Form 10-Q

May 08, 2008

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether each registrant is a shell company (as defined in Exchange Act Rule 12b-2).

PINNACLE WEST CAPITAL Yes No

CORPORATION

ARIZONA PUBLIC SERVICE COMPANY Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

PINNACLE WEST CAPITAL

CORPORATION

Number of shares of common stock, no par value, outstanding as of May 5, 2008: 100,633,751

ARIZONA PUBLIC SERVICE COMPANY

Number of shares of common stock, \$2.50 par value, outstanding as of May 5, 2008: 71,264,947

Arizona Public Service Company meets the conditions set forth in General Instruction H(1)(a) and (b) of Form 10-Q and is therefore filing this form with the reduced disclosure format allowed under that General Instruction.

This combined Form 10-Q is separately filed by Pinnacle West Capital Corporation and Arizona Public Service Company. Each registrant is filing on its own behalf all of the information contained in this Form 10-Q that relates to such registrant and, where required, its subsidiaries. Except as stated in the preceding sentence, neither registrant is filing any information that does not relate to such registrant, and therefore makes no representation as to any such information.

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Consolidation and Nature of Operations

The unaudited condensed consolidated financial statements include the accounts of Pinnacle West and our subsidiaries: APS, SunCor, APSES, El Dorado and Pinnacle West Marketing & Trading. Intercompany accounts and transactions between the consolidated companies have been eliminated. Our accounting records are maintained in accordance with GAAP. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. Condensed Consolidated Financial Statements

Our unaudited condensed consolidated financial statements reflect all adjustments that we believe are necessary for the fair presentation of our financial position, results of operations and cash flows for the periods presented. We suggest that these condensed consolidated financial statements and notes be read along with the consolidated financial statements and notes to consolidated financial statements included in our 2007 Form 10-K, except to the extent of the following items: (1) we have reclassified certain prior year real estate segment revenues and expenses to discontinued operations on our Condensed Consolidated Statements of Income in accordance with SFAS No. 144; (2) we have netted certain prior year amounts on our Condensed Consolidated Balance Sheets and Statements of Cash Flows to reflect the adoption of FASB Staff Position No. FIN 39-1 (see Note 10); and (3) reclassifications as contributions in aid of construction of amounts previously reported as part of capital expenditures on the Condensed Consolidated Statements of Cash Flows.

3. Quarterly Fluctuations

Weather conditions cause significant seasonal fluctuations in our revenues. In addition, real estate activities can have significant impacts on our results for interim periods. For these reasons, results for interim periods do not necessarily represent results expected for the year.

4. Liquidity Matters

The following table shows principal payments due on Pinnacle West's and APS' total long-term debt and capitalized lease requirements as of March 31, 2008 (dollars in millions):

Year	Consolidated Pinnacle West	APS
2008	\$ 192	\$
2009	58	1
2010	226	224
2011	578	401
2012	376	376
Thereafter	1,886	1,884
Total	\$ 3,316	\$ 2,886

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Recent sub-prime mortgage issues have adversely affected the overall financial markets. Certain bond insurers have had actual or potential downgrades of their AAA credit ratings due to their insuring certain mortgage-backed securities and collateralized debt obligations. The interest rates on eleven issues of APS pollution control bonds, in the aggregate amount of approximately \$343 million, are reset every seven days through auction processes. These bonds are supported by bond insurance policies provided by Ambac Assurance Corporation, and the interest rates on the bonds can be directly affected by the rating of the bond insurer. Downgrades of bond insurers also increase the possibility of a failed auction, which results in higher interest rates during the failed auction periods. During the first quarter of 2008, we had seven failed auctions, which represented about 5% of all of our auctions for the quarter. When the auctions failed, the bondholders received the maximum 14% annual interest rate for the week of the failed auction. The bonds were successfully re-auctioned the following week. We continue to monitor this market and are evaluating our options to eliminate our exposure to the auction rate market. We do not expect, however, that our auction rate interest exposure will have a material adverse impact on our financial position, results of operations, cash flows or liquidity.

An existing ACC order requires APS to maintain a common equity ratio of at least 40%. As defined in the ACC order, the common equity ratio is common equity divided by the sum of common equity and long-term debt, including current maturities of long-term debt. At March 31, 2008, APS common equity ratio, as defined, was 54%, its total common equity was approximately \$3.4 billion, and total capitalization was approximately \$6.2 billion. APS would be prohibited from paying dividends if its common equity falls below approximately \$2.5 billion, assuming APS total capitalization remains the same.

SunCor has a \$150 million loan facility secured primarily by an interest in land, commercial properties, land contracts and homes under construction. The loan facility requires compliance with certain loan covenants pertaining to debt to net worth, debt service, liquidity, cash flow coverage and restrictions on debt. As of March 31, 2008, the amount of SunCor's net assets that could not be transferred to Pinnacle West in the form of cash dividends as a result of these covenants was approximately \$217 million.

As a result of the restrictions in the preceding two paragraphs, as of March 31, 2008, the restricted net assets of our subsidiaries exceeded 25% of our consolidated net assets (at March 31, 2008, our consolidated net assets were approximately \$3.5 billion). These restrictions do not materially affect Pinnacle West's ability to meet its ongoing capital requirements.

5. Regulatory Matters**2008 General Rate Case**

On March 24, 2008, APS filed a request with the ACC for a net rate increase of \$266 million for retail customers effective no later than July 1, 2009 (the March Rate Request) based on a test year ended September 30, 2007, adjusted as described below. The ACC staff requested that APS update financial schedules, testimony and other data contained in the March Rate Request to reflect a test year ended December 31, 2007. Although APS concluded that the March Rate Request complied with applicable ACC test year requirements, to prevent further delays in processing the rate request, APS agreed to file the updated information with the ACC on or before June 3, 2008. The ACC staff has agreed to complete its review of the updated information no later than 30 days after APS makes its revised submission. Thereafter, we expect the ACC to issue a procedural schedule detailing the timeline for addressing the request.

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The key financial provisions of the March Rate Request included:

an average rate increase of 8.1% for existing customers plus the establishment of a new growth-related impact fee charged to new connections;

an increase of \$253 million in non-fuel base rates and a net increase of \$13 million for fuel and purchased power costs reflected in base rates, and recovery of up to \$53 million of such increases through the impact fee;

a rate base of \$5.3 billion, which approximates the ACC-jurisdictional portion of the book value of utility assets, net of accumulated depreciation and other credits, as of September 30, 2007, subject to certain adjustments, such as the inclusion of Units 5 and 6 of the Yucca Power Plant (near Yuma in southwestern Arizona), the steam generator replacements at Palo Verde Unit 3, environmental upgrades to APS coal plants, and other plant additions under construction at the end of the test year that are currently in service or expected to go into service before the proposed rates are requested to become effective;

the following proposed capital structure and costs of capital:

	Capital Structure	Cost of Capital
Long-term debt	45.9%	5.77%
Common stock equity	54.1%	11.50%
Weighted-average cost of capital		8.87%

a Base Fuel Rate of \$0.0366 per kWh based on estimated 2009 prices (an increase from the current Base Fuel Rate of \$0.0325 per kWh, including the reclassification of \$106 million of fuel and purchased power revenues from the PSA to base rates);

an \$87 million attrition adjustment to address erosion in APS earnings and return on equity between the end of the test year and 2010; and

a new super-peak residential time-of-use rate and a commercial and industrial critical peak pricing proposal to allow eligible customers additional options to manage their electric bills, as well as other conservation-related rate design proposals.

In addition, APS requested various modifications to the Environmental Improvement Surcharge and the Demand Side Management Adjustment Clause that will allow APS to expand its conservation and demand-side management programs and support environmental upgrades to APS facilities in response to and in anticipation of future environmental requirements.

2007 Retail Rate Order

As previously disclosed, in June 2007 the ACC issued an order (the Retail Rate Order) in a general retail rate case that APS filed in late 2005. The Retail Rate Order approved a \$322 million increase in APS annual retail base revenues, effective July 1, 2007, which included a \$315 million fuel-related increase and a \$7 million non-fuel related increase. The Retail Rate Order also authorized APS recovery of approximately \$34 million of 2005 Deferrals through a temporary PSA surcharge over a twelve-month period beginning July 1, 2007, modified the PSA in various respects and increased the Base Fuel Rate. In addition, the Retail Rate Order provides that the PSA adjustor that took effect on February 1, 2007 (\$0.004 per kWh), and that was scheduled to expire on January 31, 2008, will remain in effect as long as necessary to allow APS to collect \$46 million of

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

2007 fuel and purchased power costs deferred as a result of the mid-2007 implementation of the new Base Fuel Rate. We anticipate that this adjustor will remain in effect through mid-2008.

PSA Balance

The following table shows the changes in the deferred fuel and purchased power regulatory asset for the three months ended March 31, 2008 and 2007 (dollars in millions):

	Three Months Ended March 31,	
	2008	2007
Beginning balance	\$ 111	\$ 160
Deferred fuel and purchased power costs-current period	(11)	25
Interest on deferred fuel and purchased power	1	2
Amounts recovered through revenues	(51)	(69)
Ending balance	\$ 50	\$ 118

The PSA rate for the PSA Year (February 1 through January 1) beginning February 1, 2008 was set at the maximum \$0.004 per kWh. Any uncollected deferrals during the 2008 PSA Year resulting from this limit will be included in the historical component of the PSA rate for the PSA Year beginning February 1, 2009.

Rate Requests for Transmission and Ancillary Services

On July 10, 2007, APS submitted a revised Open Access Transmission Tariff filing with the FERC to move from a fixed rate to a formula rate in order to more accurately reflect the costs that APS incurs in providing transmission and ancillary services. The requested formula rate would have resulted in an estimated \$37 million increase in annual transmission revenues, effective October 1, 2007. The proposed formula rate would be updated each year effective June 1 on the basis of APS' actual cost of service, as disclosed in APS' FERC Form 1 report for the previous fiscal year, and projected capital expenditures. Approximately \$30 million of the requested increase represents charges for transmission services to serve APS' retail customers (Retail Transmission Charges).

On September 21, 2007, the FERC issued an order on these proposed revisions to APS' transmission rates in which it accepted APS' proposed formula rates and ordered settlement judge procedures, which are underway. The proposed rates became effective March 1, 2008, subject to refund based upon the ultimate outcome of proceedings at the FERC on this matter.

On December 31, 2007, APS filed with the ACC an application to increase annual pretax retail revenues by approximately \$30 million, effective March 1, 2008, to cover the Retail Transmission Charges authorized by the FERC. This retail rate increase implements an ACC-approved mechanism, the transmission cost adjustor (TCA), by which changes in Retail Transmission Charges can be reflected in APS' retail rates. On February 13, 2008, the ACC voted to approve APS' request, subject to refund pending final outcome of FERC proceedings on this matter.

Table of Contents

**PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

On June 1, 2008, our FERC transmission rates will automatically adjust based on the formula mechanism described above. In addition, APS will file a new request with the ACC to implement the TCA allowing APS to reflect the resulting increased Retail Transmission Charges in its retail rates.

Equity Infusion Notice

On May 2, 2008, Pinnacle West filed a Notice with the ACC that would allow Pinnacle West to infuse up to \$400 million of equity into APS during 2008 in the event Pinnacle West deems it appropriate to do so. Under Arizona law and implementing regulatory decisions, Pinnacle West is required to give such notice at least 120 days prior to such an equity infusion into APS. The ACC may, but need not, take action on this Notice. If the ACC takes no action within the 120 day notice period, Pinnacle West may thereafter make any such infusions at the Company's discretion.

