Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

(a joint stock limited company incorporated in the People's Republic
of China with limited liability)
(Stock Code : 0386)

Results for the Year Ended 31 December 2004

ss.1. Important Notice

- 1.1 The Board of Directors of China Petroleum & Chemical Corporation ("Sinopec Corp.") and the Directors warrant that there are no material omissions from, or misrepresentations or misleading statements contained in this announcement, and jointly and severally accept full responsibility for the authenticity, accuracy and completeness of the information contained in this announcement.

This announcement is a summary of the annual report. The entire report can be downloaded from the websites of the Shanghai Stock Exchange (www.sse.com.cn) and Sinopec Corp. (www.sinopec.com). Investors should read the annual report for the year 2004 for more details.

- 1.2 The annual report for this year has been approved unanimously at the fifteenth meeting of the Second Session of the Board. No Director has any doubt as to, or the inability to warrant, the truthfulness, accuracy and completeness of the annual report.
- 1.3 Messrs. Mou Shuling, Gao Jian, Fan Yifei, Ho Tsu Kwok, Charles and Zhang Youcai, Directors of Sinopec Corp., could not attend the fifteenth meeting of the Second Session of the Board for reasons of official duties. Mr. Mou Shuling, Director of Sinopec Corp., authorised Mr. Cao Xianghong, Mr. Fan Yifei, Director of Sinopec Corp., authorised Mr. Wang Jiming, Vice Chairman and President and Messrs. Gao Jian, Ho Tsu Kwok, Charles and Zhang Youcai, Directors of Sinopec Corp., authorised Mr. Chen Qingtai, respectively, to vote on their behalf in respect of the resolutions put forward in the fifteenth meeting of the Second Session of the Board.
- 1.4 The financial statements for the year ended 31 December 2004 of Sinopec Corp. and its subsidiaries ("the Company") prepared in accordance with the PRC Accounting Rules and Regulations and International Financial Reporting Standards ("IFRS") have been audited by KPMG Huazhen and KPMG, respectively, and both firms have issued unqualified opinions on the financial statements.

1

- 1.5 Mr. Chen Tonghai (Chairman of the Board), Mr. Wang Jiming (Vice Chairman and President), Mr. Zhang Jiaren (Director, Senior Vice President and Chief Financial Officer) and Mr. Liu Yun (Head of the Accounting Department) warrant the authenticity and completeness of the financial statements contained in the annual report for the year ended 31 December 2004.

5.4 Information on new appointment or removal of directors, supervisors and senior management and employees

Since Mr. Liu Keguo, an ex-director of Sinopec Corp., resigned from the Board of Directors of Sinopec Corp., the China Development Bank nominated Mr. Gao Jian as a candidate to the Board on 29 April 2004. At the Annual General Meeting for the year 2003 held on 18 May 2004, Mr. Gao Jian was elected as a member of the Second Session of the Board of Directors of Sinopec Corp.

ss.6. Report of the Board of Directors

6.1 Business review in the reporting period

6.1.1 Business Review

The global economy witnessed sound growth in 2004. Stable and rapid growth was also experienced in the domestic economy. In 2004, international oil prices continued its climb, the domestic demand for petrochemical products increased significantly, the petrochemical industry was on the rising trend in a new cycle. All of these factors provided favourable conditions for the Company to increase its market shares and profitability. The controlled prices of refined oil products set by the government as a result of the macro-economy control measures, however, posed higher requirements on our efforts and abilities to enhance operating profit. Facing the complex and ever-changing market situations, the Company closely monitored the changes to the international and domestic markets, adjusted its production and operation strategies accordingly, reinforced safety in production, carefully organized and arranged for production and operation, increased production efficiency and expanded market shares. Meanwhile, the Company reinforced its

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

internal management, pushed forward reform implementations and accelerated structural adjustments. With the joint efforts made by all the staff, the operating results once again reached a new high level.

13

6.1.1.1 Review of Market Environment

(1) Crude oil market

In 2004, the international crude oil prices continued its climb to a higher level, and the price spread between sweet and sour crude oil widened. The Platts Global Brent spot price averaged USD 38.27 per barrel, up by 32.73% over 2003. The trend of domestic crude oil prices basically followed the trend in the international market. However, as the increase in international benchmark prices for some of the Company's self-produced oil was not significant, in 2004, the average realized price of crude oil produced by the Company was USD 33.28 per barrel, up by 20.74% over 2003.

[GRAPHIC OMITTED]

Price Trend of International Crude Oil

(2) Refined oil products market

In 2004, domestic demand for refined oil products surged dramatically as a result of China's rapid economic growth, increase in the number of automobiles and power supply shortage in certain parts of the country. According to the Company's estimation, the apparent domestic consumption of refined oil products (inclusive of gasoline, diesel and kerosene) in 2004 was 157.06 million tonnes, up by 19.0% over last year. The trend of domestic refined oil product prices in principle followed the rising trend of international refined oil product prices, however, due to the control imposed by the government over prices of refined oil products as a result of the macro-economy control measures, the increase in domestic prices was less than the international prices.

14

(3) Chemicals market

In 2004, China's domestic demands for chemical products continued to grow significantly. The total apparent consumption of synthetic resins, synthetic fibres and synthetic rubber was 48.24 million tonnes, representing an increase of 11% over 2003. Domestic consumption of ethylene equivalent was 16.38 million tones, up by 5.8% over 2003. With the gradual recovery of the global chemical industry, the margin of chemical production increased remarkably and new price records of most

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

chemical products were repeatedly achieved.

6.1.1.2 Production and Operation

(1) Exploration and Production Segment

In 2004, by seizing the opportunity of high oil prices, the Company made great efforts in exploration and achieved relatively good results in exploration, development and production of crude oil and natural gas.

In connection with exploration activities, the Company completed a two dimensional seismic study of 31,750 kilometers, a three-dimensional seismic study of 7,030 square kilometers and drilled 590 test wells with a drilling footage of 1,484 kilometers. The proved oil and gas reserves in new exploration blocks in western China increased significantly, a breakthrough was made in southern marine phase sedimentary blocks and remarkable results were attained in terms of exploration in mature blocks and new areas in eastern China. At the end of 2004, the Company's proved reserves of crude oil were 3,267 million barrels and natural gas were 3,033 billion cubic feet, up by 0.31% and 5.04%, respectively, compared with 2003. In terms of development, the Company continually reinforced the comprehensive management in mature oil fields and development in new blocks in western China. In 2004, the Company drilled 2,365 development wells, with a drilling footage of 5,125.2 kilometers and newly built crude oil and natural gas production capacity were 6.09 million tonnes per year and 1.015 billion cubic meters per year, respectively. In 2004, the Company's production of crude oil and natural gas reached 274.15 million barrels and 207.0 billion cubic feet, respectively, representing an increase of 1.18% and 10.29%, respectively, over 2003.

15

Summary of Operations of the Exploration and Production Segment

	2004	2003	2002
Crude oil production (mmbbls)	274.15	270.96	269.80
Natural gas production (bcf)	207.0	187.7	178.8
Newly added proved reserves of crude oil (mmbbls)	284	208	375
Newly added proved reserves of natural gas (bcf)	352.0	(254.3)	20.2
Year end proved reserves of crude oil (mmbbls)	3,267	3,257	3,320
Year end proved reserves of natural gas (bcf)	3,033.0	2,887.6	3,329.4
Year end proved reserves of crude oil and natural gas (mmbboe)	3,773	3,738	3,875

(2) Refining Segment

In 2004, according to the international market condition of widened price spread between sweet and sour crude oil, the

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Company strived to reduce crude oil procurement costs by raising sour crude processing volume and optimising crude oil mix and transportation costs. Meanwhile, the Company enhanced operational performance of its facilities and brought their production capacity into full play, thus setting a new throughput record of crude oil and production record of refined oil products and light chemical feedstock. The Company processed 132.95 million tonnes of crude oil in 2004, an increase of 14.36% over 2003. The Company actively adjusted its product mix, increased the production of diesel and high value-added products to meet market demands. The Company put emphasis on market analysis and marketing management and, as a result, both the prices and volume of refined petroleum products sold by this segment had risen. The Company made efforts to revamp its existing oil refining facilities and improve product quality so that the production of high-grade gasoline amounted to 12.39 million tonnes, up by 34.2% over 2003. In addition, with enhanced management and scientific and technological advancement, all major economic and technical indicators of the Refining Segment were improved. The light products yield reached 74.02%, up by 0.22 percentage point over 2003, and the refining yield reached 93.09%, up by 0.46 percentage point over 2003.

