chief Operating Officer. From 1995 to 1996, Mr. Murnane served as Executive Vice President and Chief Operating Officer of Atlas Air, Inc., an air cargo company. From 1986 to 1996, he was an investment banker with the New York investment banking firm of Merrill Lynch & Co., most recently as a Director in the firm's Transportation Group.

Michael Ferwerda, Senior Vice President - Operations joined the Company in 1990. He was appointed President of Freedom Airlines in May 2002 and Senior Vice President - Operations in February 2003. Prior to the appointments, Mr. Ferwerda served as the Senior Vice President of Operations for Mesa Airlines, Inc. Mr. Ferwerda has served the Company in various capacities including pilot, Flight Instructor/Check Airman, Assistant Chief Pilot, FAA Designated Examiner, FAA Director of Operations and Divisional Vice President. Mr. Ferwerda was a pilot with Eastern Airlines from 1973 to 1989. Prior to joining Eastern Airlines, Mr. Ferwerda served as an Aviator in the United States Navy. Mr. Ferwerda is a graduate of Indiana University.

Brian S. Gillman, Vice President, General Counsel and Secretary, joined the Company in February 2001. From July 1996 to February 2001, he served as Vice President, General Counsel and Secretary of Vanguard Airlines, Inc. in Kansas City, Missouri. From September 1994 to July 1996, Mr. Gillman was a corporate associate in the law firm of Stinson, Mag & Fizzell, P.C., Kansas City, Missouri. Mr. Gillman received his Juris Doctorate and B.B.A. in Accounting from the University of Iowa in 1994 and 1991, respectively.

F. Carter Leake, Senior Vice President - Planning, joined the Company in January 2001. Mr. Leake served as Executive Vice-President of CCAir, Inc., a former wholly-owned subsidiary of the Company, commencing in January 2001 and was promoted to President of CCAir in October 2001. Mr. Leake served as Senior Vice President East Coast Operations for Mesa Airlines from February 2003 until January 2005. In January 2005, Mr. Leake was appointed Senior Vice President - Planning of the Company. Prior to joining the Company, Mr. Leake served as a Director of Sales for Bombardier Regional Aircraft from November 1996 to January 2001. Previously, Mr. Leake was an analyst with SH&E, an aviation consulting firm in New York, and a US Air Force military pilot.

PART II**Item 5. Market for Registrant's Common Equity and Related Stockholder Matters****Market Price of Common Stock**

The following table sets forth, for the periods indicated, the high and low price per share of Mesa common stock for the two most recent fiscal years, as reported by NASDAQ. Mesa's common stock is traded on the NASDAQ National Market System under the symbol MESA.

Table of Contents

Quarter	Fiscal 2005		Fiscal 2004	
	High	Low	High	Low
First	\$8.03	\$5.21	\$13.85	\$10.17
Second	7.93	6.29	12.45	7.48
Third	7.00	5.25	9.01	6.56
Fourth	8.66	6.76	8.12	5.10

On December 1, 2005, we had 1,066 shareholders of record. We have never paid cash dividends on our common stock. The payment of future dividends is within the discretion of our board of directors and will depend upon our future earnings, if any, our capital requirements, bank financing, financial condition and other relevant factors.

Recent Sales of Unregistered Securities

On February 7, 2002, in connection with an agreement entered into with Raytheon Aircraft Company (Raytheon), we granted Raytheon a warrant to purchase up to 233,068 shares of our common stock at a per share exercise price of \$10. Raytheon must pay a purchase price of \$1.50 per share underlying the warrant. The warrant is exercisable at any time over a three-year period following its date of issuance. Absent a default by us under the agreement with Raytheon in which case vesting is accelerated, the shares underlying the warrant vested (and are therefore purchasable by Raytheon) according to the following schedule: 13,401 shares in fiscal year 2001; 116,534 shares in fiscal year 2002; 58,267 shares in fiscal year 2003 and 44,866 shares in fiscal year 2004. As of December 1, 2004, Raytheon has exercised its option to purchase all of the components of the warrant. The sale of the warrant and the shares underlying the warrant were made pursuant to an exemption from registration pursuant to Section 4(2) under the Securities Act of 1933, as amended.

In June 2003, we completed the private placement of senior convertible notes due 2023, raising approximately \$96.9 million net proceeds. At maturity, the principal amount of each note will be \$1,000 and the aggregate amount due will be \$252 million. These notes are convertible into shares of our common stock at a conversion rate of 39.727 shares per \$1,000 in principal amount at maturity of the notes, which equals an initial conversion price of approximately \$10.00 per share. This conversion rate is subject to adjustment in certain circumstances. Holders of these notes may convert their notes only if: (i) the sale price of our common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding quarter; (ii) prior to June 16, 2018, the trading price for these notes falls below certain thresholds; (iii) these notes have been called for redemption; or (iv) specified corporate transactions occur. We may redeem these notes, in whole or in part, beginning on June 16, 2008, at a redemption price equal to the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of these notes may require us to repurchase the notes on June 16, 2008 at a price of \$397.27 per note plus accrued and unpaid cash interest, if any, on June 16, 2013 at a price of \$540.41 per note plus accrued and unpaid cash interest, if any, and on June 16, 2018 at a price of \$735.13 per note plus accrued and unpaid cash interest, if any.

In February 2004, we completed the private placement of senior convertible notes due 2024, raising approximately \$97.0 million net proceeds. At maturity, the principal amount of each note will be \$1,000 and the aggregate amount due will be \$171.4 million. These notes are convertible into shares of our common stock at a conversion rate of 40.3737 shares per \$1,000 in principal amount at maturity of the notes, which equals an initial conversion price of approximately \$14.45 per share. This conversion rate is subject to adjustment in certain circumstances. Holders of these notes may convert their notes only if: (i) the sale price of our common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding quarter; (ii) prior to February 10, 2019, the trading price for these notes falls below certain thresholds; (iii) these notes have been called for redemption; or (iv) specified corporate transactions occur. We may redeem these notes, in whole or in part, beginning on February 10, 2009, at a redemption price equal to the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of the notes may require us to repurchase the notes on February 10, 2009 at a price of \$583.4 per note plus accrued and unpaid cash interest, if any, on February 10, 2014 at a price of \$698.20 per note plus accrued and unpaid cash interest, if any, and on February 10, 2019 at a price of \$835.58 per note plus accrued and unpaid cash interest, if any.

The following table sets forth information required regarding repurchases of common stock that we made during the three months ended September 30, 2005:

Table of Contents**Issuer Purchases of Equity Securities**

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan(1)	Maximum Number of Shares That May yet be Purchased Under the Plan
September 2005	115,123	\$ 7.91	911,132	1,382,400

(1) Under resolutions adopted and publicly announced in December 1999, January 2001, October 2002, October 2004 and April 2005, our Board of Directors has authorized the repurchase, at management's discretion, of up to an aggregate of approximately 9.4 million shares of our common stock. Subsequent to year end, the Company's Board of Directors authorized the Company to purchase up to an additional 10 million shares of the Company's outstanding common stock.

Item 6. Selected Financial Data

Selected Financial Data and Operating Statistics

The selected financial data as of and for each of the five years ended September 30, 2005, are derived from the Consolidated Financial Statements of the Company and its subsidiaries and should be read in conjunction with the Consolidated Financial Statements included elsewhere in this Form 10-K and the related notes thereto and

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of the Company's results of operations and financial condition. The discussion should be read in conjunction with the Consolidated Financial Statements and the related notes thereto, and the Selected Financial Data and Operating Statistics contained elsewhere in this Form 10-K/A.

The discussion of cash flows in the Liquidity and Capital Resources section of Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended September 30, 2005 reflects a restatement related to uses of cash for capital expenditures from \$44.6 million as previously reported to \$41.9 million as restated, as a result of a restatement in the 2005 consolidated statement of cash flows. The restatement does not affect the total net change in cash and cash equivalents for the year ended September 30, 2005, and has no impact on the Company's consolidated balance sheet as of September 30, 2005 and the consolidated statement of income, the consolidated statement of stockholders' equity and the related income per share amounts for the year ended September 30, 2005.

Executive Overview

General

Mesa is a holding company whose principal subsidiaries operate as regional air carriers providing scheduled passenger and airfreight service. As of September 30, 2005, the Company served 176 cities in 43 states, the District of Columbia, Canada and Mexico and operated a fleet of 182 aircraft with approximately 1,100 daily departures.

Approximately 99% of our consolidated passenger revenues for the fiscal year ended September 30, 2005 were derived from operations associated with code-share agreements. Our subsidiaries have code-share agreements with America West, Midwest Airlines, United Airlines and US Airways. The remaining passenger revenues are derived from our independent operations.

In fiscal 2005, approximately 97% of our passenger revenue was associated with revenue-guarantee flying. The America West (regional jet and Dash-8), United (regional jet and Dash-8), and US Airways (regional jet) code-share agreements are revenue-guarantee flying agreements. Under the terms of these flying agreements, the major carrier controls marketing, scheduling, ticketing, pricing and seat inventories. Our role is simply to operate our fleet in the safest and most reliable manner in exchange for fees paid under a generally fixed payment schedule. We received a guaranteed payment based upon a fixed minimum monthly amount plus amounts related to departures and block hours flown in addition to direct reimbursement of expenses such as fuel, landing fees and insurance. Among other advantages, revenue-guarantee arrangements reduce the Company's exposure to fluctuations in passenger traffic and fare levels, as well as fuel prices. In fiscal 2005, approximately 95% of our fuel purchases were reimbursed under revenue guarantee code-share agreements.

In fiscal 2005, approximately 3% of our passenger revenue was associated with pro-rate and independent flying. The US Airways (Beechcraft 1900D turboprop), Midwest Airlines and America West (Beechcraft 1900D turboprop) code-share agreements are pro-rate agreements, for which we received an allocated portion of each passenger's fare and we pay all of the costs of transporting the passenger.

In addition to carrying passengers, we carry freight and express packages on our passenger flights and have interline small cargo

Table of Contents

freight agreements with many other carriers. We also have contracts with the U.S. Postal Service for carriage of mail to the cities we serve and occasionally operate charter flights when our aircraft are not otherwise used for scheduled service.

Fleet

In fiscal 2005, we continued our regional jet fleet growth by growing from 129 regional jets at September 30, 2004 to 144 regional jets at September 30, 2005.

The Company also continued reducing the number of B1900 aircraft in service by leasing some of these aircraft to other operators. In October 2004, the Company entered into an agreement to lease four of its Beechcraft 1900D aircraft operated by Air Midwest to Gulfstream and in January 2005, we entered into another agreement to lease ten Beechcraft 1900D aircraft to Big Sky. As of September 30, 2005, we had leased nine aircraft to Big Sky pursuant to this agreement and subleased the tenth aircraft to Big Sky in the first quarter of fiscal 2006. As of September 30, 2005, we owned 35 Beechcraft 1900D aircraft and were operating 22 of these aircraft.

Aircraft in Operation at September 30,

Type of Aircraft	2005	2004	2003
CRJ-200/100 Regional Jet	56	54	43
CRJ-700 Regional Jet	15	15	15
CRJ-900 Regional Jet	37	24	6
Embraer 145 Regional Jet	36	36	32
Beechcraft 1900D	22	35	42
Dash 8-200	16	16	12
Total	182	180	150

Aircraft Financing

In September 2005, the Company completed the permanent financing of 15 CRJ-900 regional jets through a sale and leaseback transaction. As a result of this transaction, which was structured as an off-balance sheet operating lease, approximately \$400 million in both the asset and related debt were removed from the Company's balance sheet.

In October 2004, the Company permanently financed five CRJ-900 aircraft with \$118.0 million in debt. The debt bears interest at the monthly LIBOR plus three percent and requires monthly principal and interest payments. The manufacturer has entered into an arrangement on the Company's behalf to limit the Company's variable interest rate exposure with respect to these aircraft. These aircraft had been originally acquired with interim financing from the manufacturer.

Code-Share Agreements

In May 2005, the Company announced a code-share arrangement between the Company, Freedom, and Delta that provides for Freedom to become a Delta Connection partner. Under the terms of the agreement, Freedom commenced operations in October 2005 and will operate up to 30 50-seat regional jet aircraft on routes throughout Delta's network. The arrangement required Mesa to partially reimburse Delta's lease payments associated with Delta's 30 Dornier Fairchild 328 jets throughout the term of the agreement in exchange for performing flight services under the agreement; however, the requirement to reimburse Delta for certain lease costs was terminated when Delta filed for bankruptcy protection. The code-share arrangement will terminate with respect to each aircraft, on an aircraft-by-aircraft basis, beginning in approximately twelve years. Delta may terminate the code-share agreement at any time, with or without cause, upon twelve months' prior written notice following the sixth anniversary of the in-service date of the 30th aircraft added to the Delta Connection fleet. However, Delta has not yet assumed our code-share agreement in its bankruptcy proceedings and could choose to terminate our agreement at any time prior to its emergence from bankruptcy.

In May 2005, the Company amended its code-sharing arrangement with United to allow the Company to put up to an additional 30 50-seat regional jet aircraft into the United Express system and extend the expiration dates under the existing code-share agreement with respect to certain aircraft. In connection with the amendment, the Company

agreed to make three \$10 million payments to United as follows: i) \$10 million in June 2005, ii) \$10 million in October 2005, and iii) \$10 million in November 2005.

As of September 30, 2005, we operated 59 50-seat regional jets for US Airways. As a result of US Airways emergence from bankruptcy and their non-assumption of our code-share agreement, we began working with US Airways to provide for the transition of

Table of Contents

these 59 jets to our United and Delta code-sharing arrangements. As of December 1, 2005, we had transitioned 32 50-seat regional jets out of US Airways system. We expect to complete the transition of aircraft from US Airways to United in the first quarter of fiscal year 2006 and to Delta in the second quarter of fiscal year 2006.

Rotable Spare Parts Maintenance Agreements

In August 2005, the Company entered into a ten-year agreement with AAR Corp. (the AAR Agreement), for the management and repair of certain of the Company's CRJ-200, -700, -900 and ERJ-145 aircraft rotable spare parts inventory. Under the agreement, AAR will purchase certain existing rotable spare parts inventory with \$39.5 million in cash and \$21.5 million in notes receivable to be paid over the next four years. Under the agreement, the Company is required to pay AAR a monthly fee based upon flight hours for the management of, access to and maintenance of the inventory. The agreement also contains certain minimum monthly payments that Mesa must make to AAR. At termination, the Company may elect to purchase the covered inventory at fair market value, but is not contractually obligated to do so. The AAR agreement is contingent upon the Company terminating an agreement for the Company's CRJ-200 aircraft rotable spare parts inventory with GE Capital Aviation Services (GECAS), and including these rotatables in the arrangement. The Company notified GECAS of its intent to cancel that agreement in August and terminated the agreement in November 2005.

Other Operations

The Company announced its intention to establish an independent inter-island Hawaiian airline with service expected to begin in early to mid calendar 2006. The airline will be conducted using state-of-the-art new generation regional jets in a high quality, high frequency service, connecting the islands of Hawaii with service to the Hilo, Honolulu, Kona, Lihue and Maui (Kahului) markets. The aircraft are expected to be incremental to Mesa's current fleet.

Summary of Financial Results

Mesa Air Group recorded consolidated net income of \$56.9 million in fiscal 2005, representing diluted earnings per share of \$1.35. This compares to consolidated net income of \$26.3 million or \$0.63 per share in fiscal 2004 and consolidated net income of \$25.3 million or \$0.76 per share in fiscal 2003.

The fiscal 2005 results included \$1.7 million in net costs to return four non-operating Embraer 120 aircraft to the lessor, a \$1.3 million gain from the reversal of reserves due to the early return of two Shorts 360 aircraft to the lessor, \$1.0 million in proceeds from the settlement of a dispute with a vendor and net investment income of \$2.3 million.

The fiscal 2004 results included \$12.4 million in costs to terminate the leases of seven Beechcraft 1900D aircraft, one-time compensation payments of \$3.4 million, merger costs of \$3.4 million related to our failed attempt to merge with Atlantic Coast Airlines, the reversal of certain restructuring liabilities of \$0.5 million and net investment income of \$0.6 million.