Federal

FERC Order

On August 11, 2004, Pinnacle West, APS, Pinnacle West Energy, and APSES (collectively, the Pinnacle West Companies) submitted to the FERC an update to their three-year market-based rate review pursuant to the FERC's order implementing a new generation market power analysis. On December 20, 2004, the FERC issued an order approving the Pinnacle West Companies' market-based rates for control areas other than those of APS, Public Service Company of New Mexico (PNM) and Tucson Electric Power Company (TEP). The FERC staff required the Pinnacle West Companies to submit additional data with respect to these control areas, and the Pinnacle West Companies did so.

On April 17, 2006, the FERC issued an order revoking the Pinnacle West Companies' authority to make sales at market-based rates in the APS control area (the April 17 Order). The FERC found that the Pinnacle West Companies failed to provide the necessary information about the calculation of transmission imports into the APS control area to allow the FERC to make a determination regarding FERC's generation market power screens in the APS control area. The FERC found that the Pinnacle West Companies may charge market-based rates in the PNM and TEP control areas.

On August 13, 2007, the FERC issued an order on rehearing, reinstating the authority of the Pinnacle West Companies to make sales at market-based rates in all seasons for sales outside of the Phoenix Valley, and in all seasons except the summer for sales within the Phoenix Valley. The Pinnacle West Companies submitted a compliance filing implementing this order to the FERC on October 12, 2007. This compliance filing was accepted conditionally by FERC in an order issued January 17, 2008. In compliance with the January 17, 2008 order, the Pinnacle West Companies filed a revised mitigation plan to implement cost-based rates for sales in the Phoenix Valley during the summer months. The first summer period under this cost-based mitigation will begin on June 1, 2008. We are awaiting a response from the FERC regarding the approval of our proposed mitigation plan.

Based upon an analysis of this matter, at this time neither Pinnacle West nor APS believes that this proceeding will have a material adverse effect on its financial position, results of operations or cash flows.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

6. Retirement Plans and Other Benefits

Pinnacle West sponsors a qualified defined benefit and account balance pension plan, a nonqualified supplemental excess benefit retirement plan (SEBRP), and other postretirement benefit plans for the employees of Pinnacle West and our subsidiaries. Pinnacle West uses a December 31 measurement date for its pension and other postretirement benefit plans. The market-related value of our plan assets is their fair value at the measurement date.

The following table provides details of the plans' benefit costs for the three months ended March 31, 2008 and 2007. Also included is the portion of these costs charged to expense, including administrative costs and excluding amounts billed to electric plant participants or capitalized as overhead construction (dollars in millions):

	Pension Benefits		Other Benefits	
	Three Months		Three Months	
	Ended March 31,		Ended March 31,	
	2008	2007	2008	2007
Service cost-benefits earned during the period	\$ 13	\$ 14	\$ 5	\$ 6
Interest cost on benefit obligation	27	27	10	10
Expected return on plan assets	(29)	(29)	(11)	(12)
Amortization of:				
Transition obligation			1	1
Prior service cost	1	1		
Net actuarial loss	4	4	1	2
Net periodic benefit cost	\$ 16	\$ 17	\$ 6	\$ 7
Portion of cost charged to expense	\$ 7	\$ 8	\$ 3	\$ 3
APS' share of costs charged to expense	\$ 7	\$ 7	\$ 3	\$ 3

Contributions

The contribution to our pension plan in 2008 is estimated to be approximately \$50 million. The contribution to our other postretirement benefit plans in 2008 is estimated to be approximately \$20 million. APS and other subsidiaries fund their share of the contributions. APS' share is approximately 96% of the plans.

7. Business Segments

Pinnacle West's two reportable business segments are:

our regulated electricity segment, which consists of traditional regulated retail and wholesale electricity businesses (primarily electricity service to Native Load

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

customers) and related activities and includes electricity generation, transmission and distribution; and

our real estate segment, which consists of SunCor's real estate development and investment activities.

Financial data for the three months ended March 31, 2008 and 2007 and at March 31, 2008 and December 31, 2007 is provided as follows (dollars in millions):

	Three Months Ended March 31,	
	2008	2007
Operating Revenues:		
Regulated electricity segment	\$ 623	\$ 536
Real estate segment	48	77
All other (a)	66	82
Total	\$ 737	\$ 695
Net Income (Loss):		
Regulated electricity segment	\$ (6)	\$ 4
Real estate segment	(1)	9
All other (a)	3	4
Total	\$ (4)	\$ 17

	As of March 31, 2008	As of December 31, 2007
Assets:		
Regulated electricity segment	\$ 10,399	\$ 10,356
Real estate segment	658	661
All other (a)	141	145
Total	\$ 11,198	\$ 11,162

(a) Includes activities related to marketing and trading, APSES and El Dorado. None of these segments is a reportable segment.

8. Income Taxes

As a result of a change in IRS guidance, we claimed a tax deduction related to an APS tax accounting method change on our 2001 federal consolidated income tax return. The accelerated deduction resulted in a \$200 million reduction in the current income tax liability and a corresponding increase in the plant-related deferred tax liability. Our 2001 federal consolidated income tax return is currently under examination by the IRS. As part of its ongoing examination, the IRS is reviewing this accounting method change and the resultant deduction. Within the next three months, we expect that the IRS will finalize its examination of the 2001 return, which will include a settlement on the tax accounting method change. Although the ultimate outcome of this matter cannot currently be predicted, as a result of the current status of the examination, we have increased by approximately \$13 million our estimate of the amounts of unrecognized tax benefits included in accrued taxes and other deferred credits on the Condensed Consolidated Balance Sheets at March 31, 2008. We do not expect the ultimate outcome of this examination to have a material adverse impact on our financial position or results of operations. We expect that it will have a negative impact on cash flows, but do not believe it will materially affect our ability to meet our on-going capital requirements. We do not expect that there will be any other significant increases or decreases in our unrecognized tax benefits within the next 12 months.

9. Variable-Interest Entities

In 1986, APS entered into agreements with three separate VIE lessors in order to sell and lease back interests in Palo Verde Unit 2. The leases are accounted for as operating leases in accordance with GAAP. We are not the primary beneficiary of the Palo Verde VIEs and, accordingly, do not consolidate them.

APS is exposed to losses under the Palo Verde sale leaseback agreements upon the occurrence of certain events that APS does not consider to be reasonably likely to occur. Under certain circumstances (for example, the NRC issuing specified violation orders with respect to Palo Verde or the occurrence of specified nuclear events), APS would be required to assume the debt associated with the transactions, make specified payments to the equity participants, and take title to the leased Unit 2 interests, which, if appropriate, may be required to be written down in value. If such an event had occurred as of March 31, 2008, APS would have been required to assume approximately \$194 million of debt and pay the equity participants approximately \$170 million.

10. Derivative and Energy Trading Accounting

We use derivative instruments (primarily forward purchases and sales, swaps, options and futures) to manage our exposure to the commodity price risk inherent in the purchase and sale of fuel, electricity and emission allowances and credits. As of March 31, 2008, we hedged exposures to the price variability of the power and gas commodities for a maximum of 39 months. The changes in market value of such contracts have a high correlation to price changes in the hedged transactions.

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Cash Flow Hedges

The changes in the fair value of our hedged positions included in the Condensed Consolidated Statements of Income, after consideration of amounts deferred under the PSA, for the three months ended March 31, 2008 and 2007 are comprised of the following (dollars in thousands):

	Three Months Ended March 31,	
	2008	2007
Gains on the ineffective portion of derivatives qualifying for hedge accounting	\$1,090	\$911
Gains from the discontinuance of cash flow hedges		314

During the next twelve months ending March 31, 2009, we estimate that a net gain of \$101 million before income taxes will be reclassified from accumulated other comprehensive income as an offset to the effect of market price changes for the related hedged transactions. To the extent the amounts are eligible for inclusion in the PSA, the amounts will be recorded as either a regulatory asset or liability and have no effect on earnings.

FIN 39-1

We adopted FASB Staff Position No. FIN 39-1, Amendment of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts (FIN 39-1) on January 1, 2008. In accordance with this guidance, we elected to offset the fair value amounts for derivative instruments, including collateral, executed with the same counterparty under a master netting arrangement. Collateral was previously reported in other current assets or other current liabilities on our Condensed Consolidated Balance Sheets. This guidance required retrospective application for all prior periods presented. As a result, our Condensed Consolidated Balance Sheet and Statement of Cash Flows line items changed by the following amounts (dollars in thousands):

Total	\$ 57,605	\$ 48,928	\$ (24,510)	\$ (4,701)	\$ 77,322

We maintain a margin account with a broker to support our risk management and trading activities. The margin account was a liability of \$56 million at March 31, 2008 and an asset of \$31 million at December 31, 2007 and is included in the margin account in the table above. Cash is deposited with the broker in this account at the time futures or options contracts are initiated. The change in market value of these contracts (reflected in mark-to-market) requires adjustment of the margin account balance.

See Note 20 for a discussion of SFAS No. 157, Fair Value Measurements, which we adopted January 1, 2008.

Credit Risk

We are exposed to losses in the event of nonperformance or nonpayment by counterparties. We have risk management and trading contracts with many counterparties, including one counterparty for which a worst case exposure represents approximately 19% of Pinnacle West's \$242 million of risk management and trading assets as of March 31, 2008. Our risk management process assesses and monitors the financial exposure of this and all other counterparties. Despite the fact that the great majority of trading counterparties' securities are rated as investment grade by the credit rating agencies, including the counterparty discussed above, there is still a possibility that one or more of these companies could default, resulting in a material impact on consolidated earnings for a given period. Counterparties in the portfolio consist principally of financial institutions, major energy companies, municipalities and local distribution companies. We maintain credit policies that we believe minimize overall credit risk to within acceptable limits. Determination of the credit quality of our counterparties is based upon a number of factors, including credit ratings and our evaluation of their financial condition. To manage credit risk, we employ collateral requirements, standardized agreements that allow for the netting of positive and negative exposures associated with a single counterparty and credit default swaps. Valuation adjustments are established representing our estimated credit losses on our overall exposure to counterparties.

11. Comprehensive Income

Components of comprehensive income for the three months ended March 31, 2008 and 2007 are as follows (dollars in thousands):

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

	Three Months Ended March 31,	
	2008	2007
Net income (loss)	\$ (4,473)	\$ 16,530
Other comprehensive income (loss):		
Net unrealized gains on derivative instruments (a)	119,806	62,560
Net reclassification of realized gains on derivative instruments to income (b)	(2,065)	(5,013)
Reclassification of pension and other postretirement benefits to income	1,043	251
Net income tax expense related to items of other comprehensive income	(46,481)	(22,570)
Total other comprehensive income	72,303	35,228
Comprehensive income	\$ 67,830	\$ 51,758

(a) These amounts primarily include unrealized gains and losses on contracts used to hedge our forecasted electricity and natural gas requirements to serve Native Load. These changes are primarily due to changes in forward natural gas prices and wholesale electricity prices.

(b) These amounts primarily include the reclassification of unrealized gains and losses to realized for contracted

commodities
delivered during
the period.

12. Commitments and Contingencies

Palo Verde Nuclear Generating Station

Spent Nuclear Fuel and Waste Disposal

Nuclear power plant operators are required to enter into spent fuel disposal contracts with the DOE, and the DOE is required to accept and dispose of all spent nuclear fuel and other high-level radioactive wastes generated by domestic power reactors. Although the Nuclear Waste Policy Act required the DOE to develop a permanent repository for the storage and disposal of spent nuclear fuel by 1998, the DOE has announced that the repository cannot be completed before at least 2017. In November 1997, the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit) issued a decision preventing the DOE from excusing its own delay, but refused to order the DOE to begin accepting spent nuclear fuel. Based on this decision and the DOE's delay, a number of utilities, including APS (on behalf of itself and the other Palo Verde owners), filed damages actions against the DOE in the Court of Federal Claims. APS is currently pursuing that damages claim and trial is expected to occur in 2009.

