FORM 10 Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended June 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission File No. 001-34220

3D SYSTEMS CORPORATION

(Exact Name of Registrant as Specified in Its Charter)

DELAWARE	95 4431352
(State or Other Jurisdiction of Incorporation or Organization)	(I.R.S. Employer Identification No.)
333 THREE D SYSTEMS CIRCLE	
ROCK HILL, SOUTH CAROLINA	29730
(Address of Principal Executive Offices)	(Zip Code)

(Registrant's Telephone Number, Including Area Code): (803) 326 3900

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.) Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Shares of Common Stock, par value \$0.001, outstanding as of July 23, 2014: 109,919,858

Sales of business information products decreased by 20.1%, to ¥85,728 million in fiscal 2008 due to reduced personal computer sales in the Japanese domestic market. With regard to servers and personal computers, the decline in sales was caused by Canon's change in marketing strategy from selling single products to a solutions business involving combinations of various products.

Sales of cameras declined by 9.6% in fiscal 2008, totaling ¥1,041,947 million. The high-resolution, competitively priced EOS Digital Rebel XSi (EOS 450D) and advanced-amateur model EOS 40D enjoyed healthy sales, contributing to growth in sales volume for digital SLR cameras. Sales volume also increased for compact digital cameras despite stagnant market conditions as the company bolstered its product lineup with the introduction of 16 new models, including 6 new ELPH (IXUS)-series models and 10 PowerShot-series models. Consequently, unit sales of digital cameras increased by 4% year on year. Sales of cameras constituted 25.4% of consolidated net sales in fiscal 2008.

Sales of optical and other products decreased by 0.2% in fiscal 2008, to ¥392,195 million. Within this segment, while sales of aligners, used to produce LCD panels, gained momentum owing to a recovery in demand, sales of steppers, used in the production of semiconductors, remained stagnant due to deteriorating market conditions. Sales of optical and other products constituted 9.6% of consolidated net sales in fiscal 2008.

Sales by region

A summary of net sales by region in fiscal 2008 and fiscal 2007 is provided below:

	2008	Change	2007
	(Millions of yen, except percentage data)		
Japan	¥ 868,280	- 8.4%	¥ 947,587
Americas	1,154,571	- 13.6	1,336,168
Europe	1,341,400	- 10.5	1,499,286
Others	729,910	+ 4.5	698,305
Total	¥ 4,094,161	- 8.6%	¥ 4,481,346

Note: This summary of net sales by region of destination is determined by the location of the customer.

A geographical analysis indicates that net sales in fiscal 2008 decreased in each of the major regions.

In Japan, sales of office imaging products within the business machines segment dropped by 3.5% in fiscal 2008 mainly due to weakened sales of monochrome models of network digital MFDs. Although sales of video camcorders recorded solid growth, overall sales of the cameras segment decreased by 8.7% led by reduced demand for compact digital cameras. Sales of optical and other products decreased by 22.8% mainly due to a reduced demand for steppers. As a result, net sales in the region decreased by 8.4% in fiscal 2008 from fiscal 2007.

In the Americas, net sales decreased by 1.6% on a local currency basis in fiscal 2008, mainly due to reduced sales of such products as monochrome network MFDs and compact digital cameras. On a yen basis, net sales in the Americas declined by 13.6% in fiscal 2008 as the yen strengthened to the U.S. dollar rapidly and significantly.

Table of Contents

In Europe, net sales fell by 3.4% on a local currency basis in fiscal 2008, mainly due to reduced sales of such products as compact digital cameras and laser beam printers. On a yen basis, net sales in Europe dropped by 10.5% in fiscal 2008 resulting from the impact of the rapid appreciation of the yen to the euro.

Sales in other areas increased by 4.5% on a yen basis in fiscal 2008, reflecting the robust rise in sales of digital cameras and aligners.

Operating profit by product

Operating profit for business machines in fiscal 2008 decreased by ¥105,617 million to ¥544,644 million. This decrease resulted primarily from the reduction in sales.

Operating profit for cameras in fiscal 2008 decreased by ¥119,639 million to ¥187,787 million as a result of the drop in sales value, coupled with the significant decline in the gross profit ratio stemming from falling prices and the effects of the strong yen.

Operating profit for optical and other products in fiscal 2008 decreased by ¥66,570 million to a loss of ¥45,490 million as a result of a significant increase in cost of sales and outlays due to such factors as the disposal of inventories, which was carried out in response to rising concerns that weak market sentiment may continue, the appreciation of the yen, along with an impairment charge for fixed assets equipped with current technologies.

Fiscal 2007 compared with fiscal 2006

Summarized results of operations for fiscal 2007 and fiscal 2006 are as follows:

	2007	Change	2006
	(Millions of yen, except per share amounts and percentage data)		
Net sales	¥ 4,481,346	+ 7.8%	¥ 4,156,759
Operating profit	756,673	+ 7.0	707,033
Income before income taxes and minority interests	768,388	+ 6.8	719,143
Net income	488,332	+ 7.2	455,325
Net income per share:			
Basic	377.59	+10.4	341.95
Diluted	377.53	+10.4	341.84
Note: See notes to Item 3A Selected Financial Data .			

Sales

Canon's consolidated net sales in fiscal 2007 totaled ¥4,481,346 million. This represents a 7.8% increase from the previous fiscal year, reflecting solid rises in sales of digital cameras and color network digital MFDs, and laser beam printers, along with the positive effects of the depreciation of the yen.

Overseas operations are significant to Canon's operating results and generated approximately 77% of total net sales in fiscal 2007. Such sales are denominated in the applicable local currency and are subject to fluctuations in the value of the yen in relation to such other currencies. Despite efforts to reduce the impact of currency fluctuations on operating results, including localizing some manufacturing and procuring parts and materials from overseas suppliers, Canon believes such fluctuations have had and will continue to have a significant effect on results of operations.

The average value of the yen in fiscal 2007 was ¥117.50 to the U.S. dollar, and ¥161.41 to the euro, representing a slight decrease against the U.S. dollar, and about 10% decline against the euro, compared with the previous year. The effects of foreign exchange rate fluctuations favorably impacted net sales by approximately ¥125,500 million. This favorable impact was comprised of approximately ¥9,600 million for U.S. dollar denominated sales, ¥104,700 million for euro denominated sales and ¥11,200 million for other foreign currency denominated sales.

Cost of sales

Cost of sales principally reflects the cost of raw materials, parts and labor used by Canon in the manufacture of its products. A portion of the raw materials used by Canon is imported or includes imported materials. Such raw materials are subject to fluctuations in world market prices and exchange rates that may affect Canon's cost of sales. Other components of cost of sales include depreciation expenses from plants, maintenance expenses, light and fuel expenses and rent expenses. The ratio of cost of sales to net sales for fiscal 2007, 2006 and 2005 was 49.9%, 50.4% and 51.5%, respectively.

Gross profit

Canon's gross profit in fiscal 2007 increased by 9.1% to ¥2,246,981 million from fiscal 2006. The gross profit ratio improved 0.5 points year on year to reach 50.1%. The improved gross profit ratio was mainly the result of such factors as the launch of new products and the in-house manufacturing of key components and key devices, in addition to cost-reduction efforts realized through ongoing production-reform and procurement-reform activities, which absorbed the negative effects of escalating raw materials cost and severe price competition in the consumer product market.

Operating expenses

The major components of operating expenses are payroll, R&D, advertising expenses and other marketing expenses. Although the growth in selling, general and administrative expenses which increased 7.4% year on year remained less than revenue growth, R&D expenditures grew by 19.4% from the year-ago period to ¥368,261 million due to active R&D investment, resulting in an increase in the operating expense to net sales ratio of 0.6 points year on year to 33.2%.

Operating profit

Operating profit in fiscal 2007 increased by 7.0% to ¥756,673 million from fiscal 2006. Operating profit in fiscal 2007 was 16.9% of net sales.

The company and its domestic subsidiaries implemented a change in the accounting method used to calculate depreciation of fixed assets at the start of the second quarter of the year, which resulted in an increase of depreciation expense by ¥63,773 million compared with the previously used method.

Other income (deductions)

Other income (deductions) for fiscal 2007 stayed at almost the same level as the previous year. Although interest and dividend income increased by ¥5,666 million, the foreign currency exchange loss offset it by ¥6,139 million.

Income before income taxes and minority interests

Income before income taxes and minority interests in fiscal 2007 was ¥768,388 million, a 6.8% increase from fiscal 2006, and constituted 17.1% of net sales.

Table of Contents*Income taxes*

Provision for income taxes in fiscal 2007 increased by ¥16,025 million from fiscal 2006, primarily as a result of the increase in income before income taxes and minority interests. The effective tax rate during fiscal 2007 declined by 0.1% compared with fiscal 2006.

Net income

As a result of the factors offering above, net income in fiscal 2007 increased by 7.2% to ¥488,332 million, which represents a 10.9% return on net sales.

Product information

Canon divides its businesses into three product groups: business machines, cameras and optical and other products. The business machines product group includes office imaging products, computer peripherals and business information products.

Office imaging products include mainly office network digital MFDs, color network digital MFDs, office copying machines, personal-use copying machines and full-color copying machines.

Computer peripherals include mainly laser beam printers, inkjet multifunction peripherals, single function inkjet printers and image scanners.

Business information products include mainly computer information systems, document scanners and personal information products.

The cameras product group includes mainly digital SLR cameras, compact digital cameras, interchangeable lenses and digital video camcorders.

The optical and other products product group includes mainly semiconductor production equipment, mirror projection mask aligners for LCD panels, broadcasting equipment, medical equipment, large format printers and related components.

Sales by product

Canon's sales by product group are summarized as follows:

	2007	Change	2006
	(Millions of yen, except percentage data)		
Business machines:			
Office imaging products	¥ 1,290,788	+ 8.8%	¥ 1,185,925
Computer peripherals	1,537,511	+ 9.9	1,398,408
Business information products	107,243	+ 0.5	106,754
Total business machines	2,935,542	+ 9.1	2,691,087
Cameras	1,152,663	+ 10.6	1,041,865
Optical and other products	393,141	- 7.2	423,807
Total	¥ 4,481,346	+ 7.8%	¥ 4,156,759

Sales of business machines, constituting 65.5% of consolidated net sales, increased 9.1%, to ¥2,935,542 million in fiscal 2007.

Sales of office imaging products increased 8.8% in fiscal 2007, to ¥1,290,788 million. In the business machine segment, as demand for network digital MFDs shifted toward color models in both the domestic Japanese and overseas markets, the competitively priced iR C2880 series and the high-end iR C5185 series continued to enjoy strong sales. Among monochrome network digital MFDs, the iR5055 series and the new energy-saving iR3025 series contributed to expanded sales. Additionally, the company marked its entry into the commercial print market with the launch of the new imagePRESS C7000VP. Color office imaging products accounted for 35% and 31% and monochrome office imaging products accounted for 45% and 49% of office imaging products sales in fiscal 2007 and 2006, respectively. Sales of facsimiles and information system business accounted for 20% of sales of office imaging

products in both fiscal 2007 and 2006.

Sales of computer peripherals increased 9.9% in fiscal 2007 to ¥1,537,511 million. Laser beam printers enjoyed a year-on-year increase of over 20% in unit sales, with strong demand for both color and monochrome low-end models, and consumables also growing favorably, resulting in an increase of 10.5% in sales in value terms. As for inkjet printers, despite a continuing decline in unit sales for single-function models and severe price competition in the market, sales in value terms increased by 9.2% in 2007, boosted by such factors as increased unit sales of multifunction models, including the PIXMA MP600/610, and healthy sales growth for consumables.

Sales of business information products increased 0.5%, to ¥107,243 million in fiscal 2007.

Sales of cameras continued to achieve growth of 10.6% in fiscal 2007, totaling ¥1,152,663 million. The growth was fueled by demand for digital SLR cameras, with particularly strong sales for the compact, lightweight-body EOS DIGITAL REBEL XT_i and the advanced-amateur-model EOS 30D/40D which, in turn, led to expanded sales of interchangeable lenses for SLR cameras. As for compact digital cameras, the company strengthened its lineup with the launch of 16 new models 5 stylish ELPH-series models and 11 PowerShot-series models catering to a diverse range of shooting styles. As a result, unit sales of digital cameras for 2007 increased by approximately 17% from the year-ago period. In the field of digital video camcorders, the launch of consumer-market HDV models equipped with Canon HD CMOS sensors contributed to expanded sales, filling out the company's digital camcorder lineup along with MiniDV, DVD and hard disk models. Sales of cameras constituted 25.7% of consolidated net sales in fiscal 2007.

Sales of optical and other products decreased 7.2% in fiscal 2007, to ¥393,141 million. In the optical and other products segment, sales of aligners, used to produce LCD panels, decreased amid reduced market demand due to restrained investment by LCD manufacturers, and sales of steppers, used in the production of semiconductors, also declined slightly. Sales of optical and other products constituted 8.8% of consolidated net sales in fiscal 2007.

Table of Contents**Sales by region**

A summary of net sales by region in fiscal 2007 and fiscal 2006 is provided below:

	2007	Change	2006
	(Millions of yen, except percentage data)		
Japan	¥ 947,587	+ 1.6%	¥ 932,290
Americas	1,336,168	+ 4.1	1,283,646
Europe	1,499,286	+14.1	1,314,305
Others	698,305	+11.5	626,518
Total	¥ 4,481,346	+ 7.8%	¥ 4,156,759

Note: This summary of net sales by region of destination is determined by the location of the customer.

A geographical analysis indicates that net sales in fiscal 2007 increased in every region.

In Japan, sales of office imaging products increased by 6.8% in fiscal 2007 due to the growth of color network digital MFDs and cameras also achieved sales growth of 7.4% due to strong demand for digital SLR. Sales of optical and other products decreased by 6.8% due to a reduced demand for steppers. As a result, net sales in this region increased by 1.6% in fiscal 2007 from fiscal 2006.

In the Americas, net sales increased by 3.1% on a local currency basis in fiscal 2007, mainly due to increased sales of digital cameras and color network digital MFDs. Sales of digital cameras experienced continued strong demand and benefited from the effect of newly-launched products such as the EOS 40D, advanced-amateur-model, and the EOS DIGITAL REBEL XTi. On a yen basis, net sales in the Americas increased by 4.1% in fiscal 2007.

In Europe, net sales increased by 5.3% on a local currency basis in fiscal 2007, mainly due to increased sales of laser beam printers, color network digital MFDs and digital cameras. On a yen basis, after accounting for the depreciation of the yen against the euro, net sales in Europe grew 14.1% in fiscal 2007.

Sales in other areas increased by 11.5% on a yen basis in fiscal 2007, reflecting overall sales growth, particularly in digital cameras and laser beam printers.

Operating profit by product

Operating profit for business machines in fiscal 2007 increased by ¥51,032 million to ¥650,261 million. This increase resulted primarily from sales growth and cost reduction efforts.

Operating profit for cameras in fiscal 2007 increased by ¥38,688 million to ¥307,426 million. The suppression of price declines through the launch of new products and continued cost reduction efforts realized through ongoing production reform and procurement boosted the operating profit of this segment.

Operating profit for optical and other products in fiscal 2007 decreased by ¥20,395 million to ¥21,080 million mainly due to a decline in the sales volume of aligners and steppers.

Table of Contents**Segment information by product and geographic area**

Segment information by product and by geographic area for the years ended December 31, 2008, 2007 and 2006 are shown below.

The following table provides segment information by product:

	As of/for the year ended December 31, 2008					Consolidated
	Business machines	Cameras	Optical and other products	Corporate and Eliminations	(Millions of yen)	
Net sales:						
Unaffiliated customers Intersegment	¥ 2,660,019	¥ 1,041,947	¥ 392,195	¥ (235,690)		¥4,094,161
Total	2,660,019	1,041,947	627,885	(235,690)		4,094,161

Notes:

- (1) General corporate expenses of ¥190,698 million, ¥221,979 million and ¥202,328 million in the years ended December 31, 2008, 2007 and 2006, respectively, are included in Corporate and Eliminations.
- (2) Corporate assets of ¥1,487,667 million, ¥1,644,220 million and ¥1,860,933 million as of December 31, 2008, 2007 and 2006, respectively, which mainly consist of cash and cash equivalents, short-term investments, investments and corporate properties, are

included in

Corporate and
Eliminations.

- (3) The segments are defined under Japanese GAAP. In grouping of segment information by product, Japanese GAAP requires that consideration be given to similarities of product types and characteristics, manufacturing methods, sales markets, and other factors that are similar.
- (4) As noted in Note 1-(k) of the Notes to Consolidated Financial Statements, effective April 1, 2007, the Company and its domestic subsidiaries elected to change the declining-balance method of depreciating machinery and equipment. The change in depreciation methods caused an increase in depreciation expense by ¥29,148 million in the Business machines segment, ¥6,451 million in the Cameras segment, ¥15,540 million in the Optical and other products segment and

¥12,634 million in
Corporate and
Eliminations.

Notes:

- (1) General corporate expenses of ¥190,698 million, ¥221,979 million and ¥202,328 million in the years ended December 31, 2008, 2007 and 2006, respectively, are included in Corporate and Eliminations.
- (2) Corporate assets of ¥1,487,667 million, ¥1,644,220 million and ¥1,860,933 million as of December 31, 2008, 2007 and 2006, respectively, which mainly consist of cash and cash equivalents, short-term investments, investments and corporate properties, are included in Corporate and Eliminations.
- (3) Segment information by geographic area is determined by the location of the Company or its relevant subsidiary making the sale. The segments are

defined under Japanese GAAP. In grouping of segment information by geographic area, Japanese GAAP requires that consideration be given to geographic proximity, as well as similarities of economic activities, interrelationships of business activities and other similar factors.

Table of Contents**Foreign operations and foreign currency transactions**

Canon's marketing activities are performed by subsidiaries in various regions in local currencies, while the cost of sales is generally in yen. Given Canon's current operating structure, appreciation of the yen has a negative impact on net sales and the gross profit ratio. To reduce the financial risks from changes in foreign exchange rates, Canon utilizes derivative financial instruments, which are comprised principally of forward currency exchange contracts.

The return on foreign operation sales is usually lower than that from domestic operations because foreign operations consist mainly of marketing activities. Return on foreign operation sales is calculated by dividing net income of foreign subsidiaries, after factoring in consolidation adjustments between foreign subsidiaries, by net sales of foreign subsidiaries. Marketing activities are generally less profitable than production activities, which are mainly conducted by the Company and its domestic subsidiaries. The returns on foreign operation sales in fiscal 2008, 2007 and 2006 were 2.3%, 4.0% and 3.7%, respectively. This compares with returns of 7.6%, 10.9% and 11.0% on consolidated operations for the respective years.

B. Liquidity and capital resources

Cash and cash equivalents in fiscal 2008 decreased by ¥265,267 million to ¥679,196 million, compared with ¥944,463 million in fiscal 2007 and ¥1,155,626 million in fiscal 2006. Canon's cash and cash equivalents are typically denominated both in Japanese yen and in U.S. dollar, with the remainder denominated in foreign currencies.

Net cash provided by operating activities in fiscal 2008 decreased by ¥222,585 million from the previous year to ¥616,684 million, reflecting the decrease in sales and decreased cash proceeds from sales, combined with a decrease in net income. Cash flow from operating activities consisted of the following key components: the major component of Canon's cash inflow is cash received from customers, and the major components of Canon's cash outflow are payments for parts and materials, selling, general and administrative expenses, and income taxes.

For fiscal 2008, cash inflow from cash received from customers decreased, due to the decrease in net sales. There were no significant changes in Canon's collection rates. Cash outflow for payments for parts and materials also decreased, as a result of a decrease in net sales and cost reductions. Cost reductions reflect a decline in unit prices of parts and raw materials, as well as a streamlining of the process of using these parts and materials through promoting efficiency in operations. Cash outflow for payments for selling, general and administrative expenses increased despite cost-cutting efforts. Cash outflow for payments of income taxes decreased, due to the decrease in taxable income.

Net cash used in investing activities in fiscal 2008 was ¥472,480 million, compared with ¥432,485 million in fiscal 2007 and ¥460,805 million in fiscal 2006, consisting primarily of purchases of fixed assets. The purchases of fixed assets which totaled ¥428,168 million in fiscal 2008 were mainly concentrated to items relevant to reinforcing production and achieving cost reduction, along with the acquisition of shares of Hitachi Displays, Ltd. toward the launch of Canon's display business.

Canon defines free cash flow by deducting the cash flows from investing activities from the cash flows of operating activities. For fiscal 2008, free cash flow totaled ¥144,204 million as compared to ¥406,784 million for fiscal 2007. Canon's management recognizes that constant and intensive investment in facilities and R&D is required to maintain and strengthen the competitiveness of its products. Canon's management seeks to meet its capital requirements with cash flow principally earned from its operations, therefore, our capital resources are primarily sourced from internally generated funds. Accordingly, Canon has included the information with regard to free cash flow as its management frequently monitors this indicator, and believes that such indicator is beneficial to the understanding of investors. Furthermore, Canon's management believes that this indicator is significant in understanding Canon's current liquidity and the alternatives of use in financing activities because it takes into consideration its operating and investing activities. Canon refers to this indicator together with relevant U.S. GAAP financial measures shown in its consolidated statements of cash flows and consolidated balance sheets for cash availability analysis.

Net cash used in financing activities totaled ¥277,565 million in fiscal 2008, mainly resulting from the ¥100,000 million purchase of treasury stock with the aim of improving capital efficiency and ensuring a flexible capital strategy in addition to the dividend payout of ¥145,000 million. The Company paid dividends in fiscal 2008 of ¥110.00 per share, the same dividend amount as the prior year on a local currency basis.

Canon seeks to meet its capital requirements principally with cash flow from operations although Canon expects net cash provided by operating activities in fiscal 2009 is likely to decline. In response to this expectation, Canon is currently endeavoring to optimize the level of capital investments, by further raising the efficiency of its investments and focusing investments on selected material items. Consistent with this objective, Canon continued to reduce its reliance on external funding for capital investments in favor of relying upon internally generated cash flows. This approach is supplemented with group-wide treasury and cash management activities undertaken at the parent company level.

To the extent Canon relies on external funding for its liquidity and capital requirements, it generally has access to various funding sources, including the issuance of additional share capital, long-term debt or short-term loans. While Canon has been able to obtain funding from its traditional financing sources and from the capital markets, and believes it will continue to be able to do so in the future, there can be no assurance that adverse economic or other conditions will not affect Canon's liquidity or long-term funding in the future.