The fiscal 2003 results included the reversal of \$12.0 million in restructuring liabilities related to the closure of CCAir, \$1.1 million in costs of returning Beechcraft 1900D aircraft to the manufacturer, a \$4.1 million settlement with the DOT related to payments made to the Company under the Air Transportation Safety and System Stabilization Act, \$1.0 million in TSA funds collected on the Company's behalf by other airlines, a gain on the involuntary conversion of an aircraft of \$1.3 million related to the crash of Flight 5481 and a net investment loss of \$0.7 million.

Results of Operations

The following tables set forth selected operating and financial data of the Company for the years indicated below.

	Operating Data		
	Years Ended September 30,		
	2005	2004	2003
Passengers	13,088,872	10,239,915	6,444,459

All of the Company's Beechcraft 1900D aircraft are owned by Mesa Airlines. As such, the associated aircraft and debt are recorded on the separate company financial statements of Mesa Airlines. These aircraft are operated by Air Midwest, and as a result, Mesa charges Air Midwest rent to offset its depreciation and interest cost. Prior impairment charges related to these aircraft are recorded on the separate company financial statements of Mesa Airlines.

Fiscal 2005 Versus Fiscal 2004

Operating Revenues

In fiscal 2005, operating revenue increased by \$239.5 million, or 26.7%, from \$896.8 million to \$1,136.3 million. The increase in revenue is primarily attributable to a \$256.9 million increase in revenue associated with the operation of 15 additional regional jets flown by Mesa compared to 2004. Offsetting this increase was a decrease in passenger revenue of approximately \$20.3 million at Air Midwest and Freedom. The decrease in passenger revenue at Air Midwest and Freedom was primarily due to reductions in capacity as the Company has leased nine B1900 aircraft to Big Sky and four B1900 aircraft to Great Lakes during fiscal 2005. However, EAS subsidies received by Air Midwest increased by \$1.3 million as a result of additional markets served and higher subsidy rates on existing markets.

Table of Contents**Operating Expenses*****Flight Operations***

In fiscal 2005, flight operations expense increased \$21.8 million or 7.3%, to \$319.3 million from \$297.5 million for fiscal 2004. On an ASM basis, flight operations expense decreased 11.9% to 3.7 cents per ASM in fiscal 2005 from 4.2 cents per ASM in fiscal 2004. This increase in total expense is primarily attributed to a \$15.8 million increase in aircraft lease costs as a result of placing additional regional jets into service and an increase of \$5.0 million in pilot and flight attendant wages due to growth in flight operations. The decrease on an ASM basis is due to the addition of larger regional jets at Mesa and the reduction in turboprop aircraft flown by Air Midwest.

Fuel

In fiscal 2005, fuel expense increased \$109.7 million or 56.4%, to \$304.3 million from \$194.5 million for fiscal 2004. On an ASM basis, fuel expense increased 29.6% to 3.5 cents per ASM in fiscal 2005 from 2.7 cents per ASM in fiscal 2004. Into-plane fuel cost increased 32% per gallon, resulting in a \$62.3 million unfavorable price variance and consumption increased 18% resulting in a \$47.4 million unfavorable volume variance. The increase in volume was due to the additional regional jets added to the fleet. In fiscal 2005, approximately 95% of our fuel costs were reimbursed by our code-share partners.

Maintenance Expense

In fiscal 2005, maintenance expense increased \$35.2 million or 21.6%, to \$198.7 million from \$163.5 million for fiscal 2004. On an ASM basis, maintenance expense remained flat at 2.3 cents for fiscal 2005 and fiscal 2004. The increase is due to \$5.5 million in additional aircraft heavy maintenance expense, a \$6.6 million increase in component and rent expense, a \$10.1 million increase in engine maintenance, and a \$13.5 million increase in materials, repairs and servicing expenses. The increase is due to the increased fleet size and age of the Company's aircraft.

Aircraft and Traffic Servicing

In fiscal 2005, aircraft and traffic servicing expense increased by \$2.3 million or 3.4%, to \$68.5 million from \$66.2 million for fiscal 2004. On an ASM basis, aircraft and traffic servicing expense decreased 11.1% to 0.8 cents per ASM in fiscal 2005 from 0.9 cents per ASM in fiscal 2004. The increase in expense is primarily related to an 11% increase in departures. The decrease on an ASM basis is due to the addition of larger regional jets at Mesa and the reduction in turboprop aircraft at Air Midwest.

Promotion and Sales

In fiscal 2005, promotion and sales expense decreased \$1.9 million or 32.7%, to \$3.9 million from \$5.8 million for fiscal 2004. On an ASM basis, promotion and sales expense decreased 100% to 0.0 cents per ASM in fiscal 2005 from 0.1 cents per ASM in fiscal 2004. The decrease in expense is due to a decline in booking and franchise fees paid by Air Midwest under our pro-rate agreements with our code-share partners, caused by a decline in passengers carried under these agreements. We do not pay these fees under our regional jet revenue-guarantee contracts.

General and Administrative

In fiscal 2005, general and administrative expense increased \$7.4 million or 11.9%, to \$69.4 million from \$62.0 million for fiscal 2004. On an ASM basis, general and administrative expense decreased 11.1% to 0.8 cents per ASM in fiscal 2005 from 0.9 cents per ASM in fiscal 2004. The increase in expense includes a \$6.3 million increase in property taxes associated with increases in our fleet and a \$2.6 million increase in bad debt expense as a result of increasing the Company's allowance for doubtful receivables related to code share partners in bankruptcy. Offsetting these increases was a \$1.6 million decrease in health insurance costs related to the timing and severity of claims.

Depreciation and Amortization

In fiscal 2005, depreciation and amortization expense increased \$16.2 million or 58.0%, to \$44.2 million from \$28.0 million for fiscal 2004. On an ASM basis, depreciation and amortization expense increased 25.0% to 0.5 cents per ASM in fiscal 2005 from 0.4 cents per ASM in fiscal 2004. The increase in expense is primarily due to the purchase of 13 regional jets in 2005.

Table of Contents***Impairment and Restructuring Charges***

In fiscal 2005, we reversed \$1.3 million in reserves for lease and lease return costs related to two Shorts 360 aircraft the Company returned to the lessor in January 2005.

In fiscal 2004, we recognized an impairment charge of \$12.4 million related to the early termination of leases on seven B1900D aircraft. We negotiated the terms of the early return with the majority of the aircraft lessors and took a charge that included \$2.4 million for the present value of future lease payments, \$2.4 million for the negotiated settlement of return conditions, \$1.2 million for the cancellation of maintenance agreements, \$0.8 million to reduce maintenance deposits to net realizable value and \$4.5 million to reduce the value of rotatable and expendable inventory to fair value less costs to sell. We purchased two of the aircraft from the lessors, which were subsequently scrapped. As a result, we also took a \$1.1 million impairment charge for the difference between the buy out of the lease and the subsequent sale of the aircraft. These charges were offset by the reversal of \$0.5 million of prior year restructuring charges.

Interest Expense

In fiscal 2005, interest expense increased \$19.4 million or 77.4%, to \$44.5 million from \$25.1 million for fiscal 2004. The increase in interest expense is primarily comprised of an increase of \$14.6 million on interim and permanently financed aircraft debt, \$1.2 million on the senior convertible notes that were issued in February 2004, \$1.2 million on the inventory financing arrangement with GECAS and \$1.1 million on the B1900 aircraft debt.

Other Income (Expense)

In fiscal 2005, other income increased \$2.7 million, or 159.4%, to \$4.5 million from \$1.7 million for fiscal 2004. In fiscal 2005, other income is primarily comprised of net investment income of \$2.3 million from the Company's portfolio of aviation related securities, \$2.9 million of dividend income on marketable securities, \$1.0 million income from a settlement of a dispute with a vendor and \$1.7 million in net costs to return four non-operating EMB120 aircraft to the lessor.

In fiscal 2004, other income was primarily comprised of investment income of \$0.6 million related to the Company's portfolio of aviation related securities.

Income Taxes

In fiscal 2005, the Company's effective income tax rate was 38.3% as compared to 41.8% in fiscal 2004. The decrease in rate from fiscal 2004 is due to certain payments to top executives in the prior year, a portion of which were not deductible for income taxes.

Fiscal 2004 Versus Fiscal 2003***Operating Revenues***

In fiscal 2004, operating revenue increased by \$296.8 million, or 49.5%, from \$600.0 million to \$896.8 million. The increase in revenue is primarily attributable to a \$300.2 million increase in revenue associated with the operation of 39 additional regional jets flown by Mesa and Freedom compared to 2003. Offsetting this increase was a decrease in passenger revenue of approximately \$7.8 million at Air Midwest. The decrease in passenger revenue at Air Midwest was primarily due to a decline in passengers carried as a result of parking seven leased aircraft in the second quarter (the leases on these aircraft were subsequently early terminated, with five aircraft returned to the lessor and two purchased and resold). However, EAS subsidies received by Air Midwest increased by \$3.6 million as a result of additional markets served and higher subsidy rates on existing markets.

Operating Expenses***Flight Operations***

In fiscal 2004, flight operations expense increased \$85.4 million or 40.3%, to \$297.5 million from \$212.1 million for fiscal 2003. On an ASM basis, flight operations expense decreased 12.5% to 4.2 cents per ASM in fiscal 2004 from 4.8 cents per ASM in fiscal 2003. The increase in expense is consistent with the increased capacity from the regional jets added to Mesa and Freedom's fleet

Table of Contents

during this period. The decrease on an ASM basis is due to the addition of larger regional jets at Mesa and Freedom and the reduction in turboprop aircraft at Air Midwest.

Fuel

In fiscal 2004, fuel expense increased \$81.1 million or 71.6%, to \$194.5 million from \$113.4 million for fiscal 2003. On an ASM basis, fuel expense increased 8.0% to 2.7 cents per ASM in fiscal 2004 from 2.5 cents per ASM in fiscal 2003. Into-plane fuel cost increased 16% per gallon, resulting in a \$26.2 million unfavorable price variance and consumption increased 48% resulting in a \$54.1 million unfavorable volume variance (excluding fuel used in other operations). The increase in volume was due to the additional regional jets added to the fleet. In fiscal 2004 approximately 92% of our fuel costs were reimbursed by our code-share partners.

Maintenance Expense

In fiscal 2004, maintenance expense increased \$44.9 million or 37.9%, to \$163.5 million from \$118.5 million for fiscal 2003. On an ASM basis, maintenance expense decreased 11.5% to 2.3 cents per ASM in fiscal 2004 from 2.6 cents per ASM in fiscal 2003. Mesa and Freedom's maintenance expense increased \$40.3 million primarily as a result of increases in the number of aircraft in their fleet, repair costs on certain rotatable parts, headcount and engine overhaul expenses. Maintenance expenses in the Other segment increased \$6.8 million due to increases in rotatable repair expenses and certain purchasing related administrative expenses at our procurement company. These increases were offset by a \$1.3 million decrease in maintenance expenses at CCAIR, due to its dissolution, and a \$0.9 million decrease at Air Midwest as a result of reductions in its fleet. The decrease on an ASM basis is due to the lower maintenance costs associated with adding new jets into our fleet.

Aircraft and Traffic Servicing

In fiscal 2004, aircraft and traffic servicing expense increased by \$16.2 million or 32.3%, to \$66.2 million from \$50.1 million for fiscal 2003. On an ASM basis, aircraft and traffic servicing expense decreased 18.2% to 0.9 cents per ASM in fiscal 2004 from 1.1 cents per ASM in fiscal 2003. The increase in expense is primarily related to a 19% increase in regional jet departures. The decrease on an ASM basis is due to the efficiencies attained by adding additional regional jets at Mesa and Freedom and the reduction in turboprop aircraft at Air Midwest.

Promotion and Sales

In fiscal 2004, promotion and sales expense decreased \$2.2 million or 27.1%, to \$5.8 million from \$8.0 million for fiscal 2003. On an ASM basis, promotion and sales expense decreased 50.0% to 0.1 cents per ASM in fiscal 2004 from 0.2 cents per ASM in fiscal 2003. The decrease in expense is due to a decline in booking and franchise fees paid by Air Midwest under the Company's pro-rate agreements with its code-share partners, caused by a decline in passengers carried under these agreements. The Company does not pay these fees under its regional jet revenue-guarantee contracts.

General and Administrative

In fiscal 2004, general and administrative expense increased \$24.1 million or 63.3%, to \$62.0 million from \$38.0 million for fiscal 2003. On an ASM basis, general and administrative expense remained the same at 0.9 cents per ASM in fiscal 2004 and 2003. The increase in expense includes \$3.4 million in costs associated with the failed merger with Atlantic Coast Airlines, Inc., \$3.4 million in executive compensation as a result of the restructuring of employment contracts of top executives, a \$6.1 million increase in bad debt expense as the Company increased its allowance for doubtful accounts by \$4.3 million in fiscal 2004 (we reduced our allowance by \$1.8 million in fiscal 2003), a \$3.6 million increase in passenger liability insurance associated with increases in our fleet, a \$1.2 million increase in property taxes associated with increases in our fleet, a \$3.6 million increase in administrative wages and benefits and a \$2.2 million increase in health insurance costs as a result of increased headcount.

Depreciation and Amortization

In fiscal 2004, depreciation and amortization expense increased \$12.3 million or 78.4%, to \$28.0 million from \$15.7 million for fiscal 2003. On an ASM basis, depreciation and amortization expense remained the same at 0.4 cents per ASM in fiscal 2004 and 2003. The increase in expense is primarily due to the purchase of 11 regional jets in 2004, the acquisition of two CRJ200 aircraft acquired as part of the purchase of Midway assets, depreciation of aircraft on interim financing and an increase in rotatable aircraft inventory at Mesa and Freedom.

Table of Contents***Impairment and Restructuring Charges***

In fiscal 2004, we recognized an impairment charge of \$12.4 million related to the early termination of leases on seven B1900D aircraft. We negotiated the terms of the early return with the majority of the aircraft lessors and took a charge that included \$2.4 million for the present value of future lease payments, \$2.4 million for the negotiated settlement of return conditions, \$1.2 million for the cancellation of maintenance agreements, \$0.8 million to reduce maintenance deposits to net realizable value, \$4.5 million to reduce the value of rotatable and expendable inventory to fair value less costs to sell. We were forced to purchase two of the aircraft from the lessors, which were subsequently scrapped. As a result, we also took a \$1.1 million impairment charge for the difference between the buy out of the lease and the subsequent sale of the aircraft. These charges were offset by the reversal of \$0.4 million of prior year restructuring charges.

In fiscal 2003, we recognized an additional impairment charge of \$1.1 million related to the costs of returning Beechcraft 1900D aircraft to the manufacturer. We also reversed \$7.4 million in restructuring charges for future aircraft leases related to CCAir aircraft that were returned to the lessor and \$4.6 million in aircraft related return costs for these same aircraft.

Interest Expense

In fiscal 2004, interest expense increased \$12.4 million or 97.9%, to \$25.1 million from \$12.7 million for fiscal 2003. The increase in interest expense is primarily comprised of \$8.6 million in interest on the senior convertible notes and an increase of \$4.5 million in interest on interim and permanently financed aircraft debt. These increases were offset by a decrease of \$1.3 million in interest expense on our B1900 debt due to aircraft returns and principal payments.

Other Income (Expense)

In fiscal 2004, other income (expense) increased \$4.5 million or 162%, to income of \$1.7 million from expense of \$2.8 million for fiscal 2003. In fiscal 2004, other income is primarily comprised of investment income of \$0.6 million related to the Company's portfolio of aviation related securities.

In fiscal 2003, other expense is primarily comprised of the settlement with the DOT of \$4.1 million related to payments made to us under the Air Transportation Safety and System Stabilization Act and \$0.7 million in net investment related losses on our portfolio of aviation related securities. These expenses were offset by the gain on an involuntary conversion of an aircraft of \$1.3 million related to the crash of Flight 5481 as well as \$1.0 million for TSA funds collected on our behalf by US Airways and Frontier.

Minority Interest

Amounts included in minority interest in fiscal 2003 reflect the after-tax portion of earnings of UFLY, LLC that are applicable to the minority interest partners. UFLY was dissolved in fiscal 2003.

Income Taxes

In fiscal 2004, the Company's effective income tax rate was 41.8% as compared to 38.3% in fiscal 2003. The increase in rate from fiscal 2003 is due to certain payments to top executives in the current year, a portion of which were not deductible for income taxes.