Table of Contents

**PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

APS currently estimates it will incur \$132 million (in 2008 dollars) over the life of Palo Verde for its share of the costs related to the on-site interim storage of spent nuclear fuel. At March 31, 2008, APS had a regulatory liability of \$15 million that represents amounts recovered in retail rates in excess of amounts spent for on-site interim spent fuel storage.

California Energy Market Issues and Refunds in the Pacific Northwest

FERC

In July 2001, the FERC ordered an expedited fact-finding hearing to calculate refunds for spot market transactions in California during a specified time frame. APS was a seller and a purchaser in the California markets at issue and, to the extent that refunds are ordered, APS should be a recipient as well as a payor of such amounts. The FERC is still considering the evidence and refund amounts have not yet been finalized. However, on September 6, 2005, the Ninth Circuit issued a decision, concluding that the FERC may not order refunds from entities that are not within the FERC's jurisdiction. Because a number of the entities owing refunds under the FERC's calculations are not within the FERC's jurisdiction, this order may affect the level of recovery of refunds due in this proceeding. In addition, on August 8, 2005, the FERC issued an order allowing sellers in the California markets to demonstrate that its refund methodology results in an overall revenue shortfall for their transactions in the relevant markets over a specified time frame. More than twenty sellers made such cost recovery filings on September 14, 2005. On January 26, 2006, the FERC conditionally accepted thirteen of these filings, reducing the refund liability for these sellers. Correspondingly, this will reduce the recovery of total refunds in the California markets. On August 2, 2006, the Ninth Circuit issued a decision on the appropriate temporal scope and the type of transactions that are properly subject to the refund orders. In the decision, the Court preserved the scope of the FERC's existing refund proceedings, but also expanded it potentially to include additional transactions, remanding the orders to the FERC for further proceedings. Various parties filed petitions for rehearing on this order. In addition, on December 19, 2006, the Ninth Circuit issued a decision on the appropriate standard of review at the FERC on wholesale power contracts in the refund proceedings, specifically addressing the application of the so-called "just and reasonable" standard as opposed to the "public interest" standard. In so doing, the Ninth Circuit remanded the matter back to the FERC with the requirement that the FERC review the refund matter using the appropriate standard of review. Several parties sought rehearing of this decision at the Ninth Circuit. Like the August 2, 2006 Ninth Circuit decision, the December 19, 2006 decision has the potential to expand the existing FERC refund proceedings. A settlement, resolving APS's issues with certain California parties for the current refund period, was filed with the FERC on May 2, 2008, which will be followed by a sixty-day comment period at the FERC. We currently believe the refund claims at the FERC related to the parties not involved in this settlement, as well as the claims related to the parties involved in the settlement, will have no material adverse impact on our financial position, results of operations or cash flows.

On March 19, 2002, the State of California filed a complaint with the FERC alleging that wholesale sellers of power and energy, including APS, failed to properly file rate information at the FERC in connection with sales to California from 2000 to the present under market-based rates. The complaint requests the FERC to require the wholesale sellers to refund any rates that are found to exceed just and reasonable levels. This complaint was dismissed by the FERC, and the State of California appealed the matter to the Ninth Circuit Court of Appeals. In an

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

order issued September 9, 2004, the Ninth Circuit upheld the FERC's authority to permit market-based rates, but rejected the FERC's claim that it was without authority to consider retroactive refunds when a utility has not strictly adhered to the quarterly reporting requirements of the market-based rate system. On September 9, 2004, the Ninth Circuit remanded the case to the FERC for further proceedings. Following several years of procedural activity, on March 20, 2008, the FERC re-opened its proceedings. We believe that, once the settlement mentioned above is approved by the FERC, this matter also will be dismissed as to APS. Accordingly, we currently believe that the outcome of these further proceedings will have no material adverse impact on our financial position, results of operations or cash flows.

On March 26, 2003, the FERC made public a Final Report on Price Manipulation in Western Markets, prepared by its staff and covering spot markets in the West in 2000 and 2001. The report stated that a significant number of entities who participated in the California markets during the 2000-2001 time period, including APS, may potentially have been involved in arbitrage transactions that allegedly violated certain provisions of the Independent System Operator tariff. After reviewing the matter, along with the data supplied by APS, the FERC staff moved to dismiss the claims against APS and to dismiss the proceeding. The motion to dismiss was granted by the FERC on January 22, 2004. Certain parties have sought rehearing of this order, and that request is pending. Under the pending settlement agreement mentioned above, filed with the FERC on May 2, 2008, these parties will withdraw their request for rehearing once the settlement is approved by the FERC.

On July 25, 2001, the FERC also ordered an evidentiary proceeding to discuss and evaluate possible refunds for wholesale sales in the Pacific Northwest. The FERC affirmed the ALJ's conclusion that the prices in the Pacific Northwest were not unreasonable or unjust and refunds should not be ordered in this proceeding. This decision was appealed to the U.S. Court of Appeals for the Ninth Circuit. On August 24, 2007, the Ninth Circuit issued an opinion that remanded the proceeding to the FERC for further consideration. Petitions for rehearing of this opinion were filed on December 17, 2007. Although the FERC ruling in this matter is being appealed and the FERC has not yet calculated the specific refund amounts at issue, we do not expect that the resolution of these issues will have a material adverse impact on our financial position, results of operations or cash flows.

Navajo Nation Litigation

In June 1999, the Navajo Nation served Salt River Project with a lawsuit filed in the United States District Court for the District of Columbia (the "D.C. Lawsuit") naming Salt River Project, several Peabody Coal Company entities (collectively, "Peabody"), Southern California Edison Company and other defendants, and citing various claims in connection with the renegotiations of the coal royalty and lease agreements under which Peabody mines coal for the Navajo Generating Station and the Mohave Generating Station. APS is a 14% owner of the Navajo Generating Station, which Salt River Project operates. The D.C. Lawsuit alleges, among other things, that the defendants obtained a favorable coal royalty rate by improperly influencing the outcome of a federal administrative process under which the royalty rate was to be adjusted. The suit seeks \$600 million in damages, treble damages, punitive damages of not less than \$1 billion, and the ejection of defendants from all possessory interests and Navajo Tribal lands arising out of the [primary coal lease]. In July 2001, the court dismissed all claims against Salt River Project.

Table of Contents

**PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

In January 2005, Peabody served APS with a lawsuit filed in the Circuit Court for the City of St. Louis naming APS and the other Navajo Generating Station participants and seeking, among other things, a declaration that the participants are obligated to reimburse Peabody for any royalty, tax, or other obligation arising out of the D.C. Lawsuit. Based on APS' ownership interest in the Navajo Generating Station, APS could be liable for up to 14% of any such obligation. APS cannot currently predict the outcome of this matter.

Superfund

Superfund establishes liability for the cleanup of hazardous substances found contaminating the soil, water or air. Those who generated, transported or disposed of hazardous substances at a contaminated site are among those who are PRPs. PRPs may be strictly, and often jointly and severally, liable for clean-up. On September 3, 2003, the EPA advised APS that the EPA considers APS to be a PRP in the Motorola 52nd Street Superfund Site, Operable Unit 3 (OU3) in Phoenix, Arizona. APS has facilities that are within this Superfund site. APS and Pinnacle West have agreed with the EPA to perform certain investigative activities of the APS facilities within OU3. Because the investigation has not yet been completed and ultimate remediation requirements are not yet finalized, at the present time neither APS nor Pinnacle West can accurately estimate the expenditures that may be required.

Salt River Project

Salt River Project has notified APS that Salt River Project allegedly failed to bill APS for (a) energy losses under certain service schedules of a power contract between the parties and (b) certain other charges under the contract. Salt River Project asserts that certain of these failures to bill APS for such losses and charges may extend back to 1996 and, as a result, claims that APS owes it approximately \$29 million. APS disputes that it is required to pay these amounts. No lawsuit or litigation has been initiated in the matter at this time. We do not expect that resolution of this matter will have a material adverse impact on our financial position, results of operations, or cash flows.

Litigation

We are party to various other claims, legal actions and complaints arising in the ordinary course of business, including but not limited to environmental matters related to the Clean Air Act, Navajo Nation issues and EPA and ADEQ issues. In our opinion, the ultimate resolution of these matters will not have a material adverse effect on our financial position, results of operations or cash flows.

Table of Contents

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

13. Nuclear Insurance

The Palo Verde participants have insurance for public liability resulting from nuclear energy hazards to the full limit of liability under federal law. This potential liability is covered by primary liability insurance provided by commercial insurance carriers in the amount of \$300 million and the balance by an industry-wide retrospective assessment program. If losses at any nuclear power plant covered by the program exceed the accumulated funds, APS could be assessed retrospective premium adjustments. The maximum assessment per reactor under the program for each nuclear incident is approximately \$101 million, subject to an annual limit of \$15 million per incident, to be periodically adjusted for inflation. Based on APS' interest in the three Palo Verde units, APS' maximum potential assessment per incident for all three units is approximately \$88 million, with an annual payment limitation of approximately \$13 million.

The Palo Verde participants maintain all risk (including nuclear hazards) insurance for property damage to, and decontamination of, property at Palo Verde in the aggregate amount of \$2.75 billion, a substantial portion of which must first be applied to stabilization and decontamination. APS has also secured insurance against portions of any increased cost of generation or purchased power and business interruption resulting from a sudden and unforeseen accidental outage of any of the three units. The property damage, decontamination, and replacement power coverages are provided by Nuclear Electric Insurance Limited (NEIL). APS is subject to retrospective assessments under all NEIL policies if NEIL's losses in any policy year exceed accumulated funds. The maximum amount of retrospective assessments APS could incur under the current NEIL policies totals \$21.1 million. The insurance coverage discussed in this and the previous paragraph is subject to certain policy conditions and exclusions.

14. Other Income and Other Expense

The following table provides detail of other income and other expense for the three months ended March 31, 2008 and 2007 (dollars in thousands):

	Three Months Ended March 31,	
	2008	2007
Other income:		
Interest income	\$ 2,243	\$ 3,413
SunCor other income (a)	1,596	579
Miscellaneous	9	520
Total other income	\$ 3,848	\$ 4,512
Other expense:		
Non-operating costs	\$ (1,930)	\$ (3,311)
Investment losses - net	(2,668)	(1,739)
Miscellaneous	(310)	(1,303)
Total other expense	\$ (4,908)	\$ (6,353)

(a) Includes equity earnings from a real estate joint venture that is a pass-through

entity for tax
purposes.

15. Guarantees

We have issued parental guarantees and letters of credit and obtained surety bonds on behalf of our subsidiaries. Our parental guarantees for Pinnacle West Marketing & Trading and APS relate to commodity energy products. Our credit support instruments enable APSES to offer energy-related products and commodity energy. Non-performance or non-payment under the original contract by our subsidiaries would require performance under the guarantee or surety bond. No liability is currently recorded on the Condensed Consolidated Balance Sheets related to Pinnacle West's current outstanding guarantees on behalf of our subsidiaries. Our guarantees have no recourse or collateral provisions to allow us to recover amounts paid under the guarantees. The amounts and approximate terms of our guarantees and surety bonds for each subsidiary at March 31, 2008 are as follows (dollars in millions):

	Guarantees		Surety Bonds	
	Amount	Term (in years)	Amount	Term (in years)
Parental:				
Pinnacle West Marketing & Trading	\$ 19	1	\$	
APSES	18	1	17	1
APS	4	1		
Total	\$ 41		\$ 17	

At March 31, 2008, Pinnacle West had approximately \$7 million of letters of credit related to workers compensation expiring in 2009. We intend to provide from either existing or new facilities for the extension, renewal or substitution of the letters of credit to the extent required.