Short-term loans (including current portion of long-term debt) amounted to ¥5,540 million at December 31, 2008 compared to ¥18,317 million at December 31, 2007. Long-term debt (excluding current portion) amounted to ¥8,423 million at December 31, 2008 compared to ¥8,680 million at December 31, 2007.

Canon's long-term debt (excluding current portion) generally consists of lease obligations.

In order to facilitate access to global capital markets, Canon obtains credit ratings from two rating agencies: Moody's Investors Services, Inc. (Moody's) and Standard and Poor's Rating Services (S&P). In addition, Canon maintains a rating from Rating and Investment Information, Inc. (R&I), a rating agency in Japan, for access to the Japanese capital market.

As of February 27, 2009, Canon's debt ratings are: Moody's: Aa1 (long-term); S&P: AA (long-term), A-1+ (short-term); and R&I: AA+ (long-term). Canon does not have any rating downgrade triggers that would accelerate the maturity of a material amount of its debt. A downgrade in Canon's credit ratings or outlook could, however, increase the cost of its borrowings.

Increase in property, plant and equipment on an accrual basis in fiscal 2008 amounted to ¥361,988 million compared with ¥428,549 million in fiscal 2007 and ¥379,657 million in fiscal 2006. In fiscal 2008, increase in property, plant and equipment was mainly used to reinforce production and achieve cost reductions. For fiscal 2009, Canon projects its increase in property, plant and equipment will be approximately ¥315,000 million.

Employer contributions to Canon's worldwide defined benefit pension plans were ¥23,033 million in fiscal 2008, ¥21,720 million in fiscal 2007, ¥44,981 million in fiscal 2006. In addition, employer contributions to Canon's worldwide defined contribution pension plans were ¥10,840 million in fiscal 2008, ¥10,262 million in fiscal 2007, and ¥6,233 million in fiscal 2006.

Table of Contents

Working capital in fiscal 2008 decreased by ¥231,234 million, to ¥1,120,848 million, compared with ¥1,352,082 million in fiscal 2007 and ¥1,619,042 million in fiscal 2006. This decrease was primarily a result of a decrease in cash and cash equivalents. Canon believes its working capital will be sufficient for its requirements for the foreseeable future. Canon's capital requirements are primarily dependent on management's business plans regarding the levels and timing of purchases of fixed assets and investments. The working capital ratio (ratio of current assets to current liabilities) for fiscal 2008 was 2.19 compared to 2.08 for fiscal 2007 and 2.39 for fiscal 2006.

Return on assets (net income divided by the average of total assets) was 7.3% in fiscal 2008, compared to 10.8% in fiscal 2007 and 10.6% in fiscal 2006.

Return on stockholders' equity (net income divided by the average of total stockholders' equity) was 11.1% in fiscal 2008 compared with 16.5% in fiscal 2007 and 16.3% in fiscal 2006.

Debt to total assets ratio was 0.4%, 0.6% and 0.7% as of December 31, 2008, 2007 and 2006, respectively. Canon had short-term loans and long-term debt of ¥13,963 million as of December 31, 2008, ¥26,997 million as of December 31, 2007 and ¥31,151 million as of December 31, 2006.

C. Research and development, patents and licenses

Canon is in the third year of the Excellent Global Corporation Plan, its 5-year (2006-2010) management plan. The slogan of the third phase (Phase III) is "Innovation & Sound Growth" and there are four core strategies:

Realize an overwhelming No.1 position worldwide in all current core businesses;

Expand operations through diversification;

Identify new business domains and accumulate necessary technological capabilities; and

Establish new production system to sustain global competitiveness;

Canon is striving to implement the three R&D related strategies as follows:

Realize an overwhelming No.1 position worldwide in all current core businesses: Pursue development of new products which enable cross-media imaging by sophisticated functional synergy among the variety of Canon's image handling products, benefiting from the proliferation of broad band communication environment.

Expand operations through diversification: Focus on developing various types of display, including Surface-conduction Electron-emitter Display (SED) and OLED.

Identify new business domains and accumulate necessary technological capabilities: Accumulate technological capability in each of the medical imaging sector, intelligent robot industry and safety technology domain.

Canon is developing and strengthening relationships with universities and other research institutes, such as Kyoto University, Tokyo Institute of Technology, Stanford University, the New Energy and Industrial Technology Development Organization and the National Institute of Advanced Industrial Science and Technology, to assist with fundamental research and to develop cutting-edge technologies.

Canon has fully introduced 3D-CAD systems across the Canon group, boosting R&D efficiency to curtail product development times and costs. Moreover, Canon enhanced and evolved its simulation, measurement, and analysis technologies by establishing leading-edge facilities, including one of Japan's highest-performance cluster computers. As such, Canon has succeeded in further reducing the need for prototypes, dramatically lowering costs and shortening product development lead times.

Canon has R&D centers worldwide. Each R&D center is collaborating with other centers to achieve synergies, and is cultivating closer ties in fields ranging from basic research to product development.

Canon's consolidated R&D expenditures were ¥374,025 million in fiscal 2008, ¥368,261 million in fiscal 2007 and ¥308,307 million in fiscal 2006. The ratios of R&D expenditures to the consolidated total net sales for fiscal 2008, 2007 and 2006 were 9.1%, 8.2% and 7.4%, respectively.

Canon believes that new products protected by patents will not easily allow competitors to compete with it, and will give it an advantage in establishing standards in the market and industry. According to the United States patent

annual list, which IFI CLAIMS® Patent Services released, Canon obtained the third greatest number of private sector patents in 2008. This achievement marks Canon's seventeenth consecutive year as one of the top three patent-receiving private-sector organizations.

Table of Contents**D. Trend information**

Regarding the global economy, given the combined effects of economic downturns in the leading industrialized countries and deceleration in emerging countries, it is expected that growth rates will decrease greatly and a strong sense of stagnation will continue. The business conditions for Canon are also expected to continue to be severe due to factors such as the trend of a strong yen in the foreign exchange markets. Much of the deterioration in market conditions for Canon's three product groups occurred in the fourth quarter of fiscal 2008 so that the full-year 2009 net sales volumes for Canon's product groups are likely to decline further from fiscal 2008 levels and continue to adversely affect Canon's operating results. Canon expects net sales volumes to remain at suppressed levels in fiscal 2010 and to continue to adversely affect fiscal 2010 operating results.

Under these conditions, Canon, in the fourth year of Phase III (2006 to 2010) of its Excellent Global Corporation Plan, will make the most of management reforms achieved to date and take all measures for future growth in order to achieve further improvements in management quality. In other words, Canon will respond swiftly to the present difficult business conditions and structure itself as a lean organization by using this year to prepare to take advantage of improved conditions in the future.

Toward that goal, Canon's key objectives will be, first of all, to achieve timely introductions of new products satisfactory to customers in every aspect of functionality, design, ease of use, reliability and cost performance, and to secure No. 1 market positions in each of its businesses.

Next, amid a strong yen, massive fluctuations in raw material prices, falling product prices and conditions changing in other respects, Canon will work to lower its costs by, for example, pursuing production and procurement reform activities to an even greater degree and practicing prototype-less development. Furthermore, in the face of stagnant market conditions, Canon will improve the quality of products thoroughly by renewing its appreciation of product quality as the lifeblood of a manufacturer and taking to heart the supremacy of quality.

Additionally, through collaboration with Hitachi Displays, of which Canon acquired shares during the current term, Canon will concentrate on strengthening the display operation as a new core business. Canon also aims to add significant strength in new businesses by actively launching new products in the field of medical equipment and by pursuing other initiatives as well.

With eyes focused on taking Canon to new heights, promoting its perpetual development and turning it into a truly excellent global company that continues to prosper, Canon will work to strengthen its unique core technology research system and develop management personnel, while also devoting even greater efforts to social contribution activities.

*Business machines segment**Office imaging products*

In the office imaging products segment, it has become more important to provide added value in the form of networking, integration, color printing and multifunction models. Also, in addition to the stable market for mid-segment office products, Canon expects that the market for higher-end models and low-end multifunction models will expand in the long term. The market for color network digital MFDs continued to grow, but sales of monochrome network digital MFDs decreased in 2008 due to the global economic downturn and the shifting market trend from monochrome to color models. In recent years, there has been a new printer-based MFP market emerging that has been created by printer vendors as they seek to enter the copier and MFD market.

To maintain and enhance a competitive edge and to meet more sophisticated customer demands, Canon is strengthening its marketing capabilities by reinforcing its hardware and software product lineups and by improving functionality. In 2008, Canon strengthened the product lineups of its color digital devices as well as its monochrome machines and maintained its market share by executing business strategies in line with current market trends.

Computer peripheral products

In the inkjet printer market, Canon expects a slowdown in market growth led by the global economic slowdown, and the shift from single-function printers (SFPs) to MFPs. To manage these trends, Canon has focused on selling mid-range to high-end models which enables large volume of printing, including the business-use multifunction models equipped with a facsimile function, and simultaneously has strengthened its lineup to entry models with the utmost effort to expand overall sales.

Canon's laser beam printer business had been maintaining a strong position in the market, which had consecutively displayed solid growth. However, the deterioration of the current global economy has led to a dramatic decline in the market as a whole, raising uncertainty in the market. Within the monochrome laser beam printer market, the reduced demand in emerging economies, which had been driving market expansion, was significant especially in Russia, in addition to the drop in developed countries. This situation has led to the shrinkage of the overall market. As for color laser beam printers, market growth reversed from expansion to a slight contraction. Amid this severe market conditions, Canon is accelerating the development of competitive, strategic products in all segments to introduce those products on a timely basis and prepare for the recovery of the global economy. Canon is also focused to shift from selling single-function models to multifunction models, as Canon expects continued growth in demand for multifunction models. The promotion of automated production of cartridges, along with in-house production of parts to ensure stable procurement, is concurrently in progress.

Business information products

As for document scanners, the adoption of internal information management systems by corporations, and other factors are driving a worldwide movement to digitize documents and Canon expects the market for low-priced, compact scanners to continue to expand. With regard to servers and personal computers, demand from corporate clients in the Japanese market held steady in fiscal 2008, but a decline in sales was caused by Canon's change in marketing strategy from selling single products to a solutions business involving combinations of various products.

Cameras segment

The digital camera market expanded in 2008, despite the slower growth starting in September 2008 due principally to the financial crisis. Developed markets such as the United States exhibited negative growth due to the financial crisis. However, markets in emerging countries such as China and Eastern Europe have continued to expand. The emergence of digital imaging systems such as PC-free direct printing systems has contributed to this growth by expanding digital imaging functionality through network connectivity. The improvement of the user-friendly image processing interfaces and software have also boosted growth.

Currently, the overall market for digital cameras is stagnant due to the current economic crisis. However, digital cameras are popular among individuals and further expansion is expected once the economy recovers. Nevertheless, as with most other digital consumer electronics, the digital camera market is now confronted with a fierce price war and intensified technological competition in terms of picture quality and functionality. Profit margins have been shrinking overall in the industry, and Canon's profit ratio has fallen due to the sharp economic downturn and fluctuations in the foreign exchange rates. Canon expects the market for compact digital cameras to expand in the medium term, thanks to growth in emerging market countries. However, industry profit margins are eroding due to falling prices and increased competition. Therefore, Canon seeks to continue cutting production costs while expanding sales volumes.

Table of Contents

Canon believes that it played a major role in the continued expansion of the digital SLR market in fiscal 2008. Although the difficult global economic situation has resulted in slowed growth, this market is expected to continue to grow in the near term. The trend towards high ISO speeds has moved at a dramatic pace in this digital age. It has become possible with a digital SLR camera to easily take beautiful shots in dark places where shooting with film cameras is impossible. Also, movie functions were added to SLR cameras this year, marking the beginning of a new age for these products. These functions have expanded the possibilities for shooting, and by supporting new user needs, Canon believes it can develop the market even further.

Canon expects the interchangeable lens market for SLRs to grow as a result of the market penetration in the digital SLR camera market. Canon aims to expand its sales and market share by introducing the most suitable products for the digital SLR camera users, including products with Canon's Image Stabilizer capability.

Diversification in the global video camcorder market has occurred with various new media appearing, such as DVDs, hard disks and flash memories. However, starting in 2008, it became apparent that the trend is heading for flash memories to become mainstream in the global video camcorder market and towards High Definition (HD) images. Canon believes that these two trends will lead to higher picture quality from smaller video camcorders with longer battery life, and will likely support growth in the overall digital video market. Canon is working to expand sales of its powerful lineup of products that meet a wide range of user needs and that use high-quality HD imaging and dual flash memory technologies.

The business application projector market experienced the effects of the current global economic downturn beginning in the fourth quarter of 2008. Canon has reduced its unit and monetary projections for 2009.

The economic slowdown has affected high value-added products first, and the effects have started to be observed in Canon's high-resolution, high-brightness (high-luminosity), and high value-added products. Notwithstanding this trend, Canon continues to receive inquiries from system integrators and other imaging professionals, and is seeking to expand high value-added sales despite this current global economic downturn.

Optical and other products segment

In the semiconductor-production equipment industry, equipment manufacturers must provide high quality products corresponding to rapid technological progress. Canon will continue to focus on developing new products which adopt leading-edge technologies, such as immersion exposure technology and ultra precision processing and measurement technology.

In the LCD production mask aligner market, Canon will seek to strengthen its technical capabilities to meet the recent trend toward larger glass-substrates due to the increasing demand for larger LCD televisions.

In addition, Canon will continue to make distinctive products enabling high resolution and high productivity.

In the TV lens market, demand for HDTV, which has grown in the United States and Japan, is now growing in Europe. In particular, there has been increased demand for lenses used for broadcasting sporting events and for producing dramas and documentaries in HDTV. Although Canon has observed a slowdown in demand for these TV lenses starting at the end of fiscal 2008 due to the current global economic downturn, in the medium term, Canon still expects that digitization will drive worldwide replacement demand. At the same time, there have been signs of expanded HDTV applications by the media, starting with relatively inexpensive HDTV production, as the TV lens market structure shows signs of change. Canon already has significant market share worldwide for this class of lens and intends to continue to strengthen its market position in this market.

The economic downturn has caused a decline in the large format printer market, accordingly, Canon's sales fell below last year's sales performance. Canon will continue to lower costs of production and improve inventory turnover by expanding its market share and achieving economics of scale that improve its profitability.

E. Off-balance sheet arrangements

As part of its ongoing business, Canon does not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Canon provides guarantees for bank loans of its employees, affiliates and other companies. Canon would have to perform under a guarantee if the borrower defaults on a payment within the contract periods of 1 year to 30 years in

the case of employees with housing loans, and of 1 year to 10 years in the case of affiliates and other companies. The maximum amount of undiscounted payments Canon would have had to make in the event of default by all borrowers was ¥22,308 million at December 31, 2008. The carrying amounts of the liabilities recognized for Canon's obligations as a guarantor under those guarantees were insignificant.

Table of Contents**F. Contractual obligations**

The following summarizes Canon's contractual obligations at December 31, 2008.

	Total	Less than 1 year	Payments Due By Period		More than 5 years
			1-3 years <i>(Millions of yen)</i>	3-5 years	
Contractual obligations:					
Long-Term Debt:					
Capital Lease Obligations	¥ 13,648	¥ 5,313	¥ 7,388	¥ 924	¥ 23
Other Long-Term Debt	95	7	27	33	28
Operating Lease Obligations	52,049	15,221	18,946	9,107	8,775
Purchase commitments for :					
Property, Plant and Equipment	74,909	74,909			
Parts and Raw Materials	60,281	60,281			
Total	¥ 200,982	¥ 155,731	¥ 26,361	¥ 10,064	¥ 8,826

Note: The table does not include provisions for uncertain tax positions and related accrued interest and penalties, as the specific timing of future payments related to these obligations cannot be projected with reasonable certainty. See Note 13, Income Taxes in the Notes to Consolidated Financial Statements for further details.

Canon provides warranties of generally less than one year against defects in materials and workmanship on most of its consumer products. Estimated product warranty related costs are established at the time revenue is recognized and is included in selling, general and administrative expenses. Estimates for accrued product warranty cost are primarily based on historical experience, and are affected by ongoing product failure rates, specific product class failures outside

of the baseline experience, material usage and service delivery costs incurred in correcting a product failure. As of December 31, 2008, accrued product warranty costs amounted to ¥17,372 million.

At December 31, 2008, commitments outstanding for the purchase of property, plant and equipment were approximately ¥74,909 million, and commitments outstanding for the purchase of parts and raw materials were approximately ¥60,281 million, both for use in the ordinary course of its business. Canon anticipates that funds needed to fulfill these commitments will be generated internally through operations.

During fiscal 2009, Canon expects to contribute ¥14,439 million to its Japanese defined benefit pension plans and ¥3,485 million to its foreign defined benefit pension plans.

Canon's management believes that current financial resources, cash generated from operations and Canon's potential capacity for additional debt and/or equity financing will be sufficient to fund current and future capital requirements.

Table of Contents**Item 6. Directors, Senior Management and Employees****A. Directors and senior management**

Directors and corporate auditors of the Company as of March 27, 2009 and their respective business experience are listed below.

Name (Date of birth)	Position (Group executive/function)	Date of commencement	Business experience (*current position/function)
Fujio Mitarai (Sept. 23, 1935)	Chairman & CEO	4/1961	Entered the Company

Term

All directors and corporate auditors are elected by the shareholders at their general meeting.

The term of office of directors is one year. The current term of all directors expires in March 2010. The term of office of corporate auditors is four years. The current term for Mr. Yamazaki and Mr. Nagata expires in March 2012, while the current terms for Mr. Ohe, who was elected in the general meeting of shareholders in March 2007, expires in March 2011, and the current term for Mr. Shimizu and Mr. Shishikura, who were elected in the general meeting of shareholders in March 2006, expires in March 2010.

Board members and corporate auditors may serve any number of consecutive terms.

There is no arrangement or understanding between any director or corporate auditor and any major shareholder, customer, supplier or other material stakeholders in connection with the selection of such director or corporate auditor.

Board of Directors and Corporate Auditors

The Company's articles of incorporation provide for a board of directors of not more than 30 members and for not more than five corporate auditors. Currently the number of board members is 25 and the number of corporate auditors is five. There is no maximum age limit for members of the board. Board members and corporate auditors may be removed from office at any time by a resolution of a general meeting of shareholders.

The board of directors has ultimate responsibility for the administration of the Company's affairs. By resolution, the board of directors designates, from among its members, representative directors, who have authority individually to represent the Company generally in the conduct of its affairs.

Under the Corporation Law of Japan, board members must refrain from engaging in any business competing with the Company unless approved by a board resolution, and no board member may vote on a proposal, arrangement or contract in which that board member is deemed to be materially interested.

The Corporation Law of Japan requires a resolution of the board of directors for a company to acquire or dispose of material assets, to borrow substantial amounts of money, to employ or discharge important employees such as corporate officers, and to establish, change or abolish material corporate organizations such as a branch office.

The corporate auditors are not required to be certified public accountants, although Mr. Shimizu is a certified public accountant. At least half of the corporate auditors must be persons who have not been either board members or employees of the Company or any of its subsidiaries. A corporate auditor may not at the same time be a board member or an employee of the Company or any of its subsidiaries. The corporate auditors have the statutory duty of examining the Company's financial statements and the Company's business reports to be submitted annually by the board of directors at the general meetings of shareholders and of reporting their opinions to the shareholders. They also have the statutory duty of supervising the administration by the board members of the Company's affairs. They shall participate in the meetings of the board of directors but are not entitled to vote.

The corporate auditors constitute the board of corporate auditors. Under the Corporation Law of Japan, the board of corporate auditors has a statutory duty to prepare and submit its audit report to the board of directors each year. A corporate auditor may note an opinion in the auditor report if a corporate auditor's opinion is different from the opinion expressed in the audit report. The board of corporate auditors is empowered to establish audit principles, the method of examination by corporate auditors of the Company's affairs and financial position and other matters concerning the performance of the corporate auditors' duties. The Company does not have an audit committee.

The amount of remuneration payable to the Company's board members as a group and that of the Company's corporate auditors as a group in respect of a fiscal year is subject to approval by a general meeting of shareholders. Within those authorized amounts, the compensation for each board member and corporate auditor is determined by the board of directors and a consultation of the corporate auditors, respectively. The Company does not have a remuneration committee.

In fiscal 2004, Canon established a standing committee, the Internal Control Committee, with the president appointed as chairman of the group. The Internal Control Committee has built a highly effective internal control system unique to Canon, which not only serves to ensure the reliability of the Company's financial reporting, but also aims to ensure the effectiveness and efficiency of its business operations, as well as compliance with related laws, regulations and internal controls.

Table of Contents

Additionally, in fiscal 2005, the Disclosure Committee was established with the president appointed as chairman. This committee was formed to ensure that Canon is not only in compliance with applicable laws, rules and regulations, but also to ensure that information disclosed to shareholders and capital markets is both correct and comprehensive.

Executive Officer System

At a Board of Directors meeting held on January 30, 2008, Canon resolved to adopt an Executive Officer System effective April 1, 2008. Executive Officers are appointed and discharged by the Board of Directors and have a term of office of one year. Taking into consideration growth in the scope of its business activities, Canon recognizes the need to bolster its management execution structure. By promoting capable human resources with accumulated executive knowledge across specific business areas, the Company is endeavoring to realize more flexible and efficient management operations. To this end, Canon intends to gradually increase the number of Executive Officers and further solidify its management systems.

Executive Officers of the Company appointed by the Board of Directors meeting held on January 28, 2009 are listed below.

Name	Position (Group executive/function)
Sachio Kageyama	President of Canon Vietnam Co., Ltd.
Masahiro Haga	Executive Vice President of Canon U.S.A., Inc.
Kengo Uramoto	Deputy Group Executive of Human Resource Management & Organization HQ
Masanori Yamada	Deputy Chief Executive of Office Imaging Products HQ
Akio Noguchi	Deputy Chief Executive of Peripheral Products HQ
Hiroyuki Suematsu	Chief Executive of Chemical Products HQ
Yasuhiro Tani	Group Executive of Digital Platform Technology Development HQ
Seymour Liebman	Executive Vice President of Canon U.S.A., Inc.
Masato Okada	Deputy Chief Executive of Image Communication Products HQ
Kazuhiro Akiyama	Deputy Group Executive of General Affairs HQ

B. Compensation

In the fiscal year ended December 31, 2008, the Company paid approximately ¥1,856 million, in total to directors and corporate auditors. This amount includes bonuses but excludes retirement allowances.