Liquidity and Capital Resources***Sources and Uses of Cash***

At September 30, 2005, we had cash, cash equivalents, and marketable securities (including restricted cash and held-to-maturity securities) of \$280.4 million, compared to \$241.1 million at September 30, 2004. In fiscal 2005, we permanently financed 15 CRJ-900 aircraft through a sale/leaseback transaction, which resulted in proceeds on sale of \$389.2 million. Proceeds from this transaction were used to retire \$397.4 million in interim aircraft debt. We also improved our cash position through operations and receipt of a \$22.8 million deposit from the pending sale of our existing regional jet spare parts inventory.

Uses of cash included capital expenditures of \$41.9 million, which was primarily attributable to aircraft modifications and provisioning of rotatable inventory to support the additional jets, and the purchase of \$11.2 million of the Company's outstanding common stock.

Table of Contents

Our cash and cash equivalents and marketable securities are intended to be used for working capital, capital expenditures, acquisitions, and to fund our obligations with respect to regional jet deliveries.

As of September 30, 2005, we had receivables of approximately \$29.0 million (net of an allowance for doubtful accounts of \$8.9 million), compared to receivables of approximately \$30.7 million (net of an allowance for doubtful accounts of \$7.1 million) as of September 30, 2004. The amounts include receivables due from our code-share partners, credits due from the aircraft manufacturer and passenger ticket receivables due through the Airline Clearing House. Accounts receivable from our code-share partners was 35.3% of total gross accounts receivable at September 30, 2005.

Operating Leases

We have significant long-term lease obligations primarily relating to our aircraft fleet including 15 CRJ900 aircraft that were permanently financed as operating leases in September 2005. The leases are classified as operating leases and are therefore excluded from our consolidated balance sheets. At September 30, 2005, we leased 142 aircraft with remaining lease terms ranging from 1 to 18.5 years. Future minimum lease payments due under all long-term operating leases were approximately \$2.5 billion at September 30, 2005.

3.625% Senior Convertible Notes due 2024

In February 2004, we completed the private placement of senior convertible notes due 2024, which resulted in gross proceeds of \$100.0 million (\$97.0 million net). Cash interest is payable on the notes at the rate of 2.115% per year on the aggregate amount due at maturity, payable semiannually in arrears on February 10 and August 10 of each year, beginning August 10, 2004, until February 10, 2009. After that date, we will not pay cash interest on the notes prior to maturity, and the notes will begin accruing original issue discount at a rate of 3.625% until maturity. On February 10, 2024, the maturity date of the notes, the principal amount of each note will be \$1,000. The aggregate amount due at maturity, including interest accrued from February 10, 2009, will be \$171.4 million. Each of our wholly owned domestic subsidiaries guarantees the notes on an unsecured senior basis. The notes and the note guarantees are senior unsecured obligations and rank equally with our existing and future senior unsecured indebtedness. The notes and the note guarantees are junior to the secured obligations of our wholly owned subsidiaries to the extent of the collateral pledged.

The notes are convertible into shares of our common stock at a conversion rate of 40.3737 shares per \$1,000 in principal amount at maturity of the notes. This conversion rate is subject to adjustment in certain circumstances. Holders of the notes may convert their notes only if: (i) after March 31, 2004, the sale price of our common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding quarter; (ii) on or prior to February 10, 2019, the trading price for the notes falls below certain thresholds; (iii) the notes have been called for redemption; or (iv) specified corporate transactions occur. We may redeem the notes, in whole or in part, beginning on February 10, 2009, at a redemption price equal to the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of the notes may require us to repurchase the notes on February 10, 2009 at a price of \$583.40 per note plus accrued and unpaid cash interest, if any, on February 10, 2014 at a price of \$698.20 per note plus accrued and unpaid cash interest, if any, and on February 10, 2019 at a price of \$835.58 per note plus accrued and unpaid cash interest, if any.

6.25% Senior Convertible Notes Due 2023

In June 2003, we completed the private placement of senior convertible notes due 2023, which resulted in gross proceeds of \$100.1 million (\$96.9 million net). Cash interest is payable on the notes at the rate of 2.4829% per year on the aggregate amount due at maturity, payable semiannually in arrears on June 16 and December 16 of each year, beginning December 16, 2003, until June 16, 2008. After that date, we will not pay cash interest on the notes prior to maturity, and the notes will begin accruing original issue discount at a rate of 6.25% until maturity. On June 16, 2023, the maturity date of the notes, the principal amount of each note will be \$1,000. The aggregate amount due at maturity, including interest accrued from June 16, 2008, will be \$252 million. Each of our wholly owned domestic subsidiaries guarantees the notes on an unsecured senior basis. The notes and the note guarantees are senior unsecured obligations and rank equally with our existing and future senior unsecured indebtedness. The notes and the note guarantees are junior to the secured obligations of our wholly owned subsidiaries to the extent of the collateral pledged.

The notes are convertible into shares of our common stock at a conversion rate of 39.727 shares per \$1,000 in principal amount at maturity of the notes. This conversion rate is subject to adjustment in certain circumstances. Holders of the notes may convert their notes only if: (i) the sale price of our common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding quarter; (ii) prior to June 16, 2018, the trading price for the

Table of Contents

notes falls below certain thresholds; (iii) the notes have been called for redemption; or (iv) specified corporate transactions occur. The Company may redeem the notes, in whole or in part, beginning on June 16, 2008, at a redemption price equal to the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of the notes may require the Company to repurchase the notes on June 16, 2008 at a price of \$397.27 per note plus accrued and unpaid cash interest, if any, on June 16, 2013 at a price of \$540.41 per note plus accrued and unpaid cash interest, if any, and on June 16, 2018 at a price of \$735.13 per note plus accrued and unpaid cash interest, if any.

Interim and Permanent Aircraft Financing Arrangements

At September 30, 2005, we had an aggregate of \$54.6 million in notes payable to an aircraft manufacturer for delivered aircraft on interim financing. Under interim financing arrangements, we take delivery and title of the aircraft prior to securing permanent financing and the acquisition of the aircraft is accounted for as a purchase with debt financing. Accordingly, we reflect the aircraft and debt under interim financing on our balance sheet during the interim financing period. After taking delivery of the aircraft, it is our practice and our intention to subsequently enter into a sale and leaseback transaction with an independent third-party lessor. Upon permanent financing, the proceeds from the sale and leaseback transaction are used to retire the notes payable to the manufacturer. Any gain recognized on the sale and leaseback transaction is deferred and amortized over the life of the lease. At September 30, 2005, we had two aircraft on interim financing with the manufacturer. These interim financings agreements have a term of six months and provide for monthly interest only payments at LIBOR plus three percent. The current interim financing agreement with the manufacturer provides for us to have a maximum of 15 aircraft on interim financing at any one time. Our ability to obtain additional interim financing is contingent upon obtaining permanent financing for the aircraft already delivered. There are no assurances that we will be able to obtain permanent financing for future aircraft deliveries.

Other Indebtedness and Obligations

In October 2004, the Company permanently financed five CRJ-900 aircraft with \$118.0 million in debt. The debt bears interest at the monthly LIBOR plus three percent and requires monthly principal and interest payments.

In January and March 2004, the Company permanently financed five CRJ-700 and six CRJ-900 aircraft with \$254.7 million in debt. The debt bears interest at the monthly LIBOR plus three percent and requires monthly principal and interest payments.

In December 2003, we assumed \$24.1 million of debt in connection with our purchase of two CRJ-200 aircraft in the Midway Chapter 7 bankruptcy proceedings. The debt, due in 2013, bears interest at the rate of 7% per annum through 2008, converting to 12.5% thereafter, with principal and interest due monthly.

In August 2005, the Company entered into a ten-year agreement with AAR Corp. (the AAR Agreement), for the management and repair of certain of the Company's CRJ-200, -700, -900 and ERJ-145 aircraft rotatable spare parts inventory. Under the agreement, AAR will purchase certain existing spare parts inventory for \$39.5 million in cash and \$21.5 million in notes receivable to be paid over the next four years. Under the agreement, the Company is required to pay AAR a monthly fee based upon flight hours for access to and maintenance of the inventory. The agreement also contains certain minimum monthly payments that Mesa must make to AAR. At termination, the Company may elect to purchase the covered inventory at fair value, but is not contractually obligated to do so. The AAR agreement is contingent upon the Company terminating an agreement for the Company's CRJ-200 aircraft rotatable spare parts inventory with GE Capital Aviation Services (GECAS), and including these rotatables in the arrangement. The amount included in the consolidated balance sheet at September 30, 2005, represents deposits received from AAR pending the termination of the GECAS agreement. The Company notified GECAS of its intent to cancel that agreement in August and terminated the agreement in November 2005 (see note 8).

In June 2004, the Company entered into an agreement with LogisTechs, Inc., a wholly-owned subsidiary of GECAS, whereby GECAS provided financing to the Company and the Company agreed to pay GECAS for the management and repair of certain of the Company's CRJ-200 aircraft rotatable spare parts inventory. Under the agreement, the Company received \$15 million in cash and a \$6 million promissory note receivable from GECAS. In August 2005, Mesa notified GECAS of its intent to terminate the agreement in order to enter into the AAR agreement, and as such, the Company is required to repay the 19.7 million of outstanding financing at September 30, 2005. The

agreement was terminated and this amount was repaid in November 2005.

As of September 30, 2005, we had \$8.8 million in restricted cash on deposit collateralizing various letters of credit outstanding and the ACH funding of our payroll. We have entered into a \$9.5 million letter of credit facility with a financial institution, of which \$3.8 million is required to be secured.

Future aircraft acquisition costs(3)	25,000				175,000		200,000
Rotable inventory financing commitments(4)	18,379	587	563	540	2,241		22,310
Minimum payments due under rotable spare parts maintenance agreement	19,129	22,787	26,158	28,922	31,969	172,295	301,260
Contract initiation costs(5)	20,000						20,000
Total	\$ 397,560	\$ 321,637	\$ 299,806	\$ 274,319	\$ 450,231	\$ 2,526,916	\$ 4,270,469

(1) Represents the principal and interest on notes payable to the manufacturer for interim financed aircraft. These notes payable have a six-month maturity. For purposes of this schedule, we have assumed that aircraft on interim financing are converted to permanent financing as debt upon the expiration of the notes with future maturities included on this line.

(2) Aircraft ownership costs, including depreciation and interest expense on owned aircraft and rental payments on operating leased aircraft, of aircraft flown pursuant to our guaranteed-revenue agreements are

reimbursed by the applicable code-share partner.

- (3) Represents the estimated cost of commitments to acquire CRJ-900 aircraft.
- (4) Represents the principal and interest related to financed rotatable inventory and includes amounts due as a result of the termination of the GECAS agreement.
- (5) Represents amounts due code share partners for contract modification payments.

Table of Contents***Maintenance Commitments***

In January 1997, we entered into a 10-year engine maintenance contract with General Electric Aircraft Engines (GE) for its CRJ-200 aircraft. The agreement was subsequently amended in the first quarter of fiscal 2003. The amended contract requires a monthly payment based upon the prior month's flight hours incurred by the covered engines. The hourly rate increases over time based upon the engine overhaul costs that are expected to be incurred in that year and is subject to escalation based on changes in certain price indices. The contract also provides for a fixed number of engine overhauls per year. To the extent that the number of actual overhauls is less than the fixed number, GE is required to issue a credit to us for the number of events less than the fixed number multiplied by an agreed upon price. To the extent that the number of actual overhauls is greater than the fixed number, we are required to pay GE for the number of events greater than the fixed number multiplied by the same agreed upon price.

In April 1997, we entered into a 10-year engine maintenance contract with Pratt & Whitney Canada Corp. (PWC) for our Dash 8-200 aircraft. The contract requires us to pay PWC for the engine overhaul upon completion of the maintenance based upon a fixed dollar amount per flight hour. The rate under the contract is subject to escalation based on changes in certain price indices.

In April 2000, we entered into a 10-year engine maintenance contract with Rolls-Royce Allison (Rolls-Royce) for its ERJ aircraft. The contract requires us to pay Rolls-Royce for the engine overhaul upon completion of the maintenance based upon a fixed dollar amount per flight hour. The rate per flight hour is based upon certain operational assumptions and may vary if the engines are operated differently than these assumptions. The rate is also subject to escalation based on changes in certain price indices. The agreement with Rolls-Royce also contains a termination clause and look back provision to provide for any shortfall between the cost of maintenance incurred by the provider and the amount paid up to the termination date by us and includes a 15% penalty on such amount. We do not anticipate an early termination under the contract.

In May 2002, we entered into a new six-year fleet management program with PWC to provide maintenance for our Beechcraft 1900D turboprop engines. The contract requires a monthly payment based upon flight hours incurred by the covered aircraft. The hourly rate is subject to annual adjustment based on changes in certain price indices and is guaranteed to increase by no less than 1.5% per year. Pursuant to the agreement, we sold certain assets of our Desert Turbine Services unit, as well as all spare PT6 engines to PWC for \$6.8 million, which approximated the net book value of the assets. Pursuant to the agreement, we provided a working capital loan to PWC for the same amount, which is to be repaid through a reduced hourly rate being charged for maintenance. The agreement covers all of our Beechcraft 1900D turboprop aircraft and engines. The agreement also contains a termination clause and look back provision to provide for any shortfall between the cost of maintenance incurred by the provider and the amount paid up to the termination date by us and provides for return of a pro-rated share of the prepaid amount upon early termination. We do not anticipate an early termination under the contract.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. In connection with the preparation of these financial statements, we are required to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue, and expenses, and related disclosure of contingent liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, the allowance for doubtful accounts, medical claims reserve, valuation of assets held for sale and costs to return aircraft and a valuation allowance for certain deferred tax assets. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. Such historical experience and assumptions form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We have identified the accounting policies below as critical to our business operations and the understanding of our results of operations. The impact of these policies on our business operations is discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect our reported and expected financial results. The discussion below is not intended to be a comprehensive list of our accounting policies. For a detailed discussion on the application of these and other accounting policies, see Note 1 in

the Notes to the Consolidated Financial Statements, which contains accounting policies and other disclosures required by accounting principles generally accepted in the United States of America.

Table of Contents***Revenue Recognition***

The America West, United and the US Airways regional jet code-share agreements are revenue-guarantee flying agreements. Under a revenue-guarantee arrangement, the major airline generally pays a fixed monthly minimum amount, plus certain additional amounts based upon the number of flights flown and block hours performed. The contracts also include reimbursement of certain costs incurred by us in performing flight services. These costs, known as pass-through costs, may include aircraft ownership cost, passenger and hull insurance, aircraft property taxes as well as, fuel, landing fees and catering. The contracts also include a profit component that may be determined based on a percentage of profits on the Mesa flown flights, a profit margin on certain reimbursable costs as well as a profit margin based on certain operational benchmarks. We recognize revenue under our revenue-guarantee agreements when the transportation is provided. The majority of the revenue under these contracts is known at the end of the accounting period and is booked as actual. We perform an estimate of the profit component based upon the information available at the end of the accounting period. All revenue recognized under these contracts is presented at the gross amount billed.

Under the Company's revenue-guarantee agreements with America West, US Airway and United, the Company is reimbursed under a fixed rate per block-hour plus an amount per aircraft designed to reimburse the Company for certain aircraft ownership costs. In accordance with Emerging Issues Task Force Issue No. 01-08, *Determining Whether an Arrangement Contains a Lease*, the Company has concluded that a component of its revenue under the agreement discussed above is rental income, inasmuch as the agreement identifies the right of use of a specific type and number of aircraft over a stated period of time. The amount deemed to be rental income during fiscal 2005 and 2004 was \$235.5 million and \$189.0 million, respectively, and has been included in passenger revenue on the Company's consolidated statements of income.

In connection with providing service under the Company's revenue-guarantee agreement with US Airways, the Company's fuel reimbursement is capped at \$0.85 per gallon. Under this agreement, the Company has the option to purchase fuel from a subsidiary of US Airways at the capped rate. As a result, amounts included in revenue for fuel reimbursement and expense for fuel cost may not represent market rates for fuel for the Company's US Airways flying. The Company purchased 67.4 million gallons, 68.1 million gallons and 55.3 million gallons of fuel under this arrangement in fiscal 2005, 2004 and 2003, respectively.

The America West, US Airways and Midwest Airlines B1900D turboprop code-share agreements are pro-rate agreements. Under a prorated agreement, we receive a percentage of the passenger's fare based on a standard industry formula that allocates revenue based on the percentage of transportation provided. Revenue from our pro-rate agreements and our independent operation is recognized when transportation is provided. Tickets sold but not yet used are included in air traffic liability on the consolidated balance sheets.