16

Summary of Production of the Refining Segment

Except 2002, the following operation data of 2003 and 2004 both include those of Xi'an Petrochemical and Tahe Petrochemical.

	2004	2003	2002
Crude throughput (mmbbls/day)	2,677.2	2,350.0	2,114.6
of which: sour crude throughput (mmbbls/day)	551.1	478.7	402.8
Refinery utilization rate (%)	93.43	88.10	79.3
Gasoline, diesel and kerosene (million tonnes)	80.83	69.01	62.42
of which: Gasoline (million tonnes)	23.58	21.79	19.62
Diesel (million tonnes)	50.89	41.91	37.74
Kerosene including jet fuel (million tonnes)	6.36	5.31	5.06
Light chemical feedstock (million tonnes)	17.70	16.46	15.04
Light products yield (%)	74.02	73.80	73.22
Refining yield (%)	93.09	92.63	92.50

Notes: Crude oil processing volume is converted at 1 tonne = 7.35 barrels.

(3) Marketing and Distribution Segment

In 2004, the Company paid close attention to the changes of the market, balanced resources allocation, reinforced and improved construction of marketing network. The net increase in the number of company-owned and company-operated (COCO) petrol stations in 2004 was 2,075, of which, we have won the bid to establish 5 petrol stations in Hong Kong Special Administrative Region. The Company strengthened service awareness and improved service quality to expand both retail and direct sales volume, which had resulted in an increase in sales volume, and optimised structure of refined oil products. In 2004, the total domestic sales volume of refined oil products reached 94.59 million tonnes, representing an increase of 24.59% over 2003, of which the retail volume achieved an increase of 37.07% over the previous year. The efficiency of petrol stations continued to improve with the annual throughput per petrol station exceeding 2,000 tonnes, up by 18.8% compared with that in the previous year. The retail sales volume together with direct distribution volume of refined oil products accounted for 77.07% of the total domestic sales volume, up by 5.67 percentage points over 2003. In 2004, the Company reasonably adjusted its export volume to keep in line with market demand with a total export volume of 3.5156 million tonnes of refined oil products, down by 12% compared with that in 2003.

Summary of Operations of Marketing and Distribution Segment

	2004	2003	2002
Total domestic sales of refined oil products (million tonnes)	94.59	75.92	70.09
of which:			
Retail volume (million tonnes)	53.25	38.85	34.73
Direct sales volume (million tonnes)	19.65	15.33	12.63
Wholesale volume (million tonnes)	21.69	21.74	22.73
Average annual throughput per petrol station (tonne/station)	2,003	1,686	1,560
Total number of petrol stations under SINOPEC brand	30,063	30,242	28,127
Of which:			
Number of COCO petrol stations	26,581	24,506	24,000
Number of franchised petrol stations	3,482	5,736	4,127
Retail volume/total domestic sales volume (%)	56.3	51.2	49.6

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

(4) Chemicals Segment

In 2004, the Company strengthened the management of its chemicals operation to ensure safe, stable, sustained, full-load and optimal operations. It also optimised allocation of resources, such as chemical feedstock resources, to ensure the timely supply of raw materials and increased utilisation rate. As a result, the production of most chemical products increased significantly. In 2004, the Company produced 3.637 million tones of ethylene, up by 14.77% over 2003. The production of major chemical products, such as synthetic resins, synthetic fibres, monomers and polymers for synthetic fibres and synthetic rubbers, all increased significantly. As a result of the Company's endeavors to improve product mix and increase the production of market-adapted and high value-added products, ratio of performance compound of synthetic resin and differential fibre were increased significantly. Furtherm ore, the Company actively tapped the market and accomplished the targeted production and sales volumes. In addition, the Company achieved remarkable results in improving the marketing network of acrylic fibre, optimising allocation of resources and customers, improving the quality of customer services and unifying marketing mode. This enabled the Company to collect valuable experiences for the future reform of its chemical marketing system.

19

Production of Major Chemicals

The operating data of 2003 and 2004 listed in the table below include the data of Maoming Ethylene and the chemical assets acquired from Sinopec Group in 2004, while those of 2002 do not.

	2004	2003	2002	Unit:
Ethylene	4,074	3,982	2,716	
Synthetic resins	6,221	5,805	4,005	
of which: performance compound resins	3,034	2,707	1,847	
Synthetic rubbers	561	553	458	
Monomers and polymers for Synthetic fibres	6,021	5,633	3,834	
Synthetic fibres	1,654	1,659	1,153	
of which: differential fibres	753	623	402	
Urea	2,630	2,028	2,666	

(5) Research and development

In 2004, the Company proactively developed core technology and proprietary technology for its principal operations and

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

achieved fruitful results of 639 domestic patents and 48 foreign patents being authorised. Breakthrough was achieved in exploration in marine phase sedimentary structure in southern China. Additionally, the Company successfully developed technologies to improve recovery rate in oil fields with complex faultage, flexible and diversified FCC technology (FDFCC), sulfur removal and olefin content reduction technology through selective hydrofining of catalytic gasoline (RIDOS), and 150 thousand tonnes per year three-reactor PET technology.

New progress was made in the construction of information system. The ERP system was deployed at 23 entities and its integrated advantage became more prominent. The comprehensive oil field management system and the Ningbo-Shanghai-Nanjing crude oil pipeline transportation and distribution management system were completed and put into operation. Moreover, the application of IC cards at petrol stations achieved remarkable progress with total number of customers exceeded 2 million. Over 10,000 COCO petrol stations have been equipped with IC card facilities and the vision of "One card in hand, fueling nationwide" becomes more accessible.

20

(6) Cost saving

In 2004, the Company adopted a series of measures to reduce costs: optimising the allocation of resources and logistics system to reduce the transportation costs, increasing processing volume of sour crude to reduce procurement cost of crude oil and optimising the operation of facilities to cut down material and energy consumption. In 2004, the Company's cost reduction totalled RMB 2.951 billion, which is RMB 451 million more than the original target of RMB 2.5 billion. The breakdown is as follows: RMB 660 million from the Exploration and Production Segment, RMB 660 million from the Refining Segment, RMB 731 million from the Chemicals Segment and RMB 900 million from the Marketing and Distribution Segment.

(7) Capital expenditure

In 2004, according to the prevailing market conditions and our continued focus on our development strategies and core business, the Company adjusted and improved its investment structure, strictly followed investment decision making procedures and management methods and strengthened management of key construction projects. As a result of the above efforts, projects construction was accelerated. In 2004, the Company's total capital expenditure was RMB 64.759 billion, among which the capital expenditure of the Exploration and Production Segment was RMB 21.234 billion. The Company enhanced oil reserves as well as production of crude oil and natural gas, and further improved its profile of the possible, probable and proved reserves. As a result, remarkable achievements were made in the exploration and development projects in the matured fields in eastern China, newly developed fields in western China and marine phase blocks in southern China. In addition,

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

the Company's proved reserves of crude oil increased by 284 million barrels, and natural gas increased by 352 billion cubic feet. The capital expenditure of the Refining Segment was RMB 14.272 billion. The newly added primary refining capacity was 8.3 million tonnes/year, the newly added hydro-refining capacity was 4 million tonnes/year, and the newly added delayed coking capacity was 3.9 million tonnes/year. The upgrading projects for improving oil product quality were progressing smoothly and the Ningbo-Shanghai-Nanjing crude oil pipeline was completed and put into operation. The capital expenditure of the Marketing and Distribution Segment was RMB16.678 billion, which was principally used for the construction of pipelines for refined oil products and further optimising marketing networks for refined oil products by acquiring, building and upgrading petrol stations. As a result, in 2004, the number of COCO petrol stations was up by 2,075, securing the Company's leading position in its principal market and raising brand awareness and customer loyalty. The capital expenditure of the Chemicals Segment was RMB 11.025 billion. With the investment, our ethylene capacity was increased by 270,000 tonnes/year, synthetic resin capacity increased by 700,000 tonnes/year, and capacity of monomers and polymers for synthetic fibres increased by 360,000 tonnes/year. The coal gasification

21

projects for chemical fertiliser facilities progressed smoothly. The capital expenditure of the Company's headquarters and others totalled RMB 1.55 billion, with which the construction of information system achieved new progress.