Directors and corporate auditors are not covered by the Company's retirement program. However, in accordance with customary Japanese business practices, directors and corporate auditors receive lump-sum retirement benefits, subject to shareholder approval. The Company paid retirement benefits aggregating ¥136 million to three directors during the fiscal year ended December 31, 2008.

The Company has two stock option (share option) plans. These plans were approved at the meeting of the Board of Directors in accordance with the Ordinary General Meeting of Shareholders for the 107th and 108th Business Term of the Company, pursuant to Articles 236, 238 and 239 of the Corporation Law of Japan, held on March 28, 2008 and March 27, 2009. Under and pursuant to these plans, share options will be issued as stock options to the Company's directors, executive officers and senior employees.

The descriptions of the stock option plans are below.

*The Stock Option Plan Approved on March 28, 2008***1. The Reason for the Necessity to Solicit Those Who Subscribe for Share Options on Particularly Favorable Conditions**

Share options were issued to the Company's directors, executive officers and senior employees for the purpose of further enhancing their motivation and morale to improve the Company's performance, with a view to long-term improvement of its corporate value.

2. Grantees of Share Options

The Company's directors, 8 executive officers, and 30 senior employees who are entrusted with important functions.

3. Number of Share Options

The number of share options that the Board of Directors are authorized to issue is 5,920.

4. Cash Payment for Share Options

No cash payment will be required for the share options.

5. Exercise Price

The exercise price is ¥5,502 per share.

6. Features of Share Options

The features of share options is as follows:

(1) Number of Shares acquired upon Exercise of a Share Option

The number of shares acquired upon exercise of one share option (the Allotted Number of Shares) is 100 common shares, and the total number of shares to be delivered due to the exercise of share options is 592,000 common shares.

However, if the Company effects a share split (including allotment of common shares without compensation; this inclusion being applicable below) or a share consolidation after the date of the allotment of the share options, the Allotted Number of Shares will be adjusted by the following calculation formula:

Allotted Number of Shares after Adjustment

= Allotted Number of Shares before Adjustment × Ratio of Share Splitting or Share Consolidation

Such adjustment will be made only with respect to the number of issued share options that have not then been exercised, and any fractional number of less than one share resulting from such adjustment will be rounded off.

Table of Contents**(2) Amount of Property to Be Contributed upon Exercise of Share Options**

The amount of property to be contributed upon the exercise of each share option is the amount obtained by multiplying the amount to be paid in for one share (the Exercise Price) to be delivered upon the exercise of a share option by the Allotted Number of Shares. The Exercise Price is the product of the multiplication of 1.05 and the closing price of one common share of the Company in ordinary trading at the Tokyo Stock Exchange as of the date of allotment of the share options (or if no trade is made on such date, the date immediately preceding the date on which such ordinary shares are traded), with any fractional amount of less than one yen to be rounded up to one yen.

The Exercise Price will be adjusted as follows:

(i) If the Company effects a share split or a share consolidation after the date of the allotment of the share options, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen:

Exercise Price after Adjustment

$$= \text{Exercise Price before adjustment} \times \frac{1}{\text{Ratio of Share Splitting or Share Consolidation}}$$

(ii) If, after the date of allotment of share options, the Company issues common shares at a price lower than the then market price thereof (other than by way of conversion of the third series of Unsecured Convertible Debentures Due 2008 of the Company) or disposes common shares owned by it, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen; however, the Exercise Price will not be adjusted in the case of the exercise of share options:

Exercise Price after Adjustment = Exercise Price before Adjustment ×

$$\frac{\text{Number of Newly Issued Shares} \times \text{Payment amount per Share}}{\text{Market Price} + \text{Number of Issued and Outstanding Shares}}$$

Number of Issued and Outstanding Shares + Number of Newly Issued Shares

The Number of Issued and Outstanding Shares is the number of shares already issued by the Company after subtraction of the number of shares owned by the Company. In the case of the Company's disposal of shares owned by it, the Number of Newly Issued Shares will be replaced with the Number of Own Shares to Be Disposed.

(iii) In the case of a merger, a company split or capital reduction after the date of allotment of share options, or in any other analogous case requiring the adjustment of the Exercise Price, the Exercise Price shall be appropriately adjusted within a reasonable range.

(3) Period during Which Share Options Are Exercisable

From May 1, 2010 to April 30, 2014.

(4) Matters regarding Stated Capital and Capital Reserves Increased When Shares Are Issued upon Exercise of Share Options

(i) The increased amount of stated capital will be half of the maximum amount of increases of stated capital, etc. to be calculated in accordance with Article 40, Paragraph 1 of the Companies Accounting Regulations (*Kaisha Keisan Kisoku*).

Any fractional amount of less than one yen resulting from such calculation will be rounded up to one yen.

(ii) The increased amount of capital reserves shall be the amount of the maximum amount of increases of stated capital, etc., mentioned in (i) above, after the subtraction of increased amount of stated capital mentioned in (i) above.

(5) Restriction on Acquisition of Share Options by Transfer

An acquisition of share options by way of transfer requires the approval of the Board of Directors.

(6) Events for the Company's Acquisition of Share Options

If a proposal for the approval of a merger agreement under which the Company will become an extinguishing company or a proposal for the approval for a share exchange agreement or a share transfer plan under which the Company will become a wholly-owned subsidiary is approved by the Company's shareholders at a shareholders

meeting (or by the Board of Directors if no resolution of a shareholders meeting is required for such approval), the Company will be entitled to acquire the share options, without compensation, on a date separately designated by the Board of Directors.

(7) Handling of Fractions

Any fraction of a share (less than one share) to be delivered to any holder of share options who has exercised share options will be disregarded.

(8) Other Conditions for Exercise of Share Options

(i) One share option may not be exercised partially.

(ii) Each holder of share options must continue to be a director, executive officer or employee of the Company until the end of the Company's general meeting of shareholders regarding the final business term within 2 years from the end of the Ordinary General Meeting of Shareholders for the 107th Business Term of the Company.

Table of Contents

(iii) Holders of share options will be entitled to exercise their share options for 2 years, and during the exercisable period, even after they lose their positions as directors, executive officers or employees. However, if a holder of share options loses such position due to resignation at his/her initiative, or due to dismissal or discharge by the Company, his/her share options will immediately lose effect.

(iv) No succession by inheritance is authorized for the share options.

(v) Any other conditions for the exercise of share options may be established by the Board of Directors.

7. Specific Method of Calculation of Remuneration to Directors

The amount of share options issued to the directors of the Company, as remuneration, is the amount obtained by multiplying the fair market value per share option as of the allotment date thereof by the total number of share options allotted to the directors existing as of such allotment date. The fair market value of a share option was calculated with the use of the Black-Scholes model on the basis of various conditions applicable on the allotment date.

The Stock Option Plan Approved on March 27, 2009

1. The Reason for the Necessity to Solicit Those Who Subscribe for Share Options on Particularly Favorable Conditions

Share options will be issued to the Company's directors, executive officers and senior employees for the purpose of further enhancing their motivation and morale to improve the Company's performance, with a view to long-term improvement of its corporate value.

2. Grantees of Share Options

The Company's directors, 10 executive officers, and 35 senior employees who are entrusted with important functions.

3. Number of Share Options

The number of share options that the Board of Directors will be authorized to issue is 11,000.

4. Cash Payment for Share Options

No cash payment will be required for the share options.

5. Features of Share Options

The features of share options will be as follows:

(1) Number of Shares acquired upon Exercise of a Share Option

The number of shares acquired upon Exercise of one share option (the Allotted Number of Shares) is 100 common shares, and the total number of shares to be delivered due to the exercise of share options is 1,100,000 common shares.

However, if the Company effects a share split (including allotment of common shares without compensation; this inclusion being applicable below) or a share consolidation after the date of the allotment of the share options, the Allotted Number of Shares will be adjusted by the following calculation formula:

Allotted Number of Shares after Adjustment

= Allotted Number of Shares before Adjustment × Ratio of Share Splitting or Share Consolidation

Such adjustment will be made only with respect to the number of issued share options that have not then been exercised, and any fractional number of less than one share resulting from such adjustment will be rounded off.

(2) Amount of Property to Be Contributed upon Exercise of Share Options

The amount of property to be contributed upon the exercise of each share option will be the amount obtained by multiplying the amount to be paid in for one share (the Exercise Price) to be delivered upon the exercise of a share option by the Allotted Number of Shares. The Exercise Price will be the product of the multiplication of 1.05 and the closing price of one common share of the Company in ordinary trading at the Tokyo Stock Exchange as of the date of allotment of the share options (or if no trade is made on such date, the date immediately preceding the date on which such ordinary shares are traded), with any fractional amount of less than one yen to be rounded up to one yen.

The Exercise Price will be adjusted as follows:

(i) If the Company effects a share split or a share consolidation after the date of the allotment of the share options, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen:

Exercise Price after Adjustment

= Exercise Price before adjustment \times $\frac{1}{\text{Ratio of Share Splitting or Share Consolidation}}$
42

Table of Contents

(ii) If, after the date of allotment of share options, the Company issues common shares at a price lower than the then market price thereof or disposes common shares owned by it, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen; however, the Exercise Price will not be adjusted in the case of the exercise of share options:

Exercise Price after Adjustment = Exercise Price before Adjustment ×

$$\frac{\text{Number of Issued and Outstanding Shares} + \text{Number of Newly Issued Shares} \times \text{Payment amount per Share}}{\text{Market Price}}$$

Number of Issued and Outstanding Shares + Number of Newly Issued Shares

The Number of Issued and Outstanding Shares is the number of shares already issued by the Company after subtraction of the number of shares owned by the Company. In the case of the Company's disposal of shares owned by it, the Number of Newly Issued Shares will be replaced with the Number of Own Shares to Be Disposed.

(iii) In the case of a merger, a company split or capital reduction after the date of allotment of share options, or in any other analogous case requiring the adjustment of the Exercise Price, the Exercise Price shall be appropriately adjusted within a reasonable range.

(3) Period during Which Share Options Are Exercisable

From May 1, 2011 to April 30, 2015.

(4) Matters regarding Stated Capital and Capital Reserves Increased When Shares Are Issued upon Exercise of Share Options

(i) The increased amount of stated capital will be half of the maximum amount of increases of stated capital, etc. to be calculated in accordance with Article 40, Paragraph 1 of the Companies Accounting Regulations (*Kaisha Keisan Kisoku*).

Any fractional amount of less than one yen resulting from such calculation will be rounded up to one yen.

(ii) The increased amount of capital reserves shall be the amount of the maximum amount of increases of stated capital, etc., mentioned in (i) above, after the subtraction of increased amount of stated capital mentioned in (i) above.

(5) Restriction on Acquisition of Share Options by Transfer

An acquisition of share options by way of transfer requires the approval of the Board of Directors.

(6) Events for the Company's Acquisition of Share Options

If a proposal for the approval of a merger agreement under which the Company will become an extinguishing company or a proposal for the approval for a share exchange agreement or a share transfer plan under which the Company will become a wholly-owned subsidiary is approved by the Company's shareholders at a shareholders meeting (or by the Board of Directors if no resolution of a shareholders meeting is required for such approval), the Company will be entitled to acquire the share options, without compensation, on a date separately designated by the Board of Directors.

(7) Handling of Fractions

Any fraction of a share (less than one share) to be delivered to any holder of share options who has exercised share options will be disregarded.

(8) Other Conditions for Exercise of Share Options

(i) One share option may not be exercised partially.

(ii) Each holder of share options must continue to be a director, executive officer or employee of the Company until the end of the Company's general meeting of shareholders regarding the final business term within 2 years from the end of the Ordinary General Meeting of Shareholders for the 108th Business Term of the Company.

(iii) Holders of share options will be entitled to exercise their share options for 2 years, and during the exercisable period, even after they lose their positions as directors, executive officers or employees. However, if a holder of share options loses such position due to resignation at his/her initiative, or due to dismissal or discharge by the Company, his/her share options will immediately lose effect.

(iv) No succession by inheritance is authorized for the share options.

(v) Any other conditions for the exercise of share options may be established by the Board of Directors.

6. Specific Method of Calculation of Remuneration to Directors

The amount of share options to be issued to the directors of the Company, as remuneration, will be the amount to be obtained by multiplying the fair market value per share option as of the allotment date thereof by the total number (not more than 5,700 share options) of share options to be allotted to the directors existing as of such allotment date. The fair market value of a share option will be calculated with the use of the Black-Scholes model on the basis of various conditions applicable on the allotment date.

C. Board practices

See Item 6A Directors and senior management and Item 6B Compensation.

Table of Contents**D. Employees**

The following table lists the number of Canon's employees as of December 31, 2008, 2007 and 2006.

	Total	Japan	Americas	Europe	Other
December 31, 2008					
Business machines	110,274	39,507	8,324	10,213	52,230
Cameras	25,732	10,964	1,384	1,555	11,829
Optical and other products	25,041	17,100	1,404	967	5,570
Corporate	5,933	4,874			1,059
Total	166,980	72,445	11,112	12,735	70,688
December 31, 2007					
Business machines	87,334	32,575	7,633	9,993	37,133
Cameras	19,170	5,893	1,755	1,490	10,032
Optical and other products	19,208	11,412	1,350	802	5,644
Corporate	5,640	5,347			293
Total	131,352	55,227	10,738	12,285	53,102
December 31, 2006					
Business machines	79,293	30,046	7,409	9,202	32,636
Cameras	16,841	5,422	1,652	1,381	8,386
Optical and other products	16,494	9,768	1,164	703	4,859
Corporate	5,871	5,517	44		310
Total	118,499	50,753	10,269	11,286	46,191

There was an increase of approximately 35,600 employees as of the end of fiscal 2008 compared to the end of fiscal 2007. This increase is mainly due to employment increases in the Asia region to accommodate production increases.

Canon had approximately 17,400 temporary employees on average during fiscal 2008.

The Company and its subsidiaries have their own independent labor union. Canon has not experienced a labor strike since its establishment. The Company believes that the relationship between Canon and its labor union is good.

Table of Contents**E. Share ownership**

The following table lists the number of shares owned by the directors and corporate auditors of the Company as of March 27, 2009. The total is 374,897 shares constituting 0.03% of all outstanding shares.

Name	Position	Number of shares
Fujio Mitarai	Chairman & CEO	94,600
Tsuneji Uchida	President & COO	13,500
Toshizo Tanaka	Executive Vice President & CFO	18,052
Toshiaki Ikoma	Executive Vice President & CTO	3,000
Nobuyoshi Tanaka	Senior Managing Director	21,732
Junji Ichikawa	Senior Managing Director	21,985
Akiyoshi Moroe	Senior Managing Director	18,232
Kunio Watanabe	Senior Managing Director	15,652
Yoroku Adachi	Senior Managing Director	14,442
Yasuo Mitsuhashi	Senior Managing Director	11,377
Tomonori Iwashita	Managing Director	9,150
Masahiro Osawa	Managing Director	7,142
Shigeyuki Matsumoto	Managing Director	6,352
Katsuichi Shimizu	Managing Director	10,937
Ryoichi Bamba	Managing Director	7,900
Toshio Honma	Managing Director	12,092
Masaki Nakaoka	Managing Director	4,500
Haruhisa Honda	Managing Director	8,689
Toshiyuki Komatsu	Director	5,500
Tetsuro Tahara	Director	4,752
Seijiro Sekine	Director	6,990
Shunji Onda	Director	6,902
Kazunori Fukuma	Director	2,400
Hideki Ozawa	Director	3,419
Masaya Maeda	Director	2,000
Keijiro Yamazaki	Corporate Auditor	8,650
Kunihiro Nagata	Corporate Auditor	2,650
Tadashi Ohe	Corporate Auditor	26,900
Yoshinobu Shimizu	Corporate Auditor	3,400
Minoru Shishikura	Corporate Auditor	2,000
	Total	374,897

The number of shares that may be subscribed for under rights granted to the Directors, listed above, pursuant to the stock option plan approved by the stockholders on March 28, 2008 is 340,000 shares of common stock. The exercise price of the rights is ¥5,502 per share and the rights are exercisable from May 1, 2010 to April 30, 2014. For additional information on the stock option plan, see Item 6B Compensation .

The Company and certain of its subsidiaries encourage its employees to purchase shares of their Common Stock in the market through an employees stock purchase association.

Table of Contents**Item 7. Major Shareholders and Related Party Transactions****A. Major shareholders**

The table below shows the number of the Company's shares held by the top ten holders of the Company's shares and their ownership percentage as of December 31, 2008:

Name of major shareholder	Shares owned	Percentage Number of shares owned / Number of shares issued
The Dai-Ichi Mutual Life Insurance Co. Moxley & Co.	93,312,600	7.0%
Japan Trustee Services Bank, Ltd. (Trust Account)	64,552,391	4.8%
Japan Trustee Services Bank, Ltd. (Trust Account 4G)	57,055,500	4.3%
The Master Trust Bank of Japan, Ltd. (Trust Account)	53,469,300	4.0%
JPMorgan Chase & Co. 380055	47,213,400	3.5%
State Street Bank and Trust Company	30,220,800	2.3%
Mizuho Corporate Bank, Ltd.	25,969,814	1.9%
Sompo Japan Insurance Inc.	25,919,736	1.9%
The Chase Manhattan Bank, N.A. London S.L. Omnibus Account	22,910,347	1.7%
	21,615,302	1.6%

Notes:

1: Moxley & Co. is a nominee of JPMorgan Chase Bank, which is the depository of Canon's ADRs (American Depositary Receipts.)

2: Apart from the above shares, Mizuho Corporate Bank, Ltd. held 7,704,000 shares contributed to a trust fund for its retirement and severance plans.

3: Apart from the above shares, the Company owns 99,275,245 shares (7.4% of total issued shares) of treasury stock.

4: Mizuho Corporate Bank, Ltd. and its three affiliated companies listed below submitted a report on large share holdings to the Kanto Local Finance Bureau on July 23, 2007 in their joint names and reported that they owned 71,888,936 shares (5.4%) of the Company as of July 13, 2007 in total as detailed below. However, the Company has not confirmed the status of these holdings as of December 31, 2008.

	As of July 13, 2007	
	Number of shares held	Number of shares held / Number of shares issued
Mizuho Corporate Bank, Ltd.	36,123,736	2.7%
Mizuho Bank, Ltd.	8,853,000	0.7%
Mizuho Trust & Banking Co., Ltd.	24,149,600	1.8%
Dai-Ichi Kangyo Asset Management Co., Ltd. (Subsequently renamed as Mizuho Asset Management Co., Ltd.)	2,762,600	0.2%
total	71,888,936	5.4%

Canon's major shareholders do not have different voting rights from other shareholders.

As of December 31, 2008, 22.6% of the issued shares of common stock, including the Company's treasury stock, were held of record by 253 residents of the United States of America.

The Company is not directly or indirectly owned or controlled by any other corporation, by any government, or by any other natural or legal person or persons severally or jointly.

B. Related party transactions

During the latest three fiscal years, Canon has not transacted with, nor does Canon currently plan to transact with a related party (other than certain transactions with subsidiaries of the Company). For purposes of this paragraph, a related party includes: (a) enterprises that directly or indirectly through one or more intermediaries, control or are controlled by, or are under common control with, Canon; (b) associates; (c) individuals owning, directly or indirectly, an interest in the voting power of Canon that gives them significant influence over Canon, and close members of any such individual's family; (d) key management personnel, that is, those persons having authority and responsibility for planning, directing and controlling the activities of Canon, including directors and senior management of companies and close member of such individual's families; (e) enterprises in which a substantial interest in the voting power is

owned, directly or indirectly, by any person described in (c) or (d) or over which such a person is able to exercise significant influence. This includes enterprises owned by directors or major shareholders of Canon and enterprises that have a member of key management in common with Canon. Close members of an individual's family are those that may be expected to influence, or be influenced by, that person in their dealings with Canon. An associate is an unconsolidated enterprise in which Canon has a significant influence or which has significant influence over Canon. Significant influence over an enterprise is the power to participate in the financial and operating policy decisions of the enterprise but is less than control over those policies. Shareholders beneficially owning a 10% interest in the voting power of the Company are presumed to have a significant influence on Canon.

To the Company's knowledge, no person owned a 10% interest in the voting power of the Company as of March 27, 2009.

In the ordinary course of business on an arm's length basis, Canon purchases and sells materials, supplies and services from and to its affiliates accounted for by the equity method. There are 18 affiliates which are accounted for by the equity method. Canon does not consider the amounts of the transactions with the above affiliates to be material to its business.

C. Interests of experts and counsel

Not applicable.

Table of Contents**Item 8. Financial Information****A. Consolidated financial statements and other financial information****Consolidated financial statements**

This Annual Report contains consolidated financial statements as of December 31, 2008 and 2007 and for each of the three years in the period ended December 31, 2008 prepared in accordance with U.S. generally accepted accounting principles and audited in accordance with the standards of the Public Company Accounting Oversight Board (United States) by an Independent Registered Public Accounting Firm. The financial statements as of and for the years ended December 31, 2006, 2007, and 2008 have been audited by Ernst & Young ShinNihon LLC, and their audit report covering each of the periods is included in Item 17 of this report.

Refer to Item 17 Financial Statements.

Legal proceedings

Other than as described below, neither the Company nor its subsidiaries are involved in any litigation or other legal proceedings that, if determined adversely to the Company or its subsidiaries would individually or in the aggregate have a material adverse effect on the Company or its operations.

In December 2002, the European Commission instituted an investigation into the printer and supply market. Canon received a questionnaire in connection with the investigation of the printer and supply market in January 2003 and Canon has submitted its response. The investigation is yet to be closed.

In January 2003, the Düsseldorf District Court in Germany issued rulings in Canon's favor in two patent infringement actions filed by Canon against Pelikan Hardcopy Deutschland GmbH and Pelikan Hardcopy European Logistics & Services GmbH (collectively, Pelikan Hardcopy). Pelikan Hardcopy has appealed against the decision. In November 2003, the Düsseldorf District Court in Germany issued a ruling in Canon's favor in another patent infringement action filed by Canon against Pelikan Hardcopy. Pelikan Hardcopy has appealed against the decision. The Düsseldorf High Court issued rulings in Canon's favor in two of the three appeals by Pelikan Hardcopy. The rulings have become finally binding, and now the procedures for enforcing the ruling are underway. Canon withdrew the complaint regarding the remaining case based on efficiency considerations. On November 13, 2008, Pelikan Hardcopy (now named Initio GmbH) filed a nullity suit against one of Canon's patents subject of the above enforcement procedures.