We also receive subsidies for providing scheduled air service to certain small or rural communities. Such revenue is recognized in the period in which the air service is provided. The amount of the subsidy payments is determined by the United States Department of Transportation on the basis of its evaluation of the amount of revenue needed to meet operating expenses and to provide a reasonable return on investment with respect to eligible routes. EAS rates are normally set for two-year contract periods for each city.

Allowance for Doubtful Accounts

Amounts billed by the Company under revenue guarantee arrangements are subject to our interpretation of the applicable code-share agreement and are subject to audit by our code-share partners. Periodically our code-share partners dispute amounts billed and pay amounts less than the amount billed. Ultimate collection of the remaining amounts not only depends upon Mesa prevailing under audit, but also upon the financial well-being of the code-share partner. As such, we periodically review amounts past due and records a reserve for amounts estimated to be uncollectible. The allowance for doubtful accounts was \$8.9 million and \$7.1 million at September 30, 2005 and 2004, respectively. If our actual ability to collect these receivables and the actual financial viability of its partners is materially different than estimated, the Company's estimate of the allowance could be materially understated or overstated.

Aircraft Leases

The majority of the Company's aircraft are leased from third parties. In order to determine the proper classification of a lease as either an operating lease or a capital lease, the Company must make certain estimates at the inception of the lease relating to the economic useful life and the fair value of an asset as well as select an appropriate discount rate to be used in discounting future lease payments. These estimates are utilized by management in making computations as required by existing accounting standards that determine whether the lease is classified as an operating lease or a capital lease. All of the Company's aircraft leases have been classified as operating leases, which results in rental payments being charged to expense over the terms of the related leases. Additionally, operating leases are not reflected in the Company's consolidated balance sheet and accordingly, neither a lease asset nor an obligation for future lease payments is reflected in the Company's consolidated balance sheet.

Table of Contents***Accrued Health Care Costs***

We are currently self-insured up to a cap for health care costs and as such, a reserve for the cost of claims that have not been paid as of the balance sheet date is estimated. Our estimate of this reserve is based upon historical claim experience and upon the recommendations of our health care provider. At September 30, 2005 and 2004, we accrued \$2.6 million and \$2.2 million, respectively, for the cost of future health care claims. If the ultimate development of these claims is significantly different than those that have been estimated, the accrual for future health care claims could be materially overstated or understated.

Accrued Worker's Compensation Costs

Beginning in fiscal 2005, we implemented a new worker's compensation program. Under the program, we are self-insured up to a cap for worker's compensation claims and as such, a reserve for the cost of claims that have not been paid as of the balance sheet date is estimated. Our estimate of this reserve is based upon historical claim experience and upon the recommendations of our third-party administrator. At September 30, 2005, we accrued \$1.6 million for the cost of worker's compensation claims. If the ultimate development of these claims is significantly different than those that have been estimated, the accrual for future worker's compensation claims could be materially overstated or understated.

Long-lived Assets, Aircraft and Parts Held for Sale

Property and equipment are stated at cost and depreciated over their estimated useful lives to their estimated salvage values using the straight-line method. Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amount may be impaired. Under the provisions of Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, the Company records an impairment loss if the undiscounted future cash flows are found to be less than the carrying amount of the asset. If an impairment loss has occurred, a charge is recorded to reduce the carrying amount of the asset to fair value. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

Valuation of Deferred Tax Assets

The Company records deferred tax assets for the value of benefits expected to be realized from the utilization of alternative minimum tax credit carryforwards and state and federal net operating loss carryforwards. We periodically review these assets for realizability based upon expected taxable income in the applicable taxing jurisdictions. To the extent we believe some portion of the benefit may not be realizable, an estimate of the unrealized portion is made and an allowance is recorded. At September 30, 2005, we had a valuation allowance for certain state net operating loss carryforwards because we believe we will not be able to generate sufficient taxable income in these jurisdictions in the future to realize the benefits of these recorded deferred tax assets. We believe the Company will generate sufficient taxable income in the future to realize the benefits of its other deferred tax assets. This belief is based upon the Company having had pretax income in fiscal 2005, 2004 and 2003 and we have taken steps to minimize the financial impact of its unprofitable subsidiaries. Realization of these deferred tax assets is dependent upon generating sufficient taxable income prior to expiration of any net operating loss carryforwards. Although realization is not assured, management believes it is more likely than not that the remaining, recorded deferred tax assets will be realized. If the ultimate realization of these deferred tax assets is significantly different from our expectations, the value of its deferred tax assets could be materially overstated.

Recent Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123R, Share-Based Payment, requiring all share-based payments to employees, including grants of employee stock options, to be recognized as compensation expense in the consolidated financial statements based on their fair values. This standard is effective for fiscal years beginning after June 15, 2005. The Company intends to adopt FAS 123(R) beginning in its first quarter of fiscal 2006, which ends December 31, 2005, and intends to utilize the modified prospective transition method. Under the modified prospective transition method, option awards granted, modified, or settled after the date of adoption are required to be measured and accounted for in accordance with SFAS 123R. Unvested equity-classified awards that were granted prior to the effective date will continue to be accounted for in accordance with SFAS 123, and compensation amounts for awards that vest will now be recognized in the income statement as an expense.

Adoption of the pronouncement is estimated to have a \$0.5 million impact on after-tax earnings in fiscal 2006.

Table of Contents

Item 7A *Quantitative and Qualitative Disclosures About Market Risk*

We have exposure to market risk associated with changes in interest rates related primarily to our debt obligations and short-term marketable investment portfolio. Certain of our debt obligations are variable in rate and therefore have exposure to changes in interest rates. A 10% change in interest rates would result in an approximately \$0.4 million impact on interest expense. We also have investments in debt securities. If short-term interest rates were to average 10% more than they did in fiscal year 2005 interest income would be impacted by approximately \$0.9 million.

We have exposure to certain market risks associated with our aircraft fuel. Aviation fuel expense is a significant expense for any air carrier and even marginal changes in the cost of fuel greatly impact a carrier's profitability. Standard industry contracts do not generally provide protection against fuel price increases, nor do they insure availability of supply. However, the America West, United and US Airways revenue-guarantee code-share agreements allow fuel costs to be reimbursed by the code-share partner, thereby reducing our overall exposure to fuel price fluctuations. In fiscal 2005, approximately 95% of our fuel requirements were associated with these contracts. Each one cent change in the price of jet fuel amounts to a \$0.1 million change in annual fuel costs for that portion of fuel expense that is not reimbursed by our code-share partners.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Mesa Air Group, Inc.
Phoenix, Arizona

We have audited the accompanying consolidated balance sheets of Mesa Air Group, Inc. and subsidiaries (the Company) as of September 30, 2005 and 2004, and the related consolidated statements of income, stockholders equity, and cash flows for each of the three years in the period ended September 30, 2005. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Mesa Air Group, Inc. and subsidiaries at September 30, 2005 and 2004, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2005, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2, substantially all of the Company s passenger revenue is derived from code-share agreements with United Airlines (United), America West Airlines, Inc. (America West), and US Airways, Inc (US Airways). UAL Corp., the parent company of United, has not emerged from reorganization under Chapter 11 of the U.S. Bankruptcy Code. Additionally, US Airways filed for bankruptcy protection and in September 2005 the bankruptcy court entered an order confirming US Airways plan of reorganization, which includes the merger between US Airways and America West. As a result of US Airways emergence from bankruptcy and their non-assumption of the Company s code-share agreement, the Company expanded its regional jet code-share agreement with United and entered into a new code-share agreement with Delta Air Lines (Delta). In September 2005, Delta also filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code. Delta has not yet assumed the Company s code-share agreement in its bankruptcy proceeding.

As discussed in Note 22, the accompanying consolidated statement of cash flows for the year ended September 30, 2005 has been restated.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company s internal control over financial reporting as of September 30, 2005, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 14, 2005 (August 4, 2006 as to the effect of the material weakness described in Management s Report on Internal Controls Over Financial Reporting (as revised)) expressed an unqualified opinion on management s assessment of the effectiveness of the Company s internal control over financial reporting and an adverse opinion on the effectiveness of the Company s internal control over financial reporting.

/s/ DELOITTE & TOUCHE LLP

Phoenix, Arizona

December 14, 2005

(August 4, 2006 as to the effects of the restatement discussed in Note 22)

MESA AIR GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years ended September 30, 2005, 2004 and 2003

1. Summary of Significant Accounting Policies***Principles of Consolidation and Organization***

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and include the accounts of Mesa Air Group, Inc. and its wholly-owned operating subsidiaries (collectively Mesa or the Company): Mesa Airlines, Inc. (Mesa Airlines), a Nevada corporation and certificated air carrier; Freedom Airlines, Inc. (Freedom), a Nevada corporation and certificated air carrier; Air Midwest, Inc. (Air Midwest), a Kansas corporation and certificated air carrier; CCAir, Inc. (CCAir), a Delaware corporation and certificated air carrier; MPD, Inc., a Nevada corporation, doing business as Mesa Pilot Development; Regional Aircraft Services, Inc. (RAS) a Pennsylvania company; Mesa Air Group Airline Inventory Management, LLC (MAG-AIM), an Arizona Limited Liability Company; Ritz Hotel Management Corp., a Nevada Corporation; UFLY, LLC. (UFLY), a Delaware Limited Liability Company; and MAGI Insurance, Ltd. (MAGI), a Barbados, West Indies based captive insurance company. MPD, Inc. provides pilot training in coordination with a community college in Farmington, New Mexico and with Arizona State University in Tempe, Arizona. RAS performs aircraft component repair and overhaul services. UFLY was established in fiscal 2002 to make strategic investments in US Airways common stock. MAGI is a captive insurance company established for the purpose of obtaining more favorable aircraft liability insurance rates. CCAir ceased operations and was dissolved in fiscal 2003. UFLY distributed its assets and was subsequently dissolved in fiscal 2003. All significant intercompany accounts and transactions have been eliminated in consolidation.

The Company is an independent regional airline serving 176 cities in 43 states, the District of Columbia, Canada and Mexico. At September 30, 2005, the Company operated a fleet of 182 aircraft and had over 1,100 daily departures. The Company's airline operations are conducted by three regional airline subsidiaries primarily utilizing hub-and-spoke systems. Mesa Airlines operates as America West Express under a code-share agreement with America West Airlines, Inc. (America West), as United Express under a code-share relationship with United Airlines (United) and as US Airways Express under a code-share agreement with US Airways, Inc. (US Airways). On October 1, 2005, Freedom commenced flight operations as Delta Connection under a code-share agreement with Delta Air Lines (Delta). Air Midwest operates under code-share agreements with America West, US Airways and Midwest Airlines. Air Midwest also operates an independent division, doing business as Mesa Airlines, from Albuquerque, New Mexico and select Essential Air Service markets. Prior to ceasing operations, CCAir operated under a code-share agreement with US Airways as US Airways Express. Approximately 99% of the Company's consolidated passenger revenues for 2005 were derived from operations associated with code-share agreements.

The financial arrangement between Mesa and its code-share partners involve either a revenue-guarantee or pro-rate arrangement. Under a revenue-guarantee arrangement, the major airline generally pays a monthly guaranteed amount. The America West jet and Dash-8 code-share agreement, the United code-share agreement and the US Airways regional jet agreement are revenue-guarantee flying agreements. Under the terms of these flying agreements, the major carrier controls marketing, scheduling, ticketing, pricing and seat inventories. The Company receives a guaranteed payment based upon a fixed minimum monthly amount plus amounts related to departures and block hours flown plus direct reimbursement for expenses such as fuel, landing fees and insurance. Among other advantages, revenue-guarantee arrangements reduce the Company's exposure to fluctuations in passenger traffic and fare levels, as well as fuel prices. The America West B1900 agreement, Midwest Airlines agreement and US Airways turboprop agreement are pro-rate agreements, for which the Company receives an allocated portion of the passengers' fare and pays all of the costs of transporting the passenger.

In addition to carrying passengers, the Company carries freight and express packages on its passenger flights and has interline small cargo freight agreements with many other carriers. Mesa also has contracts with the U.S. Postal Service for carriage of mail to the cities it serves and occasionally operates charter flights when its aircraft are not otherwise used for scheduled service.

Renewal of one code-share agreement with a code-share partner does not guarantee the renewal of any other code-share agreement with the same code-share partner. The agreements with America West expire in 2012; the revenue-guarantee agreements with Delta expire in January 2017 and January 2018; the pro-rate agreement with US Airways expires in October 2006; the agreement with United expires between 2011 and 2018; and the agreement with Midwest Airlines expires in 2006. Although the provisions of the code-share agreements vary from contract to contract, generally each agreement is subject to cancellation should the Company's subsidiaries fail to meet certain operating performance standards, and breach other contractual terms and conditions.

Table of Contents***Cash and Cash Equivalents***

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Restricted Cash

At September 30, 2005, the Company has \$8.8 million in restricted cash on deposit with two financial institutions. In September 2004, we entered into an agreement with a financial institution for a \$9.0 million letter of credit facility and to issue letters of credit for landing fees, workers compensation insurance and other business needs. Pursuant to the agreement, \$3.8 million of outstanding letters of credit are required to be collateralized by amounts on deposit. The Company also must maintain \$5.0 million on deposit with another financial institution to collateralize its direct deposit payroll. The change in restricted cash of \$9.5 million was reclassified on the fiscal 2004 statement of cash flows from operating activities to investing activities.

Expendable Parts and Supplies

Expendable parts and supplies are stated at the lower of cost using the first-in, first-out method or market, and are charged to expense as they are used. The Company provides for an allowance for obsolescence over the useful life of its aircraft after considering the useful life of each aircraft fleet, the estimated cost of expendable parts expected to be on hand at the end of the useful life and the estimated salvage value of the parts. The Company reviews the adequacy of this allowance on a quarterly basis.

Property and Equipment

Property and equipment are stated at cost and depreciated over their estimated useful lives to their estimated salvage values, which are estimated to be 20% for flight equipment, using the straight line method.

Estimated useful lives of the various classifications of property and equipment are as follows:

Buildings	30 years
Flight equipment	7-20 years
Equipment	5-12 years
Furniture and fixtures	3-5 years
Vehicles	5 years
Rotable inventory	Life of the aircraft or term of the lease, whichever is less
Leasehold improvements	Life of asset or term of lease, which ever is less

Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amount may be impaired. Under the provisions of Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, the Company records an impairment loss if the undiscounted future cash flows are found to be less than the carrying amount of the asset. If an impairment loss has occurred, a charge is recorded to reduce the carrying amount of the asset to fair value. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

The Company currently flies B1900 aircraft in Essential Air Service markets (EAS). If the funding under this program is terminated for any of the cities served by us, in all likelihood we would not continue to fly in these markets, and as a result, we would be forced to find alternative uses for the Beechcraft 1900D 19-seat turboprop aircraft affected.

Interest related to deposits on aircraft purchase contracts is capitalized as part of the aircraft. The Company capitalized approximately \$0.9 million, \$1.0 million and \$0.8 million of interest in fiscal 2005, 2004 and 2003, respectively.

Other Long-Term Assets

Other long-term assets primarily consist of the capitalized costs associated with establishing financing for aircraft, contract incentive payments, prepaid maintenance, a note receivable received pursuant to the rotatable spare parts financing and debt issuance costs associated with the senior convertible notes. The financing costs are amortized over the lives of the associated aircraft leases which are primarily 16-18.5 years. Contract incentive payments are amortized over the term or the modified term of the code share

Table of Contents

agreements. Prepaid maintenance is amortized over the six-year term of the related maintenance contract based upon the hours flown by the related aircraft. The debt issuance costs are amortized over the 20 year life of the senior convertible notes.

Air Traffic Liability

Air traffic liability represents the cost of tickets sold but not yet used. The Company records the revenue associated with these tickets in the period the passenger flies.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in future years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company and its subsidiaries file a consolidated federal income tax return.

Notes Payable for Aircraft on Interim Financing

Aircraft under interim financing are recorded as a purchase with interim debt financing provided by the manufacturer. As such, the Company reflects the aircraft in property and equipment and the debt financing in short-term debt on its balance sheet during the interim financing period. Upon permanent financing, the proceeds from the sale and leaseback transaction are used to retire the notes payable to the manufacturer. Any gain recognized on the sale and leaseback transaction is deferred and amortized over the life of the lease.