In addition, such joint venture projects as Shanghai Secco progressed smoothly, capital expenditure was RMB 6.5 billion in total.

(8) Cooperation with foreign partners

In 2004, the Company's major joint ventures progressed smoothly. The ethylene joint venture with BP in Shanghai has been successfully commissioned, and that with BASF in Nanjing is currently in the commissioning phase. The joint venture with Shell for coal gasification in Hunan province is under construction and estimated to be completed by the end of 2005. The joint venture with ExxonMobil and Saudi Aromco for an integrated oil refining and chemical project in Fujian is under preparation. The joint ventures for the retail of refined oil products with BP and Shell in Jiangsu and Zhejiang, respectively, were formally put into operation.

6.1.2 Management's Discussion And Analysis

The financial information presented in the following discussion and analysis is derived from the Company's audited financial statements that have been prepared in accordance with International Financial Reporting Standard ("IFRS").

6.1.2.1 Consolidated Results of Operations

In 2004, the Company's turnover and other operating revenues were

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

RMB 619.8 billion and the operating profit was RMB 63.1 billion, representing an increase of 38.0% and 62.2% over those in the previous year respectively. These results are largely attributable to a number of factors. First, the international crude oil prices continued to be volatile and remained at a high level, the chemical industry was on the up trend cycle, and the domestic economy consistently maintained fast growth, all of which resulted in strong demand for chemical products and high prices of chemical products, which, in turn, provided favorable conditions for the Company to maximise its returns. Second, by taking the advantage of the favorable opportunities, the Company proactively developed the market, increased the sales of refined oil products, maintained steady growth in oil and gas production and increased the throughput of crude oil and production of chemical products. In addition, the Company continued to strive for better operating results through strengthening internal management, furthering corporate reforms and improving asset structure.

22

The following table sets forth the major items in the consolidated income statement of the Company for the indicated periods.

	Year ended 31 December	
	2004	2003
RMB millions	RMB millions	(%)
Turnover and other operating revenues	619,783	449,001
Of which: Turnover	597,197	429,949
Other operating revenues	22,586	19,052
Operating expenses	(556,714)	(410,118)
Of which:		
Purchased crude oil, products and operating supplies and expenses	(443,590)	(313,238)
Selling, general and administrative expenses	(31,843)	(27,228)
Depreciation, depletion and amortization	(32,342)	(27,951)
Exploration expenses (including dry holes)	(6,396)	(6,133)
Personnel expenses	(18,634)	(16,972)
Employee reduction expenses	(919)	(1,040)
Taxes other than income tax	(16,324)	(13,581)
Other operating expenses, net	(6,666)	(3,975)
Operating profit	63,069	38,883
Net finance costs	(4,371)	(4,463)
Investment income, share of profit less losses from associates and gain from issuance of shares by a subsidiary	908	621
Profit from ordinary activities before taxation	59,606	35,041
Taxation	(17,815)	(10,645)
Profit from ordinary activities after taxation	41,791	24,396
Minority interests	(5,772)	(1,972)
Profit attributable to shareholders	36,019	22,424

23

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

(1) Turnover and other operating revenues

In 2004, the Company's turnover and other operating revenues were RMB 619.8 billion, of which, the turnover was RMB 597.2 billion, representing an increase of 38.9% compared with 2003. In 2004, the Company captured the opportunity of the increased prices of crude oil and petrochemical products in the international market, expanded the sales volume of its major petrochemical products and optimized marketing structure. In 2004, the Company's other operating revenues went up to RMB 22.6 billion, representing an increase of 18.5% compared with 2003. The increase in "other operating revenues" were mainly due to the increase in sales revenue from its sale of raw and auxiliary materials to Sinopec Group Company and third parties.

The following table sets forth the Company's external sales volume, average realized prices and their changes in percentage from 2003 to 2004.

	Sales volume (thousand tonnes)			Averaged prices (R RMB/th cubic 2	2
	2004	2003	Changes (%)		
Crude oil	6,012	7,219	(16.7)	1,872	1,
Natural gas (million cubic meters)	3,775	3,405	10.9	609	
Gasoline	27,353	23,356	17.1	3,765	3,
Diesel	60,419	47,290	27.8	3,221	2,
Kerosene	5,680	4,810	18.1	2,923	2,
Basic chemical feedstock	6,664	5,712	16.7	4,429	3,
Synthetic resin	5,401	5,097	6.0	7,986	6,
Synthetic fibre	556	555	0.2	10,238	8,
Synthetic rubber	1,741	1,720	1.2	10,818	9,
Monomers and polymers for synthetic fibre	2,704	2,622	3.1	8,022	5,
Chemical fertilizer	2,622	2,001	31.0	1,355	1,

24

Most of the crude oil and a small portion of the natural gas produced by the Company were internally used for refining and chemicals production. The remaining was sold to the refineries of Sinopec Group Company and other customers. In 2004, the turnover from crude oil and natural gas that were sold externally amounted to RMB 16.0 billion, accounting for 2.6% of the Company's turnover and other operating revenues, representing an increase of 6.9% compared with that in 2003. The increase was mainly due to the increase in crude oil price and expansion of natural gas business.

The Company's Refining Segment and Marketing and Distribution Segment sell petroleum products (mainly consisting of gasoline,

diesel, jet fuel, kerosene and other refined petroleum products) to third parties. In 2004, the external sales revenue of petroleum products by these two segments were RMB 406.2 billion, accounting for 65.5% of the Company's turnover and other operating revenues, representing an increase of 40.2% compared with that in 2003. The increase was mainly due to the rise of gasoline and diesel prices and also due to the Company's proactive efforts in increasing sales volume, optimising marketing structure and expanding the market of other refined petroleum products. The sales revenue of gasoline, diesel and kerosene was RMB 314.2 billion, accounting for 77.4% of the total sales revenue of petroleum products, representing an increase of 42.5% over that in 2003. The sales revenue of other refined petroleum products was RMB 92 billion, accounting for 22.6% of the total sales revenue of petroleum products, representing an increase of 33.2% compared with 2003.

The Company's external sales revenue of chemical products was RMB 126 billion, accounting for 20.3% of its turnover and other operating revenues, representing an increase of 37% compared with that in 2003. The increase was mainly due to the fact that the Company captured the opportunity of the significant increase of chemical product prices and the increase of sales volume by the Company.

25

(2) Operating expenses

In 2004, the Company's operating expenses amounted to RMB 556.7 billion, representing an increase of 35.7% compared with 2003. The operating expenses mainly consisted of the following:

Purchased Crude Oil, Products, and Operating Supplies and Expenses

In 2004, the Company's costs for purchased crude oil, products and operating supplies and expenses were RMB 443.6 billion, accounting for 79.7% of the total operating expenses, representing an increase of 41.6% compared with 2003. The costs of purchased crude oil was RMB 232.6 billion, accounting for 41.8% of the total operating expenses, representing an increase of 41.5% compared with 2003. To meet the increasing demands in the market associated with the rapid growth of the Chinese economy, the Company increased its throughput of crude oil purchased from third parties. In 2004, the throughput of the Company's crude oil purchased externally was RMB 100.62 million tonnes (excluding amounts processed for third parties), representing an increase of 13.6% compared with 2003. Average cost for crude oil purchased externally in 2004 was RMB 2,312 per tonne, representing an increase of 24.6% compared with 2003.

In 2004, the Company's other purchase expenses were RMB 211 billion, accounting for 37.9% of the total operating expenses, up by 41.7% compared with 2003. This increase was mainly due to the increase in costs of refined oil products and chemical feedstock purchased externally.

