Washington, D.C. 20549
Form 10-Q

(Mark one)

þ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2007

or

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from __________ to __________

Commission file number: 001-33156

First Solar, Inc.
(Exact name of registrant as specified in its charter)

Delaware	**20-4623678**
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

4050 East Cotton Center Boulevard, Building 6, Suite 68
Phoenix, Arizona 85040
(Address of principal executive offices, including zip code)
(602) 414-9300
(Registrant s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o Accelerated filer o Non-accelerated filer þ

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No þ

The number of shares of the registrant s common stock, par value $0.001, outstanding as of August 1, 2007 was 72,997,929 shares.

FIRST SOLAR, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
Six Months Ended June 30, 2007

Note 1 Basis of Presentation

Basis of presentation. The accompanying unaudited condensed consolidated financial statements of First Solar, Inc. and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission. Accordingly, the interim financial statements do not include all of the information and footnotes required by generally accepted accounting principles for annual financial statements. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair statement have been included. Operating results for the three and six months ended June 30, 2007 are not necessarily indicative of the results that may be expected for the year ending December 29, 2007, or for any other period. The balance sheet at December 30, 2006 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. These financial statements and notes should be read in conjunction with the financial statements and notes thereto for the year ended December 30, 2006 included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Fiscal periods. We report our results of operations using a 52 or 53 week fiscal year, which ends on the Saturday on or before December 31. Our fiscal quarters end on the Saturday closest to the end of the applicable calendar quarter. Fiscal 2007 will end on December 29, 2007 and will consist of 52 weeks.

Reclassifications. Certain prior period balances have been reclassified to conform to the current financial statement presentation. These reclassifications had no impact on previously reported results of operations or stockholders equity.

Note 2 Significant Accounting Policies

Our significant accounting policies are disclosed in our Annual Report on Form 10-K for the year ended December 30, 2006 filed with the Securities and Exchange Commission. Our significant accounting policies reflect the adoption of the provisions of FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes* in the first quarter of fiscal 2007 and the adoption of FASB Statement 115, *Accounting for Certain Investments in Debt and Equity Securities* in the second quarter of fiscal 2007, and have otherwise not materially changed during the three and six months ended June 30, 2007.

Note 3 Initial Public Offering

The Securities and Exchange Commission declared the Company s first registration statements effective on November 16, 2006, which we filed on Forms S-1 (Registration No. 333-135574) and pursuant to Rule 462(b) (Registration No. 333-138779) under the Securities Act of 1933 in connection with the initial public offering of the Company s common stock. Under these registration statements, the Company registered 22,942,500 shares of its common stock, including 2,942,500 subject to an underwriter s over-allotment option. First Solar registered 16,192,500 of these shares on its own behalf and 6,750,000 of these shares on behalf of certain of its stockholders, including one of the Company s officers. In November 2006, the Company completed the initial public offering, in which it sold all of these shares that it registered on its behalf and on behalf of the selling stockholders, for an aggregate public offering price of $458.9 million, which included $58.9 million from the underwriters exercise of their over-allotment option. Of the $458.9 million of total gross proceeds, the Company received gross proceeds of $323.9 million, against

which it charged $16.6 million of underwriting discounts and commissions and $4.6 million of other costs of the offering, resulting in a net increase in the Company s paid-in capital of $302.7 million. The remaining $135.0 million of gross proceeds went to selling stockholders; they applied $8.4 million to underwriting discounts and commissions and received $126.6 million of the offering proceeds.

Note 4 Economic Development Funding

On July 26, 2006, we were approved to receive taxable investment incentives *(Investitionszuschüsse)* of approximately 21.5 million ($28.0 million at an assumed exchange rate of $1.30/ 1.00) from the State of Brandenburg, Germany. These funds will reimburse us for certain costs we incurred building our plant in Frankfurt (Oder), Germany, including costs for the construction of buildings and the purchase of machinery and equipment. Receipt of these incentives is conditional upon the State of Brandenburg, Germany having sufficient funds allocated to this program to pay the reimbursements we claim. In addition, we are required to operate our facility for a minimum of five years and employ a specified number of employees during this period. Our incentive approval expires on December 31, 2009. As of June 30, 2007, we had received cash payments of $25.3 million under this program and we had accrued an additional $2.2 million that we are eligible to receive under this program based on qualifying expenditures that we had incurred through that date.

We are eligible to recover up to approximately 23.8 million ($30.9 million at an assumed exchange rate of $1.30/ 1.00) of expenditures related to the construction of our plant in Frankfurt (Oder), Germany under the German Investment Grant Act of 2005 *(Investitionszulagen).* This Act permits us to claim tax-exempt reimbursements for certain costs we incurred building our plant in Frankfurt (Oder), Germany, including costs for the construction of buildings and the purchase of machinery and equipment. Tangible assets subsidized under this program have to remain in the region for at least five years. In accordance with the administrative requirements of the Act, we plan to claim reimbursement under the Act in conjunction with the filing of our tax returns with the local German tax office. Therefore we do not expect to receive funding from this program until we file our annual tax return for fiscal 2006 in 2007. In addition, this program expired on December 31, 2006 and we can only claim reimbursement for investments completed by this date. The majority of our buildings and structures and our investment in machinery and equipment were completed by this date. As of June 30, 2007, we had accrued $31.6 million that we are eligible to receive under this program based on qualifying expenditures that we had incurred through that date.

Note 5 Marketable Securities

Marketable securities at June 30, 2007 consisted of the following (in thousands):

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Market Value
Obligations of states and political subdivisions	207,209		(1)	207,208
Total	$ 207,209	$	$ (1)	$ 207,208

The above unrealized losses on our investments during the second quarter of fiscal 2007 were primarily a result of changes in interest rates. We typically invest in highly-rated securities with low probabilities of default. Our investment policy requires investments to be rated single-A or better, limits the types of acceptable investments, concentration as to security holder and duration of the investment.

Market values were determined for each individual security in the investment portfolio using third party market quotes. Our marketable securities consist primarily of auction rate securities and variable rate demand notes with maturities between three months and thirty-five years. When evaluating the investments for other-than-temporary impairment, we review factors such as the length of time and extent to which fair value has been below the amortized cost basis, the financial condition of the issuer, and the Company s ability and intent to hold the investment for a period of time, which may be sufficient for anticipated recovery in market value, which may be maturity.

Table of Contents

We have classified our marketable securities as available-for-sale . All marketable securities represent the investment of funds available for current operations, notwithstanding their contractual maturities. Such marketable securities are recorded at fair value and net unrealized gains and losses are recorded as part of other comprehensive income until realized. Realized gains and losses on the sale of all such securities are reported in earnings, computed using the specific identification cost method.

Note 6 Consolidated Balance Sheet Details

Accounts receivable, net

Accounts receivable, net consisted of the following at December 30, 2006 and June 30, 2007 (in thousands):

	December 30, 2006	June 30, 2007
Accounts receivable, gross	$ 27,127	$ 13,736
Allowance for doubtful accounts	(4)	
Accounts receivable, net	$ 27,123	$ 13,736

Inventories

Inventories consisted of the following at December 30, 2006 and June 30, 2007 (in thousands):

	December 30, 2006	June 30, 2007
Raw materials	$ 8,212	$ 14,679
Work in process	1,123	6,555
Finished goods	7,175	5,614
Total inventories	$ 16,510	$ 26,848

Property, plant and equipment

Property, plant and equipment consisted of the following at December 30, 2006 and June 30, 2007 (in thousands):

	December 30, 2006	June 30, 2007
Buildings and improvements	$ 21,804	$ 42,813
Machinery and equipment	79,803	152,664
Office equipment and furniture	4,428	5,980
Leasehold improvements	3,086	3,086
Gross depreciable property, plant and equipment	109,121	204,543
Accumulated depreciation and amortization	(18,880)	(29,992)
Net depreciable property, plant and equipment	90,241	174,551
Land	2,836	2,877
Construction in progress	85,791	68,131
Net property, plant and equipment	$ 178,868	$ 245,559

Depreciation and amortization of property, plant and equipment was $2.4 million and $6.1 million for the three months ended July 1, 2006 and June 30, 2007, respectively and was $3.4 million and $11.2 million for the six months ended July 1, 2006 and June 30, 2007, respectively.