In October 2003, a lawsuit was filed by a former employee against the Company at the Tokyo District Court in Japan. The lawsuit alleges that the former employee is entitled to ¥45,872 million as reasonable remuneration for an invention related to certain technology used by the Company, and the former employee has sued for a partial payment of ¥1,000 million and interest thereon. On January 30, 2007, the Tokyo District Court of Japan ordered the Company to pay the former employee approximately ¥33.5 million and interest thereon. On the same day, the Company appealed the decision. On February 26, 2009, the Intellectual Property High Court of Japan issued a judgment in the appellate court review and ordered the Company to pay the former employee approximately ¥69.6 million, consisting of reasonable remuneration of approximately ¥56.3 million and interest thereon. On March 12, 2009, the Company appealed the decision to the Supreme Court.

In Germany, Verwertungsgesellschaft Wort (VG Wort), a collecting agency representing certain copyright holders, has filed a series of lawsuits seeking to impose copyright levies upon digital products such as PCs and printers, that allegedly enable the reproduction of copyrighted materials, against the companies importing and distributing these digital products. In May 2004, VG Wort filed a civil lawsuit against Hewlett-Packard GmbH seeking levies on multi-function printers sold in Germany during the period from 1997 through 2001. This is an industry test case under which Hewlett-Packard GmbH represents other companies sharing common interests, and Canon has undertaken to be bound by the final decision of this court case. In 2008, the Federal Supreme Court delivered its short judgment in favor of VG Wort, whereby the court decided that, for MFPs sold during the period from 1997 through 2001, the same full tariff as applicable to photocopiers (EUR 38.35 to EUR 613.56 per unit, depending on the printing speed and color printing capability) should be applied. Hewlett-Packard GmbH filed a claim with the

Federal Constitutional Court challenging the judgment of the Federal Supreme Court in August 2008. For the multi-function printers sold during the period from 2002 through 2007, VG Wort made a request for arbitration with Canon before an arbitration court in January 2007, and the arbitration court delivered their settlement proposal in December 2008. However, VG Wort rejected such settlement proposal in January 2009. VG Wort is now able to transfer this case to a court of appeals. With regard to single-function printers, VG Wort filed a separate lawsuit in January 2006 against Canon seeking payment of copyright levies, and the court of first instance in Düsseldorf ruled in favor of the claim by VG Wort in November 2006. Canon lodged an appeal against such decision in December 2006 before the court of appeals in Düsseldorf. Following a decision by the same court of appeals in Düsseldorf on January 23, 2007 in relation to a similar court case seeking copyright levies on single-function printers of Epson Deutschland GmbH, Xerox GmbH and Kyocera Mita Deutschland GmbH, whereby the court rejected such alleged levies, in its judgment of November 13, 2007, the court of appeals rejected VG Wort's claim against Canon. VG Wort appealed further against said decision of the court of appeals before the Federal Supreme Court. In December 2007, for a similar Hewlett-Packard GmbH case relating to single-function printers, the Federal Supreme Court delivered its judgment in favor of Hewlett-Packard GmbH and dismissed VG Wort's claim. VG Wort has already filed a constitutional complaint with the Federal Constitutional Court against said judgment of the Federal Supreme Court. Canon, other companies and the industry associations have expressed opposition to such extension of the levy scope. Based on industry opposition to the extension of levies to digital products, Canon's assessments of the final conclusion of these court cases including the amount of levies to be imposed and the associated financial impact on Canon remain uncertain. In 2007, an amendment of German copyright law was carried out, and a new law has been effective from January 1, 2008 for both multi-function printers and single-function printers. The new law sets forth that the scope and tariff of copyright levies will be agreed between industry and the collecting society. Industry and the collecting society, based on the requirement under the new law, reached an agreement in December 2008. This agreement is applicable retroactively from January 1, 2008 and will remain effective through end of 2010. Accordingly, there is no longer any uncertainty with respect to levies for sales of printers on and after January 1, 2008.

In April 2004, Canon filed two patent infringement actions against Recycle Assist Co., Ltd. (Recycle Assist) before the Tokyo District Court. In December 2004, the Tokyo District Court issued rulings in Recycle Assist's favor in the two actions. In December 2004, Canon appealed against the decisions of the two actions. In January 2006, the Intellectual Property High Court issued a ruling in favor of Canon in one of the two appeal cases. In February 2006, Recycle Assist further appealed against this ruling before the Supreme Court. In November 2007, the Supreme Court rendered a judgment in favor of Canon, and execution procedures were completed in March 2008. Canon withdrew the remaining appeal case based on efficiency considerations.

Table of Contents

In April 2005, a lawsuit was filed by Nano-Proprietary Inc., currently Applied Nanotech Holdings, Inc., (NPI) against the Company and Canon U.S.A., Inc. in the United States District Court of Texas alleging that SED Inc., a joint venture company established by the Company and Toshiba Corporation, was not regarded as a subsidiary under the Patent License Agreement between the Company and NPI and the extension of the license to SED Inc. constituted a breach of the agreement. NPI also alleged that Canon committed fraud in executing such agreement, and requested rescission of the agreement and compensatory damages. In November 2006, the Court denied Canon's motion for a summary judgment that SED Inc. was a subsidiary of the Company. In January 2007, the Company purchased all the shares of SED Inc. owned by Toshiba Corporation, making SED Inc. a 100% owned subsidiary of the Company. However, on February 22, 2007, the Court issued a summary judgment stating that SED Inc. (before the above stock purchase) was not a subsidiary of the Company, that the Company had materially breached the patent license agreement and that NPI was allowed to terminate that agreement. Thereafter, a trial was held from April 30 to May 3, 2007, in Austin, Texas. NPI's fraud claims against Canon were withdrawn by NPI and the jury returned a verdict that NPI had sustained no damages. All claims against Canon U.S.A., Inc. were also withdrawn by NPI. On May 15, 2007, Canon filed a notice of appeal to the United States Court of Appeals for the Fifth Circuit (Appeals Court), appealing the District Court's prior ruling that Canon had breached the patent license agreement and allowing NPI to terminate that agreement. On June 4, 2007, NPI also filed a notice of appeal, appealing the District Court's determination that NPI had sustained no damages. On July 25, 2008, the Appeals Court reversed the District Court's judgment and found that termination of the patent license agreement was ineffective and that the 100% owned SED Inc. is a subsidiary of Canon. The Appeals Court also affirmed the District Court's judgment denying damages to NPI. NPI petitioned for rehearing of the judgment, but the Appeals Court denied the petition. Since NPI did not appeal to the Supreme Court within the required time limit, the Fifth Circuit's judgment is definitive and conclusive in favor of Canon.

Dividend policy

Dividends are proposed by the Board of Directors of the Company based on the year-end non-consolidated financial statements of the Company, and are approved at the ordinary general meeting of shareholders, which is held in March of each year. Record holders of the Company's ADSs on the dividends' record date are entitled to receive payment in full of the declared dividend. In addition to annual dividends, by resolution of the Board of Directors, the Company may declare a cash distribution as an interim dividend. The record date for the Company's year-end dividends and for the interim dividends are December 31 and June 30, respectively.

Since 1996, under the two five-year initiatives Phases I and II of the Excellent Global Corporation Plan Canon has been working towards increasing its corporate value. During this period, management has focused on profitability and cash flow, which has led to greater competitiveness of its products and a stronger financial position. Following the two preceding plans, Canon has launched Phase III which targets further growth and improved corporate value by expanding its corporate scale while maintaining a high level of profitability, in 2006.

Going forward, Canon will actively invest in strategic areas to accelerate growth, and will also place priority on actively returning profits to shareholders as an important management measure, taking full advantage of its financial base strengthened by the two five-year plans.

Canon is focused on being more proactive in returning profits to shareholders, mainly in the form of a dividend, taking into consideration planned future investments, free cash flow, and reflecting on the Company's consolidated business performance. Specifically, Canon's basic dividend policy is to continuously strive to raise its consolidated payout ratio to approximately 30% over the medium to long term.

Accordingly, in response to the continued support of shareholders and based on the policy on returning profits to shareholders, Canon has kept its full-year dividend per share at ¥110.00 for fiscal 2008, the same amount per share as fiscal 2007, while the Company recorded a decrease in profits amid extremely severe economic conditions.

B. Significant changes

No significant change has occurred since the date of the annual financial statements.

Table of Contents**Item 9. The Offer and Listing****A. Offer and listing details****Trading in domestic markets**

The common stock of the Company has been listed on the Tokyo Stock Exchange (TSE), the principal stock exchange market in Japan, since 1949, and is traded on the First Section of the TSE. The shares are also listed on four other regional markets in Japan (Osaka, Nagoya, Fukuoka and Sapporo).

The following table lists the reported high and low sales prices of the shares on the TSE and the closing highs and lows of the Tokyo Stock Price Index (TOPIX) and Nikkei Stock Average for the five most recent years. TOPIX is an index of the market value of stocks listed on the First Section of the TSE. The Nikkei Stock Average, an index of 225 selected stocks on the First Section of the TSE, is another widely accepted index.

Note: Canon made a three-for-two stock split on July 1, 2006. The information above has been adjusted to reflect the stock split.

Table of Contents**Trading in foreign markets**

The Company's ADRs are listed on the New York Stock Exchange (NYSE).

Since the Company's 1969 public offering in the United States of U.S.\$9,000,000 principal amount of its 6 1/2 % Convertible Debentures due 1984, there has been limited trading in the over-the-counter market in the Company's ADRs. Since March 16, 1998, each ADR represents one share of the Company's common stock. The Company's ADSs had been quoted on the National Association of Securities Dealers Automated Quotation system (NASDAQ) from 1972 to September 13, 2000 under the symbol CANNY.

On September 14, 2000, Canon listed its ADSs on the NYSE under the symbol CAJ. The table below displays historical transition of high and low prices of our ADSs on the NYSE.

Not applicable.

B. Memorandum and articles of association

Objects and Purposes in the Company's Articles of Incorporation

Objects of the Company provided in Article 2 of the Company's Articles of Incorporation shall be to engage in the following businesses:

- (1) Manufacture and sale of optical machineries and instruments of various kinds.
- (2) Manufacture and sale of acoustic, electrical and electronic machineries and instruments of various kinds.
- (3) Manufacture and sale of precision machineries and instruments of various kinds.
- (4) Manufacture and sale of medical machineries and instruments of various kinds.
- (5) Manufacture and sale of general machineries, instruments and equipments of various kinds.
- (6) Manufacture and sale of parts, materials, etc. relative to the products mentioned in each of the preceding items.
- (7) Production and sale of software products.
- (8) Manufacture and sale of pharmaceutical products.
- (9) Telecommunications business, and information service business such as information processing service business, information providing service business, etc.
- (10) Contracting for telecommunications works, electrical works and machinery and equipment installation works.
- (11) Sale, purchase and leasing of real properties, contracting for construction works, design of buildings and supervision of construction works.
- (12) Manpower providing business, property leasing business and travel business.
- (13) Business relative to investigation, analysis of the environment and purification process of soil, water, etc.
- (14) Any and all business relevant to each of the preceding items.

Provisions Regarding Directors

There is no provision in the Company's Articles of Incorporation as to a Director's power to vote on a proposal, arrangement or contract in which the Director is materially interested, but, under the Corporation Law of Japan, the law relating to joint stock corporations (known in Japanese as *kabushiki kaisha*) which came into effect on May 1, 2006, a director is required to refrain from voting on such matters at meetings of the board of directors.

The Corporation Law of Japan provides that compensation for directors is determined at a general meeting of shareholders of a company. Within the upper limit approved at the shareholders' meeting, the board of directors will determine the amount of compensation for each director. The board of directors may, by its resolution, leave such decision to the discretion of the company's representative director.

The Corporation Law of Japan provides that the incurrence by a company of a significant loan from a third party should be approved by the company's board of directors. The Company's Regulations of the Board of Directors have adopted this policy.

There is no mandatory retirement age for the Company's Directors under the Corporation Law of Japan or its Articles of Incorporation.

There is no requirement concerning the number of shares an individual must hold in order to qualify him as a director of the Company under the Corporation Law of Japan or its Articles of Incorporation.

Holding of Shares by Foreign Investors

Other than the Japanese unit share system that is described in Rights of Shareholders Japanese Unit Share System below, there are no limitations on the rights of non-residents or foreign shareholders to hold or exercise voting rights on the Company's shares imposed by the laws of Japan or the Company's Articles of Incorporation or other constituent documents.

Rights of Shareholders

Set forth below is information relating to the Company's common stock, including brief summaries of the relevant provisions of its Articles of Incorporation and Regulations for Handling of Shares, as currently in effect, and of the Corporation Law of Japan and related legislation.

General

The Company's authorized share capital is 3,000,000,000 shares, of which 1,333,763,464 shares were issued, including the Company's treasury stock, as of December 31, 2008. On January 5, 2009, a new central clearing system for shares of Japanese listed companies was established pursuant to the Law Concerning Book-Entry Transfer of Corporate Bonds, Shares, etc. (including regulations promulgated thereunder; the "Book-Entry Law"), and the shares of all Japanese companies listed on any Japanese stock exchange, including the Company's shares, became subject to this new system. On the same day, all existing share certificates for such shares became null and void. At present, the Japan Securities Depository Center, Inc. ("JASDEC") is the only institution that is designated by the relevant authorities as a clearing house which is permitted to engage in the clearing operations of shares of Japanese listed companies under the Book-Entry Law. Under the new clearing system, in order for any person to hold, sell or otherwise dispose of shares of Japanese listed companies, it must have an account at an account management institution unless such person has an account at JASDEC. Account management institutions are financial instruments traders (i.e., securities companies), banks, trust companies and certain other financial institutions which meet the requirements prescribed by the Book-Entry Law.

Under the Book-Entry Law, any transfer of shares is effected through book entry, and title to the shares passes to the transferee at the time when the transferred number of the shares is recorded at the transferee's account at an account management institution. The holder of an account at an account management institution is presumed to be the legal owner of the shares held in such account.

Table of Contents

Under the Corporation Law of Japan and the Book-Entry Law, in order to assert shareholders' rights against the Company, a shareholder must have its name and address registered in the register of shareholders of the Company, except in limited circumstances.

The registered beneficial holder of deposited shares underlying the ADSs is the depository for the ADSs. Accordingly, holders of ADSs will not be able to directly assert shareholders' rights.

Distributions of Surplus

Under the Corporation Law of Japan, distributions of cash or other assets by joint stock corporations to their shareholders, so called dividends, are referred to as distributions of Surplus (Surplus is defined in Restriction on Distributions of Surplus below). The Company may make distributions of Surplus to the shareholders any number of times per fiscal year, subject to certain limitations described in Restriction on Distributions of Surplus. Under the Corporation Law of Japan, distributions of Surplus are required to be authorized by a resolution of a general meeting of shareholders.

Under the Articles of Incorporation of the Company, year-end dividends and interim dividends, if any, may be distributed to shareholders (or pledgees) appearing in the register of shareholders as of December 31 and June 30 of each year, respectively.

Distributions of Surplus may be made in cash or in kind in proportion to the number of shares held by each shareholder. A resolution of a shareholders' meeting must specify the kind and aggregate book value of the assets to be distributed, the manner of allocation of such assets to shareholders, and the effective date of the distribution. If a distribution of Surplus is to be made in kind, the Company may, pursuant to a resolution of shareholders meeting, grant a right to its shareholders to require the Company to make such distribution in cash instead of in kind. If no such right is granted to shareholders, the relevant distribution of Surplus must be approved by a special resolution of a general meeting of shareholders.

Restriction on Distributions of Surplus

When the Company makes a distribution of Surplus, the Company must, until the aggregate amount of its additional paid-in capital and legal reserve reaches one-quarter of its stated capital, set aside in its additional paid-in capital and/or legal reserve an amount equal to one-tenth of the amount of Surplus so distributed.

The amount of Surplus at any given time must be calculated in accordance with the following formula:

$$A + B + C + D - (E + F + G)$$

In the above formula, the alphabet from A to G is defined as follows:

A = the total amount of other capital surplus and other retained earnings, each such amount that is appearing on its non-consolidated balance sheet as of the end of the last fiscal year;

B = (if the Company has disposed of its treasury stock after the end of the last fiscal year) the amount of the consideration for such treasury stock received by the Company less the book value thereof;

C = (if the Company has reduced its stated capital after the end of the last fiscal year) the amount of such reduction less the portion thereof that has been transferred to additional paid-in capital or legal reserve (if any);

D = (if the Company has reduced its additional paid-in capital or legal reserve after the end of the last fiscal year) the amount of such reduction less the portion thereof that has been transferred to stated capital (if any);

E = (if the Company has cancelled its treasury stock after the end of the last fiscal year) the book value of such treasury stock;

F = (if the Company has distributed Surplus to its shareholders after the end of the last fiscal year) the total book value of the Surplus so distributed;

G = certain other amounts set forth in the ordinances of the Ministry of Justice, including (if the Company has reduced Surplus and increased its stated capital, additional paid-in capital or legal reserve after the end of the last fiscal year) the amount of such reduction and (if the Company has distributed Surplus to the shareholders after the end of the last fiscal year) the amount set aside in the additional paid-in capital or legal reserve (if any) as required by the ordinances of the Ministry of Justice.

The aggregate book value of Surplus distributed by the Company may not exceed a prescribed distributable amount (the Distributable Amount), as calculated on the effective date of such distribution. The Distributable Amount at any given time shall be equal to the amount of Surplus less the aggregate of the following:

- (a) the book value of the Company's treasury stock;
- (b) the amount of consideration for the treasury stock disposed of by the Company after the end of the last fiscal year; and
- (c) certain other amounts set forth in the ordinances of the Ministry of Justice, including (if the sum of one-half of goodwill and the deferred assets exceeds the total of stated capital, additional paid-in capital and legal reserve, each such amount that is appearing on the non-consolidated balance sheet as of the end of the last fiscal year) all or certain part of such exceeding amount as calculated in accordance with the ordinances of the Ministry of Justice.

If the Company has become at its option a company with respect to which consolidated balance sheets should also be taken into consideration in the calculation of the Distributable Amount (*renketsu haito kisei tekiyo kaisha*), it will be required to further deduct from the amount of Surplus the excess amount (if the amount is zero or below zero) of (x) the total amount of shareholders' equity appearing on its non-consolidated balance sheet as of the end of the last fiscal year and certain other amounts set forth in the ordinances of the Ministry of Justice over (y) the total amount of shareholders' equity and certain amounts set forth in the ordinances of the Ministry of Justice appearing on its consolidated balance sheets as of the end of the last fiscal year.

If the Company has prepared interim financial statements as described below, and if such interim financial statements have been approved (unless exempted by the Corporation Law of Japan) by a general meeting of shareholders, the Distributable Amount must be adjusted to take into account the amount of profit or loss, and the amount of consideration for the treasury stock disposed of by the Company, during the period in respect of which such interim financial statements have been prepared. The Company may prepare non-consolidated interim financial statements consisting of a balance sheet as of any date subsequent to the end of the last fiscal year and an income statement for the period from the first day of the current fiscal year to the date of such balance sheet. Interim financial statements so prepared by the Company must be approved by the board of directors and audited by its independent auditors, as required by the ordinances of the Ministry of Justice.

Table of Contents*Stock Splits*

The Corporation Law of Japan permits the Company, by resolution of its Board of Directors, to make stock splits, regardless of the value of net assets (as appearing in its latest non-consolidated balance sheet) per share. In addition, by resolution of the Company's Board of Directors, the Company may increase the authorized shares up to the number reflecting the rate of stock splits and amend its Articles of Incorporation to this effect without the approval of a shareholders' meeting. For example, if each share became three shares by way of a stock split, the Company may increase the authorized shares from the current 3,000,000,000 shares to 9,000,000,000 shares.

Under the Book-Entry Law, the Company must give notice to JASDEC regarding a stock split at least two weeks prior to the relevant record date. On the effective date of the stock split, the numbers of shares recorded in all accounts held by the Company's shareholders at account management institutions or JASDEC will be increased in accordance with the applicable ratio.

Japanese Unit Share System

The Company's Articles of Incorporation provided that 100 shares of common stock constitute one unit. The Corporation Law of Japan permits the Company, by resolution of its Board of Directors, to reduce the number of shares which constitutes one unit or abolish the unit share system, and amend its Articles of Incorporation to this effect without the approval of a shareholders' meeting.

Transferability of Shares Representing Less than One Unit

Under the new clearing system, shares constituting less than one unit are transferable. However, because shares constituting less than one unit do not comprise a trading unit, such shares may not be sold on the Japanese stock exchanges under the rules of the Japanese stock exchanges.

Right of a Holder of Shares Representing Less than One Unit to Require the Company to Purchase Its Shares

A holder of shares representing less than one unit may at any time require the Company to purchase its shares through the account management institutions and JASDEC. These shares will be purchased at (a) the closing price of the shares reported by the TSE on the day when the request to purchase is made or (b) if no sale takes place on the TSE on that day, then the price at which sale of shares is effected on such stock exchange immediately thereafter. In such case, the Company will request payment of an amount equal to the brokerage commission applicable to the shares purchased pursuant to its Regulations for Handling of Shares.

Right of a Holder of Shares Representing Less than One Unit to Purchase from the Company its Shares up to a Whole Unit

The Articles of Incorporation of the Company provide that a holder of shares representing less than one unit may require the Company to sell its shares to such holder so that the holder can raise its fractional ownership to a whole unit. Such a request shall be made through the account management institutions and JASDEC. These shares will be sold at (a) the closing price of the shares reported by the TSE on the day when the request to sell becomes effective or (b) if no sale has taken place on the TSE on that day, then the price at which sale of shares is effected on such stock exchange immediately thereafter. In such case, the Company will request payment of an amount equal to the brokerage commission applicable to the shares sold pursuant to its Regulations for Handling of Shares.

Voting Rights of a Holder of Shares Representing Less than One Unit

A holder of shares representing less than one unit cannot exercise any voting rights pertaining to those shares. In calculating the quorum for various voting purposes, the aggregate number of shares representing less than one unit will be excluded from the number of outstanding shares. A holder of shares representing one or more whole units will have one vote for each whole unit represented.