Selling, general and administrative expenses

In 2004, the Company's selling, general and administrative expenses totalled RMB 31.8 billion, representing an increase of 16.9% compared with 2003. Such an increase was largely due to:

- o An increase in the total sales volume of refined oil products and an increase of sales through retail and direct distribution. The increase in sales volume resulted in an increase of selling expenses, such as transportation cost, by RMB 1.9 billion compared with 2003.
- o An increase in repairing and maintenance expenses by RMB 1.1 billion compared with 2003 due to the additions of property, plant and equipment and the increase in maintenance activities related to petrol stations.

26

- o An increase in operating lease rentals by RMB 700 million compared with that in 2003. The increase was mainly due to the increase in rental of operating facilities such as petrol stations from third parties and rental of land and buildings from related parties.
- o Active promotion of Sinopec's overall image, which resulted in increased advertising expenses by RMB 700 million compared with 2003.

Depreciation, depletion and amortization

In 2004, the Company's depreciation, depletion and amortization were RMB 32.3 billion, up by 15.7% over 2003. The increase was mainly because of the additions of property, plant and equipment as a result of capital expenditure.

Exploration expenses

In 2004, the Company's exploration expenses were RMB 6.4 billion, representing an increase of 4.3% compared with 2003. The increase was principally due to the increase by the Company of its investment in exploration activities in major new blocks in the western and southern parts of China.

Personnel expenses

In 2004, the Company's personnel expenses were RMB 18.6 billion, representing an increase of 9.8% compared with 2003. The increase was largely due to the implementing by the Company of the market-rate based employee compensation system resulting in increased employee wages and salaries. The new compensation system also resulted in an increase of contribution to staff retirement plans accordingly.

Employee reduction expenses

In 2004, in accordance with the Company's voluntary employee

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

reduction plan, and in connection with the acquisition of petrochemical and catalyst assets from and the disposal of downhole assets to Sinopec Group Company, the Company recorded employee reduction expenses of approximately RMB 0.9 billion relating to the reduction of approximately 24,000 employees, down by RMB 0.1 billion compared with that in 2003.

27

Taxes other than income tax

In 2004, the Company's taxes other than income tax were RMB 16.3 billion, representing an increase of 20.2% compared with 2003. The increase was largely due to the increase of consumption tax and associated city construction taxes and education surcharges as a result of the increased sales volume of gasoline and diesel of the Company.

Other operating expenses, net

In 2004, the Company's other operating expenses, net were RMB 6.7 billion, representing an increase of 67.7% compared with 2003. The increase was largely due to the following reason: In order to allocate its internal resources more efficiently, the Company revised the production plans in 2004, and accordingly made a provision for impairment loss on certain less efficient chemical facilities, petrol stations and depots on the difference between the estimated recoverable value and the net book value of these assets amounting RMB 3.9 billion, representing an increase of RMB 3 billion compared with 2003. Meanwhile, disposals of assets decreased in 2004.

(3) Operating profit

In 2004, the Company's operating profit was RMB 63.1 billion, representing an increase of 62.2% compared with 2003.

(4) Net finance costs

In 2004, the Company's net finance costs were RMB 4.4 billion, down by 2.1% compared with 2003.

(5) Profit from ordinary activities before taxation

In 2004, the Company's profit from ordinary activities before taxation was RMB 59.6 billion, representing an increase of 70.1% compared with 2003.

(6) Taxation

In 2004, the Company's taxation was RMB 17.8 billion, representing an increase of 67.4% compared with 2003.

28

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

(7) Minority interests

In 2004, the Company's minority interests were RMB 5.8 billion, representing an increase of 192.7% compared with 2003. The increase was mainly due to the return of the subsidiaries of the Company increased as compared with 2003.

(8) Profit attributable to shareholders

In 2004, the Company's profit attributable to shareholders was RMB 36 billion, representing an increase of 60.6% compared with 2003.

6.1.2.2 Assets, Liabilities, Shareholders' Funds, and Working Capital

The Company's primary sources of funding were from operating activities, short-term and long-term borrowings, and primary uses of funds were for operating expenses, capital expenditures and repayments for short-term and long-term loans.

(1) Assets, liabilities and shareholders' funds

	2004	As at 31 December 2003
Total assets	474,594	420,184
Current assets	120,271	103,039
Non-current assets	354,323	317,145
Total liabilities	250,508	222,618
Current liabilities	146,277	129,272
Non-current liabilities	104,231	93,346
Minority interests	31,046	26,051
Net assets	193,040	171,515
Shareholders' fund	193,040	171,515
Share capital	86,702	86,702
Reserves	106,338	84,813

29

The Company's total assets were RMB 474.594 billion, up by RMB 54.41 billion compared with those at the end of 2003, of which the current assets were RMB 120.271 billion, up by RMB 17.232 billion compared with those at the end of 2003. The change was mainly due to the increase in inventories as a result of price and volume increase of crude oil and petrochemical products. The Company's non-current assets were RMB 354.323 billion, up by RMB 37.178 billion compared with those at the end of 2003. The change was primarily attributable to the additions of property, plant and equipment which were up by RMB 13.392 billion in value, while the construction in progress were up by RMB 16.831 billion in value.

Total liabilities were RMB 250.508 billion, up by RMB 27.89

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

billion compared with those at the end of 2003, of which the current liabilities were RMB 146.277 billion, up by RMB 17.005 billion compared with those at the end of 2003. The change was mainly due to the increase in accounts payable and bills payable in total by RMB 7.003 billion to cope with increased production volume, and the increase of the Company's short-term debt by RMB 6.975 billion. Non-current liabilities were RMB 104.231 billion at the end of 2004, up by RMB 10.885 billion compared with those at the end of 2003. The change was mainly due to the fact that long-term loans of the Company were up by RMB 10.291 billion compared with those at the end of 2003.

Shareholders' funds were RMB 193.04 billion at the end of 2004, up by RMB 21.525 billion compared with that at the end of 2003, representing an increase in the reserves by RMB 21.525 billion.

(2) Cash flow

In 2004, net increase in cash and cash equivalent was RMB 117 million (i.e. an increase from RMB 16,263 billion as at 31 December 2003 to RMB 16.381 billion as at 31 December 2004).

The following table shows the major items on the consolidated cash flow statements.

30

	(Unit:
	Years
	31 Dec
	2004
Major items of cash flows	
Net cash flow from operating activities	69,081
Net cash flow from investing activities	(73,992)
Net cash flow from financing activities	5,028
Net increase/(decrease) in cash and cash equivalents	117

o Net cash inflow from operating activities was RMB 69.081 billion.

In 2004, profit from ordinary activities before taxation was RMB 59.606 billion; depreciation, depletion and amortization were RMB 32.342 billion; after adjusting the non-cash expense items, the adjusted cash flow from operating activities was RMB 100.529 billion. Major non-cash expense items were: costs of dry holes of RMB 2.976 billion, losses from disposals of properties, plants and equipment of RMB 1.686 billion, and impairment losses on long-lived assets of RMB 3.919 billion.

The changes in operating-related account receivable and payable items reduced cash inflow by RMB 14.565 billion. In order to meet the market demand, the Company expanded production and operation, as a result, the working capital

required by the ordinary business increased, of which, the increase of inventory led to a decreased cash inflow of RMB 16.526 billion, the increase of bill receivable, accounts receivable and other current assets contributed to a decreased cash inflow of RMB 7.855 billion. Due to the expanded business activities and increased purchasing costs, cash inflow of accounts payable and bill payable increased by RMB 7.129 billion, and other operating-related account receivables and payables increased the cash inflow by RMB 2.687 billion.

After adjusting the non-cash expense items and account receivable and payable items with regard to the profit from ordinary activities before taxation, and deducting the cash outflow for payment of income tax totaling RMB 16.883 billion, the net cash flow from operating activities was RMB 69.081 billion.

- o Net cash flow for investing activities was RMB 73.992 billion.

The net cash outflow for investing activities mainly represented the cash outflow for capital expenditure by the Company of RMB 67.583 billion and by the Company's joint ventures of RMB 6.035 billion.

31

- o Net cash flow from financing activities was RMB 5.028 billion.

