**Item 8.01. Other Events.**

In March 2006, Elantech Devices Corporation ( Elantech ) filed a Complaint for Patent Infringement against us claiming that we infringed one of its patents and seeking damages, attorneys fees, and a permanent injunction against us infringing or inducing others to infringe the patent. The Elantech patent relates to recognizing and providing an indication of the presence of multiple fingers on a touchpad. In April 2006, we filed our Answer to the Complaint and Counterclaims against Elantech, claiming that Elantech has infringed and induced infringement of four of our patents and seeking damages, attorneys fees, and a permanent injunction against infringing or inducing others to infringe. In addition, in December 2007, we filed a Complaint for Patent Infringement against Elantech claiming that Elantech infringed one of our patents relating to detecting the presence of multiple fingers on a touchpad and seeking damages, attorneys fees, and an injunction.

The most recent development was that on March 20, 2008, the Court, based on its infringement ruling, filed an order preliminarily enjoining us from making, using, selling, importing into or offering to sell within the United States touchpad products containing our Type 2 firmware code with enabled multiple finger counting functionality. We have previously developed additional ways to detect multiple fingers and have our own related patents.

We are not shipping any products that utilize the contested code. As a result, the preliminary injunction will have no impact on us, our business, or our customers. Although the contested code is no longer used in our products, we do not believe the contested code infringes the Elantech patent and we intend to appeal the Court s infringement ruling.

We do not believe any aspect of the Court s decision will have a material effect on our business. We intend to vigorously defend our patents and pursue our counterclaims.

---