We incurred and capitalized interest cost (into our property, plant and equipment) as follows during the three and six months ended July 1, 2006 and June 30, 2007 (in thousands):

Table of Contents

	Three Months Ended		Six Months Ended	
	July 1, 2006	June 30, 2007	July 1, 2006	June 30, 2007
Interest cost incurred	$ 1,169	$ 1,474	$ 2,473	$ 2,522
Interest capitalized	(884)	(191)	(1,765)	(1,038)
Interest expense	$ 285	$ 1,283	$ 708	$ 1,484

Accounts payable and accrued expenses

Accounts payable and accrued expenses consisted of the following at December 30, 2006 and June 30, 2007 (in thousands):

	December 30, 2006	June 30, 2007
Accounts payable	$ 14,001	$ 25,388
Product warranty liability	2,764	4,050
Income tax payable	5,152	506
Accrued compensation and benefits	2,642	8,159
Accrued property, plant and equipment	1,968	2,884
Other accrued expenses	5,556	10,407
Total accounts payable and accrued expenses	$ 32,083	$ 51,394

Note 7 Share-Based Compensation

We measure share-based compensation cost at the grant date based on the fair value of the award and recognize this cost as an expense over the employee s requisite service period. The share-based compensation expense that we recognized on our statements of operations for the three and six months ended July 1, 2006 and June 30, 2007 was as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2006	June 30, 2007	July 1, 2006	June 30, 2007
Share-based compensation expense included in:				
Cost of sales	$ 1,242	$ 2,425	$ 2,262	$ 3,920
Research and development	591	1,495	1,190	2,653
Selling, general and administrative	989	2,870	1,979	5,738
Production start-up		210		465
Total share-based compensation expense	$ 2,822	$ 7,000	$ 5,431	$ 12,776

The increase in share-based compensation expense was primarily the result of new awards.

The following table presents our share-based compensation expense by type of award for the three and six months ended July 1, 2006 and June 30, 2007 (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2006	June 30, 2007	July 1, 2006	June 30, 2007

Stock options	$ 2,681	$ 6,980	$ 5,366	$ 12,660
Unrestricted stock		56		158
Restricted stock units		42		42
Net amount absorbed into inventory	141	(78)	65	(84)
Total share-based compensation expense	$ 2,822	$ 7,000	$ 5,431	$ 12,776

Share-based compensation cost capitalized in our inventory was $0.3 million at both July 1, 2006 and June 30, 2007. On April 30, 2007, we modified 474,374 of our share options to change their vesting dates from August 31, 2008 to August 31, 2007 and 1,171,060 of our share options to change their vesting dates from August 31, 2008 to January 15, 2008. These modifications do not affect the fair value of these share options that we use to calculate our share-based compensation expense, but the modifications do shorten the requisite service period over which we recognize that compensation expense and also increase our estimate of the number of these share options that we expect to vest. The increase in the number of these share options that we expect to vest increased the compensation cost that we expect to recognize over the service periods of the share options by $0.8 million. At June 30, 2007, we had $22.7 million of unrecognized share-based compensation cost related to unvested stock option awards, which we expect to recognize as an expense over a weighted-average period of approximately two years, and $1.3 million of unrecognized share-based compensation cost related to unvested restricted stock units, which we expect to recognize as an expense over a weighted-average period of approximately four years.

Note 8 Debt

Our long-term debt consisted of the following at December 30, 2006 and June 30, 2007 (in thousands):

	December 30, 2006	June 30, 2007
Euro denominated loan, variable interest Euribor plus 1.6%, due 2008 through 2012	$ 45,216	$ 62,043
Euro denominated loan, variable interest Euribor plus 1.8%, due 2012		20,211
2.25% loan, due 2006 through 2015	14,865	14,051
0.25% 3.25% loan, due 2007 through 2009	5,000	4,166
Capital lease obligations	15	12
	65,096	100,483
Less unamortized discount	(738)	(679)
Total long-term debt	64,358	99,804
Less current portion	(3,311)	(3,327)
Non-current portion	$ 61,047	$ 96,477

We had outstanding borrowings of $16.3 million and $22.4 million at December 30, 2006 and June 30, 2007, respectively, which we classify as short-term debt. We must repay this debt with any funding we receive from the Federal Republic of Germany under the Investment Grant Act of 2005, but in any event, this debt must be paid in full by December 30, 2008.

Note 9 Commitments and Contingencies

Product warranties

We offer warranties on our products and record an estimate of the associated liability based on the number of solar modules under warranty at customer locations, our historical experience with warranty claims, our monitoring of field installation sites, our in-house testing of our solar modules and our estimated per-module replacement cost.

Product warranty activity during the three and six months ended July 1, 2006 and June 30, 2007 was as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2006	June 30, 2007	July 1, 2006	June 30, 2007
Product warranty liability, beginning of period	$ 1,931	$ 3,355	$ 1,853	$ 2,764

Accruals for new warranties issued (warranty expense)	335	820	454	1,549
Settlements	(177)	(12)	(178)	(12)
Change in estimate of warranty liability		(113)	(40)	(251)
Product warranty liability, end of period	$ 2,089	$ 4,050	$ 2,089	$ 4,050

Note 10 Income Taxes

Table of Contents

On December 31, 2006, we adopted the provisions of FIN 48, which is an interpretation of SFAS 109, *Accounting for Income Taxes*. Tax law is subject to significant and varied interpretation, so an enterprise may be uncertain whether a tax position that it has taken will ultimately be sustained when it files its tax return. FIN 48 establishes a more-likely-than-not threshold that must be met before a tax benefit can be recognized in the financial statements and, for those benefits that may be recognized, stipulates that enterprises should recognize the largest amount of the tax benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the taxing authority. FIN 48 also addresses changes in judgments about the realizability of tax benefits, accrual of interest and penalties on unrecognized tax benefits, classification of liabilities for unrecognized tax benefits and related financial statement disclosures. As permitted by FIN 48, our policy is to recognize any interest and penalties that we might incur related to our tax positions in income tax expense.

Upon our adoption of FIN 48 at the beginning of our fiscal 2007, we identified $0.5 million of unrecognized tax benefits from prior years that, if recognized, would affect our effective tax rate. We also identified a liability of $0.1 million related to uncertain tax positions, which we recorded by a cumulative effect adjustment to equity. During the six months ended June 30, 2007, we had an increase of $0.1 million in unrecognized tax benefits that, if recognized, would affect the effective tax rate. During the six months ended June 30, 2007, we did not identify any reductions in unrecognized tax benefits resulting from settlements with taxing authorities or due to the lapse of applicable statutes of limitations.

We are subject to filing requirements for income tax returns in the U.S federal jurisdiction and various state and foreign jurisdictions. We are not presently undergoing any examinations by any taxing authorities, but our tax years going back to 2003 are subject to examination in all tax jurisdictions in which we operate.

At each period end, we exercise significant judgment in determining our provisions for income taxes, our deferred tax assets and liabilities and our future taxable income for purposes of assessing our likelihood of utilizing any future tax benefit from our deferred tax assets. Prior to our assessment at June 30, 2007, we had a valuation allowance on all of our net deferred tax assets in all of the taxing jurisdictions in which we operate. The ultimate realization of deferred tax assets depends on the generation of sufficient taxable income of the appropriate character and in the appropriate taxing jurisdictions during the future periods in which the underlying tax-deductible temporary differences become deductible. We determined the valuation allowance on our deferred tax assets in accordance with the provisions of SFAS 109, which require us to weigh both positive and negative evidence in order to ascertain whether it is more likely than not that deferred tax assets will be realized. We evaluated all significant available positive and negative evidence, including the existence of cumulative net losses, benefits that could be realized from available tax strategies and forecasts of future taxable income, in determining the need for a valuation allowance on our deferred tax assets.