The net cash inflow from financing activities increased because the amount of newly added bank loans and other loans by the Company and its joint ventures was larger than the amount of repayments of bank loans and other loans, resulting in a cash inflow of RMB 13.645 billion. However, the effect was partly offset by the final dividend for 2003 and interim dividend for 2004 distributed by the Company, which resulted in a cash outflow of RMB 8.67 billion.

During 2004 the Company captured the opportunity of robust market demand resulting in such a remarkable increase in cash flow from operating activities. At the same time, in order to enhance its market-leading position, the Company increased its capital expenditure. In addition, the Company tightened its control on cash management and strictly controlled the scale of cash and cash equivalent, as a result, the overall efficiency of the Company improved.

- (3) Contingent liabilities

Refer to the descriptions under paragraph 7.3 "Major Guarantees" in the section headed "Significant Events".

- (4) Capital expenditure

Refer to the descriptions under paragraph 6.1.1 "Business Review" in the section headed "Report of the Board of

Financial data prepared under the PRC Accounting Rules and Regulations:

33

	Unit:	
	As at 31 December /	
	Years ended 31 December	
	2004	2003
Total assets	460,081	390,213
Long-term liabilities	98,407	80,109
Shareholders' fund	186,350	162,946
Profit from principal operations	115,222	80,716
Net profit	32,275	19,011

Reason for changes

Total assets: At the end of 2004, the Company's total assets were RMB 460.081 billion, up by RMB 69.868 billion compared with 2003. This change was mainly due to the increase of investments in fixed assets by the Company during 2004 in order to meet the market demands. As a result, fixed assets increased by RMB 40.81 billion. Current assets were up by RMB 20.138 billion, which was mainly due to the increased prices and quantity of crude oil and petrochemical products which, in turn, contributed to the increase in the value of inventory of RMB 19.003 billion. Other non-current assets were up by RMB 8.92 billion, which was mainly due to the increase in deferred tax assets and long-term deferred expenses.

Long-term liabilities: At the end of 2004, the Company's long-term liabilities were RMB 98.407 billion, up by RMB 18.298 billion compared with 2003. This change was largely due to the issuance of RMB 3.5 billion corporate bonds and the increase of RMB 14.866 billion in long-term loans pursuant to the Company's investment plans for various projects.

Shareholders' funds: At the end of 2004, shareholders' funds of the Company was RMB 186.35 billion, up by RMB 23.404 billion compared with 2003. This increase was principally due to: firstly, the realized net profit in 2004 reached RMB 32.275 billion; secondly, in 2004 the distribution of its final dividend for the second half of 2003 amounted to RMB 5.202 billion and the interim dividend for 2004 totalled RMB 3.468 billion.

34

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Profit from principal operations: In 2004, the realised profit from principal operations was RMB 115.222 billion, up by RMB 34.506 billion, representing a growth of 42.75% compared with 2003. This increase was mainly because in 2004, with the robust market demand and the rising prices of crude oil and petrochemical products, the Company captured market opportunities, expanded the total volume of production and sales, optimized marketing structure and managed to improve its operating results at a steady pace.

Net profit: In 2004, the net profit realized by the Company was RMB 32.275 billion, up by RMB 13.264 billion, representing a growth of 69.77% compared with 2003. The increase was mainly due to the increase in the Company's profit from its principal operations.

- (7) Significant differences between the financial statements prepared under IFRS and U.S. GAAP

The major differences between the Company's financial statements prepared under IFRS and US GAAP are set out in the annual report of Sinopec Corp. for the year ended 31 December 2004.

6.2 The Principal Operations Categorized by Business Segments and the Status of the Connected Transactions

The following data are extracted from the financial statements prepared under the PRC Accounting Rules and Regulations.

Categorized by business segments (points)	Income from principal operations (RMB millions)	Cost of principal operations (RMB millions)	Gross profit (%) *	Increase/ decrease of income from principal operations compared with the same period of preceding year (%)	Increase/ decrease of income from principal operations compared with the same period of preceding year (%)
Exploration and production	76,023	34,929	49.98%	22.18%	
Refining	352,548	326,590	3.41%	32.41%	
Marketing and distribution	345,671	305,690	11.39%	43.54%	
Chemicals	122,118	96,339	20.57%	48.32%	
Others	79,145	78,395	0.93%	30.60%	
Elimination of inter-segment sales	(384,873)	(382,736)	N/A	N/A	
Total	590,632	459,207	19.51%	41.57%	
Of which: Connected transactions	58,732	54,197	7.35%	85.58%	

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Details of connected transactions
 Refer to descriptions under paragraph 7.4 "Connected Transactions Entered into by the Company during the Year" in the section headed "Significant Events"

Principle of pricing for connected transactions
 (1) Government-prescribed prices and government-guided prices are adopted for products or projects if such prices are available; (2) Where there is no government-prescribed price or government-guided price for products or projects, the market price (inclusive of bidding price) will apply; (3) Where none of the above is applicable, the price will be decided based on the cost incurred plus a reasonable profit of not more than 6% of the price

Of which:
 During the period of the annual report, Sinopec Corp. provided goods and services to itscontrolling shareholder, and to its own subsidiaries, which constituted connected transactions amounted to RMB 51.279 billion

6.15 Operating plan for the new fiscal year formulated by the Board of Directors

Business Prospect

6.15.1 Market Outlook

In 2005, it is estimated that the global economy will remain in stable growth. International crude oil prices will remain high and is expected to be at a fluctuating state, and the global chemical industry will still stay at a cyclical upturn. China's economy is expected to continue to grow rapidly, which will in turn drive the growth of the domestic demands for refined oil products and petrochemical products, creating rooms for the development of petroleum and petrochemical industries. Meanwhile, the openness of domestic retail market for refined oil products and the decrease of the import duty for chemical products will give rise to competitions in the domestic market.

6.15.2 Production and Operation

Faced with the opportunities and challenges in 2005, the Company intends to adopt a flexible operating strategy and focus on the following areas:

Exploration and Production Segment The Company will make further efforts in exploration and development and increasing types of supplemental resources to ensure the stable growth of oil and gas production. Moreover, the Company will strive hard to increase production and efficiency by enhancing the recovery rate and commodity rate of oil and gas. In 2005, the Company plans to produce 39 million tonnes of crude oil and 6.07 billion cubic meters of natural gas. The Company also intends to increase its production

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

capacity of crude oil by 6.05 million tonnes per year and natural gas by 2.3 billion cubic meters per year.

Refining Segment The Company will reinforce management and ensure safe, stable, sustained, full-load and optimal operation of its facilities. The projected processing volume of crude oil in 2005 is 143 million tonnes. The Company will strive to increase production of refined oil products and light chemical feedstock. Optimisation of resource allocation, adjustment to structure and improvement of quality will be our main focus in 2005. The Company also proposes to raise production of LPG, propylene, aromatics and high-grade road asphalt. The Company will further increase the major techno-economic indicators of oil refining with target for light products yield at 74.1% and refining yield at 92.9%.

40

Marketing and Distribution Segment The Company will further improve marketing networks and optimise marketing structure. Meanwhile, the Company will adjust its marketing strategies, make efforts to expand its total sales volume based on the market demands, and optimise resource allocation and logistics network. In 2005, the Company plans to achieve a total domestic sales of refined oil products of 102 million tonnes, including retail sales of 57.50 million tonnes and direct distribution of 22.50 million tonnes.

Chemicals Segment Efforts will be made to ensure safe, stable, sustained, full-load and optimal operation of facilities and put the two ethylene joint venture projects into operation. The Company will speed up the reform of the chemical marketing system to improve the competitiveness of chemical products. The Company will resort to scientific and technological advancement to increase the production of high value-added products, performance compound resins and differential fibres. In 2005, the Company plans to produce 5.19 million tonnes of ethylene, 7.47 million tonnes of synthetic resins, 0.55 million tonnes of synthetic rubbers, 1.61 million tonnes of synthetic fibre and 6.69 million tonnes of synthetic fibre monomers and polymers.