A holder of shares representing less than one unit does not have any rights relating to voting, such as the right to participate in a demand for the resignation of a director, the right to participate in a demand for the convocation of a general meeting of shareholders and the right to join with other shareholders to propose an agenda item to be addressed at a general meeting of shareholders.

However, a holder of shares constituting less than one unit has all other rights of a shareholder in respect of those shares, including the following rights:

to receive annual and interim dividends,

to receive cash or other assets in case of consolidation or split of shares, exchange or transfer of shares or corporate merger,

to be allotted rights to subscribe for free for new shares when such rights are granted to shareholders, and

to participate in any distribution of surplus assets upon liquidation.

Ordinary and Extraordinary General Meeting of Shareholders

The Company normally holds its ordinary general meeting of shareholders in March of each year in Ohta-ku, Tokyo or in a neighboring area. In addition, the Company may hold an extraordinary general meeting of shareholders whenever necessary by giving at least two weeks advance notice. Under the Corporation Law of Japan, notice of any shareholders meeting must be given to each shareholder having voting rights or, in the case of a non-resident shareholder, to his resident proxy or mailing address in Japan in accordance with the Company's Regulations for Handling of Shares, at least two weeks prior to the date of the meeting.

Voting Rights

A shareholder is generally entitled to one vote per one unit of shares as described in this paragraph and under Japanese Unit Share System above. In general, under the Corporation Law of Japan, a resolution can be adopted at a general meeting of shareholders by a majority of the shares having voting rights represented at the meeting. The Corporation Law of Japan and the Company's Articles of Incorporation require a quorum for the election of directors and corporate auditors of not less than one-third of the total number of outstanding shares having voting rights. The Company's shareholders are not entitled to cumulative voting in the election of Directors. A corporate shareholder whose outstanding shares are in turn more than one-quarter directly or indirectly owned by the Company does not have voting rights. Shareholders may exercise their voting rights through proxies, provided that those proxies are also shareholders who have voting rights.

Table of Contents

Pursuant to the Corporation Law of Japan and the Company's Articles of Incorporation, a quorum of not less than one-third of the outstanding shares with voting rights must be present at a shareholders' meeting to approve any material corporate actions such as:

- a reduction of stated capital,
- amendment of the Articles of Incorporation (except amendments which the Board of Directors are authorized to make under the Corporation Law of Japan as described in "Stock Splits" and "Japanese Unit Share System" above),
- the removal of a director or corporate auditor,
- establishment of a 100% parent-subsidary relationship by way of share exchange or share transfer,
- a dissolution, merger or consolidation,
- a corporate separation,
- the transfer of the whole or an important part of the Company's business,
- the taking over of the whole of the business of any other corporation,
- any issuance of new shares at a specially favorable price, stock acquisition rights (*shinkabu yoyakuken*) with specially favorable conditions or bonds with stock acquisition rights (*shinkabu yoyakuken-tsuki shasai*) with specially favorable conditions to persons other than shareholders,
- release of part of Directors' or Corporate Auditors' liabilities to the Company,
- distribution of Surplus in kind with respect to which shareholders are not granted the right to require the Company to make such distribution in cash instead of in kind,
- purchase of shares by the Company from a specific shareholder other than its subsidiaries,
- consolidation of shares, and
- discharge of a portion of liabilities of Directors, Corporate Auditors or independent auditors that are owed to the Company.

At least two-thirds of the outstanding shares having voting rights present at the meeting is required to approve these actions.

The voting rights of holders of ADSs are exercised by the depositary based on instructions from those holders.

Subscription Rights

Holders of shares have no pre-emptive rights. Authorized but unissued shares may be issued at such times and upon such terms as the board of directors determines, subject to the limitations as to the issue of new shares at a specially favorable price mentioned in "Voting Rights" above. The board of directors may, however, determine that shareholders be given subscription rights to new shares, in which case they must be given on uniform terms to all shareholders as of a record date with not less than two weeks prior public notice. Each of the shareholders to whom such rights are given must also be given at least two weeks prior notice of the date on which such rights will expire.

Stock Acquisition Rights

The Company may issue stock acquisition rights or bonds with stock acquisition rights (in relation to which the stock acquisition rights are undetachable). Except where the issue would be on specially favorable conditions mentioned in "Voting Rights" above, the issue of stock acquisition rights or bonds with stock acquisition rights may be authorized by a resolution of the board of directors. Subject to the terms and conditions thereof, holders of stock acquisition rights may acquire a prescribed number of shares by exercising their stock acquisition rights and paying the exercise price at any time during the exercise period thereof. Upon exercise of stock acquisition rights, the Company will be obliged to either issue the relevant number of new shares or transfer the necessary number of existing shares held by it as treasury stock to the holder. The entitlements accorded to stock acquisition rights attached to bonds are substantially similar to those accorded to stock acquisition rights issued without being attached to bonds, provided that, if so determined by the board of directors at the time of its resolution authorizing the issue of the relevant bonds with stock acquisition rights, then, upon exercise of the stock acquisition rights, their exercise price will be deemed to have been paid by the holder thereof to the Company in lieu of the Company redeeming the relevant bonds.

Liquidation Rights

In the event of liquidation, the assets remaining after payment of all debts, liquidation expenses and taxes will be distributed among the shareholders in proportion to the number of shares they own.

Liability to Further Calls or Assessments

All of the Company's currently outstanding shares, including shares represented by the ADSs, are fully paid and nonassessable.

Share Registrar

Mizuho Trust & Banking Co., Ltd. (Mizuho Trust) is the share registrar for the Company's shares. Mizuho Trust's office is located at 2-1, Yaesu 1-chome, Chuo-ku, Tokyo, Japan. Under the new clearing system, Mizuho Trust maintains the Company's register of shareholders and records transfers of record ownership upon the Company's receipt of necessary information from JASDEC and other information in the register of shareholders, as described

Record Date below.

Record Date

The close of business on December 31 is the record date for the Company's year-end dividends, if paid. June 30 is the record date for interim dividends, if paid. A holder of shares constituting one or more whole units who is registered as a holder on the Company's register of shareholders at the close of business as of December 31 is also entitled to exercise shareholders' voting rights at the ordinary general meeting of shareholders with respect to the fiscal year ending on December 31. In addition, the Company may set a record date for determining the shareholders entitled to other rights and for other purposes by giving at least two weeks public notice.

Under the Book-Entry Law, the Company is required to give notice of each record date to JASDEC at least two weeks prior to such record date. JASDEC is required to promptly give the Company notice of the names and addresses of the Company's shareholders, the numbers of shares held by them and other relevant information as of such record date.

The shares generally trade ex-dividend or ex-rights in the Japanese stock exchanges on the third business day before a record date (or if the record date is not a business day, the fourth business day prior thereto), for the purpose of dividends or rights offerings.

Table of Contents*Repurchase by the Company of Shares*

Under the Corporation Law of Japan, the Company may acquire its shares (i) by soliciting all shareholders to offer to sell its shares held by them (in this case, the certain terms of such acquisition, such as the total number of the shares to be purchased and the total amount of the consideration, shall be set by an ordinary resolution of a general meeting of shareholders in advance, and acquisition shall be effected pursuant to a resolution of the board of directors), (ii) from a specific shareholder other than any of the Company's subsidiaries (pursuant to a special resolution of a general meeting of shareholders), (iii) from any of the Company's subsidiaries (pursuant to a resolution of the board of directors), or (iv) by way of purchase on any Japanese stock exchange on which the Company's shares are listed by way of tender offer (in either case pursuant to a resolution of the board directors). In the case of (ii) above, if the purchase price or any other consideration to be received by the relevant specific shareholder exceeds the then market price of the Company's shares calculated in a manner set forth in the ordinances of the Ministry of Justice, any other shareholder may make a request to a representative director to be included as a seller in the proposed acquisition by the Company.

The total amount of the purchase price of the Company's shares may not exceed the Distributable Amount, as described in "Restriction on Distributions of Surplus" above.

In addition, the Company may acquire its shares by means of repurchase of any number of shares constituting less than one unit upon the request of the holder of those shares, as described under "Japanese Unit Share System" above.

C. Material contracts

All contracts entered into by Canon during the two years preceding the date of this annual report were entered into the ordinary course of business.

D. Exchange controls

(a) Information with respect to Japanese exchange regulations affecting the Company's security holders are as follows:

The Foreign Exchange and Foreign Trade Law of Japan and the cabinet orders and ministerial ordinances thereunder (the "Foreign Exchange Regulations") govern certain aspects relating to the issuance of securities by the Company and the acquisition and holding of such securities by non-residents of Japan and by foreign investors, as hereinafter defined.

Non-residents of Japan are defined as individuals who are not resident in Japan and corporations whose principal offices are located outside Japan. Generally, branches and other offices of Japanese corporations located outside Japan are regarded as non-residents of Japan, while branches and other offices located within Japan of non-resident corporations are regarded as residents of Japan. Foreign investors are defined to be (i) individuals not resident in Japan, (ii) corporations which are organized under the laws of foreign countries or whose principal offices are located outside Japan, (iii) corporations of which 50% or more of the shares are held by (i) and / or (ii) above and (iv) corporations in respect of which (a) a majority of the officers are non-resident individuals or (b) a majority of the officers having the power to represent the corporation are non-resident individuals.

Issuance of Securities by the Company:

Under the Foreign Exchange Regulations, the issue of securities outside Japan by the Company is, in principle, not subject to a prior notification requirement, but subject to a post reporting requirement of the Minister of Finance. Under the Foreign Exchange Regulations as currently in effect, payments of principal, premium and interest in respect of securities and any additional amounts payable pursuant to the terms thereof may in general be paid when made without any restrictions under the Foreign Exchange Regulations.

Acquisition of Shares:

In general, the acquisition of shares of stock of a Japanese company listed on any Japanese stock exchange by a non-resident of Japan from a resident of Japan is not subject to a prior notification requirement, but subject to a post reporting requirement of the Minister of Finance by such resident.

In the case where a foreign investor intends to acquire listed shares (whether from a resident or a non-resident of Japan, from another foreign investor or from or through a designated securities company) and as a result of such acquisition the number of shares held, directly or indirectly, by such foreign investor would become 10% or more of the total outstanding shares of the company, the foreign investor must generally report such acquisition to the Minister of Finance and other Ministers having jurisdiction over the business of the subject company within fifteen days from

and including the date of such acquisition. In certain exceptional cases, a prior notification is required in respect of such acquisition.

Acquisition of Shares upon Exercise of Rights for Subscription of Shares:

The acquisition by a non-resident of Japan of shares upon exercise of his rights for subscription of shares is exempted from the notification and reporting requirements described under **Acquisition of Shares** above.

Dividends and Proceeds of Sales:

Under the Foreign Exchange Regulations currently in effect, dividends paid on, and the proceeds of sale in Japan of, the shares held by non-residents of Japan may be converted into any foreign currency and repatriated abroad. The acquisition of shares by non-resident shareholders by way of stock splits is not subject to any of the aforesaid notification requirements.

(b) Reporting of Substantial Shareholdings:

The Financial Instruments and Exchange Law of Japan requires any person who has become, beneficially and solely or jointly, a holder of more than 5% of the total outstanding voting shares of capital stock of a company listed on any Japanese stock exchange to file with the relevant Local Finance Bureau of the Minister of Finance within five business days a report concerning such share ownership. A similar report must also be made in respect of any subsequent change of 1% or more in any such holding. Copies of any such report must also be furnished to the issuer of such shares and all Japanese stock exchanges on which the shares are listed. For this purpose, shares with exercisable rights for subscription of shares held by such holder are taken into account in determining both the size of a holding and a company's total outstanding share capital.

Table of Contents**E. Taxation****1. Taxation in Japan**

Generally, a non-resident of Japan or non-Japanese corporation (Non-Resident Holders) is subject to Japanese withholding tax on dividends paid by Japanese corporations. Stock splits are not subject to Japanese income tax. Due to the 2001 Japanese tax legislation, a conversion of retained earnings or legal reserve (but, not additional paid-in capital, in general) into stated capital (whether made in connection with a stock split or otherwise) is no longer treated as a deemed dividend payment to shareholders for Japanese tax purposes. Thus, such a conversion does not trigger Japanese withholding taxation. (Article 2 (16) of the Japanese Corporation Tax Law and Article 8 (1) (xv) of the Japanese Corporation Tax Law Enforcement Order).

Japan is a party to a number of income tax treaties, conventions and agreements, (collectively Tax Treaties), whereby the maximum withholding tax rate for dividend payments is set at, in most cases, 15% for portfolio investors who are Non-Resident Holders. Specific countries with which such Tax Treaties have been entered into include Australia, Belgium, Canada, Denmark, Finland, Germany, Ireland, Italy, Luxembourg, The Netherlands, New Zealand, Norway, Singapore, Spain, Sweden, and Switzerland. Pursuant to the Convention Between the Government of the United States of America and the Government of Japan for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, or the Treaty, dividend payments made by a Japanese corporation to a U.S. resident or corporation, unless the recipient of the dividend has a permanent establishment in Japan and the shares or ADSs with respect to which such dividends are paid are effectively connected with such permanent establishment, will be subject to withholding tax at rate of: (1) 10% for portfolio investors who are qualified U.S. residents eligible for benefits of the Treaty; and (2) 0% (i.e., no withholding) for pension funds which are qualified U.S. residents eligible for benefits of the Treaty, provided that the dividends are not derived from the carrying on of a business, directly or indirectly, by such pension funds. Similar withholding tax treatment applies under the new tax treaty between the United Kingdom and Japan for dividends declared on or after January 1, 2007 due to the renewal of the tax treaty. The tax treaty between France and Japan was renewed effective from January 1, 2008, under which the standard treaty withholding rate for portfolio investors on dividends was reduced from 15% to 10%. In addition, the tax treaty between Australia and Japan was also renewed effective from January 1, 2009, under which the standard treaty withholding rate on dividends will be reduced from 15% to 10%. On the other hand, under the Japanese Income Tax Law, the temporary rate of Japanese withholding tax (Temporary Rate) applicable to dividends paid with respect to listed shares, such as those paid by the Company on shares or ADSs, to Non-Resident Holders is currently 7%, which is applicable until December 31, 2011 (the applicable period of the Temporary Rate has been extended pursuant to 2009 Japanese tax legislation). Taking this Temporary Rate into account, the treaty rates such as the 15% rate (or 10% for eligible U.S. residents subject to the Treaty and/or eligible residents subject to other similarly renewed treaties mentioned above) will apply only after the expiration of the Temporary Rate, except for dividends paid to any individual holder who holds 5% or more of the total issued shares for which the applicable rate is 20%. While the treaty rate normally overrides the domestic rate, due to the so-called preservation doctrine under Article 1(2) of the Treaty, and/or due to Article 3-2 of the Special Measures Law for the Income Tax Law, Corporation Tax Law and Local Taxes Law with respect to the Implementation of Tax Treaties, if the tax rate under the domestic tax law is lower than that promulgated under the applicable income tax treaty, then the domestic tax rate is still applicable. If the domestic tax rate applies, as will generally be the case until December 31, 2011 for most holders of shares or ADSs who are US residents or corporations, no treaty application is required to be filed.

Gains derived from the sale outside Japan of Japanese corporations shares or ADSs by Non-Resident Holders, or from the sale of Japanese corporations shares or ADSs within Japan by a non-resident of Japan as an occasional transaction or by a non-Japanese corporation not having a permanent establishment in Japan, are generally not subject to Japanese income or corporation taxes, provided that the seller is a portfolio investor. Japanese inheritance and gift taxes at progressive rates may apply to an individual who has acquired Japanese corporations shares or ADSs as a distributee, legatee or donee.

2. Taxation in the United States

The following is a discussion of material U.S. federal income tax consequences of owning and disposing of Canon shares or ADSs to the U.S. holders described below, but it does not purport to be a comprehensive description of all of

the tax considerations that may be relevant to a particular person's decision to acquire, hold or dispose of such securities. The discussion applies only if you hold Canon shares or ADSs as capital assets for U.S. federal income tax purposes and it does not address special classes of holders, such as:

- certain financial institutions;
- insurance companies;
- dealers and traders in securities or foreign currencies;
- persons holding Canon shares or ADSs as part of a hedge, straddle, conversion, other integrated transaction or other similar transaction;
- persons whose functional currency for U.S. federal income tax purposes is not the U.S. dollar;
- partnerships or other entities classified as partnerships for U.S. federal income tax purposes;
- persons liable for the alternative minimum tax;
- tax-exempt organizations;
- persons holding Canon shares or ADSs that own or are deemed to own 10% or more of any class of Canon stock;
- persons who acquired Canon shares or ADSs pursuant to the exercise of any employee stock option or otherwise as compensation; or
- persons holding shares in connection with trade or business conducted outside of the United States.

This discussion is based on the Internal Revenue Code of 1986, as amended, administrative pronouncements, judicial decision, final, temporary and proposed Treasury regulations and the Treaty, all as of the date hereof. These laws are subject to change, possibly on a retroactive basis. It is also based in part on representations by the depository and assumes that each obligation under the deposit agreement and any related agreement will be performed in accordance with its terms. An investor should consult its own tax advisers concerning the U.S. federal, state, local and foreign tax consequences of purchasing, owning and disposing of Canon shares or ADSs in its particular circumstances.

- As used herein, a U.S. holder is a beneficial owner of Canon shares or ADSs that is, for U.S. federal tax purposes:
- a citizen or resident of the United States;
 - a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States or any political subdivision thereof; or
 - an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

In general, if a U.S. holder owns ADSs, it will be treated for U.S. federal income tax purposes as the owner of the underlying shares represented by those ADSs. Accordingly, no gain or loss will be recognized if a U.S. holder exchanges ADSs for the underlying shares represented by those ADSs.

Table of Contents

The U.S. Treasury has expressed concerns that parties to whom American depositary shares are released before shares are delivered to the depository or intermediaries in the chain of ownership between holder and the issuer of the security underlying the American depositary shares, may be taking actions that are inconsistent with the claiming of foreign tax credits for U.S. holders of American depositary shares. Such actions would also be inconsistent with the claiming of the reduced rate of tax applicable to dividends received by certain non-corporate U.S. holders. Accordingly, the analysis of the creditability of Japanese taxes and the reduced rates of taxation applicable to dividends received by certain non-corporate U.S. holders, both as described below, could be affected by actions that may be taken by parties to whom ADSs are pre-released.

This discussion assumes that Canon was not a passive foreign investment company for 2008, as described below.

Taxation of Distributions

Distributions paid on Canon shares or ADSs, other than certain pro rata distributions of common shares, to the extent paid out of Canon's current or accumulated earnings and profits (as determined under U.S. federal income tax principles) will be treated as dividends. Because Canon does not maintain calculations of its earnings and profits under U.S. federal income tax principles, it is expected that distributions will be reported to U.S. holders as dividends. The amount of a dividend will include any amounts withheld by Canon or its paying agent in respect of Japanese taxes. The amount of the dividend will be treated as foreign-source dividend income and will not be eligible for the dividends-received deduction generally allowed to U.S. corporations. Subject to applicable limitations that may vary depending upon a U.S. holder's individual circumstances and the concerns expressed by the U.S. Treasury, dividends paid to certain non-corporate holders in taxable years beginning before January 1, 2011 will be taxable at a maximum rate of 15%. Non-corporate U.S. holders should consult their own tax advisers to determine whether they are subject to any special rules that limit their ability to be taxed at this favorable rate.

Dividends paid in Japanese yen will be included in a U.S. holder's income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date of receipt of the dividend by the U.S. holders, in the case of Canon shares, or by the depository, in the case of ADSs, regardless of whether the payment is in fact converted into U.S. dollars at that time. If the dividend is converted into U.S. dollars on the date of receipt, a U.S. holder generally should not be required to recognize foreign currency gain or loss in respect of the dividend income. A U.S. holder may have foreign currency gain or loss if the dividend is not converted into U.S. dollars on the date of receipt.

Japanese income taxes withheld from cash dividends on Canon shares or ADSs at a rate not exceeding the rate provided by the Treaty will be creditable against a U.S. holder's U.S. federal income tax liability, subject to applicable limitations that may vary depending upon a U.S. holder's circumstances and the concerns expressed by the U.S. Treasury. Instead of claiming a credit, a U.S. holder may, at its election, deduct such Japanese taxes in computing its income, subject to generally applicable limitations under U.S. law. A U.S. holder should consult its own tax adviser regarding the availability of foreign tax credits in its particular circumstances.

Sale and Other Disposition of Canon Shares or ADSs

For U.S. federal income tax purposes, gain or loss a U.S. holder realizes on the sale or other disposition of Canon shares or ADSs will be capital gain or loss, and will be long-term capital gain or loss if such holder held the Canon shares or ADSs for more than one year. The amount of a U.S. holder's gain or loss will be equal to the difference between its U.S. dollar tax basis in the Canon shares or ADSs disposed of and the U.S. dollar amount realized on the disposition. Such gain or loss will generally be U.S. source gain or loss for foreign tax credit purposes.

Passive Foreign Investment Company Rules

Canon believes that it was not a passive foreign investment company (PFIC) for U.S. federal income tax purposes for fiscal 2008. However, since PFIC status depends upon the composition of Canon's income and assets and the market value of its assets (including, among others, goodwill and equity investments in less than 25% owned entities) from time to time, there can be no assurance that Canon will not be considered a PFIC for any taxable year. If Canon were treated as a PFIC for any taxable year during which a U.S. holder held Canon shares or ADSs, certain adverse tax consequences could apply to such U.S. holder.

If Canon were treated as a PFIC for any taxable year during which a U.S. holder held Canon shares or ADSs, gain recognized by a U.S. holder on the sale or other disposition of Canon shares or ADSs would be allocated ratably over its holding period for such securities. The amounts allocated to the taxable year of the sale or other disposition and to

any year before Canon became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect in such taxable year for individuals or corporations, as appropriate, and an interest charge would be imposed on the tax liability attributable to such allocated amounts. Further, any distribution in respect of Canon shares or ADSs in excess of 125% of the average of the annual distributions on such securities received by a U.S. holder during the preceding three years or its holding period, whichever is shorter, would be subject to taxation as described above. Certain elections (including a mark-to-market election) may be available to a U.S. holder that may mitigate the adverse tax consequences resulting from PFIC status.

In addition, if Canon were treated as a PFIC in a taxable year in which it pays a dividend or the prior taxable year, the 15% dividend rate discussed above with respect to dividends paid to certain non-corporate U.S. holders would not apply.