After applying the evaluation guidance of SFAS 109 as of June 30, 2007, we concluded that it was more-likely-than-not that $39.2 million of deferred tax assets against which we had previously held a full valuation allowance would be realized during future periods. This amount pertained to U. S. deferred tax assets. The reversal of the $39.2 million of valuation allowances was based upon management s assessment of the future realization of our U.S. deferred income tax assets. The available positive evidence at June 30, 2007 included cumulative U.S. taxable income for the previous 12 quarters and a projection of future taxable income. As a result of the reversal of the valuation allowance, we recorded a tax benefit of $39.2 million on our condensed consolidated statement of operations for the three months ended June 30, 2007, which was partially offset by tax expenses of $2.7 million on our operations for that period. We also concluded that it was necessary to retain a valuation allowance against all of our foreign net deferred tax assets of $11.0 million. We will maintain this valuation allowance until sufficient positive evidence exists to support its reversal in accordance with SFAS 109.

Note 11 Income (loss) per share

Table of Contents

Basic net income (loss) per share is computed by dividing net income by the weighted-average number of common shares outstanding for the period. Diluted net income (loss) per share is computed giving effect to all potential dilutive common stock, including stock options.

The reconciliation of the numerator and denominator used in the calculation of basic and diluted net income (loss) per share is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2006	**June 30, 2007**	**July 1, 2006**	**June 30, 2007**
Basic net income (loss) per share				
Numerator:				
Net income (loss)	$ (2,461)	$ 44,418	$ (8,356)	$ 49,446
Denominator:				
Weighted-average common stock outstanding	54,358	72,596	51,250	72,472
Effect of rights issue			1,317	
Weighted-average shares used in computing basic net income (loss) per share	54,358	72,596	52,567	72,472
Diluted net income (loss) per share				
Denominator:				
Weighted-average shares used in computing basic net income (loss) per share	54,358	72,596	52,567	72,472
Add stock options and RSU outstanding		3,493		3,268
Weighted-average shares used in computing diluted net income (loss) per share	54,358	76,089	52,567	75,740

The following number of outstanding options were excluded from the computation of diluted net income (loss) per share as they had an antidilutive effect (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2006	**June 30, 2007**	**July 1, 2006**	**June 30, 2007**
Options to purchase common stock and RSU	5,171	2,786	5,200	3,112

Note 12 Comprehensive Income (Loss)

Comprehensive income (loss) includes foreign currency translation adjustments, unrealized gains on derivate instruments designated and qualifying as cash flow hedges and unrealized losses on available-for- sale securities, the impact of which has been excluded from net income and reflected as components of stockholders equity (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2006	**June 30, 2007**	**July 1, 2006**	**June 30, 2007**
Net income (loss)	$ (2,461)	$ 44,418	$ (8,356)	$ 49,446

Foreign currency translation adjustments	27	179	(100)	340
Change in unrealized gain (loss) on marketable securities		(1)		(1)
Change in unrealized gain (loss) on derivative instruments		817		836
Comprehensive income (loss)	$ (2,434)	$ 45,413	$ (8,456)	$ 50,621

Components of accumulated other comprehensive income were as follows (in thousands):

12

Table of Contents

	December 30, 2006	June 30, 2007
Foreign currency translation adjustments	$ 1,002	$ 1,342
Unrealized loss on marketable securities		(1)
Unrealized gain on derivative instruments	20	856
Accumulated other comprehensive loss	$ 1,022	$ 2,197

Note 13 Statement of Cash Flows

Following is a reconciliation of net income (loss) to net cash provided by or used in operating activities for the six months ended July 1, 2006 and June 30, 2007 (in thousands):

	Six Months Ended	
	July 1, 2006	June 30, 2007
Net income (loss)	$ (8,356)	$ 49,446
Adjustment to reconcile net income (loss) to cash provided by (used in) operating activities:		
Depreciation and amortization	3,388	11,150
Stock-based compensation	5,431	12,776
Deferred income taxes		(39,218)
Excess tax benefit from share-based compensation arrangements		(14,026)
Loss on disposal of property and equipment		(2)
Non-cash interest	281	(3)
Non-cash loss	45	
Provision for excess and obsolete inventories		(83)
Changes in operating assets and liabilities:		
Accounts receivable	(11,710)	13,518
Inventories	(1,046)	(10,139)
Prepaid expenses and other current assets	(1,840)	(11,090)
Other non-current assets		(319)
Accounts payable and accrued expenses	4,670	13,325
Total adjustments	(781)	(24,111)
Net cash provided by (used in) operating activities	$ (9,137)	$ 25,335

Note 14 Derivative Financial Instruments

We have interest rate swaps with a financial institution that effectively convert to fixed rates the floating variable rate of Euribor on certain drawdowns taken on the term loan portion of our credit facility with a consortium of banks led by IKB Deutsche Industriebank AG. At June 30, 2007, the notional values of the interest rate swaps (in thousands) and their annual fixed payment rates and maturities were as follows:

Notional Amount	Fixed Rate	Maturity
14,921 ($19,397 at an assumed exchange rate of $1.30/ 1.00)	3.96%	December 2012
9,902 ($12,873 at an assumed exchange rate of $1.30/ 1.00)	4.03%	December 2012

3,928 ($5,106 at an assumed exchange rate of $1.30/ 1.00)	4.07%	December 2012
10,685 ($13,891 at an assumed exchange rate of $1.30/ 1.00)	4.29%	December 2012
3,248 ($4,222 at an assumed exchange rate of $1.30/ 1.00)	4.25%	December 2012
3,363 ($4,372 at an assumed exchange rate of $1.30/ 1.00)	4.55%	December 2012

Table of Contents

The notional amounts of the interest rate swaps are scheduled to decline in accordance with our scheduled principal payments on the hedged term loan drawdowns. These derivative financial instruments qualified for accounting as cash flow hedges in accordance with SFAS 133, *Accounting for Derivative Instruments and Hedging Activities* and we designated them as such. As a result, we classified the aggregate fair value of the interest rate swap agreements, which was $0.8 million, as an other current asset on our balance sheet at June 30, 2007 and we record changes in that fair value in other comprehensive income. We assessed the interest rate swap agreements as highly effective as cash flow hedges at June 30, 2007. We use interest rate swap agreements to mitigate our exposure to interest rate fluctuations associated with certain of our debt instruments; we do not use interest rate swap agreements for speculative or trading purposes.

During the six months ended June 30, 2007, we purchased a forward foreign exchange contract to hedge certain foreign currency denominated intercompany long-term debt. This hedge does not qualify for hedge accounting treatment in accordance with the provisions of SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*. Accordingly, we recognize gains or losses from the fluctuation in foreign exchange rates and the valuation of this hedging contract in other expenses. We do not use derivative financial instruments for trading or speculative purposes. As of June 30, 2007, we had one outstanding foreign exchange forward contract to sell 20.0 million for $26.8 million at a fixed exchange rate of $1.34/ 1.00. Unrealized mark-to-market losses recorded in the three and six months ended June 30, 2007 were $0.2 million and $0.5 million, respectively. The contract will be due on February 27, 2009.

Note 15 Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS 159 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We are currently assessing the impact of SFAS 159 on our consolidated financial position and results of operations.

In June 2007, the FASB Emerging Issues Task Force (EITF) published Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities.* EITF No. 07-3 requires that these payments made by an entity to third parties be deferred and capitalized and recognized as an expense as the related goods are delivered or the related services are performed. Entities report the effects of applying this Issue as a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. EITF No. 07-3 is effective for us beginning on January 1, 2008. Earlier application is not permitted. We do not expect that adoption of EITF No. 07-3 will have a material effect on our financial position or results of operations.