APS has entered into various agreements that require letters of credit for financial assurance purposes. At March 31, 2008, approximately \$200 million of letters of credit were outstanding to support existing pollution control bonds of approximately \$200 million. The letters of credit are available to fund the payment of principal and interest of such debt obligations and expire in 2010. APS has also entered into approximately \$79 million of letters of credit to support certain equity lessors in the Palo Verde sale leaseback transactions (see Note 9 for further details on the Palo Verde sale leaseback transactions). These letters of credit expire in 2010. Additionally, at March 31, 2008, APS had approximately \$4 million of letters of credit related to counterparty collateral requirements expiring in 2008. APS intends to provide from either existing or new facilities for the extension, renewal or substitution of the letters of credit to the extent required.

We enter into agreements that include indemnification provisions relating to liabilities arising from or related to certain of our agreements; most significantly, APS has agreed to indemnify the equity participants and other parties in the Palo Verde sale leaseback transactions with respect to certain tax matters. Generally, a maximum obligation is not explicitly stated in the indemnification provisions and, therefore, the overall maximum amount of the obligation under such indemnification provisions cannot be reasonably estimated. Based on historical experience and evaluation of the specific indemnities, we do not believe that any material loss related to such indemnification provisions is likely.

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

16. Earnings Per Share

The following table presents earnings per weighted average common share outstanding for the three months ended March 31, 2008 and 2007:

	Three Months Ended March 31,	
	2008	2007
Basic earnings per share:		
Income (loss) from continuing operations	\$ (0.05)	\$ 0.16
Income from discontinued operations	0.01	0.01
Earnings per share basic	\$ (0.04)	\$ 0.17
Diluted earnings per share:		
Income (loss) from continuing operations	\$ (0.05)	\$ 0.16
Income from discontinued operations	0.01	
Earnings per share diluted	\$ (0.04)	\$ 0.16

For the three months ended March 31, 2008, the weighted average common shares outstanding were the same for both basic and diluted shares. There were 703,875 outstanding options to purchase shares of common stock that were excluded from the computation of diluted earnings per share because the impact of including those options would be antidilutive.

Dilutive stock options and performance shares (which are contingently issuable) increased average common shares outstanding by approximately 577,000 shares for the three months ended March 31, 2007. All the outstanding options to purchase shares of common stock were included in the computation of diluted earnings per share because the options' exercise prices were less than the average market price of the common shares for the three-month period ended March 31, 2007.

17. Discontinued Operations

SunCor (real estate segment) - In 2008 and 2007, SunCor sold or expects to sell commercial properties that are required to be reported as discontinued operations on Pinnacle West's Condensed Consolidated Statements of Income in accordance with SFAS No. 144. Assets held for sale relate to commercial properties in the amount of \$51 million at March 31, 2008 and \$7 million at December 31, 2007. Total revenues related to discontinued operations included in Pinnacle West's Condensed Consolidated Statements of Income for the three months ended March 31, 2008 and 2007 were immaterial.

18. Nuclear Decommissioning Trust

To fund the costs APS expects to incur to decommission Palo Verde, APS established external decommissioning trusts in accordance with NRC regulations. APS invests the trust funds in fixed income securities and domestic equity securities. APS applies the provisions of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, in accounting for investments in

Table of Contents

PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

decommissioning trust funds, and classifies these investments as available for sale. As a result, we record the decommissioning trust funds at their fair value on our Condensed Consolidated Balance Sheets. Because of the ability of APS to recover decommissioning costs in rates and in accordance with the regulatory treatment for decommissioning trust funds, we have recorded the offsetting amount of gains (losses) on investment securities in other regulatory liabilities or assets. The following table summarizes the fair value of APS nuclear decommissioning trust fund assets at March 31, 2008 and December 31, 2007 (dollars in millions):

	Trust Fund Assets	Total Unrealized Gains
March 31, 2008		
Equity securities fair value	\$ 159	\$ 51
Fixed income securities fair value	218	7
Net payables(a)	(5)	
Total	\$ 372	\$ 58

(a) Net payables relate to pending securities sales and purchases.

December 31, 2007		
Equity securities fair value	\$ 175	\$ 68
Fixed income securities fair value	204	5
Total	\$ 379	\$ 73

The costs of securities sold are determined on the basis of specific identification. The following table sets forth approximate gains and losses and proceeds from the sale of securities by the nuclear decommissioning trust funds (dollars in millions):

	Three Months Ended March 31,	
	2008	2007
Realized gains	\$ 1	\$ 1
Realized losses	(1)	(1)
Proceeds from the sale of securities	67	63

The fair value of fixed income securities, summarized by contractual maturities, at March 31, 2008 is as follows (dollars in millions):

	March 31, 2008
Fair Value	
Less than one year	\$ 24
1 year 5 years	41
5 years 10 years	36
Greater than 10 years	117
Total	\$ 218

See Note 20 for a discussion of SFAS No. 157, Fair Value Measurements, which we adopted January 1, 2008.

Table of Contents

**PINNACLE WEST CAPITAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

19. New Accounting Standards

See Note 20 for a discussion of SFAS No. 157, Fair Value Measurements, which we adopted January 1, 2008.

See Notes 10 and S-1 for a discussion of FASB Staff Position No. FIN 39-1, Amendment of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts (FIN 39-1), which we adopted January 1, 2008.

SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities was effective for us on January 1, 2008. This guidance provides companies with an option to report selected financial assets and liabilities at fair value. We did not elect the fair value option for any of our financial assets or liabilities therefore, SFAS No. 159 did not have an impact on our financial statements.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities. This guidance requires enhanced disclosures about derivative instruments and hedging activities. The Statement is effective for us on January 1, 2009. We are currently evaluating this new guidance but do not expect it to have a material impact on our financial statements.

20. Fair Value Measurements

We adopted SFAS No. 157, Fair Value Measurements, on January 1, 2008. This new standard defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. We apply fair value measurements to derivative instruments and nuclear decommissioning trust assets. The adoption of SFAS No. 157 did not have a material impact on our financial statements.

SFAS No. 157 requires companies to disclose the fair value of certain assets and liabilities according to a fair value hierarchy. This hierarchy ranks the quality and reliability of the inputs used to determine fair values, which are then classified and disclosed in one of three categories. The three levels of the fair value hierarchy are:

Level 1 quoted prices in active markets for identical assets or liabilities.

Level 2 quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active; and model-derived valuations whose inputs are observable.

Level 3 model-derived valuations with unobservable inputs that are supported by little or no market activity.

As required by SFAS No. 157, assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels. The following table presents the fair value at March 31, 2008 of our assets and liabilities that are measured at fair value on a recurring basis for both Pinnacle West Consolidated and APS (dollars in millions):

Table of Contents**S-1. Derivative and Energy Trading Accounting**

APS is exposed to the impact of market fluctuations in the commodity price of electricity, natural gas and emissions allowances. As part of its overall risk management program, APS uses various commodity instruments that qualify as derivatives to hedge purchases and sales of electricity, fuels, and emission allowances and credits. As of March 31, 2008, APS hedged exposures to these risks for a maximum of 39 months.

Cash Flow Hedges

The changes in the fair value of APS hedged positions included in the APS Condensed Statements of Income, after consideration of amounts deferred under the PSA, for the three months ended March 31, 2008 and 2007 were comprised of the following (dollars in thousands):

	Three Months Ended March 31,	
	2008	2007
Gains on the ineffective portion of derivatives qualifying for hedge accounting	\$1,090	\$911
Gains from the discontinuance of cash flow hedges		150

During the next twelve months ending March 31, 2009, APS estimates that a net gain of \$77 million before income taxes will be reclassified from accumulated other comprehensive income as an offset to the effect of market price changes for the related hedged transactions. To the extent the amounts are eligible for inclusion in the PSA, the amounts will be recorded as either a regulatory asset or liability and have no effect on earnings.

FIN 39-1

We adopted FASB Staff Position No. FIN 39-1, Amendment of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts (FIN 39-1), on January 1, 2008. In accordance with this guidance, we elected to offset the fair value amounts for derivative instruments, including collateral, executed with the same counterparty under a master netting arrangement. Collateral was previously reported in other current assets or other current liabilities on our Condensed Balance Sheets. This guidance required retrospective application for all prior periods presented. As a result, APS Condensed Balance Sheet and Statement of Cash Flows line items changed by the following amounts (dollars in thousands):

Table of Contents

	As originally reported in the 2007 Form 10-K	Reclassifications as a result of the adoption of FIN 39-1	After adoption of FIN 39-1
Balance Sheet - December 31, 2007

Margin account liability	(62,049)		(500)		(62,549)
Collateral provided to counterparties					
Collateral provided from counterparties					
Total	\$ 100,825	\$ 101,032	\$ (17,567)	\$ (10,993)	\$ 173,297

Table of Contents

	Current	Investments and Other	Current	Deferred Credits and Other	Net Asset
December 31, 2007	Assets	Assets	Liabilities		
Mark-to-market	\$ 2,815	\$ 41,603	\$ (26,197)	\$ (4,573)	\$ 13,648
Margin account	30,650		6,148		36,798
Collateral provided to counterparties	622		128		750
Collateral provided from counterparties					
Total	\$ 34,087	\$ 41,603	\$ (19,921)	\$ (4,573)	\$ 51,196

We maintain a margin account with a broker to support our risk management and trading activities. The margin account was a liability of \$56 million at March 31, 2008 and an asset of \$31 million at December 31, 2007 and is included in the margin account in the table above. Cash is deposited with the broker in this account at the time futures or options contracts are initiated. The change in market value of these contracts (reflected in mark-to-market) requires adjustment of the margin account balance.

See Note 20 for a discussion of SFAS No. 157, Fair Value Measurements, which we adopted January 1, 2008.

S-2. Comprehensive Income

Components of APS comprehensive income for the three months ended March 31, 2008 and 2007 are as follows (dollars in thousands):

	Three Months Ended March 31,	
	2008	2007
Net income (loss)	\$ (6,364)	\$ 4,317
Other comprehensive income (loss):		
Net unrealized gains on derivative instruments (a)	107,016	50,545
Net reclassification of realized losses on derivative instruments to income (b)	3,318	741
Reclassification of pension and other postretirement benefits to income	795	
Net income tax expense related to items of other comprehensive income	(43,740)	(20,124)
Total other comprehensive income	67,389	31,162
Comprehensive income	\$ 61,025	\$ 35,479

Table of Contents

(a) These amounts primarily include unrealized gains and losses on contracts used to hedge our forecasted electricity and natural gas requirements to serve Native Load. These changes are primarily due to changes in forward natural gas prices and wholesale electricity prices.

(b) These amounts primarily include the reclassification of unrealized gains and losses to realized gains and losses for contracted commodities delivered during the period.

S-3. Other Income and Other Expense

The following table provides detail of APS other income and other expense for the three months ended March 31, 2008 and 2007 (dollars in thousands):

	Three Months Ended March 31,	
	2008	2007
Other income:		
Interest income	\$ 1,723	\$ 3,347
Investment gains net		377
Miscellaneous	341	709
Total other income	\$ 2,064	\$ 4,433

Other expense:		
Non-operating costs (a)	\$ (3,322)	\$ (3,233)

(a) As defined by the FERC, includes below-the-line non-operating utility income and expense (items excluded from utility rate recovery).

Table of Contents

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
INTRODUCTION**

The following discussion should be read in conjunction with Pinnacle West's Condensed Consolidated Financial Statements and Arizona Public Service Company's Condensed Financial Statements and the related Notes that appear in Item 1 of this report.