Information Reporting and Backup Withholding

Payment of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting and to backup withholding unless the U.S. holder is a corporation or other exempt recipient or, in the case of backup withholding, the U.S. holder provides a correct taxpayer identification number and certifies that no loss of exemption from backup withholding has occurred.

The amount of any backup withholding from a payment to a U.S. holder will be allowed as a credit against such holder's U.S. federal income tax liability and may entitle it to a refund, provided that the required information is furnished to the Internal Revenue Service.

F. Dividends and paying agents

I. Subsidiary information

Not applicable.

Item 11. Quantitative and Qualitative Disclosures about Market Risk**Market risk exposures**

Canon is exposed to market risks, including changes in foreign currency exchange rates, interest rates and prices of marketable securities and investments. In order to hedge the risks of changes in foreign currency exchange rates, Canon uses derivative financial instruments.

Equity price risk

Canon holds marketable securities included in current assets, which consist generally of highly-liquid and low-risk instruments. Investments included in noncurrent assets are held as long-term investments. Canon does not hold marketable securities and investments for trading purposes.

Maturities and fair values of such marketable securities and investments with original maturities of more than three months were as follows at December 31, 2008 and 2007.

Available-for-sale securities

	2008		2007	
	Cost	Fair value	Cost	Fair value
	(Millions of yen)			
Due within one year	¥ 134	¥ 150	¥ 51	¥ 51
Due after one year through five years	3,542	3,426	3,430	3,638
Due after five years through ten years	848	811	3,822	4,726
Equity securities	10,522	12,218	12,666	22,316
	¥ 15,046	¥ 16,605	¥ 19,969	¥ 30,731

Held-to-maturity securities

	2008		2007	
	Cost	Fair value	Cost	Fair value
	(Millions of yen)			
Due within one year	¥	¥	¥ 10,115	¥ 10,115
	¥	¥	¥ 10,115	¥ 10,115

Table of Contents**Foreign currency exchange rate and interest rate risk**

Canon operates internationally, exposing it to the risk of changes in foreign currency exchange rates. Derivative financial instruments are comprised principally of foreign currency exchange contracts utilized by the Company and certain of its subsidiaries to reduce the risk. Canon assesses foreign currency exchange rate risk by continually monitoring changes in the exposures and by evaluating hedging opportunities. Canon does not hold or issue derivative financial instruments for trading purposes. Canon is also exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but it is not expected that any counterparties will fail to meet their obligations. Most of the counterparties are internationally recognized financial institutions and selected by Canon taking into account their financial condition, and contracts are diversified across a number of major financial institutions.

Canon's international operations expose Canon to the risk of changes in foreign currency exchange rates. Canon uses foreign exchange contracts to manage certain foreign currency exchange exposures principally from the exchange of U.S. dollars and euros into Japanese yen. These contracts are primarily used to hedge the foreign currency exposure of forecasted intercompany sales and intercompany trade receivables which are denominated in foreign currencies. In accordance with Canon's policy, a specific portion of foreign currency exposure resulting from forecasted intercompany sales are hedged using foreign exchange contracts which principally mature within three months.

The following table provides information about Canon's major derivative financial instruments related to foreign currency exchange transactions existing at December 31, 2008. All of the foreign exchange contracts described in the following table have a contractual maturity date in 2009.

	Millions of yen			
	U.S.\$	Euro	Others	Total
Forwards to sell foreign currencies:				
Contract amounts	¥ 179,239	¥ 152,423	¥ 19,297	¥ 350,959
Estimated fair value	8,391	(1,390)	710	7,711
Forwards to buy foreign currencies:				
Contract amounts	¥ 24,518	¥ 1,000	¥ 9,729	¥ 35,247
Estimated fair value	(9)	7	2,129	2,127

Changes in the fair value of derivative financial instruments designated as cash flow hedges, including foreign exchange contracts associated with forecasted intercompany sales, are reported in accumulated other comprehensive income (loss). These amounts are subsequently reclassified into earnings through other income (deductions) in the same period as the hedged items affect earnings. Substantially all such amounts recorded in accumulated other comprehensive income (loss) at year-end are expected to be recognized in earnings over the next 12 months. Canon excludes the time value component from the assessment of hedge effectiveness. Changes in the fair value of a foreign exchange contract for the period between the date that the forecasted intercompany sales occur and its maturity date are recognized in earnings and not considered hedge ineffectiveness.

The amount of the hedging ineffectiveness was not material for the years ended December 31, 2008, 2007 and 2006. The amount of net losses excluded from the assessment of hedge effectiveness (time value component) which was recorded in other income (deductions) was ¥3,701 million, ¥6,883 million and ¥5,917 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Canon has entered into certain foreign currency exchange contracts to manage its foreign currency exposures. These foreign currency exchange contracts have not been designated as hedges. Accordingly, the changes in fair values of the contracts are recorded in earnings immediately.

All of Canon's long-term debt is fixed rate debt. Canon believes that fair value change, and cash flows resulting from reasonable near-term changes in interest rates would be immaterial. Accordingly, Canon considers interest rate risk is insignificant. See also Item 17, Financial Statements - Note 10 of the Notes to Consolidated Financial Statements.

Item 12. Description of Securities Other than Equity Securities

Not applicable.

Table of Contents

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

The Corporation Law of Japan, which came into effect on May 1, 2006, generally maintained the unit share system under the Commercial Code of Japan. The Company's Articles of Incorporation provide that 100 shares constitute one unit .

Under the unit share system, shareholders have one voting right for each unit of shares they hold. Shares not constituting a full unit will carry all shareholders' rights except for those relating to voting rights.

Under the new clearing system, shares constituting less than one unit are transferable. Under the rules of the Japanese stock exchanges, however, shares constituting less than one unit do not comprise a trading unit, except in limited circumstances, and accordingly may not be sold on the Japanese stock exchanges.

A holder of shares constituting less than one unit may at any time require the Company through the account management institutions and JASDEC to purchase such shares at the last selling price of a share as reported by the Tokyo Stock Exchange, Inc. on the day when such request is made.

Shareholders (including beneficial owners) who own less than one unit of shares may request through the account management institutions and JASDEC that the Company sell them a number of shares which, when added to their less than one unit shares, would equal one unit of shares; provided, however, that the Company is not obliged to do so if the Company does not own its own shares in the number which it is requested to sell.

A holder of shares constituting less than one unit is entitled as a shareholder to the rights (i) to receive distribution of dividends of profit or interest, (ii) to receive cash or other assets in case of consolidation or split of shares, exchange or transfer of shares or corporate merger, (iii) to be allotted rights to subscribe for free for new shares when such rights are granted to shareholders; and (iv) to participate in any distribution of surplus assets upon liquidation. Such holder cannot exercise any voting rights pertaining to those shares. For calculation of the quorum for various voting purposes, the aggregate number of shares constituting less than one unit will be excluded from the number of voting rights.

Item 15. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Canon's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives and Canon's chief executive officer and chief financial officer concluded that Canon's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act are effective at the reasonable assurance level.

Management's Report on Internal Control over Financial Reporting

The management of Canon is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) promulgated under the Exchange Act, as amended, as a process designed by, or under the supervision of, the company's principal executive and principal financial officers and effected by the company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Canon's management assessed the effectiveness of internal control over financial reporting as of December 31, 2008. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework (the "COSO criteria").

Based on its assessment, management concluded that, as of December 31, 2008, Canon's internal control over financial reporting was effective based on the COSO criteria.

Canon's independent registered public accounting firm, Ernst & Young ShinNihon LLC, has issued an audit report on the effectiveness of Canon's internal control over financial reporting. This report appears in Item 17.

Changes in Internal Control over Financial Reporting

There has been no change in Canon's internal control over financial reporting that occurred during the period covered by this Annual Report that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

Table of Contents**Item 16A. Audit Committee Financial Expert**

Canon's Board of Directors has determined that Kunihiro Nagata qualifies as an audit committee financial expert as defined by the rules of the SEC. Mr. Nagata began his career at Canon in 1970, and since that time has worked in the field of finance and accounting for nearly thirty years. From 1996 to 1999, Mr. Nagata served as a senior manager of the Accounting Planning & Administration Division, the division responsible for Canon's consolidated reporting. Mr. Nagata was elected as one of Canon's corporate auditors at an ordinary general meeting of shareholders held in March 2004 and was reelected in March 2008. See Item 6.A. for additional information regarding Mr. Nagata. Mr. Nagata meets the independence requirements imposed on corporate auditors as set forth by Japanese legal provisions.

Item 16B. Code of Ethics

Canon maintains a Canon Group Code of Conduct, or Code of Conduct, applicable to all executives and employees. The Code of Conduct sets forth provisions relating to honest and ethical conduct (including the handling of conflicts of interest), compliance with applicable laws, rules and regulations and accountability for adherence to the provisions of the Code of Conduct. In addition, on March 31, 2004, the Board of Directors adopted a Code of Ethics as a supplement to the Code of Conduct. This Code of Ethics applies to Canon's President and Chief Executive Officer, each member of the Board of Directors (which includes the Chief Financial Officer) and general managers belonging to Canon's accounting headquarters. The Code of Ethics requires full, fair, accurate, timely and understandable disclosure in reports and documents that Canon files with or submits to the SEC and in Canon's other communications with the public, prompt internal reporting of violations of the Code of Conduct or Code of Ethics, and accountability for adherence to their provisions. Both the Code of Conduct and the Code of Ethics have been filed as exhibits.

Item 16C. Principal Accountant Fees and Services*Policy on Pre-Approval of Audit and Non-Audit Services of Independent Auditors*

Canon's board of corporate auditors consisting of five members, including three external auditors, is responsible for the oversight of the services of its independent registered public accounting firm. The board of corporate auditors has established Pre-Approval Policies and Procedures for Audit and Non-Audit Services, effective as of May 28, 2003. These policies and procedures govern the board of corporate auditors' review and approval of the board of director's engagement of Canon's independent registered public accounting firm to render audit or non-audit services. Non-audit services include audit-related services, tax services and other services, as described in greater detail below under Fees and Services. Canon and any affiliate controlled by Canon directly, indirectly or through one or more intermediaries must follow these policies and procedures before any engagement of Canon's independent registered public accounting firm for U.S. securities law reporting purposes.

The policies and procedures stipulate three means by which audit and non-audit services may be pre-approved, depending on the content of and the fee for the services.

All services provided to Canon necessary to perform an annual audit or review to comply with the standards of the Public Company Accounting Oversight Board (United States), in any jurisdiction, including tax services and accounting consultation necessary to comply with the standards of the Public Company Accounting Oversight Board (United States) in those jurisdictions, and any engagement of an Independent Registered Public Accounting Firm for any audit or non-audit service involving estimated fees exceeding ¥10,000,000 per single engagement must be pre-approved by the majority of board of corporate auditors.

Certain other services may be pre-approved under detailed categories of audit and non-audit services established annually by the board of corporate auditors, as long as those services do not exceed specified maximum yen limits for aggregate fees relating to each of those categories. Any engagement of an Independent Registered Public Accounting Firm by this mean must be reported to the board of corporate auditors at its next regularly scheduled meeting.

For services that are not covered by the above two means of pre-approval, the board of corporate auditors has delegated pre-approval authority to any of the full-time corporate auditors of the board. Any engagement of an Independent Registered Public Accounting Firm pre-approved by one of the full-time corporate auditors is required to be reported to the board of corporate auditors at its next regularly scheduled meeting.

Edgar Filing: 3D SYSTEMS CORP - Form 10-Q

Additional services may be pre-approved by the board of corporate auditors on an individual basis.

No services were provided for which pre-approval was waived pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

Fees and Services

The following table discloses the aggregate fees accrued or paid to Canon's principal accountant for each of the last two fiscal years and briefly describes the services performed:

	Year ended December 31, 2008		Year ended December 31, 2007	
	(Millions of yen)			
Audit fees	¥	2,299	¥	2,503
Audit-related fees		43		16
Tax fees		34		15
All other fees		4		7
Total	¥	2,380	¥	2,541

Audit fees include fees billed for professional services rendered for audits of Canon's annual consolidated financial statements, limited review procedures of consolidated quarterly financial information and statutory audits of the Company and its subsidiaries.

Audit-related fees include fees billed for assurance and related services such as due diligence, accounting consultations and audits in connection with mergers and acquisitions, employee benefit plan audits, internal control reviews, and consultations concerning financial accounting and reporting standards.

Tax fees include fees billed for services related to tax compliance, including the preparation of tax returns and claims for refund, tax planning and tax advice, including assistance with tax audits and appeals, advice related to mergers and acquisitions, tax services for employee benefit plans and assistance with respect to requests for rulings from tax authorities.

All other fees include fees billed primarily for services rendered with respect to learning products and services.

Ernst & Young ShinNihon LLC served as Canon's principal accountant for fiscal 2008 and 2007.

Table of Contents**Item 16D. Exemptions from the Listing Standards for Audit Committees**

Canon is relying on the general exemption contained in Rule 10A-3(c)(3) under the Exchange Act. Because of such reliance, Canon does not have an audit committee which can act independently and satisfy the other requirements of Rule 10A-3 under the Exchange Act.

According to Rule 10A-3 under the Exchange Act and NYSE listing standards, Canon's board of corporate auditors has been identified to act in place of an audit committee. The board of corporate auditors meets the following requirements of the general exemption contained in Rule 10A-3(c)(3):

the board of corporate auditors is established pursuant to applicable Japanese law and Canon's Articles of Incorporation;

under Japanese legal requirements, the board of corporate auditors is separate from the board of directors;

the board of corporate auditors is not elected by the management of Canon and no executive officer of Canon is a member of the board of corporate auditors;

all of the members of the board of corporate auditors meet specific independence requirements from the Company and Canon, the management and the auditing firm, as set forth by Japanese legal provisions;

the board of corporate auditors, in accordance with and to the extent permitted by Japanese law, is responsible for the appointment, retention and oversight of the work of Canon's external auditors engaged for the purpose of issuing audit reports on Canon's annual financial statements;

the board of corporate auditors adopted a complaints procedure (which became effective prior to July 31, 2005) in accordance with Rule 10A-3(b)(3) of the Exchange Act;

the board of corporate auditors is authorized to engage independent counsel and other advisers, as it deems appropriate; and

the board of corporate auditors is provided with appropriate funding for payment of (i) compensation to Canon's independent registered public accounting firm engaged for the purpose of issuing audit reports on Canon's annual financial statements, (ii) compensation to independent counsel and other advisers engaged by the board of corporate auditors, and (iii) ordinary administrative expenses of the board of corporate auditors in carrying out its duties.

Canon's reliance on Rule 10A-3(c)(3) does not, in its opinion, materially adversely affect the ability of its board of corporate auditors to act independently and to satisfy the other requirements of Rule 10A-3.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table sets forth, for each of the months indicated, the total number of shares purchased by Canon, or on Canon's behalf or by any affiliated purchaser, the average price paid per share, the number of shares purchased pursuant to the applicable shareholder resolution or board resolution, which are publicly announced and the maximum number of shares that may yet be purchased pursuant to these shareholder resolutions or board resolutions.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
2008	(Shares)	(Yen)		
January 1 - January 31	1,315	4,750		
February 1 - February 29	973	4,648		
March 1 - March 31	894	4,568		
April 1 - April 30	2,151	4,910		
May 1 - May 31	2,467	5,392		
June 1 - June 30	2,515	5,551		
July 1 - July 31	2,065	5,207		

August 1 - August 31	1,863	5,074	
September 1- September 30	4,804,293	4,134	4,800,000
October 1 - October 31	8,080,307	3,734	8,077,200
November 1 - November 30	13,798,431	3,624	13,795,000
December 1 - December 31	3,872	2,719	

Notes:

(1)A resolution approved at the meeting of our board of directors held on September 16, 2008 authorized Canon to acquire up to 14.5 million shares with an aggregate purchase price of ¥50 billion during the period from September 17, 2008 through October 20, 2008.

(2)A resolution approved at the meeting of our board of directors held on October 30, 2008 authorized Canon to acquire up to 20 million shares with an aggregate purchase price of ¥50 billion during the period from October 31, 2008 through November 28, 2008.

(3)As of December 31, 2008, Canon

had completed
all of its share
repurchase plans
or programs
listed above.

Column (a) represents the total number of shares purchased as fractional shares from fractional shareowners in accordance with the Corporation Law of Japan, and the purchase of shares from publicly announced plans which is shown in column (c). During 2008, the Company purchased 28,946 shares for a total purchase price of 122,157,290 yen upon requests from holders of shares consisting less than one full unit.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable.

Table of Contents**Item 16G. Corporate Governance****1. Directors**

Currently, the Company's board of directors does not have any director who could be regarded as an independent director under the NYSE Corporate Governance Rules for U.S. listed companies. Unlike the NYSE Corporate Governance Rules, the Corporation Law of Japan (the Corporation Law) does not require Japanese companies with a board of corporate auditors such as the Company, to appoint independent directors as members of the board of directors. The NYSE Corporate Governance Rules require non-management directors of U.S. listed companies to meet at regularly scheduled executive sessions without the presence of management. Unlike the NYSE Corporate Governance Rules, however, the Corporation Law does not require companies to implement an internal corporate organ or committee comprised solely of independent directors. Thus, the Company's board of directors currently does not include any non-management directors.

2. Committees

Under the Corporation Law, the Company may choose to: (i) have an audit committee, nomination committee and compensation committee and abolish the post of corporate auditors; or (ii) have a board of corporate auditors. The Company has elected to have a board of corporate auditors, whose duties include monitoring and reviewing the management and reporting the results of these activities to the shareholders or board of directors of the Company. While the NYSE Corporate Governance Rules provide that U.S. listed companies must have an audit committee, nominating committee and compensation committee, each composed entirely of independent directors, the Corporation Law does not require companies to have specified committees, including those that are responsible for director nomination, corporate governance and executive compensation.

The Company's board of directors nominates candidates for directorship and submits a proposal at the general meeting of shareholders for shareholder approval. Pursuant to the Corporation Law, the shareholders then vote to elect directors at the meeting. The Corporation Law requires that the total amount or calculation method of compensation for directors and corporate auditors be determined by a resolution of the general meeting of shareholders respectively, unless the amount or calculation method is provided under the Articles of Incorporation. As the Articles of Incorporation of the Company do not provide for an amount or calculation method, the amount of compensation for the directors and corporate auditors of the Company is determined by a resolution of the general meeting of shareholders. The allotment of compensation for each director from the total amount of compensation is determined by the Company's board of directors, and the allotment of compensation to each corporate auditor is determined by consultation among the Company's corporate auditors.

3. Audit Committee

The Company plans to avail itself of paragraph (c)(3) of Rule 10A-3 of the Security Exchange Act, which provides that a foreign private issuer which has established a board of corporate auditors shall be exempt from the audit committee requirements, subject to certain requirements which continue to be applicable under Rule 10A-3. Pursuant to the requirements of the Corporation Law, the shareholders elect the corporate auditors by resolution of a general meeting of shareholders. The Company currently has five corporate auditors, although the minimum number of corporate auditors required pursuant to the Corporation Law is three. Unlike the NYSE Corporate Governance Rules, Japanese laws and regulations, including the Corporation Law, do not require corporate auditors to be experts in accounting or to have any other area of expertise. Under the Corporation Law, a board of corporate auditors may determine the auditing policies and methods for investigating the business and assets of a Company, and may resolve other matters concerning the execution of the corporate auditor's duties. The board of corporate auditors prepares auditors' reports and may veto a proposal for the nomination of corporate auditors and accounting auditors put forward by the board of directors. Under the Corporation Law, more than half of a company's corporate auditors must be outside corporate auditors. These are individuals who are prohibited from having ever been a director, executive officer, manager, or employee of the Company or its subsidiaries. The Company's current corporate auditor system meets these requirements. Among the five members on the Company's board of auditors, three are outside corporate auditors. The qualifications for an outside corporate auditor under the Corporation Law are different from the audit committee independence requirement under the NYSE Corporate Governance Rules.

4. Shareholder Approval of Equity Compensation Plans

The NYSE Corporate Governance Rules require that shareholders be given the opportunity to vote on all equity compensation plans and any material revisions of such plans, with certain limited exceptions. Under the Corporation Law, a Company is required to obtain shareholder approval regarding the details of an equity-compensation plan. Stock acquisition rights to be issued to directors and corporate auditors are recognized as part of remuneration of directors and corporate auditors, and the issuance of stock acquisition rights must be approved by shareholders as part of their approval regarding remuneration of directors and corporate auditors.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of
Canon Inc.

We have audited the accompanying consolidated balance sheets of Canon Inc. and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedule listed in the Index at Item 17. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company's consolidated financial statements do not disclose segment information required by Statement of Financial Accounting Standards No. 131, "Disclosures about Segments of an Enterprise and Related Information." In our opinion, disclosure of segment information is required by U.S. generally accepted accounting principles.

In our opinion, except for the omission of segment information as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Canon Inc. and subsidiaries at December 31, 2008 and 2007, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, in 2007 the Company changed its method of accounting for depreciation.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Canon Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 16, 2009 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of
Canon Inc.

We have audited Canon Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Canon Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Canon Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the accompanying consolidated balance sheets of Canon Inc. and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008, and our report thereon dated March 16, 2009 stated that, except for the omission of segment information required by Statement of Financial Accounting Standards No. 131, Disclosures about Segments of an Enterprise and Related Information, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Canon Inc. and subsidiaries at December 31, 2008 and 2007, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

Canon Inc. and Subsidiaries
Notes to Consolidated Financial Statements

1. Basis of Presentation and Significant Accounting Policies**(a) Description of Business**

Canon Inc. (the Company) and subsidiaries (collectively Canon) is one of the world's leading manufacturers in such fields as office imaging products, computer peripherals, business information products, cameras, and optical related products. Office imaging products consist mainly of network multifunction devices and copying machines. Computer peripherals consist mainly of laser beam and inkjet printers. Business information products consist mainly of computer information systems, document scanners and calculators. Cameras consist mainly of digital single-lens reflex (SLR) cameras, compact digital cameras, interchangeable lenses and digital video camcorders. Optical and other products include semiconductor production equipment, mirror projection mask aligners for liquid crystal display (LCD) panels, broadcasting equipment, medical equipment and large format printers. Canon's consolidated net sales for the years ended December 31, 2008, 2007 and 2006 were distributed as follows: office imaging products 27%, 29% and 28%, computer peripherals 36%, 34% and 34%, business information products 2%, 2% and 3%, cameras 25%, 26% and 25%, and optical and other products 10%, 9% and 10%, respectively.