In May 2007, the FASB issued FASB Staff Position, or FSP, No. FIN 48-1, *Definition of Settlement in FASB Interpretation No. 48*, to amend FIN No. 48 by providing that previously unrecognized tax benefits can be recognized when the tax positions are effectively settled upon examination by a taxing authority. According to FSP FIN 48-1, an enterprise s tax position will be considered effectively settled if the taxing authority has completed its examination, the enterprise does not plan to appeal, and it is remote that the taxing authority would reexamine the tax position in the future. FSP FIN 48-1 must be applied upon the initial adoption of FIN No. 48. Enterprises that did not apply FIN No. 48 in a manner consistent with the provisions of FSP FIN 48-1 would be required to retrospectively apply its provisions to the date of the initial adoption of FIN No. 48. FSP FIN 48-1 did not have a material impact on our initial adoption of FIN No. 48.

Note 16 Subsequent Events

Table of Contents

On July 9, 2007 we announced that we entered into five agreements for the manufacture and sale of solar modules totaling 685 Megawatts. These new agreements are expected to allow for sales of approximately $1.28 billion at an assumed exchange rate of $1.30/ 1.00 over the period of 2007 to 2012. Included in the new agreements are long term agreements with EDF Energies Nouvelles (EDF EN), a renewable energy producer specializing in wind, hydro, biomass, and solar power plants; and Séchilienne-Sidec, a renewable energy producer specializing in thermal, wind, and solar power plants. In addition, First Solar and the Juwi Group have also agreed to increase volumes under an existing long term supply agreement. These customers are targeting development of solar projects with First Solar modules in Spain, Italy, France, Greece and Portugal. Also included in the new agreements is a long term agreement with RIO Energie GmbH & Co. KG, a joint venture of the Stadtwerke Mainz AG utility company and the Juwi Group with a focus on the development of solar power plants in the utility service region of the Stadtwerke Mainz AG and its subsidiaries through 2012. These new long term agreements are structured on terms similar to our existing long term supply contracts. Furthermore, we entered into new multi-year sales contracts with SunEdison, LLC, a leading provider of solar generated electricity to commercial, municipal, and utility customers in North America. SunEdison will deploy First Solar modules in Ontario, Canada, which has adopted a feed-in tariff for solar energy.

On July 5, 2007 we completed a tender offer to amend, at the election of the applicable option holder, certain portions of options to purchase Company stock that were granted under the Company s 2003 Unit Option Plan between May 1, 2004 and October 1, 2005, were held by Eligible Optionees as of the Expiration Time, have vested or will vest on or after January 1, 2005 and were still outstanding and unexercised on the expiration date of the offer. The offer expired on July 5, 2007 and we accepted for amendment Eligible Portions of Eligible Options to purchase 2,135,834 shares of common stock.

On July 19, 2007 we filed a registration statement on Form S-1 for a proposed follow-on offering of our common stock. The planned offering will be comprised of up to 4,000,000 shares offered by us and 5,650,000 shares offered by existing stockholders. We intend to use the net proceeds from this offering for the build of plant two at our Malaysian manufacturing center, fund the associated production start-up and ramp-up costs and use the remainder for working capital and general corporate purposes, including possible future capacity expansions.

On July 30, 2007 the compensation committee of our Board approved the grant of 301,340 options and restricted stock units to certain of our current employees and consultants. The estimated grant date fair value, after estimated forfeitures, for these grants is approximately $28.0 million, of which $8.7 million will be recognized as share-based compensation expense in the third quarter of fiscal 2007 due to immediate vesting upon grant of approximately 72,202 restricted stock units and the remaining amount of $19.3 million will be recognized over the respective vesting period, which is generally four years.

Item 2. ***Management s Discussion and Analysis of Financial Condition and Results of Operations***

Cautionary Statement Regarding Forward-Looking Statements

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of the Securities Exchange Act of 1934 and the Securities Act of 1933, which are subject to risks, uncertainties and assumptions that are difficult to predict. All statements in this quarterly report on Form 10-Q, other than statements of historical fact, are forward-looking statements. These forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The forward-looking statements include statements, among other things, concerning our business strategy, including anticipated trends and developments in and management plans for, our business and the markets in which we operate; future financial results, operating results, revenues, gross margin, operating expenses, products, projected costs and capital expenditures; research and development programs; sales and marketing initiatives; and competition. In some cases, you can identify these statements by forward-looking words, such as estimate , expect , anticipate , project , plan , intend , believe , forecast , foresee , likely , may might , will , could , predict and continue ,

Table of Contents

the negative or plural of these words and other comparable terminology. The forward-looking statements are only predictions based on our current expectations and our projections about future events. All forward-looking statements included in this quarterly report on Form 10-Q are based upon information available to us as of the filing date of this quarterly report on Form 10-Q. You should not place undue reliance on these forward-looking statements. We undertake no obligation to update any of these forward-looking statements for any reason. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance, or achievements to differ materially from those expressed or implied by these statements. These factors include the matters discussed in the section entitled Risk Factors elsewhere in this quarterly report on Form 10-Q. You should carefully consider the risks and uncertainties described under this section.

The following discussion and analysis should be read in conjunction with our condensed consolidated financial statements and the accompanying notes contained in this quarterly report on Form 10-Q. Unless expressly stated or the context otherwise requires, the terms we , our , us and First Solar refer to First Solar, Inc. and its subsidiaries.

Overview

We design and manufacture solar modules using a proprietary thin film semiconductor technology that has allowed us to reduce our average solar module manufacturing costs to among the lowest in the world. Each solar module uses a thin layer of cadmium telluride semiconductor material to convert sunlight into electricity. We manufacture our solar modules on a high-throughput production line and we perform all manufacturing steps ourselves in an automated, proprietary and continuous process. In 2006 and the first six months of 2007, we sold almost all of our solar modules to solar project developers and system integrators headquartered in Germany.

First Solar was founded in 1999 to bring an advanced thin film semiconductor process into commercial production through the acquisition of predecessor technologies and the initiation of a research, development and production program that allowed us to improve upon the predecessor technologies and launch commercial operations in January 2002. Currently, we manufacture our solar modules and conduct our research and development activities at our Perrysburg, Ohio and Frankfurt/Oder, Germany manufacturing facility. We completed the qualification of our base plant in Perrysburg for high volume production in November 2004. In April 2007, we also started initial production at a 120MW manufacturing facility in Germany, which we expect to reach full capacity by the fourth quarter of 2007. In April 2007, we also began construction of plant one of our Malaysia manufacturing center, and we plan to begin construction of plant two in the fourth quarter of 2007. Our objective is to become, by 2010, the first solar module manufacturer to offer a solar electricity solution that competes on a non-subsidized basis with the price of retail electricity in key markets in North America, Europe and Asia. To approach the price of retail electricity in such markets, we believe that we will need to reduce our manufacturing costs per watt by an additional 40-50%, assuming prices for traditional energy sources remain flat on an inflation adjusted basis.

We converted, on February 22, 2006, from a Delaware limited liability company to a Delaware corporation. Prior that date, we operated as a Delaware limited liability company. On March 31, 2007 we merged our United States subsidiaries into the U.S. parent company, First Solar Inc.

Net Sales

We generate substantially all of our net sales from the sale of solar modules. Over the past three years and during the first six months of 2007, the main constraint limiting our sales has been production capacity as customer demand has exceeded the number of solar modules we could produce. We price and sell our solar modules per watt of power. As a result, our net sales can fluctuate based on our output of sellable watts. We currently sell almost all of our solar modules to solar project developers and system integrators headquartered in Germany and France, which then resell our solar modules to end-users who receive government subsidies. Our net sales could be negatively impacted if legislation reduces the current subsidy programs in Europe, North America, or Asia or if interest rates increase, which could impact our end-users ability to either meet their target return on investment or finance their projects. We have entered into

Table of Contents

contracts for the purchase and sale of our solar modules with nine European project developers, system integrators and operators of renewable energy projects. We refer to these as our Long Term Sales Contracts . These contracts account for a significant portion of our planned production over the period from 2007 through 2012 and therefore will significantly affect our overall financial performance.