Deferred Credits

Deferred credits consist of aircraft purchase incentives provided by the aircraft manufacturers and deferred gains on the sale and leaseback of interim financed aircraft. Purchase incentives include credits that may be used to purchase spare parts, pay for training expenses or reduce other aircraft operating costs. The deferred credits and gains are amortized on a straight-line basis as a reduction of lease expense over the term of the respective leases.

Revenue Recognition

The America West, United and the US Airways regional jet code-share agreements are revenue-guarantee flying agreements. Under a revenue-guarantee arrangement, the major airline generally pays a fixed monthly minimum amount, plus certain additional amounts based upon the number of flights and block hours flown. The contracts also include reimbursement of certain costs incurred by Mesa in performing flight services. These costs, known as pass-through costs, may include aircraft ownership cost, passenger and hull insurance, aircraft property taxes as well as, fuel, landing fees and catering. The Company records reimbursement of pass-through costs as revenue. In addition, the Company's code-share partners also provide, at no cost to Mesa, certain ground handling and customer service functions, as well as airport-related facilities and gates at their hubs and other cities. Pass-through costs provided by code-share partners are presented net in the Company's financial statements, hence no amounts are recorded for revenue or expense for these items. The contracts also include a profit component that may be determined based on a percentage of profits on the Mesa flown flights, a profit margin on certain reimbursable costs as well as a profit margin based on certain operational benchmarks. The Company recognizes revenue under its revenue-guarantee agreements when the transportation is provided. The majority of the revenue under these contracts is known at the end of the accounting period and is booked as actual. The Company performs an estimate of the profit component based upon the information available at the end of the accounting period. All revenue recognized under these contracts is presented at the gross amount billed.

In connection with providing service under the Company's revenue-guarantee agreement with US Airways, the Company's fuel reimbursement is capped at \$0.85 per gallon. Under this agreement, the Company has the option to purchase fuel from a subsidiary of US Airways at the capped rate. As a result, amounts included in revenue for fuel reimbursement and expense for fuel cost may not represent market rates for fuel for the Company's US Airways flying. The Company purchased 67.4 million gallons, 68.1 million gallons and 55.3 million gallons of fuel under this arrangement in fiscal 2005, 2004 and 2003, respectively.

Table of Contents

Under the Company's revenue-guarantee agreements with America West, US Airway and United, the Company is reimbursed under a fixed rate per block-hour plus an amount per aircraft designed to reimburse the Company for certain aircraft ownership costs. In accordance with Emerging Issues Task Force Issue No. 01-08, "Determining Whether an Arrangement Contains a Lease," the Company has concluded that a component of its revenue under the agreements discussed above is rental income, inasmuch as the agreement identifies the right of use of a specific type and number of aircraft over a stated period of time. The amount deemed to be rental income during fiscal 2005 and 2004 was \$235.5 million and \$189.0 million, respectively, and has been included in passenger revenue on the Company's consolidated statements of income.

The America West, US Airways, and Midwest Airlines turboprop code-share agreements are pro-rate agreements. Under a pro-rate agreement, the Company receives a percentage of the passenger's fare based on a standard industry formula that allocates revenue based on the percentage of transportation provided. Revenue from the Company's pro-rate agreements and the Company's independent operation is recognized when transportation is provided. Tickets sold but not yet used are included in air traffic liability on the consolidated balance sheets.

The Company also receives subsidies for providing scheduled air service to certain small or rural communities. Such revenue is recognized in the period in which the air service is provided. The amount of the subsidy payments is determined by the United States Department of Transportation on the basis of its evaluation of the amount of revenue needed to meet operating expenses and to provide a reasonable return on investment with respect to eligible routes. EAS rates are normally set for two-year contract periods for each city.

Maintenance Expense

The Company charges the cost of engine and aircraft maintenance to expense as incurred.

Minority Interest

In 2001, the Company entered into an agreement to form UFLY for the purpose of making strategic investments in US Airways, Inc. In 2002, UFLY was capitalized with \$5.0 million from the Company and \$5.0 million from other members, which included Jonathan Ornstein, the Company's Chairman and Chief Executive Officer. UFLY distributed its assets and was subsequently dissolved in fiscal 2003. The Company owned greater than 50% of UFLY in 2003 and therefore the financial results of UFLY are included in the consolidated financial results of the Company. Amounts included in the consolidated statements of operations as minority interest reflect the after-tax portion of earnings of UFLY that are applicable to the minority interest partners.

Earnings Per Share

The Company accounts for earnings per share in accordance with SFAS No. 128, "Earnings per Share." Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the periods presented. Diluted net income per share reflects the potential dilution that could occur if outstanding stock options and warrants were exercised. In addition, dilutive convertible securities are included in the denominator while interest on convertible debt, net of tax, is added back to the numerator. A reconciliation of the numerator and denominator used in computing income per share is as follows:

	Years Ended September 30,		
	2005	2004	2003
	(In thousands)		
Share calculation:			
Weighted average shares outstanding - basic	29,215	31,490	31,556
Effect of dilutive outstanding stock options and warrants	127	1,139	507
Effect of restricted stock	286	214	
Effect of dilutive outstanding convertible debt due 2023	16,931	14,410	2,935
Weighted average shares outstanding - diluted	46,559	47,253	34,998
Adjustments to net income:			
Net income	\$ 56,867	\$ 26,282	\$ 25,305

Edgar Filing: MESA AIR GROUP INC - Form 10-K/A

Interest expense on convertible debt, net of tax	6,097	5,027	1,144
Adjusted net income	\$ 62,964	\$ 31,309	\$ 26,449

In September 2004, the Emerging Issues Task Force (EITF) reached a consensus on EITF Issue No. 04-08, The Effect of Contingently Convertible Debt on Diluted Earnings per Share. EITF Issue No. 04-08 requires shares of common stock issuable upon

Table of Contents

conversion of contingently convertible debt instruments to be included in the calculation of diluted earnings per share whether or not the contingent conditions for conversion have been met, unless the inclusion of these shares is anti-dilutive. Previously, shares of common stock issuable upon conversion of contingently convertible debt securities were excluded from the calculation of diluted earnings per share if the contingency had not been met. The Company previously included its convertible notes due 2003 in the EPS calculation. The Company adopted the provisions of EITF Issue No. 04-08 in the first quarter of fiscal 2005, and as such, has now also included the 3.625% senior convertible notes due 2024 in the calculation of diluted earnings per share. EITF Issue No. 04-08 required the restatement of prior period diluted earnings per share amounts. The 3.625% senior convertible notes due 2024 were issued in February 2004, thus the reported diluted earnings per share for the year ended September 30, 2004 have been restated to include the dilutive impact of the 3.625% senior convertible notes.

Stock Options

The Company accounts for its stock-based compensation arrangements in accordance with the provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. The Company has adopted only the disclosure requirements of SFAS No. 123, Accounting for Stock-Based Compensation, as amended, which permits pro-forma net earnings and pro-forma earnings per share disclosures for employee stock option grants made in fiscal 1996 and future years as if the fair value based measurement method defined in SFAS No. 123 had been applied. Warrants issued to non-employees are also accounted for under SFAS No. 123, at fair value on the measurement date.

Had the compensation cost for the Company's stock-based compensation plans been determined consistent with the measurement provisions of SFAS No. 123, the Company's net income and net income per share would have been as indicated by the pro forma amounts below:

	2005	2004	2003
	(In thousands, except per share amounts)		
Net income as reported	\$ 56,867	\$ 26,282	\$ 25,305
Stock option compensation expense determined under fair value based method, net of related tax effects	(968)	(1,324)	(2,082)
Pro forma	\$ 55,899	\$ 24,958	\$ 23,223

Pro forma	\$ 1.33	\$ 0.63	\$ 0.70

The per share weighted-average fair value of stock options granted during 2005, 2004 and 2003 was \$4.16, \$6.77 and \$3.29, respectively, on the grant date as determined by using the Black-Scholes option pricing model with the following weighted average assumptions: an expected dividend yield 0.0%, an expected life of 6.1 years, a risk-free interest rate of 4.2%, 4.1% and 4.3%, and volatility of 62.4%, 79.8% and 80.5% in 2005, 2004 and 2003, respectively.

Use of Estimates in the Preparation of Financial Statements

The preparation of the Company's consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and

liabilities at the date of the financial statements. Actual results could differ from those estimates.

Segment Reporting

SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, requires disclosures related to components of a company for which separate financial information is available that is evaluated regularly by a company's chief operating decision maker in deciding the allocation of resources and assessing performance. The Company has three airline operating subsidiaries, Mesa Airlines, Freedom Airlines and Air Midwest and various other subsidiaries organized to provide support for the Company's airline operations. The Company has aggregated these operating segments into three reportable segments; Mesa Airlines, Air Midwest/Freedom and Other. Mesa Airlines operates all of the Company's regional jets and Dash-8 aircraft pursuant to revenue-

Table of Contents

guarantee code-share agreements. Air Midwest and Freedom primarily operate the Company's Beech 1900D turboprop aircraft pursuant to pro-rate code-share agreements. The Other reportable segment includes Mesa Air Group, RAS, MPD, MAG-AIM and MAGI, all of which support Mesa's operating subsidiaries.

Recent Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123R, Share-Based Payment, requiring all share-based payments to employees, including grants of employee stock options, to be recognized as compensation expense in the consolidated financial statements based on their fair values. This standard is effective for fiscal years beginning after June 15, 2005. The Company intends to adopt SFAS 123(R) beginning in its first quarter of fiscal 2006, which ends December 31, 2005, and intends to utilize the modified prospective transition method. Under the modified prospective transition method, option awards granted, modified, or settled after the date of adoption are required to be measured and accounted for in accordance with SFAS 123R. Unvested equity-classified awards that were granted prior to the effective date will continue to be accounted for in accordance with SFAS 123, and compensation amounts for awards that vest will be recognized in the income statement as expense. Adoption of the pronouncement is estimated to have a \$0.5 million impact on after-tax earnings in fiscal 2006.

Reclassifications

Certain reclassifications were made to the 2004 and 2003 financial statements to conform to the 2005 presentation.

2. Concentrations

The Company has code-share agreements with America West, US Airways and United Airlines. Approximately 99%, 99% and 98% of the Company's consolidated passenger revenue for the years ended September 30, 2005, 2004 and 2003, respectively, were derived from these agreements. Accounts receivable from the Company's code-share partners were 35% and 59% of total gross accounts receivable at September 30, 2005 and 2004, respectively.

Passenger revenue received from America West amounted to 44%, 38% and 44% of the Company's total passenger revenue in fiscal 2005, 2004 and 2003, respectively. A termination of the America West revenue-guarantee code-share agreements would have a material adverse effect on the Company's business prospects, financial condition, results of operations and cash flows.

US Airways, which accounted for approximately 29%, 40% and 38% of the Company's passenger revenue in fiscal 2005, 2004 and 2003, respectively, filed for Chapter 11 bankruptcy protection on September 12, 2004. As of September 30, 2005, we operated 59 50-seat regional jet aircraft for US Airways under a revenue-guarantee code-sharing agreement. As a result of US Airways' emergence from bankruptcy and their non-assumption of our revenue-guarantee code-share agreement, the Company expanded its regional jet revenue-guarantee code-share agreement with United and entered into a new revenue-guarantee code-share agreement with Delta and the Company is currently working to transition the jets flown under the US Airways code-share agreement to the United and Delta arrangements. As of December 1, 2005, the Company had transitioned 32 of the 59 aircraft and operated 27 50-seat regional jets for US Airways under our code-sharing agreement. The Company expects to complete the transition of aircraft from US Airways to United in the first quarter of fiscal year 2006 and to Delta in the second quarter of fiscal year 2006. In addition, on September 14, 2005, Delta Air Lines filed for reorganization under Chapter 11 of the US Bankruptcy Code. Delta has not yet assumed the code-share agreement with the Company in its bankruptcy proceeding and could choose to terminate this agreement or seek to renegotiate the agreement on less favorable terms.

United Airlines, a subsidiary of UAL Corp., accounted for approximately 24%, 20% and 1% of the Company's passenger revenue in fiscal 2005, 2004 and 2003, respectively. A termination of the United agreement or the failure of United to successfully emerge from bankruptcy would have a material adverse effect on the Company's business prospects, financial condition, results of operations and cash flows.

3. Marketable Securities

The Company has a cash management program which provides for the investment of excess cash balances primarily in short-term money market instruments, US treasury securities, intermediate-term debt instruments, and common equity securities of companies operating in the airline industry.

Table of Contents

SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, requires that all applicable investments be classified as trading securities, available for sale securities or held-to-maturity securities. The Company currently has \$128.2 million in marketable securities that include US Treasury notes, government bonds, corporate bonds and auction rate securities (ARS). These investments are classified as trading securities during the periods presented and accordingly, are carried at market value with changes in value reflected in the current period operations. Unrealized losses relating to trading securities held at September 30, 2005 and 2004, were \$0.5 million and \$1.7 million, respectively.

The Company has determined that investments in auction rate securities should be classified as short-term investments. Previously, such investments had been classified as cash and cash equivalents. ARS generally have long-term maturities; however, these investments have characteristics similar to short-term investments because at predetermined intervals, generally every 28 days, there is a new auction process. As such, the Company classifies ARS as short-term investments. The balance of marketable securities at September 30, 2005 and 2004 includes investments in ARS of \$46.7 million and \$47.8 million, respectively. The Company reclassified ARS of \$47.8 million as of September 30, 2004 that were previously included in cash and cash equivalents to short-term investments and included this amount in net purchases of investment securities in the consolidated statement of cash flows for fiscal 2004.

4. Property and Equipment

Property and equipment consists of the following:

	September 30,	
	2005	2004
	(In thousands)	
Flight equipment, substantially pledged	\$ 705,453	\$ 731,859
Other equipment	25,960	24,775
Leasehold improvements	2,883	2,620
Furniture and fixtures	1,117	1,087
Buildings	3,968	3,968
Vehicles	1,139	1,045
	740,520	765,354
Less accumulated depreciation and amortization	(97,606)	(67,929)
Net property and equipment	\$ 642,914	\$ 697,425

5. Short-Term Debt

At September 30, 2005 and 2004, the Company had \$54.6 million and \$231.0 million, respectively, in notes payable to an aircraft manufacturer for aircraft on interim financing. Under interim financing arrangements, the Company takes delivery and title to the aircraft prior to securing permanent financing and the acquisition of the aircraft is accounted for as a purchase with debt financing. Accordingly, the Company reflects the aircraft and debt under interim financing on its balance sheet during the interim financing period. After taking delivery of the aircraft, it is the Company's intention to permanently finance the aircraft as an operate lease through a sale and leaseback transaction with an independent third-party lessor. Upon permanent financing, the proceeds are used to retire the notes payable to the manufacturer. Any gain recognized on the sale and leaseback transaction is deferred and amortized over the life of the lease. The Company had two aircraft on interim financing with the manufacturer at September 30, 2005. These interim financings agreements are six months in length and provide for monthly interest only payments at LIBOR plus three percent. The current interim financing agreement with the manufacturer provides for the Company to have a maximum of 15 aircraft on interim financing at a given time.

6. Deposit on Pending Sale of Rotable Spare Parts

In August 2005, the Company entered into a ten-year agreement with AAR Corp. (the AAR Agreement), for the management and repair of certain of the Company s CRJ-200, -700, -900 and ERJ-145 aircraft rotatable spare parts inventory. Under the agreement, AAR will purchase certain existing spare parts inventory for \$39.5 million in cash and \$21.5 million in notes receivable to be paid over the next four years. Under the agreement, the Company is required to pay AAR a monthly fee based upon flight hours for access to and maintenance of the inventory. The agreement also contains certain minimum monthly payments that Mesa must make to AAR. At termination, the Company may elect to purchase the covered inventory at fair value, but is not contractually obligated to do so. The AAR agreement is contingent upon the Company terminating an agreement for the Company s CRJ-200 aircraft rotatable spare parts

Table of Contents

inventory with GE Capital Aviation Services (GECAS), and including these rotables in the arrangement. The amount included in the consolidated balance sheet at September 30, 2005, represents deposits received from AAR pending the termination of the GECAS agreement. The Company notified GECAS of its intent to cancel that agreement in August and terminated the agreement in November 2005 (see note 8).