OVERVIEW

Pinnacle West owns all of the outstanding common stock of APS. APS is a vertically-integrated electric utility that provides retail and wholesale electric service to most of the state of Arizona, with the major exceptions of about one-half of the Phoenix metropolitan area, the Tucson metropolitan area and Mohave County in northwestern Arizona. APS has historically accounted for a substantial part of our revenues and earnings, and is expected to continue to do so. Although customer growth in APS' service territory has recently decreased, it is still above the national average and remains an important driver of our revenues and earnings.

Our cash flows and profitability are affected by the rates APS may charge and the timely recovery of costs through those rates. APS' retail rates are regulated by the ACC and its wholesale electric rates (primarily for transmission) are regulated by the FERC. APS' capital expenditure requirements, which are discussed below under Liquidity and Capital Resources, are substantial because of customer growth in APS' service territory and inflationary impacts on the capital budget, highlighting APS' need for the timely recovery through rates of these and other expenditures. On March 24, 2008, APS filed a rate case with the ACC requesting, among other things, an increase in rates to help defray rising infrastructure costs, approval of an impact fee and approval of new conservation rates. Details of the current ACC rate case and other retail and wholesale rate matters are discussed in Note 5.

SunCor, our real estate development subsidiary, has been an important source of earnings in recent years, although SunCor's earnings in 2007 and expected earnings in 2008 reflect the weak real estate market. See discussion below in Pinnacle West Consolidated Factors Affecting our Financial Outlook Subsidiaries. Our subsidiary, APSES, provides energy-related products and services and competitive commodity-related energy services to commercial and industrial retail customers in the western United States. Recently, APSES has de-emphasized its commodity-related energy services. El Dorado, our investment subsidiary, owns minority interests in several energy-related investments and Arizona community-based ventures.

We continue to focus on solid operational performance in our electricity generation and delivery activities. In the delivery area, we focus on superior reliability and customer satisfaction. We plan to expand long-term energy resources and our transmission and distribution systems to meet the electricity needs of our growing retail customers and sustain reliability.

See Pinnacle West Consolidated Factors Affecting Our Financial Outlook below for a discussion of several factors that could affect our future financial results.

Table of Contents**EARNINGS CONTRIBUTION BY BUSINESS SEGMENT**

Pinnacle West's two reportable business segments are:

our regulated electricity segment, which consists of traditional regulated retail and wholesale electricity businesses (primarily electric service to Native Load customers) and related activities and includes electricity generation, transmission and distribution; and

our real estate segment, which consists of SunCor's real estate development and investment activities.

The following table summarizes net income (loss) for the three months ended March 31, 2008 and 2007 (dollars in millions):

	Three Months Ended March 31,	
	2008	2007
Regulated electricity segment	\$ (6)	\$ 4
Real estate segment	(1)	9
All other (a)	3	4
Net income (loss)	\$ (4)	\$ 17

(a) Includes activities related to marketing and trading, APSES and El Dorado. None of these segments is a reportable segment.

PINNACLE WEST CONSOLIDATED RESULTS OF OPERATIONS**Operating Results Three-month period ended March 31, 2008 compared with three-month period ended March 31, 2007**

Our consolidated net loss for the three months ended March 31, 2008 was \$4 million compared with net income of \$17 million for the comparable prior-year period. Net income decreased \$21 million in the period-to-period comparison and is reflected in the segments as follows:

Regulated Electricity Segment Net income decreased approximately \$10 million primarily due to higher operations and maintenance expense related to increased costs for generation (including more planned overhauls and maintenance) and increased customer service and other costs; and higher depreciation and amortization primarily due to higher plant balances. These negative factors were partially offset by higher retail sales primarily due to customer growth.

Real Estate Segment Net income decreased approximately \$10 million primarily due to lower land parcel sales resulting from the weak real estate market.

Additional details on the major factors that increased (decreased) net income for the three-month period ended March 31, 2008 compared with the prior-year period are contained in the following table (dollars in millions):

Table of Contents

	Increase (Decrease)	
	Pretax	After Tax
Regulated electricity segment:		
Higher retail sales primarily due to customer growth, excluding weather effects	\$ 6	\$ 4
Impacts of retail rate increase effective July 1, 2007 and transmission rate increase effective March 1, 2008:		
Retail revenue increase primarily related to higher Base Fuel Rate	63	38
Decreased deferred fuel and purchased power costs related to higher Base Fuel Rate	(65)	(40)
Transmission rate increase	3	2
Operations and maintenance increases primarily due to:		
Increased generation costs, including more planned overhauls and maintenance	(14)	(9)
Increased customer service and other costs	(10)	(6)
Higher depreciation and amortization primarily due to higher plant balances	(6)	(4)
Miscellaneous items, net	10	5
Decrease in regulated electricity segment net income	(13)	(10)
Lower real estate segment net income primarily due to lower land parcel sales resulting from the weak real estate market	(17)	(10)
Other miscellaneous items, net	(1)	(1)
Decrease in net income	\$ (31)	\$ (21)

Regulated Electricity Segment Revenues

Regulated electricity segment revenues were \$87 million higher for the three months ended March 31, 2008 compared with the prior-year period primarily because of:

a \$63 million increase in retail revenues due to a rate increase effective July 1, 2007;

a \$17 million increase in revenues from Off-System Sales due to higher prices and volumes;

an \$8 million increase in retail revenues primarily related to customer growth, excluding weather effects;

a \$3 million increase due to a transmission rate increase effective March 1, 2008;

an \$18 million decrease in retail revenues related to recovery of PSA deferrals, which had no earnings effect because of amortization of the same amount recorded as fuel and purchased power expense; and

a \$14 million net increase due to miscellaneous factors.

Table of Contents

Real Estate Segment Revenues

Real estate segment revenues were \$29 million lower for the three months ended March 31, 2008 compared with the prior-year period primarily because of the weak real estate market.

All Other Revenues

All other revenues were \$16 million lower for the three months ended March 31, 2008 compared with the prior-year period primarily due to a \$15 million decrease in marketing and trading revenues as a result of lower mark-to-market gains because of changes in forward prices and lower sales volumes.

LIQUIDITY AND CAPITAL RESOURCES Pinnacle West Consolidated

Operating Cash Flows

Net cash provided by operating activities was \$246 million for the three months ended March 31, 2008, compared with \$215 million for the comparable prior-year period, an increase in net cash flow of \$31 million. This increase was primarily due to a change in the amount of margin cash collected from counterparties as a result of changes in commodity prices, partially offset by other miscellaneous factors.

Investing Cash Flows

Net cash used for investing activities was \$248 million for the three months ended March 31, 2008, compared with \$184 million for the comparable prior-year period, a decrease in net cash flow of \$64 million.

This cash flow decrease was primarily due to:

An increase in cash used for capital expenditures and capitalized interest of \$33 million (see table and discussion below); and

A decrease of \$33 million in net cash proceeds from the sale of securities at APS.

Financing Cash Flows

Net cash used for financing activities was \$36 million for the three months ended March 31, 2008, compared with net cash provided by financing activities of \$3 million for the comparable prior-year period, a decrease in net cash flow of \$39 million.

This cash flow decrease was primarily due to:

A net decrease of \$33 million in short-term borrowings to fund day-to-day operations and liquidity needs; and

A net decrease of \$6 million due to miscellaneous factors.

Table of Contents**Liquidity****Capital Expenditure Requirements**

The following table summarizes the actual capital expenditures for the three months ended March 31, 2007 and 2008 and estimated capital expenditures, net of contributions in aid of construction, for the next three years:

CAPITAL EXPENDITURES

(dollars in millions)

	Three Months Ended		Estimated for the Year Ended		
	March 31,		December 31,		
	2007	2008	2008	2009	2010
APS					
Distribution	\$ 97	\$ 88	\$ 380	\$ 340	\$ 280
Generation	45	89	380	390	380
Transmission	40	37	220	320	290
Other (a)	1	4	50	40	50
Subtotal	183	218	1,030	1,090	1,000
SunCor (b)	39	15	50	30	100
Other	1	5	20	20	10
Total	\$ 223	\$ 238	\$ 1,100	\$ 1,140	\$ 1,110

- (a) Primarily information systems and facilities projects.
- (b) Primarily capital expenditures for residential, land development and retail and office building construction reflected in Real estate investments and Capital expenditures on the Condensed Consolidated Statements of Cash Flows.

Distribution and transmission capital expenditures are comprised of infrastructure additions and upgrades, capital replacements, new customer construction and related information systems and facility costs. Examples of the types of projects included in the forecast include power lines, substations, line extensions to new residential and commercial developments and upgrades to customer information systems, partially offset by amounts for the recent changes in the line extension policy. See Line Extension Schedule in Note 3 of the 2007 Form 10-K for further details regarding the

recent changes to the line extension policy.

Generation capital expenditures are comprised of various improvements to APS existing fossil and nuclear plants. Examples of the types of projects included in this category are additions, upgrades and capital replacements of various power plant equipment such as turbines, boilers and environmental equipment. Installation of new steam generators in Palo Verde Unit 3 was completed in the fourth quarter of 2007 at an approximate cost of \$70 million (APS share), which completed the steam generator replacement program for all three units. Environmental expenditures are estimated at approximately \$70 million to \$120 million per year for 2008, 2009 and 2010. We are also monitoring the status of certain environmental matters, which, depending on their final outcome, could require additional environmental expenditures. (See Business of Arizona Public Service Company

Table of Contents

Environmental Matters Regional Haze Rules in Item 1 of the 2007 Form 10-K.) Generation also includes nuclear fuel expenditures of approximately \$90 million to \$120 million per year for 2008, 2009 and 2010.

Capital expenditures will be funded with internally generated cash and/or external financings, which may include issuances of long-term debt and Pinnacle West common stock.

Pinnacle West (Parent Company)

Our primary cash needs are for dividends to our shareholders and principal and interest payments on our long-term debt. The level of our common stock dividends and future dividend growth will be dependent on a number of factors including, but not limited to, payout ratio trends, free cash flow and financial market conditions.

Our primary sources of cash are dividends from APS, external debt and equity financings and cash distributions from our other subsidiaries, primarily SunCor. An existing ACC order requires APS to maintain a common equity ratio of at least 40% and prohibits APS from paying common stock dividends if the payment would reduce its common equity below that threshold. As defined in the ACC order, the common equity ratio is common equity divided by the sum of common equity and long-term debt, including current maturities of long-term debt. At March 31, 2008, APS common equity ratio, as defined, was approximately 54%.

Pinnacle West sponsors a qualified defined benefit and account balance pension plan and a non-qualified supplemental excess benefit retirement plan for the employees of Pinnacle West and our subsidiaries. IRS regulations require us to contribute a minimum amount to the qualified plan. We contribute at least the minimum amount required under IRS regulations, but no more than the maximum tax-deductible amount. The minimum required funding takes into consideration the value of plan assets and our pension obligation. The assets in the plan are comprised of fixed-income, equity and short-term investments. Future year contribution amounts are dependent on plan asset performance and plan actuarial assumptions. We contributed approximately \$52 million in 2007. The contribution to our pension plan in 2008 is estimated to be approximately \$50 million. The expected contribution to our other postretirement benefit plans in 2008 is estimated to be approximately \$20 million. APS and other subsidiaries fund their share of the contributions. APS share is approximately 96% of both plans.

On April 22, 2008, the Pinnacle West Board of Directors declared a quarterly dividend of \$0.525 per share of common stock, payable on June 2, 2008, to shareholders of record on May 1, 2008.

See Equity Infusion Notice in Note 5 for information regarding Pinnacle West's filing of a notice with the ACC regarding a potential equity infusion into APS of up to \$400 million during 2008.

APS

APS capital requirements consist primarily of capital expenditures and mandatory redemptions of long-term debt. APS pays for its capital requirements with cash from operations, equity infusions from Pinnacle West and, to the extent necessary, external financings. APS has historically paid its dividends to Pinnacle West with cash from operations. See Pinnacle West (Parent Company) above for a discussion of the common equity ratio that APS must maintain in order to pay dividends to Pinnacle West.