Under our customer contracts, starting in April 2006, we transfer title and risk of loss to the customer and recognize revenue upon shipment. Under our customer contracts in effect prior to April 1, 2006, we did not transfer title or risk of loss, or recognize revenue, until the solar modules were received by our customers. Our customers do not have extended payment terms or rights of return under these contracts.

We retain the right to terminate the Long Term Sales Contracts upon 12 months notice and the payment of a termination fee if we determine that certain material adverse changes have occurred, including one or more of the following: new laws, rules or regulations with respect to our production, distribution, installation, or reclamation and recycling program have a substantial adverse impact on our business; unanticipated technical or operational issues result in our experiencing widespread, persistent quality problems or the inability to achieve stable conversion efficiencies at planned levels; or extraordinary events beyond our control substantially increase the cost of our labor, materials or utility expenses or significantly reduce our throughput.

Our customers are entitled to certain remedies in the event of missed deliveries of kilowatt volume. These delivery commitments are established through rolling four quarter forecasts to be negotiated with each of the customers and define the specific quantities to be purchased on a quarterly basis and the schedules of the individual shipments to be made to the customers. In the case of a late delivery, certain of our customers are entitled to a maximum credit representing a percentage of the delinquent revenue. If we do not meet our annual minimum volume shipments or the minimum average watt per module, our customers also have the right to terminate these contracts on a prospective basis.

No single customer accounted for more than 22% of our net sales in the six months ended June 30, 2007.

Cost of sales

Our cost of sales includes the cost of raw materials, such as tempered back glass, TCO coated front glass, cadmium telluride, laminate, connector assemblies and laminate edge seal. In addition, other items contributing to our cost of sales are direct labor and manufacturing overhead such as engineering expense, equipment maintenance, environmental health and safety, quality and production control and procurement. Cost of sales also includes depreciation of manufacturing plant and equipment and facility related expenses. In addition, we accrue warranty and end of life reclamation and recycling expenses to our cost of sales.

We implemented a program in 2005 to reclaim and recycle our solar modules after their use. Under our reclamation and recycling program, we enter into an agreement with the end-users of the photovoltaic systems that use our solar modules. In the agreement, we commit, at our expense, to remove the solar modules from the installation site at the end of their life and transport them to a processing center where the solar module materials and components will be recycled, and the owner agrees not to dispose of the solar modules except through our program or another program that we approve. The photovoltaic system owner is responsible for disassembling the solar modules and packaging them in containers that we provide. At the time we sell a solar module, we record an expense in cost of sales equal to the present value of the estimated future end of life obligation. We record the accretion expense on this future obligation to selling, general and administrative expense.

Overall, we expect our cost of sales per watt to decrease over the next several years due to an increase of sellable watts per solar module, an increase in unit output per line, geographic diversification into lower-cost manufacturing regions and more efficient absorption of fixed costs driven by economies of scale.

Research and development

Table of Contents

Research and development expense consists primarily of salaries and personnel-related costs and the cost of products, materials and outside services used in our process and product research and development activities. In 2006, we began adding equipment for further process developments and recording the depreciation of such equipment as research and development expense. We may also allocate a portion of the annual operating cost of the Ohio expansion to research and development expense.

Selling, general and administrative

Selling, general and administrative expense consists primarily of salaries and other personnel-related costs, professional fees, insurance costs, travel expense and other selling expenses. We expect these expenses to increase in the near term, both in absolute dollars and as a percentage of net sales, in order to support the growth of our business as we expand our sales and marketing efforts, improve our information processes and systems and implement the financial reporting, compliance and other infrastructure required for a public company. Over time, we expect selling, general and administrative expense to decline as a percentage of net sales and on a cost per watt basis as our net sales and our total watts produced increase.

Production start-up

Production start-up expense consists primarily of salaries and personnel-related costs and the cost of operating a production line before it has been qualified for full production, including the cost of raw materials for solar modules run through the production line during the qualification phase. It also includes all expenses related to the selection of a new site and the related legal and regulatory costs and the costs to maintain our plant replication program, to the extent we cannot capitalize these expenditures. We expect to incur significant production start-up expenses in fiscal year 2007 in connection with the German plant and plant one and plant two at the Malaysia manufacturing center. In general, we expect production start-up expenses per production line to be higher when we build an entire new manufacturing facility compared with the addition of a new production line at an existing manufacturing facility, primarily due to the additional infrastructure investment required. Over time, we expect production start-up expenses to decline as a percentage of net sales and on a cost per watt basis as a result of economies of scale.

Interest expense

Interest expense is associated with various debt financings.

Use of estimates

Our discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, net sales and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to inventories, intangible assets, income taxes, warranty obligations, marketable securities, end of life reclamation and recycling, contingencies and litigation and stock-based compensation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Results of Operations

The following table sets forth our consolidated statement of operations as a percentage of net sales for the periods indicated:

	Three Months Ended		Six Months Ended	
	July 1, 2006	June 30, 2007	July 1, 2006	June 30, 2007
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	67.3%	63.3%	70.2%	59.5%
Gross profit	32.7%	36.7%	29.8%	40.5%
Research and development	5.5%	4.9%	7.4%	4.7%
Selling, general and administrative	29.2%	22.4%	33.7%	21.5%
Production start up	14.6%	2.0%	16.0%	6.9%
Operating income (loss)	(16.6)%	7.4%	(27.3)%	7.4%
Foreign currency gain (loss)	7.8%	0.0%	7.5%	(0.2)%
Interest expense	(1.0)%	(1.6)%	(1.7)%	(1.1)%
Other income (expense), net	0.9%	4.3%	1.4%	5.1%
Income tax benefit	0.1%	47.3%		23.1%
Net income (loss)	(8.8)%	57.4%	(20.1)%	34.3%

Three Months Ended July 1, 2006 and June 30, 2007

Net sales

	Three Months Ended		Three Month Period Change	
(Dollars in thousands)	July 1, 2006	June 30, 2007		
Net sales	$27,861	$ 77,223	$49,362	177%

The increase in our net sales was due primarily to a 172% increase in the MW volume of solar modules sold in the second quarter of 2007 compared to the second quarter of 2006. We were able to increase the MW volume of solar modules sold primarily as a result of the full production of our Ohio expansion, commencement of production at our German plant and continued improvements to our overall production throughput. In addition, we increased the average number of sellable watts per solar module from approximately 62 watts in the second quarter of 2006 to approximately 68 watts in the second quarter of 2007. Our average selling price in the second quarter of 2007 increased to $2.37 from $2.32 in the second quarter of 2006. Our average selling price was positively impacted by $0.17 due to a favorable foreign exchange rate between the U.S. dollar and euro, partially offset by a price decline. In both periods, almost all of our net sales resulted from sales of solar modules to customers headquartered in Germany.

Cost of sales

	Three Months Ended		Three Month Period Change	
(Dollars in thousands)	July 1, 2006	June 30, 2007		
Cost of sales	$18,761	$ 48,852	$30,091	160%
% of Net sales	67.3%	63.3%		

Direct material expense increased $11.7 million, warranty and end of life costs relating to the reclamation and recycling of our solar modules increased $1.2 million, sales freight and other costs increased $0.6 million, in each case, primarily as a result of higher production volumes in the second quarter of 2007 compared to the second quarter of 2006. In addition, manufacturing overhead costs increased by $16.6 million, which was primarily composed of an increase in salaries and personnel related expenses of $9.5 million, including $1.2 million in share-based compensation expense, resulting from the infrastructure associated with our Ohio expansion and German plant build-outs, facility and related expenses of $3.9 million and depreciation expense of $3.2 million, primarily as a result of additional equipment becoming operational at our Ohio and German plants.