7. Deferred Credits

The Company accounts for purchase incentives provided by aircraft manufacturers as deferred credits. These credits are amortized over the life of the related lease as a reduction of lease expense, which is included in flight operations in the statements of operations. Purchase incentives include credits that may be used to purchase spare parts, pay for training expenses or reduce other aircraft operating costs. Deferred credits also include deferred gains on the sale and leaseback of interim financed aircraft. These deferred gains are also amortized over the life of the related leases as a reduction of lease expense, which is included in flight operations in the statements of operations.

8. Rotable Spare Parts Financing Liability

In June 2004, the Company entered into an agreement with LogisTechs, Inc., a wholly-owned subsidiary of GECAS, whereby GECAS provided financing to the Company and the Company agreed to pay GECAS for the management and repair of certain of the Company's CRJ-200 aircraft rotatable spare parts inventory. Under the agreement, the Company received \$15 million in cash and a \$6 million promissory note receivable from GECAS. In August 2005, Mesa notified GECAS of its intent to terminate the agreement in order to enter into the AAR agreement, and as such, the Company is required to repay the 19.7 million of outstanding financing at September 30, 2005. The agreement was terminated and this amount was repaid in November 2005.

9. Long-Term Debt

In October 2004, the Company permanently financed five CRJ-900 aircraft with \$118.0 million in debt. The debt bears interest at the monthly LIBOR plus three percent and requires monthly principal and interest payments. These aircraft had originally been financed with interim debt financing from the manufacturer.

In December 2003, we assumed \$24.1 million of debt in connection with the purchase of two CRJ-200 aircraft in the Midway Chapter 7 bankruptcy proceedings. The debt, due in 2013, bears interest at the rate of 7% per annum through 2008, converting to 12.5% thereafter, with principal and interest due monthly.

In January and March 2004, the Company permanently financed five CRJ-700 and six CRJ-900 aircraft with \$254.7 million in debt. The debt bears interest at the monthly LIBOR plus three percent and requires monthly principal and interest payments.

In February 2004, the Company completed the private placement of senior convertible notes (the February 2004 Notes) due 2024, which resulted in gross proceeds of \$100.0 million (\$97.0 million net). Cash interest is payable on these notes at the rate of 2.115% per year on the aggregate amount due at maturity, payable semiannually in arrears on February 10 and August 10 of each year, beginning August 10, 2004, until February 10, 2009. After that date, the Company will not pay cash interest on these notes prior to maturity, and they will begin accruing original issue discount at a rate of 3.625% until maturity. On February 10, 2024, the maturity date of these notes, the principal amount of each note will be \$1,000. The aggregate amount due at maturity, including interest accrued from February 10, 2009, will be \$171.4 million. Each of the Company's wholly-owned domestic subsidiaries guarantees these notes on an unsecured senior basis. The February 2004 Notes and the note guarantees are senior unsecured obligations and rank equally with the Company's existing and future senior unsecured and unsubordinated indebtedness. These notes and the note guarantees are junior to any secured obligations of the Company and any of its wholly owned subsidiaries to the extent of the collateral pledged.

The February 2004 Notes are convertible into shares of the Company's common stock at a conversion rate of 40.3737 shares per \$1,000 in principal amount at maturity of the notes. This conversion rate is subject to adjustment in certain circumstances. Holders of these notes may convert their notes only if: (i) the sale price of the Company's common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive days ending on the last trading day of the preceding quarter; (ii) on or prior to February 10, 2019, the trading price for these notes falls below certain thresholds; (iii) these notes have been called for redemption; or (iv) specified corporate transactions occur. The Company may redeem these notes, in whole or in part, beginning on February 10, 2009, at a redemption price equal to the sum of the issue price, plus accrued original issue discount, plus any accrued and unpaid

cash interest. The holders of these notes may require the Company to repurchase the notes on February 10, 2009 at a price of \$583.40 per note plus accrued and unpaid cash interest, if any, on February 10, 2014 at a price of \$698.20 per note plus accrued and

Table of Contents

unpaid cash interest, if any, and on February 10, 2019 at a price of \$835.58 per note plus accrued and unpaid cash interest, if any. The Company has filed a shelf registration statement with the U.S. Securities and Exchange Commission covering the resale of the February 2004 Notes and the shares of common stock issuable upon conversion thereof. The Company plans to use the net proceeds from the sale of these notes for working capital and to fund its obligations with respect to regional jet deliveries.

In June 2003, the Company completed the private placement of senior convertible notes (the June 2003 Notes) due 2023, which resulted in gross proceeds of \$100.1 million (\$96.9 million net). Cash interest is payable on these notes at a rate of 2.4829% per year on the aggregate amount due at maturity, payable semiannually in arrears on June 16 and December 16 of each year, beginning December 16, 2003, until June 16, 2008. After that date, the Company will not pay cash interest on these notes prior to maturity, and the notes will begin accruing compounded interest at a rate of 6.25% until maturity. On June 16, 2023, the maturity date of these notes, the principal amount of each note will be \$1,000. The aggregate amount due at maturity, including interest accrued from June 16, 2008, will be \$252 million. The June 2004 Notes and the note guarantees are senior unsecured obligations and rank equally with the Company's existing and future senior unsecured indebtedness. These notes and the note guarantees are junior to any secured obligations of the Company and any of its wholly owned subsidiaries to the extent of the collateral pledged.

The June 2003 Notes are convertible into shares of the Company's common stock at a conversion rate of 39.727 shares per \$1,000 in principal amount at maturity of the notes. This conversion rate is subject to adjustment in certain circumstances. Holders of these notes may convert their notes only if: (i) the sale price of the Company's common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding quarter; (ii) prior to June 16, 2018, the trading price for these notes falls below certain thresholds; (iii) these notes have been called for redemption; or (iv) specified corporate transactions occur. The Company may redeem these notes, in whole or in part, beginning on June 16, 2008, at a redemption price equal to the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of these notes may require the Company to repurchase the notes on June 16, 2008 at a price of \$397.27 per note plus accrued and unpaid cash interest, if any, on June 16, 2013 at a price of \$540.41 per note plus accrued and unpaid cash interest, if any, and on June 16, 2018 at a price of \$735.13 per note plus accrued and unpaid cash interest, if any. As the sale price of our common stock exceeded 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading day period ending September 30, 2003, these notes became convertible September 30, 2003.

Repayment of the February 2004 and June 2003 Notes (collectively, the Notes) is jointly and severally guaranteed on an unconditional basis by the Company's wholly owned domestic subsidiaries. Except as otherwise specified in the indentures pursuant to which the Notes were issued, there are no restrictions on the ability of such subsidiaries to transfer funds to the Company in the form of cash dividends, loans or advances. General provisions of applicable state law, however, may limit the ability of any subsidiary to pay dividends or make distributions to the Company in certain circumstances.

Separate financial statements of the Company's subsidiaries are not included herein because the aggregate assets, liabilities, earnings, and equity of the subsidiaries are substantially equivalent to the assets, liabilities, earnings, and equity of the Company on a consolidated basis; the subsidiaries are jointly and severally liable for the repayment of the Notes; and the separate financial statements and other disclosures concerning the subsidiaries are not deemed by the Company to be material to investors.

Long-term debt consists of the following:

	September 30,	
	2005	2004
	(In thousands)	
Notes payable to bank, collateralized by the underlying aircraft, due 2019	\$ 348,452	\$ 248,135

Principal maturities of long-term debt for each of the next five years and thereafter are as follows:

	Years Ending September 30, (In thousands)
2006	\$ 27,787
2007	30,050
2008	29,536
2009	31,741
2010	42,087
Thereafter	503,168

10. Common Stock Purchase and Retirement

In December 1999, the Company's Board of Directors authorized the Company to purchase up to 10%, or approximately 3.4 million shares of the Company's then-outstanding common stock. In January 2001, October 2002, October 2004 and April 2005, the Board of Directors amended its original purchase plan and authorized the purchase of one million, two million, two million and one million additional shares of common stock, respectively. As of September 30, 2005, the Company has acquired and retired approximately 8.0 million shares of its outstanding common stock at an aggregate cost of approximately \$48.0 million, leaving approximately 1.4 million shares available for purchase under the current Board authorizations. Purchases are made at management's discretion based on market conditions and the Company's financial resources. Subsequent to year end, the Company's Board of Directors authorized the Company to purchase up to an additional 10 million shares of the Company's outstanding common stock.

11. Income Taxes

Income tax expense consists of the following:

	Years Ended September 30,		
	2005	2004	2003
	(In thousands)		
Current:			
Federal	\$ 1,720	\$	\$ 777
State	1,954	176	1,231
	3,674	176	2,008
Deferred:			
Federal	28,905	16,765	13,278
State	2,720	1,958	424
	31,625	18,723	13,702
	\$ 35,299	\$ 18,899	\$ 15,710

The difference between the actual income tax expense and the statutory tax expense (computed by applying the U.S. federal statutory income tax rate of 35 percent to income or loss before income taxes) is as follows:

	Years Ended September 30,		
	2005	2004	2003

		(In thousands)	
Computed expected tax expense	\$ 32,258	\$ 15,813	\$ 14,357
Increase (reduction) in income taxes resulting from:			
State taxes, net of federal taxes	3,029	2,134	966
Nondeductible compensation	6	987	
Other	(356)	45	387
Increase (decrease) in valuation allowance	362	(80)	
	\$ 35,299	\$ 18,899	\$ 15,710

Table of Contents

Elements of deferred income tax assets (liabilities) are as follows:

	September 30,	
	2005	2004
	(In thousands)	
Deferred tax assets:		
Net operating loss carryforwards	\$ 31,396	\$ 47,707
Deferred credits	26,549	15,271
Other accrued expenses	5,839	5,115
Deferred gains	2,992	3,133
Allowance for doubtful receivables	3,392	2,710
Alternative minimum tax	3,638	1,918
Unrealized trading (gains) losses	197	664
Expendable parts	822	567
Intangibles	374	474
Other	3,655	237
Valuation allowance	(362)	
Total deferred tax assets	\$ 78,492	\$ 77,796
Deferred tax liabilities:		
Property and equipment	\$ (92,289)	\$ (62,923)
Other	(3,631)	(676)
Total deferred tax liabilities	\$ (95,920)	\$ (63,599)

Deferred tax assets include benefits expected to be realized from the utilization of alternative minimum tax credit carryforwards of approximately \$3.6 million that do not expire and federal net operating loss carryforwards of approximately \$80.7 million that expire in years 2017 through 2024. The Company also has state net operating loss carryforwards of approximately \$78.4 million that expire in years 2006 through 2019. During 2005, the Company established a valuation allowance of \$0.4 million for certain state net operating loss carryforwards that are expected to expire unutilized in the future. Realization of the remaining deferred tax assets is dependent upon generating sufficient taxable income prior to expiration of any net operating loss carryforwards. Although realization is not assured, management believes it is more likely than not that the recorded deferred tax asset, net of the valuation allowance provided, will be realized.

12. Stockholders Equity

In March 2004, the Company granted 428,297 shares of restricted stock to the Company's Chief Executive Officer and the Company's President and Chief Operating Officer. The restricted stock shares vest in one-third increments over a three-year period beginning on April 1, 2004. The shares under the grant were issued in March 2005. To recognize the transaction, the Company recorded deferred compensation of \$3.5 million in stockholders' equity. The deferred compensation is amortized on a straight-line basis over the vesting period of the grants.

In February 2004, the Company completed the private placement of senior convertible notes due February 2024. At maturity, the principal amount of each note will be \$1,000 and the aggregate amount due will be \$171.4 million. These notes are convertible into shares of the Company's common stock at a conversion rate of 40.3737 shares per \$1,000 in principal amount at maturity of the notes, which equals an initial conversion price of approximately \$14.45 per share. This conversion rate is subject to adjustment in certain circumstances. Holders of these notes may convert their notes only if: (i) the sale price of the Company's common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive days ending on the last trading day of the preceding quarter; (ii) on or prior to February 10, 2019, the trading price for these notes falls below certain thresholds; (iii) these notes have been

called for redemption; or (iv) specified corporate transactions occur. The Company may redeem these notes, in whole or in part, beginning on February 10, 2009, at a redemption price equal to the sum of the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of these notes may require the Company to repurchase the notes on February 10, 2009 at a price of \$583.40 per note plus accrued and unpaid cash interest, if any, on February 10, 2014 at a price of \$698.20 per note plus accrued and unpaid cash interest, if any, and on February 10, 2019 at a price of \$835.58 per note plus accrued and unpaid cash interest, if any.

In June 2003, the Company completed the private placement of senior convertible notes due June 2023. At maturity, the principal amount of each note will be \$1,000 and the aggregate amount due will be \$252 million. These notes are convertible into shares of the Company's common stock at a conversion rate of 39.727 shares per \$1,000 in principal amount at maturity of the notes which equals an initial conversion price of approximately \$10.00 per share. This conversion rate is subject to adjustment in certain circumstances.

Table of Contents

Holders of these notes may convert their notes only if: (i) the sale price of our common stock exceeds 110% of the accreted conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding quarter; (ii) prior to June 16, 2018, the trading price for these notes falls below certain thresholds; (iii) these notes have been called for redemption; or (iv) specified corporate transactions occur. The Company may redeem these notes, in whole or in part, beginning on June 16, 2008, at a redemption price equal to the issue price, plus accrued original issue discount, plus any accrued and unpaid cash interest. The holders of these notes may require the Company to repurchase the notes on June 16, 2008 at a price of \$397.27 per note plus accrued and unpaid cash interest, if any, on June 16, 2013 at a price of \$540.41 per note plus accrued and unpaid cash interest, if any, and on June 16, 2018 at a price of \$735.13 per note plus accrued and unpaid cash interest, if any.

In February 2002, the Company entered into an agreement with Raytheon Aircraft Company (the Raytheon Agreement) to, among other things, reduce the operating costs of the Company's Beechcraft 1900D fleet. In connection with the Raytheon Agreement and subject to the terms and conditions contained therein, Raytheon agreed to provide up to \$5.5 million in annual operating subsidy payments to the Company contingent upon the Company remaining current on its payment obligations to Raytheon. Approximately \$5.3 million, \$5.3 million and \$6.0 million was recorded as a reduction to flight operations during 2005, 2004 and 2003, respectively. In return, the Company granted Raytheon a warrant to purchase up to 233,068 shares of our common stock at a per share exercise price of \$10. The Company recorded the issuance of the warrant at a value of \$0.4 million within stockholders' equity as a debit and credit to common stock. The contra equity value of the warrant was being amortized to expense over the vesting period of three years. Raytheon must pay a purchase price of \$1.50 per common share underlying the warrant. The warrant was exercisable at any time over a three-year period following its date of purchase. Raytheon is completely vested in the 233,068 shares of common stock underlying the warrant.. As of September 30, 2005, Raytheon has exercised its option to purchase all components of the warrant.

At September 30, 2005, the Company sponsored the following stock-based compensation plans:

In March 1993, and December 1994, the Company adopted stock option plans for outside directors. These plans originally provided for the grant of options to purchase up to 450,000 shares of the Company's common stock at fair value on the date of grant. At September 30, 2005, there were 52,000 options outstanding under this plan. There are no options available for grant under this plan.

In July 1998, the Company adopted a second stock option plan for outside directors. This plan, as amended, provides for the grant of options to purchase up to 275,000 shares of the Company's common stock at fair value on the date of the grant. On February 11, 2003 an additional 200,000 options were approved by the stockholders to be granted under this plan. At September 30, 2005, there were 235,739 options outstanding and 92,299 options available for future grants under this plan.

In April 1996, the Company adopted an employee stock option plan under the new management incentive program (the 1996 Stock Option Plan) that provides for the granting of options to purchase up to 2,800,000 shares of the Company's common stock at the fair value on the date of grant. On July 24, 1998, an additional 1,500,000 options were approved by the stockholders to be granted under this plan. At September 30, 2005, there were 2,140,308 options outstanding. No future grants will be made under this plan.

In June 1998, the Company adopted a Key Officer Stock Option Plan for compensating the Company's Chief Executive Officer and Chief Operating Officer, which provided for the grant of options to purchase up to 1,600,000 shares of the Company's common stock at the fair value on the date of grant. At September 30, 2005 there were 1,112,533 options outstanding. There are no options available for grant under this plan.