Scientific and Technological Development The Company will accelerate the development of core technology and proprietary technology and further build up technological advantages for core businesses development. The Company will carefully arrange for the development of key technologies, involving increase in reserves and stable production in oil fields in eastern China, exploration and development of new oil fields, natural gas development in Ordos and Sichuan, upgrading of oil product quality, construction of Qingdao Refinery and the second round revamping of Maoming Ethylene. In addition, the Company will attach great importance to the development of new high value-added products and the promotion of scientific and technological research results to serve as the technological support for reduction of costs and sharpening of products competitive edge.

Cost Saving In 2005, the Company will, depending on scientific and technological advancement, reinforce management practices, deepen reforms and enhance operating efficiency. It plans to achieve a cost saving of RMB 2.5 billion, among which Exploration and Production Segment plans to achieve a cost saving by RMB 600 million, Refining

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Segment RMB 600 million, Chemicals Segment RMB 700 million, and Marketing and Distribution Segment RMB 600 million.

41

Capital Expenditure In 2005, the Company's capital expenditure is planned to be RMB 62 billion. The projected expenditure for Exploration and Production Segment is RMB 22.9 billion, Refining Segment is RMB 16.127 billion, Chemicals Segment is RMB 10.373 billion, Marketing and Distribution Segment is RMB 11 billion, Corporate and Others is RMB 1.6 billion. In 2005, capital expenditure will be engaged in the following areas: In Exploration and Production Segment, the Company will carry out the operation notion of oil reserves and strive to expand qualified resources, improve the profile of oil and gas reserves and increase production of oil and gas. In Refining Segment, the Company intends to complete the second-phase of Ningbo-Shanghai-Nanjing crude oil pipeline, construct the crude oil pipeline along the Yangtze River, and speed up the revamping of selected refining projects. In Chemicals Segment, the Company will focus on the revamping and construction of large-scale ethylene, aromatics and PTA facilities and accelerate the coal gasification projects. In Marketing and Distribution Segment, the Company will improve the marketing networks continually, build, acquire and upgrade petrol stations, optimise layout of depots, promote pipeline transportation, improve operating efficiency, and put the southwest refined oil product pipeline into operation in the first half of 2005. Moreover, the Company will speed up the application of petrol IC cards to increase marketing level based on information technologies.

Workforce downsize The company plans to reduce the number of employees by more than 15,000 in 2005 (including the downhole operation workers). By the end of 2005, the workforce size is expected to be around 370,000. In this case, the accumulative number of persons laid-off by the end of 2005 will amount to 140,000.

In addition, the Company will continue to improve foreign cooperation. The two ethylene joint ventures with BASF and BP will be put into commercial operation in the first half of 2005 and progress of Fujian integrated project will be accelerated. The Company will, according to the schedule and scale of construction determined by the board of directors of the two joint ventures and the Company's percentage of shareholdings in the joint ventures, inject investment in a timely manner. These investments will be accounted for as the Company's investment in associates as appropriate.

With the practical and down-to-earth efforts made by our employees, we are confident that, in the forthcoming year, the Company will improve its production and operating results, deepen corporate reform, strengthen structural adjustment and realize the sustained and effective development.

Profit forecast for the new fiscal year

42

6.16 Plan of the board of directors for profit appropriation or transfer of statutory surplus reserve to capital for this year

According to the consolidated income statement prepared pursuant to the PRC Accounting Rules and Regulations and the consolidated income statement prepared pursuant to IFRS, the Company's audited net profit in 2004 was RMB 32.275 billion and RMB 36.019 billion respectively. In accordance with the provisions of the Sinopec Corp.'s Articles of Association, the appropriation of the profit after tax for the relevant fiscal year would be conducted on the basis of the net profit as determined in accordance with the PRC Accounting Rules and Regulations or under IFRS, whichever is lower. Thus, on the basis of the net profit of Sinopec Corp. of RMB 32.275 billion, after the transfer of 10% to the statutory surplus reserve (RMB 3.228 billion) and 10% to the statutory public welfare fund (RMB 3.228 billion) from Sinopec Corp.'s net profit, adding the undistributed profit brought forward from the preceding year from and the deduction of the final dividend for year 2003 (RMB 5.202 billion) and the interim dividend for 2004 (RMB 3.468 billion) distributed in 2004, the amount of distributable profit of Sinopec Corp. of 2004 was RMB 37.124 billion. On the basis of the total number of 86,702,439,000 issued shares at the end of 2004, the proposed dividends to be distributed in cash would be RMB 0.12 per share (including tax) or RMB 10.404 billion in total. After the deduction of the cash dividends of RMB 0.04 per share distributed in the interim of 2004 (totalled RMB 3.468 billion), the final cash dividends for year 2004, declared after the balance sheet date, would be RMB 0.08 per share (totalled RMB 6.936 billion). This preliminary plan for profit appropriation will be subject to the consideration and approval at the Annual General Meeting of Shareholders for year 2004 to be convened on Wednesday, 18 May 2005.

The proposed final dividend will be distributed on or before Monday, 27 June 2005 to those shareholders whose names appear on the register of members of Sinopec Corp. at the close of business on Friday, 3 June 2005. The register of members of Sinopec Corp.'s H shares will be closed from Monday, 30 May 2005 to Friday 3 June 2005 (both dates are inclusive). In order to qualify for the year end dividend for H shares, the shareholders must lodge all share certificates accompanied by the transfer materials with Hong Kong Registrars Limited, at Shops 1712 to 1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Hong Kong before 4:00 p.m. on Friday, 27 May 2005 for registration.

Dividend will be denominated and declared in Renminbi. The dividend for holders of domestic shares will be paid in Renminbi and the dividend for holders of foreign shares will be paid in Hong Kong dollars. The exchange rate for the dividend to be paid in Hong Kong dollars will be the mean of the exchange rates of Hong Kong dollars to Renminbi as announced by the People's Bank of China during the week prior to the date of declaration of dividend.

The Company recorded profit during the period of the annual report but no profit appropriation proposal has been declared.

Performing Material Guarantees

At the fourteenth meeting of the First Session of the Board of Directors of Sinopec Corp., the Board approved Sinopec Corp. to

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

provide conditional guarantee in both domestic and foreign currency for the Shanghai Secco project loan, and the amount of guarantee equals to RMB 6.992 billion. For further details, please refer to Sinopec Corp.'s announcement published in China Securities, Shanghai Securities and Securities Times in Mainland China on 2 April 2002 and the results announcement for the year 2001 published in South China Morning Post and Hong Kong Economic Times in Hong Kong.

47

At the fourteenth meeting of the First Session of the Board of Directors of Sinopec Corp., the Board approved the proposal regarding Sinopec Corp.'s provision of guarantee for the BASF-YPC projects. On 7 March 2003, Sinopec Corp. entered into guarantee agreements for the completion of construction of the BASF-YPC project with domestic and foreign banks, whereby it guaranteed 40% of a domestic and foreign currencies denominated loan equivalent to around RMB 11.7 billion provided by these banks to BASF-YPC Co., Ltd. for completion of construction.

At the twenty-second meeting of the First Session of the Board of Directors of Sinopec Corp., the Board approved the proposal regarding Sinopec Corp.'s provision of equity pledge for the BASF-YPC project loan on the condition that BASF should provide equity pledge on the same terms. On 12 August 2004, Sinopec Corp. officially entered into the equity pledge agreement.

At the twenty-second meeting of the First Session of the Board of Directors of Sinopec Corp., the Board also approved the proposal regarding Sinopec Corp.'s provision of guarantee for Yueyang Sinopec Shell Coal Gasification Co., Ltd., in the amount of RMB 377 million.

At the thirteenth meeting of the Second Session of the Board of Directors of Sinopec Corp, the Board approved Sinopec Corp. in providing China International United Petroleum & Chemical Co., Ltd. with credit line guarantee equivalent to RMB 2.483 billion.