Sales are made principally under the Canon brand name, almost entirely through sales subsidiaries. These subsidiaries are responsible for marketing and distribution, and primarily sell to retail dealers in their geographical area. Approximately 76%, 77% and 75% of consolidated net sales for the years ended December 31, 2008, 2007 and 2006 were generated outside Japan, with 28%, 30% and 31% in the Americas, 33%, 33% and 31% in Europe, and 15%, 14% and 13% in other areas, respectively.

Canon sells laser beam printers on an OEM basis to Hewlett-Packard Company; such sales constituted approximately 23%, 22% and 22% of consolidated net sales for the years ended December 31, 2008, 2007 and 2006, respectively.

Canon's manufacturing operations are conducted primarily at 25 plants in Japan and 18 overseas plants which are located in countries or regions such as the United States, Germany, France, Taiwan, China, Malaysia, Thailand and Vietnam.

(b) Basis of Presentation

The Company and its domestic subsidiaries maintain their books of account in conformity with financial accounting standards of Japan. Foreign subsidiaries maintain their books of account in conformity with financial accounting standards of the countries of their domicile.

Certain adjustments and reclassifications have been incorporated in the accompanying consolidated financial statements to conform with U.S. generally accepted accounting principles. These adjustments were not recorded in the statutory books of account.

(c) Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its majority owned subsidiaries and those variable interest entities where the Company or its consolidated subsidiaries are the primary beneficiaries under Financial Accounting Standards Board (FASB) Interpretation No. 46 (revised December 2003),

Consolidation of Variable Interest Entities. All significant intercompany balances and transactions have been eliminated.

(d) Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Significant estimates and assumptions are reflected in valuation and disclosure of revenue recognition, allowance for doubtful receivables, valuation of

inventories, impairment of long-lived assets, environmental liabilities, valuation of deferred tax assets, uncertain tax positions and employee retirement and severance benefit plans. Actual results could differ materially from those estimates.

(e) Translation of Foreign Currencies

Assets and liabilities of the Company's subsidiaries located outside Japan with functional currencies other than Japanese yen are translated into Japanese yen at the rates of exchange in effect at the balance sheet date. Income and expense items are translated at the average exchange rates prevailing during the year. Gains and losses resulting from translation of financial statements are excluded from earnings and are reported in other comprehensive income (loss).

Gains and losses resulting from foreign currency transactions, including foreign exchange contracts, and translation of assets and liabilities denominated in foreign currencies are included in other income (deductions) in the consolidated statements of income. Foreign currency exchange losses, net were ¥11,212 million, ¥31,943 million and ¥25,804 million for the years ended December 31, 2008, 2007 and 2006, respectively.

(f) Cash Equivalents

All highly liquid investments acquired with original maturities of three months or less are considered to be cash equivalents. Certain debt securities with original maturities of less than three months classified as available-for-sale securities of ¥194,030 million and ¥164,610 million at December 31, 2008 and 2007, respectively, are included in cash and cash equivalents in the consolidated balance sheets. Additionally, certain debt securities with original maturities of less than three months classified as held-to-maturity securities of ¥997 million and ¥5,992 million at December 31, 2008 and 2007, respectively, are also included in cash and cash equivalents. Fair value for these securities approximates their cost.

Table of Contents

Canon Inc. and Subsidiaries
Notes to Consolidated Financial Statements (continued)

1. Basis of Presentation and Significant Accounting Policies (continued)

(g) Investments

Investments consist primarily of time deposits with original maturities of more than three months, debt and marketable equity securities, investments in affiliated companies and non-marketable equity securities. Canon reports investments with maturities of less than one year as short-term investments.

Canon classifies investments in debt and marketable equity securities as available-for-sale or held-to-maturity securities. Canon does not hold any trading securities, which are bought and held primarily for the purpose of sale in the near term.

Available-for-sale securities are recorded at fair value. Unrealized holding gains and losses, net of the related tax effect, are reported as a separate component of other comprehensive income (loss) until realized. Held-to-maturity securities are recorded at amortized cost, adjusted for the amortization or accretion of premiums or discounts.

Available-for-sale and held-to-maturity securities are regularly reviewed for other-than-temporary declines in carrying value based on criteria that include the length of time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer and Canon's intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in market value. When such a decline exists, Canon recognizes an impairment loss to the extent by which the cost basis of the investment exceeds the fair value of the investment. Fair value is determined based on quoted market prices, projected discounted cash flows or other valuation techniques as appropriate.

Realized gains and losses are determined on the average cost method and reflected in earnings.

Investments in affiliated companies over which Canon has the ability to exercise significant influence, but does not hold a controlling financial interest, are accounted for by the equity method.

Non-marketable equity securities in companies over which Canon does not have the ability to exercise significant influence are stated at cost and reviewed periodically for impairment.

(h) Allowance for Doubtful Receivables

Allowance for doubtful trade and finance receivables is maintained for all customers based on a combination of factors, including aging analysis, macroeconomic conditions, significant one-time events, and historical experience. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings. If circumstances related to customers change, estimates of the recoverability of receivables would be further adjusted. When all collection options are exhausted including legal recourse, the accounts or portions thereof are deemed to be uncollectable and charged against the allowance.

(i) Inventories

Inventories are stated at the lower of cost or market value. Cost is determined by the average method for domestic inventories and principally by the first-in, first-out method for overseas inventories.

(j) Impairment of Long-Lived Assets

Long-lived assets, such as property, plant and equipment, and acquired intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the asset and the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of the asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated.

(k) Property, Plant and Equipment and Accounting Change

Property, plant and equipment are stated at cost. Depreciation is calculated principally by the declining-balance method, except for certain assets which are depreciated by the straight-line method over the estimated useful lives of the assets.

Effective April 1, 2007, the Company and its domestic subsidiaries elected to change the declining-balance method of depreciating machinery and equipment from the fixed-percentage-on-declining base application to the 250% declining-balance application. Estimated residual values were also reduced in conjunction with this change. The Company and its domestic subsidiaries believe that the 250% declining-balance application is preferable because it provides a better matching of the allocation of cost of machinery and equipment with associated revenues in light of increasingly short product life cycles.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 154, Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3, this change in depreciation methods represented a change in accounting estimate effected by a change in accounting principle. Accordingly, the affects of the change have been accounted for prospectively beginning with the period of change and prior period results have not been restated. The change in depreciation methods caused an increase in depreciation expense by ¥63,773 million for the year ended December 31, 2007. Net income, basic net income per share and diluted net income per share decreased by ¥32,321 million, ¥24.99 and ¥24.99, respectively, for the year ended December 31, 2007.

The depreciation period ranges from 3 years to 60 years for buildings and 1 year to 20 years for machinery and equipment.

Assets leased to others under operating leases are stated at cost and depreciated to the estimated residual value of the assets by the straight-line method over the period ranging from 2 years to 5 years.

Table of Contents

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

1. Basis of Presentation and Significant Accounting Policies (continued)**(l) Goodwill and Other Intangible Assets**

Goodwill and other intangible assets with indefinite useful lives are not amortized, but are instead tested for impairment annually in the fourth quarter of each year, or more frequently if indicators of potential impairment exist. Intangible assets with finite useful lives, consisting primarily of software and license fees, are amortized using the straight-line method over the estimated useful lives, which range from 3 years to 5 years for software and 5 years to 10 years for license fees. Certain costs incurred in connection with developing or obtaining internal use software are capitalized. These costs consist primarily of payments made to third parties and the salaries of employees working on such software development. Costs incurred in connection with developing internal use software are capitalized at the application development stage. In addition, Canon develops or obtains certain software to be sold where related costs are capitalized after establishment of technological feasibility.

(m) Environmental Liabilities

Liabilities for environmental remediation and other environmental costs are accrued when environmental assessments or remedial efforts are probable and the costs can be reasonably estimated. Such liabilities are adjusted as further information develops or circumstances change. Costs of future obligations are not discounted to their present values.

(n) Income Taxes

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Canon records a valuation allowance to reduce the deferred tax assets to the amount that is more likely than not realizable.

Canon recognizes the financial statement effects of tax positions when it is more likely than not, based on the technical merits, that the tax positions will be sustained upon examination by the tax authorities. Benefits from tax positions that meet the more-likely-than-not recognition threshold are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Interest and penalties accrued related to unrecognized tax benefits are included in income taxes in the consolidated statements of income.

(o) Issuance of Stock by Subsidiaries and Equity Investees

The change in the Company's proportionate share of a subsidiary's or equity investee's equity resulting from the issuance of stock by the subsidiary or equity investee is accounted for as an equity transaction.

(p) Stock-Based Compensation

Canon measures stock-based compensation cost at the grant date, based on the fair value of the award, and recognizes the cost on a straight-line basis over the requisite service period, which is the vesting period.

(q) Net Income per Share

Basic net income per share is computed by dividing net income by the weighted-average number of common shares outstanding during each year. Diluted net income per share includes the effect from potential issuances of common stock based on the assumptions that all convertible debentures were converted into common stock and all stock options were exercised.

(r) Revenue Recognition

Canon generates revenue principally through the sale of consumer products, equipment, supplies, and related services under separate contractual arrangements. Canon recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred and title and risk of loss have been transferred to the customer or services have been rendered, the sales price is fixed or determinable, and collectibility is probable.

Revenue from sales of consumer products including office imaging products, computer peripherals, business information products and cameras is recognized upon shipment or delivery, depending upon when title and risk of loss transfer to the customer.

Revenue from sales of optical equipment, such as steppers and aligners that are sold with customer acceptance provisions related to their functionality, is recognized when the equipment is installed at the customer site and the specific criteria of the equipment functionality are successfully tested and demonstrated by Canon. Service revenue is derived primarily from separately priced product maintenance contracts on equipment sold to customers and is measured at the stated amount of the contract and recognized as services are provided.

Canon also offers separately priced product maintenance contracts for most office imaging products, for which the customer typically pays a stated base service fee plus a variable amount based on usage. Revenue from these service maintenance contracts is measured at the stated amount of the contract and recognized as services are provided and variable amounts are earned.

Revenue from the sale of equipment under sales-type leases is recognized at the inception of the lease. Income on sales-type leases and direct-financing leases is recognized over the life of each respective lease using the interest method. Leases not qualifying as sales-type leases or direct-financing leases are accounted for as operating leases and related revenue is recognized ratably over the lease term. When equipment leases are bundled with product maintenance contracts, revenue is first allocated considering the relative fair value of the lease and non-lease deliverables based upon the estimated relative fair values of each element. Lease deliverables generally include equipment, financing and executory costs, while non-lease deliverables generally consist of product maintenance contracts and supplies.

Table of Contents

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

1. Basis of Presentation and Significant Accounting Policies (continued)**(r) Revenue Recognition (continued)**

For all other arrangements with multiple elements, Canon allocates revenue to each element based on its relative fair value if such element meets the criteria for treatment as a separate unit of accounting as prescribed in the Emerging Issues Task Force (EITF) Issue No. 00-21, Revenue Arrangements with Multiple Deliverables. Otherwise, revenue is deferred until the undelivered elements are fulfilled and accounted for as a single unit of accounting.

Canon records estimated reductions to sales at the time of sale for sales incentive programs including product discounts, customer promotions and volume-based rebates. Estimated reductions in sales are based upon historical trends and other known factors at the time of sale. In addition, Canon provides price protection to certain resellers of its products, and records reductions to sales for the estimated impact of price protection obligations when announced.

Estimated product warranty costs are recorded at the time revenue is recognized and are included in selling, general and administrative expenses. Estimates for accrued product warranty costs are based on historical experience, and are affected by ongoing product failure rates, specific product class failures outside of the baseline experience, material usage and service delivery costs incurred in correcting a product failure.

Taxes collected from customers and remitted to governmental authorities are excluded from revenues in the consolidated statements of income.

(s) Research and Development Costs

Research and development costs are expensed as incurred.

(t) Advertising Costs

Advertising costs are expensed as incurred. Advertising expenses were ¥112,810 million, ¥132,429 million and ¥116,809 million for the years ended December 31, 2008, 2007 and 2006, respectively.

(u) Shipping and Handling Costs

Shipping and handling costs totaled ¥62,128 million, ¥63,708 million and ¥62,626 million for the years ended December 31, 2008, 2007 and 2006, respectively, and are included in selling, general and administrative expenses in the consolidated statements of income.

(v) Derivative Financial Instruments

All derivatives are recognized at fair value and are included in prepaid expenses and other current assets, or other current liabilities in the consolidated balance sheets. On the date the derivative contract is entered into, Canon designates the derivative as either a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge), or a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge). Canon formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. Canon also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, Canon discontinues hedge accounting prospectively.

Changes in the fair value of a derivative that is designated and qualifies as a fair-value hedge, along with the loss or gain on the hedged asset or liability or unrecognized firm commitment of the hedged item that is attributable to the hedged risk, are recorded in earnings. Changes in the fair value of a derivative that is designated and qualifies as a cash-flow hedge are recorded in other comprehensive income (loss), until earnings are affected by the variability in cash flows of the hedged item. Gains and losses from hedging ineffectiveness are included in other

income (deductions). Gains and losses related to the components of hedging instruments excluded from the assessment of hedge effectiveness are included in other income (deductions).

Canon also uses certain derivative financial instruments which are not designated as hedges. Canon records these derivative financial instruments in the consolidated balance sheets at fair value. The changes in fair values are immediately recorded in earnings.

Canon classifies cash flows from derivatives as cash flows from operating activities in the consolidated statements of cash flows.

(w) Guarantees

Canon recognizes, at the inception of a guarantee, a liability for the fair value of the obligation it has undertaken in issuing guarantees.

(x) New Accounting Standards

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. This statement clarifies how to measure fair value as permitted or required under other accounting pronouncements, but does not require any new fair value measurements. In February 2008, the FASB issued Staff Position (FSP) No. FAS 157-2, Effective Date of FASB Statement No. 157, which delays the effective date of SFAS 157 for one year for certain nonfinancial assets and liabilities. Canon adopted SFAS 157 in the first quarter beginning January 1, 2008 for all financial assets and liabilities that are recognized or disclosed at fair value in the financial statements. This adoption did not have a material impact on Canon's consolidated results of operations and financial condition. The adoption of SFAS 157 for all nonfinancial assets and liabilities beginning January 1, 2009 will not have a material impact on Canon's consolidated results of operations and financial condition. See Note 22 for the disclosures required by SFAS 157.

Table of Contents

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

1. Basis of Presentation and Significant Accounting Policies (continued)**(x) New Accounting Standards (continued)**

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, Including an amendment of FASB Statement No. 115 (SFAS 159). SFAS 159 provides companies with an option to report selected financial assets and liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are recognized in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007 and was adopted by Canon in the first quarter beginning January 1, 2008. The adoption of SFAS 159 did not have an impact on Canon's consolidated results of operations and financial condition as Canon did not elect to report financial assets and liabilities under the fair value option.

In June 2007, the FASB ratified the consensus in EITF Issue No. 07-3, Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities (EITF 07-3). EITF 07-3 requires that nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities be deferred and capitalized and recognized as an expense as the related goods are delivered or the related services are performed. EITF 07-3 is effective, on a prospective basis, for fiscal years beginning after December 15, 2007 and was adopted by Canon in the first quarter beginning January 1, 2008. The adoption of EITF 07-3 did not have a material impact on Canon's consolidated results of operations and financial condition.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired in a business combination. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS 141R is effective for fiscal years beginning on or after December 15, 2008 and is required to be adopted by Canon for any business combinations with an acquisition date on or after January 1, 2009. The impact of the adoption of SFAS 141R on Canon's consolidated results of operations and financial condition will be largely dependent on the size and nature of the business combinations completed after the adoption of this statement.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS 160 is effective for fiscal years beginning on or after December 15, 2008 on a prospective basis, except for certain presentation and disclosure requirements, which will be applied retrospectively for all periods presented, and is required to be adopted by Canon in the first quarter beginning January 1, 2009. The adoption of SFAS 160 will impact the presentation of Canon's consolidated balance sheets and consolidated statements of income; however, it will not have a material impact on Canon's consolidated results of operations and financial condition.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 amends and expands the current disclosures required by SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133). SFAS 161 requires entities to provide greater transparency about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS 133 and its

interpretations, and how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. SFAS 161 does not change the existing standards relative to recognition and measurement of derivative instruments and hedging activities. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008 and is required to be adopted by Canon in the first quarter beginning January 1, 2009. The adoption of SFAS 161 will not have an impact on Canon's consolidated results of operations and financial condition.

In December 2008, the FASB issued FSP FAS No. 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets* (FSP 132R-1). FSP 132R-1 requires additional disclosures about plan assets including investment allocation, fair value of major categories of plan assets, development of fair value measurements, and concentrations of risk. FSP 132R-1 is effective for fiscal years ending after December 15, 2009 and is required to be adopted by Canon in the year ending December 31, 2009. Canon is currently evaluating the requirements of these additional disclosures, but does not expect the adoption of FSP 132R-1 to have an impact on Canon's consolidated results of operations and financial condition.

(y) Reclassification

Time deposits with original maturities of more than three months and marketable securities, which were previously disclosed separately in the consolidated balance sheets, have been reclassified to short-term investments to conform to the current year presentation.

Intangible assets, which were previously included in other assets, have been reclassified to intangible assets in the consolidated balance sheets to conform to the current year presentation.

Table of Contents

Canon Inc. and Subsidiaries
Notes to Consolidated Financial Statements (continued)

2. Foreign Operations

Amounts included in the consolidated financial statements relating to subsidiaries operating in foreign countries are summarized as follows:

	2008	2007 <i>(Millions of yen)</i>	2006
December 31:			
Total assets	¥1,502,451	¥2,077,268	¥1,995,927
Net assets	850,491	1,024,150	907,845
Years ended December 31:			
Net sales	¥3,095,485	¥3,433,036	¥3,119,102
Net income	72,520	136,560	114,916

3. Investments

The cost, gross unrealized holding gains, gross unrealized holding losses and fair value for available-for-sale securities and held-to-maturity securities included in short-term investments and investments by major security type at December 31, 2008 and 2007 were as follows:

	December 31, 2008			
	Cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
	<i>(Millions of yen)</i>			
Current:				
Available-for-sale:				
Government bonds	¥ 1	¥	¥	¥ 1
Fund trusts	133	16		149
	¥ 134	¥ 16	¥	¥ 150
Noncurrent:				
Available-for-sale:				
Government bonds	¥ 431	¥	¥ 18	¥ 413

3. Investments (continued)

	Cost	December 31, 2007		Fair value
		Gross unrealized holding gains	Gross unrealized holding losses	
<i>(Millions of yen)</i>				
Current:				
Available-for-sale:				
Bank debt securities	¥ 51	¥	¥	¥ 51
Held-to-maturity:				
Corporate debt securities	10,115			10,115
	¥10,166	¥	¥	¥10,166
Noncurrent:				
Available-for-sale:				
Government bonds	¥ 496	¥	¥ 25	¥ 471
Corporate debt securities	3,183	31	49	3,165
Fund trusts	3,573	1,158	3	4,728
Equity securities	12,666	10,233	583	22,316
	¥19,918	¥ 11,422	¥ 660	¥30,680

Maturities of available-for-sale debt securities and fund trusts included in short-term investments and investments in the accompanying consolidated balance sheets were as follows at December 31, 2008:

	Available-for-sale securities	
	Cost	Fair value
	<i>(Millions of yen)</i>	
Due within one year	¥ 134	¥ 150
Due after one year through five years	3,542	3,426
Due after five years through ten years	848	811
	¥4,524	¥4,387

The gross realized gains were ¥116 million, ¥1,512 million and ¥674 million for the years ended December 31, 2008, 2007 and 2006, respectively. The gross realized losses, including write-downs for impairments that were other than temporary, were ¥7,868 million for the year ended December 31, 2008, and were not significant for the years ended December 31, 2007 and 2006.

At December 31, 2008, substantially all of the available-for-sale securities with unrealized losses had been in a continuous unrealized loss position for less than 12 months.

Time deposits with original maturities of more than three months are ¥7,430 million and ¥10,333 million at December 31, 2008 and 2007, respectively, and are included in short-term investments in the accompanying consolidated balance sheets.

Aggregate cost of non-marketable equity securities accounted for under the cost method totaled ¥10,684 million and ¥14,017 million at December 31, 2008 and 2007, respectively. Investments with an aggregate cost of ¥10,572 million were not evaluated for impairment because (a) Canon did not estimate the fair value of those investments as it was not practicable to estimate the fair value of the investments and (b) Canon did not identify any events or changes in circumstances that might have had significant adverse effects on the fair value of those investments.

Investments in affiliated companies accounted for by the equity method amounted to ¥59,428 million and ¥42,817 million at December 31, 2008 and 2007, respectively. Canon's share of the net earnings (losses) in affiliated companies accounted for by the equity method, included in other income (deductions), was a loss of ¥20,047 million for the year ended December 31, 2008, and earnings of ¥5,634 million and ¥4,237 million for the years ended December 31, 2007 and 2006, respectively.

4. Trade Receivables

Trade receivables are summarized as follows:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Notes	¥ 20,303	¥ 23,632
Accounts	584,437	785,155
	604,740	808,787
Less allowance for doubtful receivables	(9,318)	(14,547)
	¥595,422	¥794,240

5. Inventories

Inventories are summarized as follows:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Finished goods	¥316,533	¥366,845
Work in process	171,511	175,704
Raw materials	18,875	20,925
	¥506,919	¥563,474

6. Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and are summarized as follows:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Land	¥ 247,602	¥ 249,959
Buildings	1,268,388	1,198,519
Machinery and equipment	1,395,451	1,406,849
Construction in progress	81,346	103,749
	2,992,787	2,959,076
Less accumulated depreciation	(1,635,601)	(1,594,374)
	¥ 1,357,186	¥ 1,364,702

Depreciation expense for the years ended December 31, 2008, 2007 and 2006 was ¥304,622 million, ¥309,815 million and ¥235,804 million, respectively.

Amounts due for purchases of property, plant and equipment were ¥98,398 million and ¥120,823 million at December 31, 2008 and 2007, respectively, and are included in other current liabilities in the accompanying consolidated balance sheets. Fixed assets presented in the consolidated statements of cash flows includes property, plant and equipment and intangible assets.