In June 1999, the Company adopted the 1999 Non-Qualified Stock Option Plan in connection with the CCAir merger. At September 30, 2005, there were 49,712 options outstanding and there are no options available for future grants under this plan.

In October 2001, the Company adopted a Key Officer Stock Option Plan for compensating the Company's Chief Executive Officer and Chief Operating Officer, which provided for the grant of options to purchase up to 2,000,000 shares of the Company's common stock at the fair value on the date of grant. At September 30, 2005 there were 1,000,000 options outstanding and 1,000,000 options available for future grants under this plan.

In February 2005, the Company's shareholders approved the adoption of the 2005 Employee Stock Incentive Plan. The plan provides for the grant of options to purchase up to 1,500,000 shares of common stock to officers and key employees. At September 30, 2005, there were 615,650 options outstanding and 1,256,892 options available for future grants under this plan, which includes 372,542 options authorized but not issued under the 1996 Option Plan.

Table of Contents

Generally, options granted to employees vest over a three-year period and options granted to directors vest immediately upon grant or six months following the grant.

Transactions involving stock options under these plans are summarized as follows:

	2005		2004		2003	
	Shares (000)	Weighted Average Exercise Price	Shares (000)	Weighted Average Exercise Price	Shares (000)	Weighted Average Exercise Price
Outstanding at beginning of year	4,572	\$ 7.05	4,376	\$ 6.73	3,843	\$ 7.10
Granted	947	6.58	430	9.89	1,019	4.96
Exercised	(166)	4.75	(110)	5.58	(270)	5.42
Canceled/Forfeited	(147)	8.07	(124)	6.95	(216)	6.51
Outstanding at end of year	5,206	\$ 6.99	4,572	\$ 7.20	4,376	\$ 6.73
Exercisable at end of year	3,765	\$ 7.04	3,161	\$ 7.13	2,485	\$ 7.47

At September 30, 2005, the range of exercise prices for the aforementioned options was \$2.31 to \$12.56.

The following table summarizes information concerning options outstanding at September 30, 2005:

Range of Exercise Prices	Stock Options Outstanding			Stock Options Exercisable	
	Number Outstanding	Weighted Average Remaining Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$1.73 - \$3.45	28,723	2.0 Years	\$ 2.44	26,256	\$ 2.37
\$3.46 - \$5.18	1,204,455	5.5 Years	4.57	959,357	4.50

Options at September 30, 2005	5,205,942	5.2 Years	6.99	3,764,922	7.04

13. Benefit Plans

The Company has a 401(k) plan covering the employees of Mesa Airlines, Freedom, Air Midwest and the airline support operations (the Mesa Plan). Under the Mesa Plan, employees may contribute up to 15 percent of their annual

compensation. Employer contributions are made at the discretion of the Board of Directors. During fiscal 2005, the Company made matching contributions of 25 percent of employee contributions up to 10 percent of annual employee compensation. Employees are eligible to participate in the plan upon completion of one year of service. The employee vests 20% per year in employer contributions. Employees become fully vested in employer contributions after completing six years of employment. The Company has the right to terminate the 401(k) plan at any time. Contributions by the Company to the Mesa Plan for the years ended September 30, 2005, 2004 and 2003 were approximately \$0.9 million, \$0.8 million and \$0.7 million, respectively.

14. Lease Commitments

At September 30, 2005, the Company leased 142 aircraft under non-cancelable operating leases with remaining terms of up to 18.5 years. The aircraft leases require the Company to pay all taxes, maintenance, insurance and other operating expenses. The Company has the option to terminate certain of the leases at various times throughout the lease. Aggregate rental expense under all operating leases totaled approximately \$194.7 million, \$183.5 million and \$130.2 million for the years ended September 30, 2005, 2004 and 2003, respectively.

Table of Contents

Future minimum lease payments under non-cancelable operating leases are as follows:

	Years Ending September 30, (In thousands)
2006	\$ 247,286
2007	229,636
2008	206,565
2009	186,690
2010	184,988
Thereafter	1,435,530

In January 2003, the FASB issued Interpretation No. 46, *Consolidation of Variable Interest Entities* (FIN 46), which requires the consolidation of variable interest entities. The majority of the Company's leased aircraft are owned and leased through trusts whose sole purpose is to purchase, finance and lease these aircraft to the Company; therefore, they meet the criteria of a variable interest entity. However, since these are single owner trusts in which the Company does not participate, the Company is not at risk for losses and is not considered the primary beneficiary. As a result, the Company is not required to consolidate any of these trusts or any other entities in applying FIN 46. Management believes that the Company's maximum exposure under these leases is the remaining lease payments.

Under the Company's leveraged lease agreements, the Company typically agree to indemnify the equity/owner participant against liabilities that may arise due to changes in benefits from tax ownership of the respective leased aircraft. The terms of these contracts range up to 18.5 years. The Company did not accrue any liability relating to the indemnification to the equity/owner participant because the probability of this occurring is remote.

As of September 30, 2005, we owned 35 Beechcraft 1900D aircraft and were operating 22 of these aircraft. During fiscal year 2005, the Company leased four of its Beechcraft 1900D aircraft to Gulfstream International Airlines, a regional turboprop air carrier based in Ft. Lauderdale, Florida for a term of five years. In January 2005, we entered into an agreement to lease ten of our Beechcraft 1900D aircraft to Big Sky Transportation Co. (Big Sky), a regional turboprop carrier based in Billings, Montana. As of September 30, 2005, we had leased nine aircraft to Big Sky and leased the tenth aircraft to Big Sky in the first quarter of fiscal 2006 for a term of five years.

15. Commitments and Contingencies

In May 2005, the Company amended its code-sharing arrangement with United to allow the Company to put up to an additional 30 50-seat regional jet aircraft into the United Express system. The first of these aircraft were put into service in October 2005. The agreement with respect to the additional 30 50-seat regional jet aircraft expires in April 2010. Additionally, the expiration dates under the existing code-share agreement with respect to certain aircraft were extended. The code-share agreement for (i) the ten Dash-8 aircraft terminates in July 2013, and United Airlines right to terminate earlier will not begin until April 2010, (ii) the 15 50-seat CRJ-200s now terminates in April 2010, (iii) the 15 70-seat regional jets (to be delivered upon the withdrawal of the 50-seat regional jets) terminates on the earlier of ten years from delivery date or October 2018 and (iv) the remaining 15 70-seat regional jets terminates in three tranches between December 2011 and December 2013. In connection with the amendment, the Company paid three \$10 million payments to United as follows: i) \$10 million was paid in June 2005, ii) \$10 million was paid in October 2005, and iii) \$10 million was paid in November 2005. Amounts paid are recorded as a deferred charge and included in other assets on the balance sheet. The deferred charge is being amortized over the term of the code-share agreement as a reduction of passenger revenue. Amortization of \$0.2 million was recorded in fiscal 2005.

In May 2005, the Company announced a code-share arrangement between the Company, Freedom, and Delta that provides for Freedom to become a Delta Connection partner. Under the terms of the agreement, Freedom commenced operations in October 2005 and will operate up to 30 50-seat regional jet aircraft on routes throughout Delta's network. The arrangement required Mesa to partially reimburse Delta's lease payments associated with Delta's 30 Dornier Fairchild 328 jets throughout the term of the agreement in exchange for performing flight services under the agreement; however, the requirement to reimburse Delta for certain lease costs was terminated when Delta filed for bankruptcy protection. The code-share arrangement will terminate with respect to each aircraft, on an

aircraft-by-aircraft basis, beginning in approximately twelve years. Delta may terminate the code-share agreement at any time, with or without cause, upon twelve months prior written notice following the sixth anniversary of the in-service date of the 30th aircraft added to the Delta Connection fleet. However, Delta has not yet assumed our code-share agreement in its bankruptcy proceedings and could choose to terminate this agreement at any time prior to its emergence from bankruptcy.

Table of Contents

As of September 30, 2005, the Company had firm orders with Bombardier Aerospace, Inc. for eight CRJ-900 aircraft (seven of which can be converted to CRJ-700s). In addition to the firm orders, Mesa has an option to acquire an additional 72 CRJ-700 and CRJ-900 regional jets that are exercisable through 2009 and 40 CRJ-700 and CRJ-900 regional jets that are exercisable in 2010 and beyond. In conjunction with this purchase agreement, Mesa had \$15.0 million on deposit with BRAD that was included in lease and equipment deposits at September 30, 2005. The remaining deposits are expected to be returned upon completion of permanent financing on each of the last five aircraft (\$3.0 million per aircraft).

The Company accrues for potential income tax contingencies when it is probable that a liability has been incurred and the amount of the contingency can be reasonably estimated. The Company's accrual for income tax contingencies is adjusted for changes in circumstances and additional uncertainties, such as amendments to existing tax law, both legislated and concluded through the various jurisdictions' tax court systems. At September 30, 2005, the Company had an accrual for income tax contingencies of approximately \$2.9 million. If the amounts ultimately settled are greater than the accrued contingencies, the Company would record additional income tax expense in the period in which the assessment is determined. To the extent amounts are ultimately settled for less than the accrued contingencies, or the Company determines that a liability is no longer probable, the liability is reversed as a reduction of income tax expense in the period the determination is made.

In August 2005, the Company entered into a ten-year agreement with AAR, for the management and repair of certain of the Company's CRJ-200, -700, -900 and ERJ-145 aircraft rotatable spare parts inventory. Under the agreement, the Company is required to pay AAR a monthly fee based upon flight hours for access to and maintenance of the inventory. The agreement also contains certain minimum monthly payments that Mesa must make to AAR. At termination, the Company may elect to purchase the covered inventory at fair value, but is not contractually obligated to do so. The agreement is contingent upon the Company terminating an agreement for the Company's CRJ-200 aircraft rotatable spare parts inventory with GECAS, and including these rotatables in the arrangement. The Company notified GECAS of its intent to cancel that agreement in August and terminated the agreement in November 2005.

Future minimum payments under the agreement are as follows:

	Years Ending September 30 (In thousands)
2006	\$ 19,129
2007	22,787
2008	26,158
2009	28,922
2010	31,969
Thereafter	172,295

The Company also has long-term contracts for the performance of engine maintenance on some of its aircraft. A description of each of these contracts is as follows:

In January 1997, the Company entered into a 10-year engine maintenance contract with General Electric Aircraft Engines (GE) for its CRJ-200 aircraft. The agreement was subsequently amended in the first quarter of fiscal 2003. The amended contract requires a monthly payment based upon the prior month's flight hours incurred by the covered engines. The hourly rate increases over time based upon the engine overhaul costs that are expected to be incurred in that year and is subject to escalation based on changes in certain price indices. Maintenance expense is recognized based upon the product of flight hours flown and the rate in effect for the period. The contract also provides for a fixed number of engine overhauls per year. To the extent that the number of actual overhauls is less than the fixed number, GE is required to issue to Mesa a credit for the number of events less than the fixed number multiplied by an agreed upon price. To the extent that the number of actual overhauls is greater than the fixed number, Mesa is required to pay GE for the number of events greater than the fixed number multiplied by the same agreed upon price. Any adjustments payments or credits are recognized in the period they occur.

In April 1997, the Company entered into a 10-year engine maintenance contract with Pratt & Whitney Canada Corp. (PWC) for its Dash 8-200 aircraft. The contract requires Mesa to pay PWC for the engine overhaul upon completion of the maintenance based upon a fixed dollar amount per flight hour. The rate under the contract is subject to escalation based on changes in certain price indices.

In April 2000, the Company entered into a 10-year engine maintenance contract with Rolls-Royce Allison (Rolls-Royce) for

Table of Contents

its ERJ aircraft. The contract requires Mesa to pay Rolls-Royce for the engine overhaul upon completion of the maintenance based upon a fixed dollar amount per flight hour. The rate per flight hour is based upon certain operational assumptions and may vary if the engines are operated differently than these assumptions. The rate is also subject to escalation based on changes in certain price indices. The agreement with Rolls-Royce also contains a termination clause and look back provision to provide for any shortfall between the cost of maintenance incurred by the provider and the amount paid up to the termination date by the Company and includes a 15% penalty on such amount. The Company does not anticipate an early termination under the contract.

In May 2002, the Company entered into a six-year fleet management program with PWC to provide maintenance for the Company's Beechcraft 1900D turboprop engines. The contract requires a monthly payment based upon flight hours incurred by the covered aircraft. The hourly rate is subject to annual adjustment based on changes in certain price indices and is guaranteed to increase by no less than 1.5% per year. Pursuant to the agreement, the Company sold certain assets of its Desert Turbine Services unit, as well as all spare PT6 engines to PWC for \$6.8 million, which approximated the net book value of the assets. Pursuant to the agreement, the Company provided a working capital loan to PWC for the same amount, which is to be repaid through a reduced hourly rate being charged for maintenance. The agreement covers all of the Company's Beechcraft 1900D turboprop aircraft and engines. The agreement also contains a termination clause and look back provision to provide for any shortfall between the cost of maintenance incurred by the provider and the amount paid up to the termination date by the Company and provides for return of a pro-rated share of the prepaid amount upon early termination. The Company does not anticipate an early termination under the contract.

The Company is also involved in various legal proceedings and FAA civil action proceedings that the Company does not believe will have a material adverse effect upon its business, financial condition or results of operations, although no assurance can be given to the ultimate outcome of any such proceedings.

16. Financial Instruments

The carrying amount of cash and cash equivalents, receivables, accounts payable, accrued compensation and other liabilities approximates fair value due to the short maturity periods of these instruments. The fair value of the Company's marketable securities is based on quoted market prices. The Company's variable rate long-term debt had a carrying value of approximately \$436.4 million at September 30, 2005, which approximates fair value because these borrowings have variable interest rate terms that approximate market interest rates for similar debt instruments. The Company's fixed rate long-term debt, having a carrying value of approximately \$228.0 million at September 30, 2005, had a fair value of approximately \$193.9 million. The Company uses a financial model to calculate the fair value of its senior convertible debt.

17. Impairment and Restructuring Charges (Credits)***Beechcraft 1900D Impairment and Restructuring Charges***

In fiscal 2003, the Company returned the three remaining B1900D aircraft permitted under its agreement with Raytheon, and as a result of additional costs required of meeting the return conditions of these and previous aircraft, the Company recorded an additional impairment charge of \$1.1 million.

In the fiscal 2004, the Company recognized an impairment and restructuring charge of \$12.4 million related to the planned early return of seven leased B1900D aircraft with lease expirations between December 2004 and September 2005. The Company negotiated the terms of the early return with the aircraft lessors and took a charge that included \$2.4 million for the present value of future lease payments, \$2.4 million for the negotiated settlement of return conditions, \$1.2 million for the cancellation of maintenance agreements, \$1.1 million for the difference between the buyout option of two aircraft and the proceeds from the subsequent sale of the aircraft, \$0.8 million to reduce maintenance deposits to net realizable value and \$4.5 million to reduce the value of rotatable and expendable inventory to fair value less costs to sell.

CCAir Impairment and Restructuring

In fiscal 2002, as a result of the inability of CCAir to reduce its operating costs and its continued history of operating losses, as well as receiving a notification by US Airways of their intent to cancel CCAir's pro-rate contract effective November 3, 2002, management at CCAir elected to cease operations on the effective date of US Airways' cancellation. As a result, the Company took an impairment and restructuring charge of \$19.8 million in fiscal 2002. At

the time of the shutdown, it was the Company's intention to maintain the legal entity of CCAir as well as its operating certificate with the possibility of either restructuring the airline and operating it under amended labor agreements in the future or affecting a sale of CCAir.

Table of Contents

In fiscal 2003, CCAir surrendered its operating certificate to the FAA and filed articles of dissolution with the State of Delaware. As a result of these events and CCAir's lack of liquidity, it became clear that CCAir would be unable to pay any of its obligations. In fiscal 2003, in light of CCAir's inability to pay its obligations and the resulting dissolution, the Company reversed approximately \$12 million of the restructuring charges recorded in fiscal 2002. The reversal of these charges was precipitated by the dissolution of CCAir and the Company's subsequent determination, after consultation with counsel, that the Company should not be held legally responsible for the obligations incurred solely by CCAir and not guaranteed by the Company. Including these charges and reversals, CCAir had after tax net income of \$8.3 million in fiscal 2003.

In fiscal 2004, the Company reversed approximately \$0.5 million of the restructuring charges recorded in fiscal 2002 as the recorded liabilities were no longer needed.