Table of Contents

Gross profit

	Three Months Ended			
	July 1,	June 30,	Three Month Period	
(Dollars in thousands)	2006	2007	Change	
Gross profit	$9,100	$ 28,371	$19,271	212%
% Gross margin	32.7%	36.7%		

Gross profit increased by $19.3 million from $9.1 million in the second quarter of 2006 to $28.4 million in the second quarter of 2007, reflecting an increase in net sales. As a percentage of sales, gross margin increased 4.0 percentage points from 32.7% in the second quarter of 2006 to 36.7% in the second quarter of 2007, representing increased leverage of our fixed cost infrastructure and scalability associated with our plant expansions, which drove a 172% increase in the number of MW sold over the same time period. Additionally, we incurred $7.6 million or 9.8% of revenues of costs associated with the ramp of our German plant in the second quarter of 2007 versus $1.1 million or 3.9% of revenues of costs incurred in the second quarter of 2006 related to the ramp of our Ohio expansion.

Research and development

	Three Months Ended			
	July 1,	June 30,	Three Month Period	
(Dollars in thousands)	2006	2007	Change	
Research and development	$1,536	$ 3,763	$2,227	145%
% of Net sales	5.5%	4.9%		

The increase in research and development expense was primarily the result of a $2.1 million increase in personnel related expense, which included share-based compensation expense of $1.5 million in the second quarter of 2007 compared to $0.6 million for the same period in 2006, as a result of increased headcount. Consulting and other expenses also increased by $0.3 million and were partially offset by a $0.2 million increase in grant revenue received over the same time period.

Selling, general and administrative

	Three Months Ended			
	July 1,	June 30,	Three Month Period	
(Dollars in thousands)	2006	2007	Change	
Selling, general and administrative	$8,133	$ 17,285	$9,152	113%
% of Net sales	29.2%	22.4%		

Selling, general and administrative expense increased primarily as a result of an increase in salaries and personnel-related expenses of $5.6 million due to increased headcount and an increase in share-based compensation expense from $1.0 million in the second quarter of 2006 compared to $2.9 million in the second quarter of 2007. In addition, legal and professional service fees increased by $2.9 million and other expenses increased by $0.7 million from the second quarter of 2006 to the second quarter of 2007 primarily resulting from expenses incurred in connection with being a public company.

Production start-up

	Three Months Ended			
	July 1,	June 30,	Three Month Period	
(Dollars in thousands)	2006	2007	Change	
Production start-up	$4,062	$ 1,523	$(2,539)	(63)%
% of Net sales	14.6%	2.0%		

In the second quarter of 2007, we incurred $1.5 million of production start-up expenses related to our Malaysia expansion, including related legal and regulatory costs, compared with $4.1 million of production

Table of Contents

start-up expenses for our Ohio and German plant expansions during the second quarter of 2006. Production start-up expenses are primarily attributable to the cost of labor and material and depreciation expense to run and qualify the line, related facility expenses and management of our replication process.

Foreign currency gain

	Three Months Ended		Three Month Period	
(Dollars in thousands)	July 1, 2006	June 30, 2007	Change	
Foreign exchange gain	$2,190	$ 21	$(2,169)	N.M.

Foreign currency gain decreased by $2.2 million during the three months ended June 30, 2007 compared with the three months ended July 1, 2006, primarily as a result of lower euro denominated asset balances and, partially offset by the implementation of a hedging program for certain inter-company loans.

Interest expense

	Three Months Ended		Three Month Period	
(Dollars in thousands)	July 1, 2006	June 30, 2007	Change	
Interest expense	$(285)	$ (1,283)	$ 998	N.M.

Interest expense, net of amounts capitalized, increased by $1.0 million during the three months ended June 30, 2007 compared with the three months ended July 1, 2006 primarily as a result of additional draws on our credit facility with IKB.

Other income (expense), net

	Three Months Ended		Three Month Period	
(Dollars in thousands)	July 1, 2006	June 30, 2007	Change	
Other income (expense), net	$242	$ 3,326	$3,084	N.M.

The increase in other income of $3.1 million in the three months ended June 30, 2007 compared with the three months ended July 1, 2006 was primarily due to increased interest income from higher cash balances as a result of our initial public offering in the fourth quarter of 2006.

Income tax expense

	Three Months Ended		Three Month Period	
(Dollars in thousands)	July 1, 2006	June 30, 2007	Change	
Income tax benefit	$23	$ 36,554	$36,531	N.M.

The income tax benefit of $36.6 million during the three months ended June 30, 2007 is mainly due to the reversal of valuation allowances of $39.2 million against previously established U.S. deferred income tax assets, offset by $2.7 million in current income tax provision. The reversal was based upon our updated assessment of the future realization of our deferred income tax assets. The available positive evidence at June 30, 2007 included cumulative U.S. taxable income for the previous 12 quarters and a projection of future taxable income.

Six Months Ended July 1, 2006 and June 30, 2007

Net sales

(Dollars in thousands)	Six Months Ended July 1, 2006	June 30, 2007	Six Month Period Change	
Net sales	$41,485	$144,172	$102,687	248%

The increase in our net sales was due primarily to a 241% increase in the MW volume of solar modules sold in the first half of 2007 compared with the first half of 2006. We were able to increase the MW volume of solar modules sold primarily as a result of the full production ramp of our Ohio expansion, commencement of production at our German plant, and continued improvements to our production throughput. In addition, we increased the average number of sellable watts per solar module from approximately 62 watts in the first six months of 2006 to approximately 67 watts in the first six months of 2007. Our average selling price in the first six months of 2007 was $2.35 from $2.30 in the first six months of 2006. Our average selling price was positively impacted by $0.17 due to a favorable foreign exchange rate between the U.S. dollar and euro, partially offset by a price decline. In both periods, almost all of our net sales resulted from sales of solar modules to customers headquartered in Germany.

Cost of sales

(Dollars in thousands)	Six Months Ended July 1, 2006	June 30, 2007	Six Month Period Change	
Cost of sales	$29,113	$85,759	$56,646	195%
% of Net sales	70.2%	59.5%		

Direct material expense increased $25.2 million, warranty and end of life costs relating to the reclamation and recycling of our solar modules increased $2.4 million, sales freight and other costs increased $1.3 million, in each case, primarily as a result of higher production volumes in the first six months of 2007 compared with the first six months of 2006. In addition, manufacturing overhead costs increased by $27.7 million, which was primarily composed of an increase in salaries and personnel related expenses of $15.6 million, including $1.7 million share-based compensation expense, resulting from the infrastructure associated with our Ohio expansion and German plant build-outs, facility and related expenses of $5.7 million and depreciation expense of $6.4 million, primarily as a result of additional equipment becoming operational at our Ohio and German plants.

Gross profit

(Dollars in thousands)	Six Months Ended July 1, 2006	June 30, 2007	Six Month Period Change	
Gross profit	$12,372	$58,413	$46,041	372%
% Gross margin	29.8%	40.5%		

Gross profit increased by $46.0 million from $12.4 million in the first six months of 2006 to $58.4 million in the first six months of 2007, reflecting an increase in net sales. As a percentage of sales, gross margin increased 10.7 percentage points from 29.8% in the first six months of 2006 to 40.5% in the first six months of 2007, representing increased leverage of our fixed cost infrastructure and scalability associated with our plant expansions, which drove a 241% increase in the number of MW sold. Additionally, we incurred $7.6 million or 5.3% of revenues of costs associated with the ramp of our German plant in the first six months of 2007 versus $1.1 million or 2.7% of revenues of costs incurred in the first six months of 2006 related to the ramp of our Ohio expansion.