7.4 Connected Transactions Entered into by the Company during the Year

The aggregate amount of connected transactions actually occurred in relation to the Company during the year was RMB 131.589 billion, of which, incoming trade amounted to RMB 67.982 billion, and outgoing trade amounted to RMB 63.603 billion (including, RMB 63.507 billion of sales of products and services, RMB 59 million of interest earned, RMB 41 million of income from agency fee). All of these transactions satisfied the conditions of waiver imposed by the Hong Kong Stock Exchange. In 2004, the products and services provided by Sinopec Group Company (purchase, storage and transportation, exploration and production services and production-related services) to the Company amounted to RMB 62.313 billion, representing 11.19% of the Company's annual operating expenses, a decrease of 2.42% compared with those in 2003, which were within the cap of 18% for waiver. The auxiliary and community services provided by Sinopec Group Company to the Company amounted to RMB 1.740 billion, representing 0.31% of operating expenses, with a slight decrease compared with 0.43% in the preceding year, which were within the cap of 2% for waiver. In 2004, the product sales from the Company to Sinopec Group Company amounted to RMB 63.507 billion, representing 10.25% of the Company's operating revenue, which were within the cap of 14% for waiver. With regard to the Leasing Agreement of Land Use

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Rights, the amount of rent paid by the Company for the year ended 31 December 2004 was approximately RMB 2.146 billion. With regard to the premium payable under the SPI Fund Document, the amount of fund paid by the Company in 2004 was not less than the amount specified in the SPI Fund Document.

48

Other Material Connected Transactions during The Year

- (1) Connected transactions for new leasing of Sinopec Group Company's land use rights

At the third meeting of the Second Session of the Board of Directors of Sinopec Corp., the Board approved the Proposal Regarding the New Leasing of Land Use Rights from Sinopec Group Company, and approved the lease of the land use rights by Sinopec Corp. of an area of 51.71 million square meters from Sinopec Group Company. The parties entered into an Agreement on Lease of Land Use Rights in August 2003. The amount of rent under the leasing agreement incurred in this reporting period was approximately RMB 300 million.

- (2) Acquisition of shares of Jinzhi Company

Please refer to the section headed "Disclosure of Significant Events" in the Annual Report.

- (3) Acquisition of petrochemical, catalyst and petrol stations assets from parent company and the disposal of downhole operation assets

Please refer to the section headed "Disclosure of Significant Events" in the Annual Report.

7.9 Other significant events

7.9.1 Issuance and Listing of Corporate Bonds

On 8 March 2004, Sinopec Corp. successfully issued domestic 10-year term corporate bonds which amounted to RMB 3.5 billion with a fixed coupon rate of 4.61%. On 28 September 2004, the said corporate bonds were listed on the Shanghai Stock Exchange. For further details, please refer to Sinopec Corp.'s announcement published in China Securities, Shanghai Securities, and Securities Times in Mainland China, and South China Morning Post and Hong Kong Economic Times in Hong Kong on 24 February 2004 and 28 September 2004. As at 31 December 2004, the outstanding principal balance of the said corporate bonds was RMB 3.5 billion. On 24 February 2005, Sinopec Corp. repaid coupon interests for the first year in full.

52

7.9.2 The transfer of state-owned shares from CDB and Cinda to Sinopec Group Company

China Development Bank ("CDB") and China Cinda Asset Management Corporation ("Cinda"), entered into a share transfer agreement with Sinopec Group Company during the reporting period pursuant to which Cinda transferred 5 billion state-owned shares of Sinopec Corp. (representing 5.767% of the total issued shares of Sinopec Corp.) to Sinopec Group Company and CDB transferred 6.143 billion state-owned shares of Sinopec Corp. (representing 7.085% of the total issued shares of Sinopec Corp.) to Sinopec Group Company. The total cash considerations of RMB 9 billion and RMB 11.0574 billion were paid to Cinda and CDB respectively by Sinopec Group Company. The said share transfers were completed on 29 December 2004. Please refer to the announcement published in China Securities, Shanghai Securities, and Securities Times in Mainland China, and South China Morning Post and Hong Kong Economic Times in Hong Kong on 15 October 2004 for further details.

7.9.3 Major Cooperation Projects

- (1) Establishment of Sinopec-Shell (Jiangsu) Petroleum Marketing Co., Ltd.

On 13 July 2004, the Ministry of Commerce approved the establishment of Sinopec-Shell (Jiangsu) Petroleum Sales Co., Ltd., a Sino-foreign joint venture by Sinopec Corp., Royal Dutch/Shell (China) Holding BV and Shell (China) Ltd. The total investment in the said joint venture was RMB 1.55 billion and the registered capital was RMB 830 million. The parties contributed to the registered capital of the said joint venture in the proportion of 60%, 30% and 10% respectively. On 28 August 2004, Sinopec Shell (Jiangsu) Petroleum Marketing Co., Ltd was officially established in Nanjing.

- (2) Establishment of BP Sinopec (Zhejiang) Petroleum Co., Ltd.

On 3 September 2004, the Ministry of Commerce approved the

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

establishment of a Sino-foreign joint venture, Sinopec BP (Zhejiang) Petroleum Co. Ltd., by Sinopec Corp. and BP Global Investments Limited. The total investments of the said joint venture amounted to RMB 2.188 billion and its registered capital was RMB 800 million. Sinopec Corp. and BP Global Investments Limited contributed 60% and 40% of the registered capital of the said joint venture respectively. Sinopec BP (Zhejiang) Petroleum Co., Ltd. was officially established on 4 November 2004.

53

(3) Foreign Partners Exits the Natural Gas Project in East China Sea

On 19 August 2003, Sinopec Corp., CNOOC, Shell and Unocal reached an agreement to jointly explore for, develop and sales natural gas, oil and condensate in the East China Sea. Pursuant to the terms of the agreement, the foreign partners were required to reach a formal decision on whether to continue to participate in the said project after 12 months from the date of signing of the agreement. On 24 September 2004, Shell and Unocal made an announcement of their decision to end their involvement in the exploration, production and sales of products in five different areas of the Xihu district and to exit the said project based on commercial reasons.

7.9.4 The Transfer of State-Owned legal person shares of China Phoenix held by Sinopec Corp.

At the ninth meeting of the Second Session of the Board of Directors of Sinopec Corp. held on 6 July 2004, the proposal to transfer 211,423,651 state-owned legal person shares held by Sinopec Corp. in Sinopec Wuhan Phoenix Company Limited ("China Phoenix") (representing 40.72% of the total issued share capital of China Phoenix) to Hubei Qingjiang Water Power Investment Limited ("Qingjiang Investment") and China Guodian (Group) Corporation ("Guodian Group") was approved. The total consideration for the said transfer was approximately RMB 621 million. The proposed acquisition of petrochemicals assets of China Phoenix (including production facilities, inventories and corresponding accounts receivables) from Qingjiang Investment and Guodian Group which they would acquire through asset swaps with China Phoenix was also approved by the Board of Directors of Sinopec Corp. at the same meeting. The total consideration payable for the acquisition was RMB 548 million. Please refer to Sinopec Corp.'s announcement published in China Securities, Shanghai Securities, and Securities Times in Mainland China, and South China Morning Post and Hong Kong Economic Times in Hong Kong on 7 July 2004 for further details. The proposed asset swaps are pending the approval of China Securities Regulatory Commission (CSRC) and such acquisition and asset swaps are being modified to satisfy the requirements of CSRC.

7.9.5 Acquisition of 40.5% shares held by Hong Kong Huarun in Qingdao Qirun

Qingdao Qirun Petrochemical Company Limited (Qingdao Qirun) is a Sino-foreign joint venture established by Qingdao Petroleum General

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Company Limited, Qilu Petrochemical Company Limited and Hong Kong Huarun Petrochemical (Group) Company Limited (Hong Kong Huarun) on 27 April 1993. The parties contributed 21%, 38.5% and 40.5% respectively to the total registered capital of USD 27.38 million. Qingdao Qirun is mainly engaged in storing, transporting and transferring crude oil and refined oil and is equipped with 500,000 cubic meters of crude/refined oil storage tanks, four pipelines linking to Qingdao oil terminal, dedicated railways connecting to the Jiaoji railway and road delivery and transport system for crude/refined oil.