Shorts 360 Impairment

In fiscal 2002, the Company's sublease of two Shorts 360 aircraft the Company had been subleasing to an operator in Europe expired and the Company did not anticipate the lease to be renewed. As a result, the Company took a charge for \$3.6 million to accrue for the remaining lease payments and the future costs of returning these aircraft to the lessor.

In fiscal 2005, the Company entered into an agreement with the lessor for the early return of these two aircraft. The agreement included the elimination of the aircraft return conditions and called for a \$1.3 million payment. As a result, the Company reduced its reserve for the costs to return these aircraft to the agreed upon amount.

The changes in the impairment and restructuring charges for the three fiscal years ended September 30, 2005 are as follows:

Description of Charge	Reserve	Reversal	Non-		Reserve	Non-		Reserve		
	Oct. 1, 2002	of Provision	Cash Utilized	Cash Utilized	Sept. 30, 2003	(Provision) Reversal	Cash Utilized	Cash Utilized	Sept. 30, 2004

The reserve balance above is included in other accrued expenses on the accompanying consolidated balance sheets.

Table of Contents**18. Related Party Transactions**

In February 1999, the Company entered into an agreement with Barlow Capital, LLC (Barlow), whereby Barlow would provide financial advisory services related to aircraft leases, mergers and acquisitions, and certain other financing arrangements. Under this agreement, the Company paid fees totaling \$0.6 million, \$2.5 million and \$1.3 million to Barlow in fiscal 2005, 2004 and 2003, respectively, for arranging for leasing companies to participate in the Company's various aircraft financings. At September 30, 2004, Jonathan Ornstein, the Company's Chairman of the Board and Chief Executive Officer, and George Murnane III, the Company's Executive Vice President and Chief Financial Officer were each members of Barlow and each held a 25% membership interest therein. Messrs. Ornstein and Murnane disposed of their membership interest at the end of the first quarter of fiscal 2005. Distributions to the members of Barlow were determined by the members on a year-to-year basis. Substantially all of Barlow's revenues were derived from its agreement with the Company.

On September 9, 1998, the Company entered into an agreement with International Airline Support Group (IASG) whereby the Company would consign certain surplus airplane parts to IASG to sell on the open market. IASG in turn would submit proceeds from such sales to the Company less a market-based fee. During fiscal 2003, the Company paid IASG approximately \$0.4 million in commissions on sales of surplus aircraft parts. During 2003, IASG provided consultation on determining the fair value of the Company's surplus inventory. Mr. Ronald Fogleman, a member of the Company's Board of Directors, and Mr. Murnane were members of the board of directors of IASG during fiscal 2003 and Mr. Murnane was an executive officer of IASG before joining the Company. Messrs. Fogleman and Murnane resigned from the Board of Directors of IASG in mid 2003. In September 2003, IASG ceased operations and any inventory remaining at IASG was moved to another consignment firm.

The Company provides reservation services to Europe-By-Air, Inc. The Company billed Europe-By-Air approximately \$57,000, \$57,000 and \$61,000 for these services during fiscal 2005, 2004 and 2003, respectively. At September 30, 2004, the Company had receivables from Europe-By-Air of \$24,000. There were no amounts due as of September 30, 2005. Mr. Ornstein is a major shareholder of Europe-By-Air.

The Company uses the services of the law firm of Baker & Hostetler and Piper Rudnick for labor related legal services. The Company paid the firms an aggregate of \$0.3 million, \$0.2 million and \$0.3 million for legal-related services in 2005, 2004 and 2003, respectively. Mr. Joseph Manson, a member of the Company's Board of Directors, is a partner with Baker & Hostetler and a former partner with Piper Rudnick.

During fiscal 2001, the Company established Regional Airline Partners (RAP), a political interest group formed to pursue the interests of regional airlines, communities served by regional airlines and manufacturers of regional airline equipment. RAP has been involved in various lobbying activities related to maintaining funding for the Essential Air Service program under which the Company operates certain of its B1900 aircraft. Mr. Maurice Parker, a member of the Company's Board of Directors, is the Executive Director of RAP. During 2005, 2004 and 2003, the Company paid RAP's operating costs totaling approximately \$312,000, \$241,000 and \$200,000, respectively. Included in these amounts are the wages of Mr. Parker, which amounted to \$120,000, \$87,000 and \$94,000 in fiscal 2005, 2004 and 2003, respectively. Since inception, the Company has financed 100% of RAP's operations.

In September 2001, the Company entered into an agreement to form UFLY, LLC (UFLY), for the purpose of making strategic investments in US Airways, Inc. UFLY had investment gains of \$28,000 during fiscal 2003. Mr. Ornstein was a shareholder/owner and managing member of UFLY. Mr. Ornstein received no additional compensation from the Company or UFLY for his role as managing member of UFLY. UFLY's assets were distributed and UFLY was dissolved in fiscal 2003.

In fiscal 2003, Durango Pro-Focus used the services of the Company for pilot training. The Company billed Durango Pro-Focus \$25,000 and \$45,000 in fiscal year 2004 and 2003, respectively, for pilot training services. In 2004, Durango Pro-Focus was dissolved. Amounts due from Durango Pro-Focus of \$70,000 were written off in fiscal 2004. Mr. Fogleman was the President and Chief Executive Officer of Durango Pro-Focus.

The Company will enter into future business arrangements with related parties only where such arrangements are approved by a majority of disinterested directors and are on terms at least as favorable as available from unaffiliated third parties.

19. Segment Reporting

SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, requires disclosures related to components of a company for which separate financial information is available that is evaluated regularly by a company's chief operating decision maker in deciding the allocation of resources and assessing performance. The Company has three airline operating

Table of Contents

subsidiaries, Mesa Airlines, Freedom Airlines and Air Midwest, as well as various other subsidiaries organized to provide support for the Company's airline operations. In fiscal 2005, the Company aggregated these subsidiaries into three reportable segments: Mesa Airlines, Air Midwest/Freedom and Other. Mesa Airlines operates all of the Company's regional jets and Dash-8 aircraft pursuant to revenue-guarantee code-share agreements. Air Midwest and Freedom primarily operate the Company's Beech 1900 turboprop aircraft pursuant to pro-rate code-share agreements. The Other reportable segment includes Mesa Air Group (the holding company), RAS, MPD, MAG-AIM, MAGI and Ritz Hotel Management Corp., all of which support Mesa's operating subsidiaries. Prior to October 2004, the Company operated regional jets in both Mesa and Freedom. In October 2004, the Company completed its transition of regional jets from Freedom into Mesa and transferred a B1900D aircraft from Air Midwest into Freedom. As such, the Company has aggregated Freedom with Air Midwest beginning in the first quarter of fiscal 2005. Operating revenues in the Other segment are primarily sales of rotatable and expendable parts to the Company's operating subsidiaries.

Mesa Airlines provides passenger service with regional jets under revenue-guarantee contracts with America West, United and US Airways. Mesa Airlines also previously operated under a code-share agreement with Frontier Airlines, Inc., which terminated in December 2003. Mesa Airlines also provides passenger service with Dash-8 aircraft under revenue-guarantee contracts with United and America West. As of September 30, 2005, Mesa Airlines operated a fleet of 160 aircraft - 108 CRJs, 36 ERJs and 16 Dash-8s.

Air Midwest and Freedom provide passenger service with Beechcraft 1900D aircraft under pro-rate contracts with America West, US Airways and Midwest, as well as independent operations under the brand name of Mesa Airlines. As of September 30, 2005, Air Midwest and Freedom operated a fleet of 22 Beechcraft 1900D turboprop aircraft.

CCAir provided passenger service with Dash-8 and Jetstream 31 turboprop aircraft under pro-rate revenue contracts with US Airways. CCAir ceased operations on November 3, 2002.

The Other category consists of Mesa Air Group, RAS, MPD, MAG-AIM, MAGI and Ritz Hotel Management Corp. Mesa Air Group performs all administrative functions not directly attributable to any specific operating company. These administrative costs are allocated to the operating companies based upon specific criteria including headcount, available seat miles (ASM's) and other operating statistics. MPD operates pilot training programs in conjunction with San Juan College in Farmington, New Mexico and Arizona State University in Tempe, Arizona. Graduates of these training programs are eligible to be hired by the Company's operating subsidiaries. RAS primarily provides repair services to the Company's operating subsidiaries. MAGI is a captive insurance company located in Barbados. MAG-AIM is the Company's inventory procurement and sales company.

- (3) The sum of quarterly earnings per share may not equal annual earnings per share due to rounding.

Table of Contents**22. Restatement of Financial Statements**

Subsequent to the issuance of the Company's consolidated financial statements for the year ended September 30, 2005, the Company's management determined that certain changes in other assets were improperly presented in its Consolidated Statement of Cash Flows for the year ended September 30, 2005. Specifically, a \$10.0 million contract incentive payment made to United (see Note 15) and \$2.0 million of other contract incentive payments were incorrectly classified as a cash outflows from investing activities, rather than cash outflows from operating activities. In addition, there were \$5.5 million of prepaid aircraft lease costs were incorrectly classified as investing activities, rather than as operating activities. In addition, \$3.2 million of debt issuance costs that were incorrectly classified as cash used in investing activities, rather than as cash outflows from financing activities; and a non-cash transfer of \$4.2 million in rotatable equipment to non-operating assets was incorrectly presented as a change in other assets, rather than being included in supplemental disclosure as a non-cash transaction. As a result, the accompanying consolidated statement of cash flows for the year ended September 30, 2005, has been restated from the amounts previously reported to correct the presentation of these amounts. A summary of the effects of the restatement on the accompanying consolidated statement of cash flows for the year ended September 30, 2005 is presented below. The restatement has no effect on the total net change in cash and cash equivalents, the Consolidated Statement of Income, the Consolidated Statement of Stockholders' Equity, the related earnings per share amounts for the year ended September 30, 2005 or the Consolidated Balance Sheet as of September 30, 2005.

	2005 (As Restated)	2005 (As previously Reported)
Cash Flows from Operating Activities:		
Prepaid expenses and other assets	\$(58,704)	\$ (53,234)
Contract incentive payments	(12,025)	
NET CASH PROVIDED BY (USED IN) OPERATING ACTIVITIES	4,775	22,270
Cash Flows from Investing Activities:		
Capital expenditures	(41,873)	(44,561)
Change in other assets	4,088	(13,896)
NET CASH PROVIDED BY (USED IN) INVESTING ACTIVITIES	(35,092)	(55,764)
Cash Flows from Financing Activities:		
Deferred issuance costs	(3,177)	
NET CASH PROVIDED BY (USED IN) FINANCING ACTIVITIES	635	3,812
SUPPLEMENTAL NON-CASH INVESTING AND FINANCING ACTIVITIES:		
Rotable inventory reclassified to other assets	\$ 4,248	

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no disagreements with accountants on accounting and financial disclosure.

Item 9A. Controls and Procedures**Evaluation of Disclosure Controls and Procedures.**

In accordance with Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this *Annual Report on Form 10-K/A*, the Company's management re-evaluated, with the participation of the Company's principal executive officer and principal financial officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Exchange Act). Based on their evaluation of these disclosure controls and procedures, the Company's chairman of the board and chief executive officer and the Company's executive vice president and chief financial officer concluded that the Company's disclosure controls and procedures were not effective solely due to the material weakness related to the presentation of certain items in the consolidated statement of cash flows for the year ended September 30, 2005 as noted below. This conclusion is different than the conclusion disclosed in the original

filing of our Annual Report on Form 10-K for the fiscal year ended September 30, 2005 in which management concluded that

Table of Contents

disclosure controls and procedures were effective. As a result of the material weakness, we performed additional analysis and reviews to provide reasonable assurance that the financial statements included in this Form 10-K/A are fairly presented in accordance with generally accepted accounting principles.

Management's Report on Internal Control over Financial Reporting (as revised).

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) and Rule 15d-15(f). Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In the Company's 2005 annual report on Form 10-K, filed on December 14, 2005, management of the Company included Management's Report on Internal Control Over Financial Reporting, which expressed a conclusion by management that as of September 30, 2005, the Company's internal control over financial reporting was effective. As a result of a material misstatement in its 2005 statement of cash flows, which caused the 2005 financial statements to be restated, as described further in Note 22 to the Consolidated Financial Statements, management concluded that a material weakness in internal control over financial reporting existed as of September 30, 2005. Accordingly, management revised its assessment of the effectiveness of the Company's internal control over financial reporting as of September 30, 2005.

A material weakness in internal control over financial reporting is a control deficiency (within the meaning of the Public Company Accounting Oversight Board's (PCAOB) Auditing Standard No. 2), or combination of control deficiencies, that results in there being more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. PCAOB Auditing Standard No. 2 identifies a number of circumstances that, because of their likely significant negative effect on internal control over financial reporting, are to be regarded as at least significant deficiencies, as well as strong indicators of a material weakness, including the restatement of previously issued financial statements to reflect the correction of a misstatement.

Subsequent to the issuance of the original Form 10-K for the year ended September 30, 2005, management determined that the Company's consolidated statement of cash flows for the year ended September 30, 2005 included in the original Form 10-K should be restated to correct the presentation of the change in other assets for the following components: parts held for sale, contract incentive costs, prepaid rent costs, and debt issuance costs, and accordingly, we restated our consolidated statement of cash flows on Form 10-K/A. This restatement was the result of a material weakness in internal control over financial reporting. Specifically, the Company failed to design and implement appropriate controls over the preparation and presentation of the statement of cash flows in accordance with generally accepted accounting principles.

Under the supervision and with the participation of management, including the chief executive officer and chief financial officer, management revised their assessment of the effectiveness of internal control over financial reporting. Management based this revised assessment on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on those criteria and management's revised assessment the Company's management concluded that, as of September 30, 2005, internal control over financial reporting was not effective, as a result of the material weakness related to the presentation in the statement of cash flows. We identified no other material weaknesses in performing our assessment and reaching our conclusion.

Management's revised assessment of the effectiveness of internal control over financial reporting as of September 30, 2005 has been audited by Deloitte & Touche, LLP, an independent registered public accounting firm, as stated in their report that is included herein.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Mesa Air Group, Inc.
Phoenix, Arizona

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting (as revised), that Mesa Air Group, Inc. and subsidiaries (the Company) did not maintain effective internal control over financial reporting as of September 30, 2005, because of the effect of the material weakness identified in management's assessment based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our report dated December 14, 2005, we expressed an unqualified opinion on management's assessment that the Company maintained effective internal control over financial reporting and an unqualified opinion on the effectiveness of internal control over financial reporting. As described in the following paragraph, the Company subsequently identified a material misstatement in its 2005 statement of cash flows, which caused the 2005 financial statements to be restated. Management subsequently revised its assessment due to the identification of a material weakness, described in the following paragraph, in connection with the financial statement restatement. Accordingly, our opinion on the effectiveness of the Company's internal control over financial reporting as of September 30, 2005 expressed herein is different from that expressed in our previous report.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weakness has been identified and included in management's revised assessment: the Company failed to design and implement appropriate controls over the preparation and presentation of the statement of cash flows in accordance with generally accepted accounting principles. As a result, the Company failed to detect

errors in the classification of the change in other assets in the statement of cash flows for the following items within the change in other assets: parts held for sale, contract incentive costs, prepaid rent costs, and debt issuance costs. This material weakness resulted in the restatement of the Company's previously issued consolidated financial statements for the fiscal year ended September 30, 2005, as more fully described in Note 22 to the consolidated

Table of Contents

financial statements. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the consolidated financial statements as of and for the year ended September 30, 2005, of the Company and this report does not affect our report on such financial statements.

In our opinion, management's revised assessment that the Company did not maintain effective internal control over financial reporting as of September 30, 2005, is fairly stated, in all material respects, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, the Company did not maintain effective internal control over financial reporting as of September 30, 2005, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended September 30, 2005 of the Company and our report dated December 14, 2005 (August 4, 2006 as to the effects of the restatement described in Note 22 to the Consolidated Financial Statements) expressed an unqualified opinion on those consolidated financial statements and includes explanatory paragraphs relating to the Company's significant code-sharing agreements and the restatement described in Note 22.

/s/ DELOITTE & TOUCHE LLP

Phoenix, Arizona

December 14, 2005 (August 4, 2006 as to the effect of the material weakness described in Management's Report on Internal Control Over Financial Reporting (as revised))