Other Financing Matters Although APS defers actual retail fuel and purchased power costs on a current basis, APS recovery of the deferrals from its ratepayers is subject to annual and, if necessary,

Table of Contents

periodic PSA adjustments. See *PSA Modifications* in Note 3, Item 8 of the 2007 Form 10-K for information regarding the PSA approved by the ACC.

See *Cash Flow Hedges* in Note 10 for information related to the change in our margin account.

Other Subsidiaries

During the past three years, SunCor funded its cash requirements with cash from operations and its own external financings. SunCor's capital needs consist primarily of capital expenditures for land development and retail and office building construction. See the capital expenditures table above for actual capital expenditures during the three months ended March 31, 2007 and 2008 and projected capital expenditures for the next three years. SunCor expects to fund its future capital requirements with cash from operations and external financings.

El Dorado expects minimal capital requirements over the next three years and intends to focus on prudently realizing the value of its existing investments.

APSES expects minimal capital expenditures over the next three years.

Debt Provisions

Pinnacle West's and APS' debt covenants related to their respective bank financing arrangements include debt to capitalization ratios. Certain of APS' bank financing arrangements also include an interest coverage test. Pinnacle West and APS comply with these covenants and each anticipates it will continue to meet these and other significant covenant requirements. For both Pinnacle West and APS, these covenants require that the ratio of consolidated debt to total consolidated capitalization not exceed 65%. At March 31, 2008, the ratio was approximately 51% for Pinnacle West and 47% for APS. The provisions regarding interest coverage require minimum cash coverage of two times the interest requirements for APS. The interest coverage was approximately 4.7 times under APS' bank financing agreements as of March 31, 2008. Failure to comply with such covenant levels would result in an event of default which, generally speaking, would require the immediate repayment of the debt subject to the covenants and could cross-default other debt. See further discussion of *cross-default* provisions below.

Neither Pinnacle West's nor APS' financing agreements contain *rating triggers* that would result in an acceleration of the required interest and principal payments in the event of a rating downgrade. However, our bank financial agreements contain a pricing grid in which the interest costs we pay are determined by our current credit ratings.

All of Pinnacle West's loan agreements contain *cross-default* provisions that would result in defaults and the potential acceleration of payment under these loan agreements if Pinnacle West or APS were to default under certain other material agreements. All of APS' bank agreements contain *cross-default* provisions that would result in defaults and the potential acceleration of payment under these bank agreements if APS were to default under certain other material agreements. Pinnacle West and APS do not have a material adverse change restriction for revolver borrowings.

See Note 4 for further discussions.

Table of Contents**Credit Ratings**

The ratings of securities of Pinnacle West and APS as of May 5, 2008 are shown below. The ratings reflect the respective views of the rating agencies, from which an explanation of the significance of their ratings may be obtained. There is no assurance that these ratings will continue for any given period of time. The ratings may be revised or withdrawn entirely by the rating agencies if, in their respective judgments, circumstances so warrant. Any downward revision or withdrawal may adversely affect the market price of Pinnacle West's or APS' securities and serve to increase the cost of and access to capital. It may also require additional collateral related to certain derivative instruments, natural gas transportation, fuel supply, and other energy-related contracts.

	Moody's	Standard & Poor's	Fitch
Pinnacle West			
Senior unsecured (a)	Baa3 (P)	BB+ (prelim)	N/A
Commercial paper	P-3	A-3	F3
Outlook	Negative	Stable	Negative
APS			
Senior unsecured	Baa2	BBB-	BBB
Secured lease obligation bonds	Baa2	BBB-	BBB
Commercial paper	P-2	A-3	F3
Outlook	Negative	Stable	Stable

(a) Pinnacle West has a shelf registration under SEC Rule 415. Pinnacle West currently has no outstanding, rated senior unsecured securities. However, Moody's assigned a provisional (P) rating and Standard & Poor's assigned a preliminary (prelim) rating to the senior unsecured securities that can be issued under such shelf registration.

Off-Balance Sheet Arrangements

In 1986, APS entered into agreements with three separate VIE lessors in order to sell and lease back interests in Palo Verde Unit 2. The leases are accounted for as operating leases in accordance with GAAP. We are not the primary beneficiary of the Palo Verde VIEs and, accordingly, do not consolidate them (see Note 9).

APS is exposed to losses under the Palo Verde sale leaseback agreements upon the occurrence of certain events that APS does not consider to be reasonably likely to occur. Under certain circumstances (for example, the NRC issuing specified violation orders with respect to Palo Verde or the occurrence of specified nuclear events), APS would be required to assume the debt associated with the transactions, make specified payments to the equity participants, and take title to the leased Unit 2 interests, which, if appropriate, may be required to be written down in value. If such an event had occurred as of March 31, 2008, APS would have been required to assume approximately \$194 million of debt and pay the equity participants approximately \$170 million.

Guarantees and Letters of Credit

We have issued parental guarantees and letters of credit and obtained surety bonds on behalf of our subsidiaries. Our parental guarantees for Pinnacle West Marketing & Trading and APS relate to

Table of Contents

commodity energy products. Our credit support instruments enable APSES to offer energy-related products and commodity energy. Non-performance or non-payment under the original contract by our subsidiaries would require performance under the guarantee or surety bond. No liability is currently recorded on the Condensed Consolidated Balance Sheets related to Pinnacle West's current outstanding guarantees on behalf of our subsidiaries. Our guarantees have no recourse or collateral provisions to allow us to recover amounts paid under the guarantees. We generally agree to indemnification provisions related to liabilities arising from or related to certain of our agreements, with limited exceptions depending on the particular agreement. See Note 15 for additional information regarding guarantees and letters of credit.

Contractual Obligations

Our future contractual obligations related to fuel and purchased power contracts have increased from approximately \$3.1 billion at December 31, 2007 to \$8.0 billion at March 31, 2008 as follows (dollars in billions):

2008	2009-2010	2011-2012	Thereafter	Total
\$0.5	\$0.7	\$0.7	\$6.1	\$8.0

This increase is primarily due to contingent obligations related to renewable energy contracts, primarily the 280MW solar project described in Portfolio Resources Alternative Generation Sources in Part I, Item 1 of the 2007 Form 10-K.

See Note 4 for a list of payments due on total long-term debt and capitalized lease requirements.

CRITICAL ACCOUNTING POLICIES

In preparing the financial statements in accordance with GAAP, management must often make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures at the date of the financial statements and during the reporting period. Some of those judgments can be subjective and complex and actual results could differ from those estimates. Our most critical accounting policies include the impacts of regulatory accounting, the determination of the appropriate accounting for our pension and other postretirement benefits and derivatives accounting. There have been no changes to our critical accounting policies since our 2007 Form 10-K. See Critical Accounting Policies in Item 7 of the 2007 Form 10-K for further details about our critical accounting policies.

OTHER ACCOUNTING MATTERS

See Note 20 for a discussion of SFAS No. 157, Fair Value Measurements, which we adopted January 1, 2008.

See Notes 10 and S-1 for a discussion of FASB Staff Position No. FIN 39-1, Amendment of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts (FIN 39-1), which we adopted January 1, 2008.

We adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities effective January 1, 2008. This guidance provides companies with an option to report

Table of Contents

selected financial assets and liabilities at fair value. We did not elect the fair value option for any of our financial assets or liabilities therefore, SFAS No. 159 did not have an impact on our financial statements.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities. This guidance requires enhanced disclosures about derivative instruments and hedging activities. The Statement is effective for us on January 1, 2009. We are currently evaluating this new guidance but do not expect it to have a material impact on our financial statements.

**PINNACLE WEST CONSOLIDATED FACTORS AFFECTING
OUR FINANCIAL OUTLOOK**

Factors Affecting Operating Revenues, Fuel and Purchased Power Costs

General Electric operating revenues are derived from sales of electricity in regulated retail markets in Arizona and, to a lesser extent, from competitive retail and wholesale power markets in the western United States. For the years 2005 through 2007, retail electric revenues comprised approximately 84% of our total electric operating revenues. Our electric operating revenues are affected by electricity sales volumes related to customer growth, variations in weather from period to period, customer mix, average usage per customer, electricity rates and tariffs and the recovery of PSA deferrals. Off-System Sales of excess generation output, purchased power and natural gas are included in regulated electricity segment revenues and related fuel and purchased power because they are credited to APS retail customers through the PSA. These revenue transactions are affected by the availability of excess economic generation or other energy resources and wholesale market conditions, including demand and prices. Competitive retail sales of energy and energy-related products and services are made by APSES in certain western states that have opened to competition.

Rate Proceedings Our cash flows and profitability are affected by the rates APS may charge and the timely recovery of costs through those rates. APS retail rates are regulated by the ACC and its wholesale electric rates (primarily for transmission) are regulated by the FERC. APS capital expenditure requirements, which are discussed above under Liquidity and Capital Resources - Capital Expenditure Requirements, are substantial because of customer growth in APS service territory and inflationary impacts on the capital budget, highlighting APS need for the timely recovery through rates of these and other expenditures. On March 24, 2008, APS filed a rate case with the ACC requesting, among other things, an increase in rates to help defray rising infrastructure costs, approval of an impact fee and approval of new conservation rates. Details of the current ACC rate case and other retail and wholesale rate matters are discussed in Note 5.

Fuel and Purchased Power Costs Fuel and purchased power costs included on our Condensed Consolidated Statements of Income are impacted by our electricity sales volumes, existing contracts for purchased power and generation fuel, our power plant performance, transmission availability or constraints, prevailing market prices, new generating plants being placed in service in our market areas, our hedging program for managing such costs and, since April 1, 2005, PSA deferrals and the amortization thereof. See PSA Modifications in Note 3, Item 8 of the 2007 Form 10-K for information regarding the PSA. APS recovery of PSA deferrals from its ratepayers is subject to annual and, if necessary, periodic PSA adjustments.

Customer and Sales Growth The customer and sales growth referred to in this paragraph apply to Native Load customers and sales to them. Customer growth in APS service territory for the three-month period ended March 31, 2008 was 2.0% compared with the prior-year period. Customer growth

Table of Contents

averaged 4.0% a year for the three years 2005 through 2007; and we currently expect customer growth to decline, averaging about 1% to 2% per year for 2008 through 2010 due to factors reflecting the economic conditions both nationally and in Arizona. For the three years 2005 through 2007, APS' actual retail electricity sales in kilowatt-hours grew at an average annual rate of 4.8%; adjusted to exclude the effects of weather variations, such retail sales growth averaged 3.8% a year. We currently estimate that total retail electricity sales in kilowatt-hours will grow 1% to 2% on average per year, during 2008 through 2010, excluding the effects of weather variations. We currently expect our retail sales growth in 2008 to be below average because of potential effects on customer usage from the economic conditions mentioned above and retail rate increases (see Note 5).

Actual sales growth, excluding weather-related variations, may differ from our projections as a result of numerous factors, such as economic conditions, customer growth, usage patterns and responses to retail price changes. Our experience indicates that a reasonable range of variation in our kilowatt-hour sales projection attributable to such economic factors can result in increases or decreases in annual net income of up to \$10 million.

Weather In forecasting retail sales growth, we assume normal weather patterns based on historical data. Historical extreme weather variations have resulted in annual variations in net income in excess of \$20 million. However, our experience indicates that the more typical variations from normal weather can result in increases or decreases in annual net income of up to \$10 million.

Wholesale Market Our marketing and trading activities focus primarily on managing APS' risks relating to fuel and purchased power costs in connection with its costs of serving Native Load customer demand. Our marketing and trading activities include, subject to specified parameters, marketing, hedging and trading in electricity, fuels and emission allowances and credits. See *Rate Requests for Transmission and Ancillary Services* in Note 5 for information regarding APS' filing with the FERC requesting an increase in transmission rates.