54

To facilitate oil products storage and transportation for Qingdao Refining Project, Sinopec Corp. and Hong Kong Huarun entered into a share transfer agreement on 17 November 2004, pursuant to which Sinopec Corp. acquired 30% interest in Qingdao Qirun from Hong Kong Huarun. On 21 January 2005, the parties entered into another share transfer agreement, pursuant to which Sinopec Corp. acquired the remaining 10.5% interest in Qingdao Qirun from Hong Kong Huarun. The shares transfer represented an aggregate of 40.5% interest in Qingdao Qirun and the total consideration for the transfer amounted to RMB 480 million.

7.9.6 Purchasing Stake in China Gas

Sinopec Corp. and China Gas Holdings Ltd. ("China Gas") entered into a strategic cooperation agreement on 1 November 2004 in Beijing. Pursuant to the agreement, Sinopec Corp. subscribed for 210 million newly issued shares of China Gas at the price of HK\$ 0.61 per share. Sinopec Corp. undertakes not to sell the shares within 12 months since the completion date of such shares subscription.

7.9.7 Merger by Absorption of Beijing Yanhua

Sinopec Corp. plans to privatise Beijing Yanhua Petrochemical Company Limited (Beijing Yanhua) by way of merger by absorption through Beijing Feitian Petrochemical Company Limited (Beijing Feitian), a wholly-owned subsidiary of Sinopec Corp. established for the purpose of such merger. Pursuant to the agreement entered into between Beijing Feitian and Beijing Yanhua on 29 December 2004, Beijing Feitian will purchase the listed shares of Beijing Yanhua from shareholders at a unit price of HK\$ 3.80 per share in cash, the total consideration involved amounts to approximately HK\$ 3.846 billion. The proposed merger has been approved by relevant shareholders at the general meeting or independent shareholders at the general meeting of independent shareholders of Beijing Yanhua and the general meeting of shareholders of Beijing Feitian, but is subject to the approvals of domestic and overseas regulators of securities markets. Please refer to Sinopec Corp.'s announcement published in China Securities, Shanghai Securities and Securities Times in Mainland China and South China Morning Post and Hong Kong Economic Times in Hong Kong on 30 December 2004 and 7 March 2005 for details.

7.9.8 Reduction of Employees

Sinopec Corp. plans to reduce the number of employees by 100,000

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

persons through retirement, voluntary resignation and/or redundancy within the period of 5 years from 2001 to 2005 to enhance its efficiency and operating profit. By the end of 2004, the accumulative net reduction during the past four years had amounted to 119,000 persons. In 2004, the Company has recorded employees reduction expenses of approximately RMB 920 million for about 24,000 employees (including 13,000 downhole operation staff to be reduced in 2005). The net reduction of number of employees in 2004 was 11,000.

55

7.9.9 Changes in senior management

At the sixteenth meeting of the Second Session of the Board of Directors of Sinopec Corp., the Board approved the resignation applications of Mr. Wang Jiming from the President position and Mr. Mou Shuling from the Senior Vice President position. The Board of Directors also approved the appointment of Mr. Wang Tianpu as President and Mr. Zhang Jianhua and Mr. Wang Zhigang as Senior Vice President of Sinopec Corp.

ss.8. Report of the Supervisory Committee

The Supervisory Committee considers that Sinopec Corp. has complied with relevant regulations. There were no irregularities identified in Sinopec Corp.'s financial conditions, use of proceeds from issuance of A shares, acquisitions and disposal of assets or connected transactions.

9.2.3 Major differences between the financial statements prepared under the PRC Accounting Rules and Regulations and IFRS

Other than the differences in the classifications of certain financial statements captions and the accounting for the items described below, there are no material differences between the Group's financial statements prepared under the PRC Accounting Rules and Regulations and IFRS. The major differences are:

- (1) Effects of major differences between the PRC Accounting Rules and Regulations and IFRS on net profit are analysed as follows:

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

	For the year ended 31 December 2004 RMB millions	For t 31
Net profit under the PRC		
Accounting Rules and Regulations	32,275	
Adjustments:		
Disposal of oil and gas properties, net of depreciation effect	2,110	
Acquisitions of Sinopec Maoming, Xi'an Petrochemical, Tahe Petrochemical, Tianjin Petrochemical, Luoyang Petrochemical, Zhongyuan Petrochemical and Catalyst Plants	1,499	
Acquisition of Sinopec National Star	117	
Depreciation of oil and gas properties	761	
Impairment losses on revalued assets	709	
Capitalisation of general borrowing costs	480	
Revaluation of land use rights	19	
Government grants	3	
Unrecognised losses of subsidiaries	(531)	
Pre-operating expenditures	(288)	
Gain from issuance of shares by a subsidiary	--	
Gain from debt restructuring	--	
Effects of the above adjustments on taxation	(1,135)	
Net profit under IFRS*	36,019	

69

- (2) Effects of major differences between the PRC Accounting Rules and Regulations and IFRS on shareholders' funds are analysed as follows:

	At 31 December 2004 RMB millions	31
Shareholders' funds under the		
PRC Accounting Rules and Regulations	186,350	
Adjustments:		
Disposal of oil and gas properties	3,370	
Acquisitions of Tianjin Petrochemical, Luoyang Petrochemical, Zhongyuan Petrochemical and Catalyst Plants	--	
Acquisition of Sinopec National Star	(2,695)	

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Depreciation of oil and gas properties	11,646
Capitalisation of general borrowing costs	1,605
Revaluation of land use rights	(851)
Government grants	(592)
Effect of minority interests on unrecognised losses of subsidiaries	--
Pre-operating expenditures	(457)
Impairment losses on long-lived assets	(113)
Effects of the above adjustments on taxation	(5,223)
Shareholders' funds under IFRS *	193,040

* The above figure is extracted from the financial statements prepared in accordance with IFRS which have been audited by KPMG.

9.2.4 Supplemental information for North American Shareholders

The Group's accounting policies conform with IFRS which differ in certain significant respects from accounting principles generally accepted in the United States of America ("US GAAP"). See the text of the Annual Report for details.

70

The effect on profit attributable to shareholders of significant differences between IFRS and US GAAP is as follows:

	For the years ended 31	
	2004 US\$ millions	2004 RMB millions
Profit attributable to shareholders under IFRS	4,352	36,019
US GAAP adjustments:		
Foreign exchange gains and losses	7	57
Capitalisation of property, plant and equipment	1	12
Reversal of deficit on revaluation of property, plant and equipment, net of depreciation effect	(1)	(8)
Depreciation on revalued property, plant and equipment	462	3,825
Disposal of property, plant and equipment	228	1,891
Exchange of assets	3	23
Reversal of impairment of long-lived assets, net of depreciation effect	4	29
Capitalised interest on investments in associates	25	205
Goodwill amortisation for the year	1	7
Deferred tax effect of US GAAP adjustments	(252)	(2,085)
Profit attributable to shareholders under US GAAP	4,830	39,975
Basic and diluted earnings per share under US GAAP	US\$0.06	RMB0.46

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Basic and diluted earnings
per ADS under US GAAP* US\$5.57 RMB46.11

* Basic and diluted earnings per ADS is calculated on the basis that one ADS is equivalent to 10 shares of ordinary shares.

71

The effect on shareholders' funds of significant differences between IFRS and US GAAP is as follows:

	2004 US\$ millions	At 31 December 2004 RMB millions
Shareholders' funds under IFRS	23,324	193,040
US GAAP adjustments:		
Foreign exchange gains and losses	(36)	(295)
Capitalisation of property, plant and equipment	--	--
Revaluation of property, plant and equipment	(820)	(6,783)
Deferred tax adjustments on revaluation	254	2,101
Exchange of assets	(64)	(532)
Reversal of impairment of long-lived assets	(64)	(532)
Capitalised interest on investments in associates	64	526
Goodwill	3	24
Deferred tax effect of US GAAP adjustments	36	301
Shareholders' funds under US GAAP	22,697	187,850

Note: United States dollar equivalents

For the convenience of readers, amounts in Renminbi have been translated into United States dollars at the rate of US\$1.00 = RMB8.2765 being the noon buying rate in New York City on 31 December 2004 for cable transfers in Renminbi as certified for customs purposes by the Federal Reserve Bank of New York. No representation is made that the Renminbi amounts could have been, or could be, converted into United States dollars at that rate.