Table of Contents

Research and development

	Six Months Ended		Six Month Period	
(Dollars in thousands)	**July 1, 2006**	**June 30, 2007**	**Change**	
Research and development	$3,055	$ 6,821	$3,766	123%
% of Net sales	7.4%	4.7%		

The increase in research and development expense was primarily the result of a $3.6 million increase in personnel related expense, which included share-based compensation expense of $2.7 million in the first six months of 2007 compared to $1.2 million for the same period in 2006, due to increased headcount and additional option awards. Consulting and other expenses also increased by $0.8 million partially offset by a $0.6 million increase in grant revenue received over the same time period.

Selling, general and administrative

	Six Months Ended		Six Month Period	
(Dollars in thousands)	**July 1, 2006**	**June 30, 2007**	**Change**	
Selling, general and administrative	$14,005	$ 30,975	$16,970	121%
% of Net sales	33.7%	21.5%		

Selling, general and administrative expense increased primarily as a result of an increase in salaries and personnel-related expenses of $11.1 million due to increased headcount and an increase in share-based compensation expense from $2.0 million in the first six months of 2006 compared to $5.7 million in the first six months of 2007. In addition, legal and professional service fees increased by $5.3 million and other expenses increased by $0.6 million from the first six months of 2006 to the first six months of 2007 primarily resulting from expenses incurred in connection with being a public company.

Production start-up

	Six Months Ended		Six Month Period	
(Dollars in thousands)	**July 1, 2006**	**June 30, 2007**	**Change**	
Production start-up	$6,641	$ 9,997	$3,356	51%
% of Net sales	16.0%	6.9%		

In the first six months of 2007, we incurred $10.0 million of production start-up expenses related to our German and Malaysia expansions, including related legal and regulatory costs and increased headcount, compared with $6.6 million of production start-up expenses for our Ohio and German plant expansions during the first six months of 2006. Production start-up expenses are primarily attributable to the cost of labor and material and depreciation expense to run and qualify the line, related facility expenses and management of our replication process.

Foreign currency gain (loss)

	Six Months Ended		Six Month Period	
	July 1, 2006	**June 30, 2007**	**Change**	
(Dollars in thousands)				
Foreign currency gain (loss)	$3,090	$ (249)	$ (3,339)	N.M.

Foreign exchange gain decreased by $3.3 million from the six months ended July 1, 2006 to the six months ended June 30, 2007 primarily as a result of lower euro denominated asset balances and, partially offset by the implementation of a hedging program for certain inter-company loans.

Table of Contents

Interest expense

	Six Months Ended			
	July 1,	**June 30,**	**Six Month Period**	
(Dollars in thousands)	**2006**	**2007**	**Change**	
Interest expense	$(708)	$ (1,484)	$776	N.M.

Interest expense, net of amounts capitalized, increased by $0.8 million from the six months ended July 1, 2006 to the six months ended June 30, 2007 primarily as a result of additional draws on our credit facility with IKB.

Other income (expense), net

	Six Months Ended			
	July 1,	**June 30,**		
(Dollars in thousands)	**2006**	**2007**	**Six Month Period Change**	
Other income (expense), net	$591	$ 7,286	$6,695	N.M.

The increase in other income of $6.7 million in the six months ended June 30, 2007 compared with the six months ended July 1, 2006 was primarily due to increased interest income from higher cash balances as a result of our initial public offering in the fourth quarter of 2006.

Income tax expense

	Six Months Ended			
(Dollars in thousands)	**July 1, 2006**	**June 30, 2007**	**Six Month Period Change**	
Income tax benefit	$	$33,273	$33,273	N.M.

The income tax benefit of $33.3 million during the six months ended June 30, 2007 is mainly due to the reversal of valuation allowances of $39.2 million previously established against U.S. deferred income tax assets, offset by $6.0 million in current income tax provision. The reversal was based upon our updated assessment of the future realization of our deferred income tax asset. The available positive evidence at June 30, 2007 included cumulative U.S. taxable income for the previous 12 quarters and a projection of future taxable income.

Critical Accounting Policies and Estimates

For a description of the critical accounting policies that affect our more significant judgments and estimates used in the preparation of our condensed consolidated financial statements, refer to our Annual Report on Form 10-K filed with the Securities and Exchange Commission. There have been no changes to our critical accounting policies since December 30, 2006, with the exception of the accounting related to uncertainty in income taxes and accounting for investments in debt and equity securities.

Liquidity and Capital Resources

As of June 30, 2007, we had $315.0 million in cash, cash equivalents and marketable securities compared to $308.4 million at December 30, 2006.

Operating Activities

Cash provided by operating activities was $25.3 million during the first six months of 2007 compared to cash used in operating activities of $9.1 million during the same period in 2006. Cash received from customers increased to $157.6 million during the first six months of 2007 from $31.4 million during the first six months of 2006 mainly due to an increase in net sales. This increase was partially offset by an increase in cash paid to suppliers and employees of $118.7 million during the first six months of 2007

compared to cash paid to suppliers and employees of $40.8 million during the same period in 2006, mainly due to an increase in raw materials, an increase in personnel related costs due to higher headcount and other costs supporting our global expansion.

Investing Activities

Cash used in investing activities was $287.9 million during the first six months of 2007 compared with $69.5 million during the same period in 2006. Cash used in investing activities resulted primarily from capital expenditures in these periods and the net purchase of marketable securities of $198.6 million during the second quarter of fiscal 2007. Capital expenditures were $80.4 million during the first six months of 2007 and $67.8 million during the same period in 2006. The increase in capital expenditures was primarily due to our investments related to the construction of our new plants in Germany and Malaysia.

Financing Activities

Cash provided by financing activities was $61.3 million during the first six months of 2007 compared with $83.4 million during the same period in 2006. During the first six months of 2007 we received $41.3 million from additional drawings under our IKB credit facilities. Net proceeds from the exercise of stock options were $2.8 million. Tax benefits related to the exercise of stock options during the six months ended June 30, 2007 were $14.0 million. In addition, we received $4.8 million in taxable investment incentives (Investitionszuschuesse) from the State of Brandenburg related to the construction of our plant in Frankfurt/Oder, Germany. Cash provided by financing activities for the first six months of 2006 was primarily due to the issuance of convertible senior subordinated notes in the aggregate principal amount of $74.0 million (resulting in cash of $73.3 million, net of issuance costs). We extinguished these notes in the second quarter of 2006 by payment of 4.3 million shares of our common stock. Also, during the first six months of 2006, we received equity contributions of $30.0 million from our majority stockholder, which was partially offset by $20.0 million in net repayments of related party debt.

We expect capital expenditures for fiscal 2007 to average between 60% and 65% of our revenues.

We believe that our current cash and cash equivalents, cash flows from operating activities and government grants and low interest debt financings for our German plant will be sufficient to meet our working capital and capital expenditures needs for at least the next 12 months. However, if our financial results or operating plans change from our current assumptions, we may not have sufficient resources to support our business plan. As a result, we may engage in one or more debt or equity financings in the future that would result in increased expenses or dilution to our existing stockholders. If we are unable to obtain debt or equity financing on reasonable terms, we may be unable to execute our expansion strategy. On July 19, 2007 we filed a registration statement on Form S-1 for a proposed follow-on offering of our common stock. The planned offering will be comprised of up to 4,000,000 shares offered by us and 5,650,000 shares offered by existing stockholders. We intend to use the net proceeds from shares offered by us, for the build of plant two at our Malaysian manufacturing center, fund the associated production start-up and ramp-up costs and use the remainder for working capital and general corporate purposes, including possible future capacity expansions.

Off-Balance Sheet Arrangements

We had no off-balance sheet arrangements as of June 30, 2007.

Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS 159 *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS 159 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007.

We are currently assessing the impact of SFAS 159 on our consolidated financial position and results of operations.

In June 2007, the FASB Emerging Issues Task Force (EITF) published Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities.* EITF No. 07-3 requires that these payments made by an entity to third parties be deferred and capitalized and recognized as an expense as the related goods are delivered or the related services are performed. Entities report the effects of applying this Issue as a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. EITF No. 07-3 is effective for us beginning on January 1, 2008. Earlier application is not permitted. We do not expect that adoption of EITF No. 07-3 will have a material effect on our financial position or results of operations.