Other Factors Affecting Financial Results

Operations and Maintenance Expenses Operations and maintenance expenses are impacted by growth, power plant operations, maintenance of utility plant (including generation, transmission, and distribution facilities), inflation, outages, higher-trending pension and other postretirement benefit costs and other factors.

Depreciation and Amortization Expenses Depreciation and amortization expenses are impacted by net additions to utility plant and other property (such as new generation, transmission, and distribution facilities), and changes in depreciation and amortization rates. See *Capital Expenditures* above for information regarding planned additions to our facilities.

Property Taxes Taxes other than income taxes consist primarily of property taxes, which are affected by the value of property in-service and under construction, assessment ratios, and tax rates. The average property tax rate for APS, which currently owns the majority of our property, was 8.3% of the assessed value for 2007 and 8.9% of assessed value for 2006. We expect property taxes to increase as we add new utility plant (including new generation, transmission and distribution facilities) and as we improve our existing facilities. See *Capital Expenditures* above for information regarding planned additions to our facilities.

Table of Contents

Interest Expense Interest expense is affected by the amount of debt outstanding and the interest rates on that debt. The primary factors affecting borrowing levels are expected to be our capital expenditures, long-term debt maturities, and internally generated cash flow. Capitalized interest offsets a portion of interest expense while capital projects are under construction. We stop accruing capitalized interest on a project when it is placed in commercial operation.

Retail Competition Although some very limited retail competition existed in Arizona in 1999 and 2000, there are currently no active retail electric service providers providing unbundled energy or other utility services to APS customers. We cannot predict when, and the extent to which, additional electric service providers will re-enter APS service territory.

Subsidiaries SunCor's net income was \$24 million in 2007, \$61 million in 2006 and \$56 million in 2005. See Note 17 for further discussion. We currently expect minimal contributions from SunCor in 2008. This estimate reflects the weak real estate market.

The historical results of APSES, Pinnacle West Marketing & Trading and El Dorado are not indicative of future performance.

General Our financial results may be affected by a number of broad factors. See Forward-Looking Statements below for further information on such factors, which may cause our actual future results to differ from those we currently seek or anticipate.

Market Risks

Our operations include managing market risks related to changes in interest rates, commodity prices and investments held by our nuclear decommissioning trust fund.

Interest Rate and Equity Risk

We have exposure to changing interest rates. Changing interest rates will affect interest paid on variable-rate debt and the market value of fixed income securities held by our nuclear decommissioning trust fund. The nuclear decommissioning trust fund also has risks associated with the changing market value of its investments. Nuclear decommissioning costs are recovered in regulated electricity prices.

Commodity Price Risk

We are exposed to the impact of market fluctuations in the commodity price and transportation costs of electricity, natural gas and emissions allowances. Our ERMC, consisting of officers and key management personnel, oversees company-wide energy risk management activities and monitors the results of marketing and trading activities to ensure compliance with our stated energy risk management and trading policies. We manage risks associated with these market fluctuations by utilizing various commodity instruments that qualify as derivatives, including exchange-traded futures and options and over-the-counter forwards, options and swaps. As part of our risk management program, we use such instruments to hedge purchases and sales of electricity, fuels and emissions allowances and credits. The changes in market value of such contracts have a high correlation to price changes in the hedged commodities.

The following tables show the net pretax changes in mark-to-market value of our derivative positions for the three months ended March 31, 2008 and 2007 (dollars in millions):

Table of Contents

	Three Months Ended March 31,	
	2008	2007
Mark-to-market of net positions at beginning of period	\$ 40	\$ 15
Recognized in earnings:		
Change in mark-to-market gains for future period deliveries	13	11
Mark-to-market (gains) losses realized including ineffectiveness during the period	2	(6)
Decrease in regulatory asset	98	53
Recognized in OCI:		
Change in mark-to-market gains for future period deliveries (a)	119	63
Mark-to-market gains realized during the period	(2)	(5)
Change in valuation techniques		
Mark-to-market of net positions at end of period	\$ 270	\$ 131

(a) The increases in regulated mark-to-market recorded in OCI are due primarily to increases in forward natural gas prices.

The tables below show the net fair value of maturities of our derivative contracts (dollars in millions) at March 31, 2008 by maturities and by the type of valuation that is performed to calculate the fair values. See Note 1, Derivative Accounting, in Item 8 of our 2007 Form 10-K and Note 20 for more discussion of our valuation methods.

Source of Fair Value	2008	2009	2010	2011	2012	Years thereafter	Total fair value
Level 1 - Quoted prices in active markets	\$ 86	\$ 13	\$	\$	\$	\$	\$ 99
Level 2 - Significant other observable inputs	71	60	29	4			164
Level 3 - Significant unobservable inputs	(2)	(10)	(6)	5	6	14	7
Total by maturity	\$ 155	\$ 63	\$ 23	\$ 9	\$ 6	\$ 14	\$ 270

The table below shows the impact that hypothetical price movements of 10% would have on the market value of our risk management and trading assets and liabilities included on Pinnacle West's Condensed Consolidated Balance Sheets at March 31, 2008 and December 31, 2007 (dollars in millions):

Table of Contents

Mark-to-market changes reported in:	March 31, 2008		December 31, 2007	
	Gain (Loss)		Gain (Loss)	
	Price Up 10%	Price Down 10%	Price Up 10%	Price Down 10%
Earnings				
Electricity	\$ 4	\$ (4)	\$ 3	\$ (3)
Natural gas	4	(4)	4	(4)
Regulatory asset (liability) or OCI (a)				
Electricity	35	(35)	45	(45)
Natural gas	112	(112)	85	(85)
Total	\$ 155	\$ (155)	\$ 137	\$ (137)

- (a) These contracts are hedges of our forecasted purchases of natural gas and electricity. The impact of these hypothetical price movements would substantially offset the impact that these same price movements would have on the physical exposures being hedged. To the extent the amounts are eligible for inclusion in the PSA, the amounts are recorded as either a regulatory asset or liability.

Credit Risk

We are exposed to losses in the event of non-performance or non-payment by counterparties. See Note 1, Derivative Accounting in Item 8 of our 2007 Form 10-K for a discussion of our credit valuation adjustment policy.

See Note 10 for further discussion of credit risk.

ARIZONA PUBLIC SERVICE COMPANY RESULTS OF OPERATIONS

Operating Results Three-month period ended March 31, 2008 compared with three-month period ended March 31, 2007

Our net loss for the three months ended March 31, 2008 was \$6 million compared with net income of \$4 million for the comparable prior-year period. Net income decreased approximately \$10 million primarily due to higher operations and maintenance expense related to increased costs for generation (including more planned overhauls and maintenance) and increased customer service and other costs; and higher depreciation and amortization primarily due to higher plant balance. These negative factors were partially offset by higher retail sales primarily due to customer growth.

Additional details on the major factors that increased (decreased) net income for the three-month period ended March 31, 2008 compared with the prior-year period are contained in the following table (dollars in millions):

52

Table of Contents

	Increase (Decrease)	
	Pretax	After Tax
Higher retail sales primarily due to customer growth, excluding weather effects	\$ 6	\$ 4
Impacts of retail rate increase effective July 1, 2007 and transmission rate increase effective March 1, 2008:		
Retail revenue increase primarily related to higher Base Fuel Rate	63	38
Decreased deferred fuel and purchased power costs related to higher Base Fuel Rate	(65)	(40)
Transmission rate increase	3	2
Operations and maintenance increases primarily due to:		
Increased generation costs, including more planned overhauls and maintenance	(14)	(9)
Increased customer service and other costs	(8)	(5)
Higher depreciation and amortization primarily due to higher plant balances	(6)	(4)
Miscellaneous items, net	12	4
Decrease in net income	\$ (9)	\$ (10)

Regulated Electricity Segment Revenues

Regulated electricity segment revenues were \$87 million higher for the three months ended March 31, 2008 compared with the prior-year period primarily because of:

a \$63 million increase in retail revenues due to a rate increase effective July 1, 2007;

a \$17 million increase in revenues from Off-System Sales due to higher prices and volumes;

an \$8 million increase in retail revenues primarily related to customer growth, excluding weather effects;

a \$3 million increase due to a transmission rate increase effective March 1, 2008;

an \$18 million decrease in retail revenues related to recovery of PSA deferrals, which had no earnings effect because of amortization of the same amount recorded as fuel and purchased power expense; and

a \$14 million net increase due to miscellaneous factors.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES Arizona Public Service Company

Operating Cash Flows

Net cash provided by operating activities was \$266 million for the three months ended March 31, 2008, compared with \$185 million for the comparable prior year period, an increase in net cash flow of \$81 million. This change was primarily due a change in the amount of margin cash collected from counterparties as a result of changes in commodity prices and other miscellaneous factors.

Investing Cash Flows

Net cash used for investing activities was \$240 million for the three months ended March 31, 2008, compared with \$164 million for the comparable prior year period, a decrease in net cash flow of \$76 million.

This cash flow decrease was primarily due to:

An increase of \$43 million in cash used for capital expenditures and related capitalized interest costs (see table and discussion above); and

A decrease of \$33 million in net cash proceeds from the sale of securities.

Financing Cash Flows

Net cash used for financing activities was \$70 million for the three months ended March 31, 2008, compared with no cash used for the comparable prior year period, a decrease in net cash flow of \$70 million.

The cash flow decrease was primarily due to:

A net decrease of \$27 million in short-term borrowings to fund day-to-day operations and liquidity needs; and

A decrease of \$43 million due to the timing of dividends paid.

For additional discussion see LIQUIDITY AND CAPITAL RESOURCES Pinnacle West Consolidated.

Contractual Obligations

APS future contractual obligations related to fuel and purchased power contracts have increased from approximately \$3.0 billion at December 31, 2007 to \$7.9 billion at March 31, 2008 as follows (dollars in billions):

2008	2009-2010	2011-2012	Thereafter	Total
\$0.5	\$ 0.7	\$ 0.6	\$ 6.1	\$7.9

Table of Contents

This increase is primarily due to contingent obligations related to renewable energy contracts, primarily the 280MW solar project described in Portfolio Resources Alternative Generation Sources in Part I, Item 1 of the 2007 Form 10-K.

See Note 4 for a list of APS payments due on total long-term debt and capitalized lease requirements.

FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements based on current expectations, and neither Pinnacle West nor APS assumes any obligation to update these statements or make any further statements on any of these issues, except as required by applicable law. These forward-looking statements are often identified by words such as estimate, predict, hope, may, believe, anticipate, plan, expect, require, intend, assume and similar words. Because future results may differ materially from expectations, we caution readers not to place undue reliance on these statements. A number of factors could cause future results to differ materially from historical results, or from results or outcomes currently expected or sought by Pinnacle West or APS. In addition to the Risk Factors described in Item 1A of the 2007 Form 10-K, these factors include, but are not limited to:

state and federal regulatory and legislative decisions and actions, including the outcome or timing of the rate case filed with the ACC on March 24, 2008, as updated on or before June 3, 2008;

the outcome of regulatory, legislative and judicial proceedings, both current and future, relating to the restructuring of the electric industry and environmental matters (including those relating to climate change);

the ongoing restructuring of the electric industry, including decisions impacting wholesale competition and the introduction of retail electric competition in Arizona;

fluctuations in market prices for electricity, natural gas, coal, uranium and other fuels used in our generating facilities, and supplies of such commodities;

volatile market liquidity, any deteriorating counterparty credit and the use of derivative contracts in our business (including the interpretation of the subjective and complex accounting rules related to these contracts);

power plant performance and outages;

transmission outages and constraints;

weather variations affecting local and regional customer energy usage;

customer growth and energy usage;

regional economic and market conditions, including the results of litigation and other proceedings resulting from the California and Pacific Northwest energy situations, volatile fuel and purchased power costs, and the completion of generation and transmission construction in the region, which could affect customer growth and the cost of power supplies;

ability of power plant participants to meet contractual or other obligations;

the cost of debt and equity capital and access to capital markets;

current credit ratings remaining in effect for any given period of time;

our ability to compete successfully outside traditional regulated markets (including the wholesale market);

changes in accounting principles generally accepted in the United States of America and the interpretation of those principles;

Table of Contents

the performance of the stock market and the changing interest rate environment, which affect the value of our nuclear decommissioning trusts, pension and other postretirement benefit plan assets, the amount of required contributions to Pinnacle West's pension plan and contributions to APS' nuclear decommissioning trust funds, as well as the reported costs of providing pension and other postretirement benefits;

technological developments in the electric industry;

the strength of the real estate market in SunCor's market areas, which include Arizona, Idaho, New Mexico and Utah; and

other uncertainties, all of which are difficult to predict and many of which are beyond the control of Pinnacle West and APS.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See Pinnacle West Consolidated Factors Affecting Our Financial Outlook in Item 2 above for a discussion of quantitative and qualitative disclosures about market risks.

Item 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

The term disclosure controls and procedures means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Securities Exchange Act of 1934, as amended (the Exchange Act) (15 U.S.C. 78a *et seq.*), is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to a company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Pinnacle West's management, with the participation of Pinnacle West's Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of Pinnacle West's disclosure controls and procedures as of March 31, 2008. Based on that evaluation, Pinnacle West's Chief Executive Officer and Chief Financial Officer have concluded that, as of that date, Pinnacle West's disclosure controls and procedures were effective.

APS' management, with the participation of APS' Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of APS' disclosure controls and procedures as of March 31, 2008. Based on that evaluation, APS' Chief Executive Officer and Chief Financial Officer have concluded that, as of that date, APS' disclosure controls and procedures were effective.

(b) Changes in Internal Control Over Financial Reporting

The term internal control over financial reporting (defined in SEC Rule 13a-15(f)) refers to the process of a company that is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP.

Table of Contents

No change in Pinnacle West's or APS' internal control over financial reporting occurred during the fiscal quarter ended March 31, 2008 that materially affected, or is reasonably likely to materially affect, Pinnacle West's or APS' internal control over financial reporting.

Table of Contents**Part II OTHER INFORMATION****Item 1. LEGAL PROCEEDINGS**

See Note 12 in regard to pending or threatened litigation or other disputes. See also Federal Implementation Plan Four Corners and Superfund under Item 5 below.

Item 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in the 2007 Form 10-K, which could materially affect the business, financial condition, cash flows or future results of APS and Pinnacle West. The risks described in the 2007 Form 10-K are not the only risks facing APS and Pinnacle West. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect the business, financial condition, cash flows and/or operating results of APS and Pinnacle West.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Issuer Purchases of Equity Securities**

The following table contains information about our purchases of our common stock during the first quarter of 2008.

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 - January 31, 2008		\$		
February 1 - February 29, 2008	2,375	36.81		
March 1 - March 31, 2008	36,623	35.46		
Total	38,998	\$ 35.54		

(1) Represents shares of common stock withheld by Pinnacle West to satisfy tax withholding obligations upon the vesting of restricted stock.

Item 5. OTHER INFORMATION**Construction and Financing Programs**

See Liquidity and Capital Resources in Part I, Item 2 of this report for a discussion of construction and financing programs of the Company and its subsidiaries.

Regulatory Matters

See Note 5 for a discussion of regulatory developments.

Table of Contents**NRC Inspection**

In early 2007, the NRC placed Palo Verde Unit 3 in the multiple/repetitive degraded cornerstone column of the NRC's Action Matrix, which has resulted in an enhanced NRC inspection regime, including on-site in-depth inspections of Palo Verde equipment and operations. See Business of Arizona Public Service Company, Nuclear Generating Facility NRC Inspection in Item 1 of the 2007 Form 10-K for more information regarding the enhanced inspection regime and related procedures and correspondence between APS and the NRC. On March 31, 2008, APS submitted to the NRC a revision to its improvement plan to address issues raised by the NRC in its Inspection Report. The NRC will continue to provide increased oversight at Palo Verde until the facility demonstrates sustained performance improvement. APS will continue cooperating fully with the NRC throughout this process.

Environmental Matters**Superfund**

See Superfund in Note 12 for a discussion of a Superfund site.

By letter dated April 25, 2008, the EPA informed APS that it may be a PRP in the Gila River Indian Reservation Superfund Site in Maricopa County, Arizona. We are currently evaluating this matter and investigating whether APS owns land located within this Superfund site. Currently the EPA is only seeking payment from APS and other PRPs for past cleanup-related costs. We have not yet completed our review and are unable to predict the outcome of this matter; however, based upon the total amount of cleanup costs reported by the EPA in its letter to APS, we do not expect that the resolution of this matter will have a material adverse impact on our financial position, results of operations, or cash flows.

Mercury On March 15, 2005, the EPA issued the Clean Air Mercury Rule (CAMR) to control mercury emissions from coal-fired power plants. This rule established performance standards limiting mercury emissions from coal-fired power plants and established a two phased market-based emissions trading program. Under the trading program, the EPA assigned each state a mercury emissions budget and each state must submit to the EPA a plan detailing how it will meet its budget. In the first phase of the program, beginning in 2010, mercury emissions from all coal-fired power plants in the country will be reduced from a total of 48 tons per year to 38 tons. In 2018, those emissions will be further reduced to 15 tons.

In November 2006, ADEQ submitted a State Implementation Plan (SIP) to the EPA to implement the CAMR. ADEQ's SIP generally incorporated the EPA's model cap-and-trade program, but it included additional requirements, including the requirement to meet a 90% mercury removal control level or 0.0087 lbs/GWh, whichever is greater, the requirement to obtain mercury allowances at a 2:1 ratio for any emissions that fall below the specified control level, and the requirement, beginning in 2013, to consider clean coal technologies as part of permitting any new generation.

On February 8, 2008, the U.S. Court of Appeals for the D.C. Circuit vacated the CAMR and the EPA rule that allowed for the creation of the CAMR and, on March 14, 2008, the court issued the mandate to vacate these rules. The EPA is expected to ask for a rehearing of the decision and/or appeal to the Supreme Court. Unless and until this decision is overturned, the law in effect prior to the adoption of the CAMR becomes the applicable law, and requires the EPA to develop an emission limit for mercury that represents the maximum achievable control technology. It is expected to take the EPA several years to establish its standard, followed by a period of several years during which existing plants would implement any controls needed to comply with the standard. The court's ruling also invalidates CAMR-based portions of ADEQ's mercury rule (the trading provisions of the rule), although the state-only emission limits remain in effect. While we continue to monitor this matter, we cannot predict the final outcome of the court's proceeding (if a rehearing is requested or appeal filed), the response of ADEQ or the scope, timing or impact of any alternate rules that may be proposed to address mercury emissions.

We have installed, and continue to install, certain of the equipment necessary to meet the current mercury standards. However, due to the recent U.S. Court of Appeals decision, we will monitor the type and timing of any necessary equipment installation. The estimated costs expected to be incurred over the

Table of Contents

next three years for such equipment are included in our environmental expenditure estimates (see Management's Discussion and Analysis of Financial Condition and Results of Operation - Capital Expenditures in Item 2).

Federal Implementation Plan - Four Corners

As previously reported, in April 2007, the EPA adopted a source specific FIP to set air quality standards at Four Corners, after which APS filed a petition for review in the United States District Court of Appeals for the Tenth Circuit seeking revisions to the FIP to clarify certain requirements and allow operational flexibility. See Business of Arizona Public Service Company, Environmental Matters, Federal Implementation Plan - Four Corners FIP in Item 1 of the 2007 Form 10-K for additional details regarding this matter. Briefing in this case is now complete and the court scheduled oral arguments, as requested by the EPA, to occur in May 2008. We anticipate that the court will issue its opinion before the end of 2008. Although we cannot predict the outcome or the actual timing of these matters, we do not believe that they will have a material adverse impact on our financial position, results of operations or cash flows.

Climate Change

Legislative and Regulatory Initiatives. In the past several years, the United States Congress has considered bills that would regulate domestic greenhouse gas emissions, but such bills have not yet received sufficient Congressional approval to become law; however, there is growing consensus that some form of regulation or legislation is likely to occur in the near future at the federal level with respect to greenhouse gas emissions. In 2007, the United States Supreme Court ruled that greenhouse gases fit within the Clean Air Act's broad definition of "air pollutant" and, as a result, the EPA has the authority to regulate greenhouse gas emissions of new motor vehicles under the Clean Air Act. The court held that the only way the EPA can avoid regulating greenhouse gases is if it determines that the emissions do not contribute to climate change, or if the EPA provides a reasonable explanation for why it cannot or will not exercise its discretion to regulate these emissions. While this decision applies only to emissions from new motor vehicles, if the EPA determines that greenhouse gas emissions can reasonably be anticipated to endanger public health or welfare, this determination will likely impact other Clean Air Act programs as well, and could potentially result in new regulatory requirements for our power plants.

If any emission reduction legislation or regulations are enacted, we will assess our compliance alternatives, which may include replacement of existing equipment, installation of additional pollution control equipment, purchase of allowances, curtailing certain operations, or other actions. Although associated capital expenditures or operating costs resulting from greenhouse gas emission regulations or legislation could be material, we believe that we would be able to recover the costs of these environmental compliance initiatives through our rates.

Regional Initiative. In 2007, six western states (Arizona, California, New Mexico, Oregon, Utah and Washington) and two Canadian provinces (British Columbia and Manitoba) entered into an accord, the Western Climate Initiative (the Initiative), to reduce greenhouse gas emissions from automobiles and certain industries, including utilities. In August 2007, the Initiative participants set a goal of reducing greenhouse gas emissions 15% below 2005 levels by 2020. By August 2008, the Initiative participants intend to develop a plan for implementation of this goal. We believe that the implementation of any such program in Arizona would require legislative action. While we continue to monitor the impact of the Initiative, at the present time we cannot predict what form it will ultimately take, whether it will be implemented or, if it is implemented, what impact it will have on our operations.

Table of Contents

Company Response to Climate Change Initiatives. While we are currently not subject to state or federal limits on our greenhouse gas emissions, we have undertaken a number of initiatives to address emission concerns, including renewable energy development and the procurement and promotion of programs and rates related to energy conservation, renewable energy use and energy efficiency. APS currently has a diverse portfolio of renewable resources including wind, geothermal, solar and biomass and we are focused on increasing the percentage of our energy that is produced by renewable resources. (See Business of Arizona Public Service Company Alternative Generation Sources in Item 1 of the 2007 Form 10-K.) In addition, we are currently developing a Climate Management Report to comply with an ACC order in which the ACC directed APS to undertake a climate management plan, carbon emission reduction study and commitment and action plan with public input and ACC review. We expect to complete the report in 2008.

In January 2008, APS joined the Climate Registry as a Founding Reporter. Founding Reporters are companies that voluntarily join the non-profit organization before May 2008 to measure and report greenhouse gas emissions in a common, accurate and transparent manner consistent across industry sectors and borders. Pinnacle West has also reported, and will continue to report, greenhouse gas emissions in its annual Corporate Responsibility Report, which is available on our website (www.pinnaclewest.com). In addition to emissions data, the report provides information related to the Company, its approach to sustainability and its workplace and environmental performance. The information on Pinnacle West's website, including the Corporate Responsibility Report, is not incorporated by reference into this report.