In May 2007, the FASB issued FASB Staff Position, or FSP, No. FIN 48-1, *Definition of Settlement in FASB Interpretation No. 48*, to amend FIN No. 48 by providing that previously unrecognized tax benefits can be recognized when the tax positions are effectively settled upon examination by a taxing authority. According to FSP FIN 48-1, an enterprise s tax position will be considered effectively settled if the taxing authority has completed its examination, the enterprise does not plan to appeal, and it is remote that the taxing authority would reexamine the tax position in the future. FSP FIN 48-1 must be applied upon the initial adoption of FIN No. 48. Enterprises that did not apply FIN No. 48 in a manner consistent with the provisions of FSP FIN 48-1 would be required to retrospectively apply its provisions to the date of the initial adoption of FIN No. 48. FSP FIN 48-1 did not have a material impact on our initial adoption of FIN No. 48.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Foreign Currency Exchange Risk

Our international operations accounted for 100.0% of our net sales in the first six months of 2007 and 99.9% of our net sales in the first six months of 2006. In the first six months of 2007 and the first six months of 2006, all of our international sales were denominated in euros. As a result, we have exposure to foreign exchange risk with respect to almost all of our net sales. Fluctuations in currency exchange rates, particularly in the U.S. dollar to euro exchange rate, affect our gross and net profit margins and could result in foreign currency and operating losses. Historically, most of our exposure to currency exchange risk has related to currency gains and losses from the time we sign and settle our sales contracts. For example, our Long Term Supply Contracts obligate us to deliver solar modules at a fixed price in euros per watt and do not adjust for fluctuations in the U.S. dollar to euro exchange rate. In the first six months of 2007, a 10% change in currency exchange rates would have impacted our net sales by $14.4 million.

In the past, currency exchange rate fluctuations have had an impact on our business and results of operations. For example, currency exchange rate fluctuations positively impacted our cash flows by $1.0 million in the first six months of 2007 and negatively impacted our cash flows by $0.1 million in the first six months of 2006. Although we cannot predict the impact of future currency exchange rate fluctuations on our business or results of operations, we believe that we may have increased risk associated with currency exchange rate fluctuations in the future. As of June 30, 2007, we had one outstanding foreign exchange forward contract to sell 20.0 million for $26.8 million at a fixed exchange rate of $1.34/ 1.00. The contract is due to settle on February 27, 2009. This currency forward contract hedges an intercompany loan. Most of our German plant s operating expenses will be in euro, creating increasing opportunities for some natural hedges against the currency risk in our net sales. In addition, we may decide to enter into other hedging activities in the future.

Interest Rate Risk

Table of Contents

We are exposed to interest rate risk because many of our end-users depend on debt financing to purchase and install a photovoltaic system. Although the useful life of a photovoltaic system is approximately 25 years, end-users of our solar modules must pay the entire cost of the photovoltaic system at the time of installation. As a result, many of our end-users rely on debt financing to fund their up-front capital expenditures and final project. An increase in interest rates could make it difficult for our end-users to secure the financing necessary to purchase and install a photovoltaic system on favorable terms, or at all and thus lower demand for our solar modules and reduce our net sales. In addition, we believe that a significant percentage of our end-users install photovoltaic systems as an investment, funding the initial capital expenditures through a combination of equity and debt. An increase in interest rates could lower an investor s return on investment in a photovoltaic system or make alternative investments more attractive relative to photovoltaic systems, which, in each case, could cause these end-users to seek alternative investments that promise higher returns.

During July 2006, we entered into the IKB credit facility, which bears interest at Euribor plus 1.6% for the term loan, Euribor plus 2.0% for the bridge loan and Euribor plus 1.8% for the revolving credit facility. As of June 30, 2007, we held six pay fixed, receive Euribor interest rate swaps with a combined notional value of 46.0 million ($59.8 million at an assumed exchange rate of $1.30/ 1.00), which hedge our interest rate risk on the IKB term loan.

In addition, we invest some of our cash in debt and equity securities, which exposes us to interest rate risk. The primary objective of our investment activities is to preserve principal, while at the same time maximizing the income we receive from our investments without significantly increasing risk. Some of the securities in which we invest may be subject to market risk. This means that a change in prevailing interest rates may cause the principal amount of the investment to fluctuate. For example, if we hold a security that was issued with an interest rate fixed at the then-prevailing rate and the prevailing interest rate later rises, the principal amount of our investment may decline. To minimize this risk, we maintain our portfolio of cash equivalents and marketable securities in a variety of securities, including money market funds, government and non-government debt securities and certificates of deposit. The risk associated with fluctuating interest rates is limited to our investment portfolio and we do not believe that a 10% change in interest rates will have a significant impact on our consolidated statements of operations and statements of cash flow. As of June 30, 2007, all of our investments were in money market accounts or tax-exempt U.S. government securities, including obligations of states and political subdivisions.

Item 4T. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of June 30, 2007 of the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of June 30, 2007, our disclosure controls and procedures were effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in rules and forms of the SEC, and is accumulated and communicated to our management as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of our internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) to determine whether any changes in our internal control over financial reporting occurred during the second quarter of fiscal 2007 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there have been no such changes in our internal control over financial reporting during the first six months of fiscal 2007.

Table of Contents

CEO and CFO Certifications

We have attached as exhibits to this Quarterly Report on Form 10-Q the certifications of our Chief Executive Officer and Chief Financial Officer, which are required in accordance with the Exchange Act. We recommend that this Item 4T be read in conjunction with the certifications for a more complete understanding of the subject matter presented.

Limitations on the Effectiveness of Controls

Control systems, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control systems objectives are being met. Further, the design of any control systems must reflect the fact that there are resource constraints, and the benefits of all controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Control systems can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II. OTHER INFORMATION

Item 1. *Legal Proceedings*

General

In the ordinary conduct of our business, we are subject to periodic lawsuits, investigations and claims, including, but not limited to, routine employment matters. Although we cannot predict with certainty the ultimate resolution of lawsuits, investigations and claims asserted against us, we do not believe that any currently pending legal proceeding to which we are a party will have a material adverse effect on our business, results of operations, cash flows or financial condition.

NASD Inquiry

On August 1, 2007 we received a letter from the NASD Market Regulation Department (the NASD) requesting certain information in connection with the NASD s review of trading in our common stock surrounding our July 9, 2007 announcement of having entered into new long-term supply contracts. Among other things, the NASD requested information about all persons who possessed information about the new long-term supply contracts prior to our public disclosure, a chronology of all significant events leading to the execution of the new long-term supply contracts and a description of our procedures to ensure the confidentiality of material, non-public information prior to its public dissemination. The letter states that the inquiry should not be construed as an indication that the NASD has determined that any violations of the NASD Conduct Rules or the federal securities laws have occurred. We are cooperating with the NASD and are not aware of any inappropriate disclosure or improper trading.

Item 1A. *Risk Factors*

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A: Risk Factors in our Annual Report on Form 10-K for the year ended December 30, 2006 and our registration statement on Form S-1 filed on July 19, 2007, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results. The risk factors included in our Annual Report on Form 10-K for the year ended December 30, 2006 and our registration statement on Form S-1 filed on July 19, 2007, have not materially changed.

Item 4. Submission of Matters to a Vote of Security Holders

We held our 2007 Annual Meeting of Stockholders on May 25, 2007. At the meeting, our stockholders voted on the following two proposals and cast their votes as follows to approve such proposals:

Proposal 1: To elect the following six nominees to First Solar s board of directors, each to serve on our board of directors until the next annual meeting of stockholders or until his successor has been elected and qualified:

Table of Contents

Nominee	For	Withheld
Michael J. Ahearn	62,324,159	7,806,037
Bruce Sohn	62,183,505	7,946,691