Canon recognized impairment losses of ¥11,164 million related primarily to property, plant and equipment of its semiconductor production equipment business during the year ended December 31, 2008. As a result of declining demand in the semiconductor manufacturing industry and diminished profitability of the semiconductor production equipment business, Canon evaluated the ongoing value of the related long-lived assets and estimated that the carrying amounts would not be recoverable from the future cash flows. The fair value of the property, plant and equipment was based on the estimated discounted future cash flows expected to be generated from the use of them. The impairment losses are included in selling, general and administrative expenses in the consolidated statements of income.

7. Finance Receivables and Operating Leases

Finance receivables represent financing leases which consist of sales-type leases and direct-financing leases resulting from the marketing of Canon's and complementary third-party products. These receivables typically have terms ranging from 1 year to 7 years. The components of the finance receivables, which are included in prepaid expenses and other current assets, and other assets in the accompanying consolidated balance sheets, are as follows:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Total minimum lease payments receivable	¥198,611	¥229,229
Unguaranteed residual values	16,310	17,036
Executory costs	(1,729)	(2,960)
Unearned income	(26,658)	(27,756)
	186,534	215,549
Less allowance for doubtful receivables	(8,268)	(8,590)
	178,266	206,959
Less current portion	(59,608)	(72,776)
	¥118,658	¥134,183

The cost of equipment leased to customers under operating leases included in property, plant and equipment, net at December 31, 2008 and 2007 was ¥50,388 million and ¥63,190 million, respectively. Accumulated depreciation on equipment under operating leases at December 31, 2008 and 2007 was ¥37,284 million and ¥48,818 million, respectively.

The following is a schedule by year of the future minimum lease payments to be received under financing leases and non-cancelable operating leases at December 31, 2008.

	Financing leases	Operating leases
	<i>(Millions of yen)</i>	
Year ending December 31:		
2009	¥ 76,599	¥4,225
2010	57,305	1,585
2011	38,152	832
2012	19,024	390
2013	6,743	54
Thereafter	788	7
	¥198,611	¥7,093

8. Acquisitions

In 2007, the Company and one of its subsidiaries acquired two companies for a total cost of ¥26,387 million. One company, which was acquired with cash, is engaged in developing, manufacturing, selling and providing services for equipment used in the manufacture of organic EL display panels and thin-film solar cells. The other company, which was acquired with cash and share exchange by the subsidiary of the Company, is engaged in providing architecture, management and maintenance services for information systems. In connection with those transactions, Canon recognized goodwill of ¥7,556 million, which is included in other assets, and intangible assets of ¥7,131 million, which are included in intangible assets in the accompanying consolidated balance sheets. Intangible assets consist primarily of manufacturing technology, trademarks, patents, customer contracts and related customer relationships, and are subject to a weighted average amortization period of approximately 13 years as of the date of acquisition.

Canon acquired businesses other than those described above during the years ended December 31, 2008, 2007 and 2006 that were not material to its consolidated financial statements.

Canon has included the results of operations of these transactions prospectively from the respective dates of transactions. Canon has not presented pro forma results of operations of the acquired businesses because the results are not material to its consolidated results of operations on either an individual or an aggregate basis.

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

9. Goodwill and Other Intangible Assets

Intangible assets developed or acquired during the year ended December 31, 2008 totaled ¥47,050 million, which are subject to amortization and primarily consist of software of ¥38,986 million, which is mainly for internal use, and license fees of ¥2,217 million, in addition to those recorded from acquired businesses. The weighted average amortization period for software, license fees and intangible assets in total is approximately 4 years, 7 years and 4 years, respectively.

The components of intangible assets subject to amortization at December 31, 2008 and 2007 were as follows:

	December 31, 2008		December 31, 2007	
	Gross carrying amount	Accumulated amortization	Gross carrying amount	Accumulated amortization
	<i>(Millions of yen)</i>			
Software	¥187,920	¥103,535	¥174,645	¥ 96,445
License fees	21,537	11,104	22,825	11,697
Other	34,341	10,925	31,488	9,241
	¥243,798	¥125,564	¥228,958	¥117,383

Aggregate amortization expense for the years ended December 31, 2008, 2007 and 2006 was ¥36,715 million, ¥31,879 million and ¥26,490 million, respectively. Estimated amortization expense for intangible assets currently held for the next five years ending December 31 is ¥35,010 million in 2009, ¥27,402 million in 2010, ¥16,455 million in 2011, ¥9,030 million in 2012, and ¥6,016 million in 2013.

Intangible assets not subject to amortization other than goodwill at December 31, 2008 and 2007 were not significant.

The changes in the carrying amount of goodwill, which is included in other assets in the consolidated balance sheets, for the years ended December 31, 2008 and 2007 were as follows:

	Years ended December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Balance at beginning of year	¥56,783	¥40,801
Goodwill acquired during the year	4,975	13,573
Translation adjustments and other	(11,004)	2,409
Balance at end of year	¥50,754	¥56,783

10. Short-Term Loans and Long-Term Debt

Short-term loans consisting of bank borrowings at December 31, 2008 and 2007 were ¥220 million and ¥2,888 million, respectively. The weighted average interest rates on short-term loans outstanding at December 31, 2008 and 2007 were 6.21% and 3.16%, respectively.

Long-term debt consisted of the following:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Loans, principally from banks, maturing in installments through 2017; bearing weighted average interest of 2.93% and 1.80% at December 31, 2008 and 2007, respectively	¥ 95	¥ 2,993
2.27% Japanese yen notes, due 2008		10,000
1.30% Japanese yen convertible debentures, due 2008		128
Capital lease obligations	13,648	10,988
	13,743	24,109
Less current portion	(5,320)	(15,429)
	¥ 8,423	¥ 8,680

The aggregate annual maturities of long-term debt outstanding at December 31, 2008 were as follows:

Year ending December 31:	<i>(Millions of yen)</i>
2009	¥ 5,320
2010	4,410
2011	3,005
2012	822
2013	135
Thereafter	51
	¥ 13,743

Both short-term and long-term bank loans are made under general agreements which provide that security and guarantees for present and future indebtedness will be given upon request of the bank, and that the bank shall have the right to offset cash deposits against obligations that have become due or, in the event of default, against all obligations due to the bank.

11. Trade Payables

Trade payables are summarized as follows:

December 31	
2008	2007

(Millions of yen)

Notes	¥ 14,544	¥ 17,088
Accounts	392,202	497,138
	¥406,746	¥514,226

Table of Contents

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

12. Employee Retirement and Severance Benefits

The Company and certain of its subsidiaries have contributory and noncontributory defined benefit pension plans covering substantially all of their employees. Benefits payable under the plans are based on employee earnings and years of service. Certain foreign subsidiaries also have defined contribution pension plans covering substantially all of their employees.

Effective January 1, 2007, the Company and certain of its domestic subsidiaries amended their funded defined benefit pension plans. Under these funded defined benefit pension plans, the lifetime pension benefit is based upon amounts payable during an initial period after retirement (the guarantee period) and the subsequent period lasting for the remainder of the retiree's lifetime (the post-guarantee period). The Company and certain of its domestic subsidiaries amended these plans to increase the duration of this guarantee period from 15 years to 20 years to reflect an increase in the average lifespan of their employees, resulting in reduced amounts payable during each of the guarantee and post-guarantee periods. As a result of these changes, the projected benefit obligation decreased by ¥101,620 million. In conjunction with these plan changes, the Company and certain of its domestic subsidiaries also have implemented an unfunded retirement and severance plan and a defined contribution pension plan for certain future pension benefits attributable to employees' future services.

The amounts of cost recognized for the defined contribution pension plans of the Company and certain of its subsidiaries for the years ended December 31, 2008, 2007 and 2006 were ¥10,840 million, ¥10,262 million and ¥6,233 million, respectively.

Obligations and funded status

Reconciliations of beginning and ending balances of the benefit obligations and the fair value of the plan assets are as follows:

	Japanese plans		Foreign plans	
	December 31		December 31	
	2008	2007	2008	2007

12. Employee Retirement and Severance Benefits (continued)

Other changes in plan assets and benefit obligations recognized in other comprehensive income (loss) for the years ended December 31, 2008 and 2007 were summarized as follows:

	Japanese plans		Foreign plans	
	Years ended December 31		Years ended December 31	
	2008	2007	2008	2007
	<i>(Millions of yen)</i>			
Current year actuarial (gain) loss	¥ 111,862	¥ 32,321	¥ 9,451	¥ (149)
Amortization of actuarial loss	(7,068)	(4,868)	(898)	(887)
Prior service credit due to amendments	(204)	(101,620)	(86)	
Amortization of prior service credit	13,373	13,479	271	86
Amortization of net transition obligation	(722)	(722)		
	¥ 117,241	¥ (61,410)	¥ 8,738	¥ (950)

The estimated net transition obligation, prior service credit and actuarial loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost over the next year are summarized as follows:

	Japanese plans		Foreign plans	
	<i>(Millions of yen)</i>		<i>(Millions of yen)</i>	
	¥	¥	¥	¥
Net transition obligation	722			
Prior service credit	(13,514)		(117)	
Actuarial loss	13,249		1,122	

Assumptions

Weighted-average assumptions used to determine benefit obligations are as follows:

	Japanese plans		Foreign plans	
	December 31		December 31	
	2008	2007	2008	2007
Discount rate	2.4%	2.5%	5.3%	5.1%
Assumed rate of increase in future compensation levels	3.0%	2.9%	3.1%	3.1%

Weighted-average assumptions used to determine net periodic benefit cost are as follows:

	Japanese plans			Foreign plans		
	Years ended December 31			Years ended December 31		
	2008	2007	2006	2008	2007	2006
Discount rate	2.5%	2.5%	2.5%	5.1%	4.5%	4.8%
Assumed rate of increase in future compensation levels	2.9%	2.9%	2.9%	3.1%	2.9%	2.6%
Expected long-term rate of return on plan assets	3.7%	3.9%	4.5%	6.5%	6.0%	6.4%

Canon determines the expected long-term rate of return based on the expected long-term return of the various asset categories in which it invests. Canon considers the current expectations for future returns and the actual historical returns of each plan asset category.

Plan assets

The weighted-average asset allocations of Canon's benefit plans at December 31, 2008 and 2007 and target asset allocation by asset category are as follows:

Asset category:	Japanese plans			Foreign plans		
	December 31 2008	December 31 2007	Target allocation	December 31 2008	December 31 2007	Target allocation
Equity securities	22.7%	33.6%	31.9%	43.3%	52.4%	30.3%
Debt securities	52.0	45.2	46.7	42.5	33.8	59.9
Cash	0.6	1.1	0.1	1.3		1.6
Life insurance company general accounts	23.8	19.5	20.4			
Other	0.9	0.6	0.9	12.9	13.8	8.2
	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

Table of Contents

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

12. Employee Retirement and Severance Benefits (continued)

Canon's investment policies are designed to ensure adequate plan assets are available to provide future payments of pension benefits to eligible participants. Taking into account the expected long-term rate of return on plan assets, Canon formulates a model portfolio comprised of the optimal combination of equity securities and debt securities. Plan assets are invested in individual equity and debt securities using the guidelines of the model portfolio in order to produce a total return that will match the expected return on a mid-term to long-term basis. Canon evaluates the gap between expected return and actual return of invested plan assets on an annual basis to determine if such differences necessitate a revision in the formulation of the model portfolio. Canon revises the model portfolio when and to the extent considered necessary to achieve the expected long-term rate of return on plan assets.

The plan's equity securities include common stock of the Company and certain of its subsidiaries in the amounts of ¥485 million and ¥1,257 million at December 31, 2008 and 2007, respectively.

Contributions

Canon expects to contribute ¥14,439 million to its Japanese defined benefit pension plans and ¥3,485 million to its foreign defined benefit pension plans for the year ending December 31, 2009.

Estimated future benefit payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

Year ending December 31:	Japanese plans	Foreign plans
	<i>(Millions of yen)</i>	
2009	¥ 11,779	¥ 1,566
2010	12,849	1,733
2011	14,506	1,784
2012	15,700	1,902
2013	16,918	1,851
2014 - 2018	105,706	12,483

Notes to Consolidated Financial Statements (continued)

13. Income Taxes (continued)

The Company and its domestic subsidiaries are subject to a number of income taxes, which, in the aggregate, represent a statutory income tax rate of approximately 40% for the years ended December 31, 2008, 2007 and 2006. A reconciliation of the Japanese statutory income tax rate and the effective income tax rate as a percentage of income before income taxes and minority interests is as follows:

	Years ended December 31		
	2008	2007	2006
Japanese statutory income tax rate	40.0%	40.0%	40.0%
Increase (reduction) in income taxes resulting from:			
Expenses not deductible for tax purposes	0.5	0.3	0.3
Income of foreign subsidiaries taxed at lower than Japanese statutory tax rate	(2.6)	(2.8)	(2.1)
Tax credit for research and development expenses	(4.6)	(4.5)	(4.1)
Other	0.1	1.4	0.4
Effective income tax rate	33.4%	34.4%	34.5%

Net deferred income tax assets and liabilities are included in the accompanying consolidated balance sheets under the following captions:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Prepaid expenses and other current assets	¥ 96,613	¥ 79,846
Other assets	130,378	68,178
Other current liabilities	(2,491)	(4,506)
Other noncurrent liabilities	(29,075)	(28,157)
	¥195,425	¥115,361

The tax effects of temporary differences that give rise to the deferred tax assets and deferred tax liabilities at December 31, 2008 and 2007 are presented below:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Deferred tax assets:		
Inventories	¥ 36,817	¥ 17,359
Accrued business tax	5,183	11,555
Accrued pension and severance cost	51,713	16,336
Research and development costs capitalized for tax purposes	41,661	42,434
Property, plant and equipment	58,682	53,487
Accrued expenses	27,748	27,903
Net operating losses carried forward	6,745	4,080
Other	44,894	34,448

	273,443	207,602
Less valuation allowance	(10,817)	(9,327)
Total deferred tax assets	262,626	198,275
Deferred tax liabilities:		
Undistributed earnings of foreign subsidiaries	(10,407)	(13,566)
Net unrealized gains on securities	(607)	(4,440)
Tax deductible reserve	(8,119)	(8,574)
Financing lease revenue	(31,035)	(26,892)
Prepaid pension and severance cost	(2,644)	(10,604)
Other	(14,389)	(18,838)
Total deferred tax liabilities	(67,201)	(82,914)
Net deferred tax assets	¥195,425	¥115,361

Table of Contents

Canon Inc. and Subsidiaries
Notes to Consolidated Financial Statements (continued)

13. Income Taxes (continued)

The net changes in the total valuation allowance were increases of ¥1,490 million, ¥2,827 million and ¥3,155 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Based upon the level of historical taxable income and projections for future taxable income over the periods which the net deductible temporary differences are expected to reverse, management believes it is more likely than not that Canon will realize the benefits of these deferred tax assets, net of the existing valuation allowance, at December 31, 2008.

At December 31, 2008, Canon had net operating losses which can be carried forward for income tax purposes of ¥18,322 million to reduce future taxable income. Periods available to reduce future taxable income vary in each tax jurisdiction and generally range from one year to ten years as follows:

	<i>(Millions of yen)</i>
Within one year	¥ 233
After one year through five years	2,945
After five years through ten years	10,293
Indefinite period	4,851
 Total	 ¥18,322

Income taxes have not been accrued on undistributed earnings of domestic subsidiaries as the tax law provides a means by which the dividends from a domestic subsidiary can be received tax free.

Canon has not recognized deferred tax liabilities of ¥37,208 million for a portion of undistributed earnings of foreign subsidiaries that arose for the year ended December 31, 2008 and prior years because Canon currently does not expect to have such amounts distributed or paid as dividends to the Company in the foreseeable future. Deferred tax liabilities will be recognized when Canon expects that it will realize those undistributed earnings in a taxable manner, such as through receipt of dividends or sale of the investments. At December 31, 2008, such undistributed earnings of these subsidiaries were ¥728,410 million.

Effective January 1, 2007, Canon adopted FASB Interpretation No.48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No.109. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	Years ended December 31	
	2008	2007
	<i>(Millions of yen)</i>	
Balance at beginning of year	¥15,791	¥16,087
Additions for tax positions of the current year	8,700	994
Additions for tax positions of prior years	1,354	1,902
Reductions for tax positions of prior years	(8,512)	(1,340)
Lapse of the applicable statute of limitations		(1,311)
Settlements with tax authorities	(1,208)	(322)
Other	(3,436)	(219)
 Balance at end of year	 ¥12,689	 ¥15,791

The total amounts of unrecognized tax benefits that would reduce the effective tax rate, if recognized, are ¥4,405 million and ¥8,278 million at December 31, 2008 and 2007, respectively.

Although Canon believes its estimates and assumptions of unrecognized tax benefits are reasonable, uncertainty regarding the final determination of tax audit settlements and any related litigation could affect the effective tax rate in the future period. Based on each of the items of which Canon is aware at December 31, 2008, no significant changes to the unrecognized tax benefits are expected within the next twelve months.

Canon recognizes interest and penalties accrued related to unrecognized tax benefits in income taxes. Both interest and penalties accrued at December 31, 2008 and 2007, and interest and penalties included in income taxes for the years ended December 31, 2008 and 2007 are not material.

Canon files income tax returns in Japan and various foreign tax jurisdictions. In Japan, Canon is no longer subject to regular income tax examinations by the tax authority for years before 2006. While there has been no specific indication by the tax authority that Canon will be subject to a transfer pricing examination in the near future, the tax authority could conduct a transfer pricing examination for years after 2001. In other major foreign tax jurisdictions, including the United States and Netherlands, Canon is no longer subject to income tax examinations by tax authorities for years before 2004 with few exceptions. The tax authorities are currently conducting income tax examinations of Canon's income tax returns for years after 2005 in Japan and for certain years after 2003 in major foreign tax jurisdictions.

Canon Inc. and Subsidiaries
Notes to Consolidated Financial Statements (continued)

14. Common Stock

For the years ended December 31, 2008, 2007 and 2006, the Company issued 127,254 shares, 190,380 shares and 331,661 shares of common stock, respectively, in connection with the conversion of convertible debt. In accordance with the Corporation Law of Japan, conversion into common stock of convertible debt is accounted for by crediting one-half or more of the conversion price to the common stock account and the remainder to the additional paid-in capital account.

15. Legal Reserve and Retained Earnings

The Corporation Law of Japan provides that an amount equal to 10% of distributions from retained earnings paid by the Company and its Japanese subsidiaries be appropriated as a legal reserve. No further appropriations are required when the total amount of the additional paid-in capital and the legal reserve equals 25% of their respective stated capital. The Corporation Law of Japan also provides that additional paid-in capital and legal reserve are available for appropriations by the resolution of the stockholders. Certain foreign subsidiaries are also required to appropriate their earnings to legal reserves under the laws of the respective countries.

Cash dividends and appropriations to the legal reserve charged to retained earnings for the years ended December 31, 2008, 2007 and 2006 represent dividends paid out during those years and the related appropriations to the legal reserve. Retained earnings at December 31, 2008 do not reflect current year-end dividends in the amount of ¥67,897 million which will be payable in March 2009 upon approval by the stockholders.

The amount available for dividends under the Corporation Law of Japan is based on the amount recorded in the Company's nonconsolidated books of account in accordance with financial accounting standards of Japan. Such amount was ¥1,363,838 million at December 31, 2008.

Retained earnings at December 31, 2008 included Canon's equity in undistributed earnings of affiliated companies accounted for by the equity method in the amount of ¥17,745 million.

16. Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss) are as follows:

17. Stock-Based Compensation

On May 1, 2008, based on the approval of the stockholders, the Company granted stock options to its directors, executive officers and certain employees to acquire 592,000 shares of common stock.

These option awards vest after two years of continuous service beginning on the grant date and have a four year contractual term. The grant date fair value of each option granted was ¥1,247.

The compensation cost recognized for these stock options for the year ended December 31, 2008 was ¥246 million and is included in selling, general and administrative expenses in the consolidated statements of income.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model that uses the assumptions presented below:

Expected term of option (in years)	4.0
Expected volatility	37.39%
Dividend yield	2.10%
Risk-free interest rate	0.95%

A summary of option activity under the stock option plan as of and for the year ended December 31, 2008 is presented below:

	Shares	Weighted-average exercise price <i>(Yen)</i>	Weighted-average remaining contractual term <i>(Year)</i>	Aggregate intrinsic value <i>(Millions of yen)</i>
Outstanding at January 1, 2008				
Granted	592,000	¥5,502		
Forfeited				
Outstanding at December 31, 2008	592,000	¥5,502	3.3	¥

At December 31, 2008, all option awards were nonvested, but expected to be vested, and there was ¥492 million of total unrecognized compensation cost related to nonvested stock option. That cost is expected to be recognized over 1.33 years.

18. Net Income per Share

A reconciliation of the numerators and denominators of basic and diluted net income per share computations is as follows:

	2008	Years ended December 31 2007	2006
		<i>(Millions of yen)</i>	
Net income	¥309,148	¥488,332	¥455,325
Effect of dilutive securities:			
1.30% Japanese yen convertible debentures, due 2008	2	4	8
Diluted net income	¥309,150	¥488,336	¥455,333
		<i>(Number of shares)</i>	
Average common shares outstanding	1,255,626,490	1,293,295,680	1,331,542,074
Effect of dilutive securities:			
1.30% Japanese yen convertible debentures, due 2008	79,929	221,751	474,796
Diluted common shares outstanding	1,255,706,419	1,293,517,431	1,332,016,870
		<i>(Yen)</i>	
Net income per share:			
Basic	¥246.21	¥377.59	¥341.95
Diluted	246.20	377.53	341.84

The computation of diluted net income per share for the year ended December 31, 2008 excludes outstanding stock options because the effect would be anti-dilutive.

Canon Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

19. Derivatives and Hedging Activities***Risk management policy***

Canon operates internationally, exposing it to the risk of changes in foreign currency exchange rates. Derivative financial instruments are comprised principally of foreign exchange contracts utilized by the Company and certain of its subsidiaries to reduce the risk. Canon assesses foreign currency exchange rate risk by continually monitoring changes in the exposures and by evaluating hedging opportunities. Canon does not hold or issue derivative financial instruments for trading purposes. Canon is also exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but it is not expected that any counterparties will fail to meet their obligations. Most of the counterparties are internationally recognized financial institutions and selected by Canon taking into account their financial condition, and contracts are diversified across a number of major financial institutions.

Foreign currency exchange rate risk management

Canon's international operations expose Canon to the risk of changes in foreign currency exchange rates. Canon uses foreign exchange contracts to manage certain foreign currency exchange exposures principally from the exchange of U.S. dollars and euros into Japanese yen. These contracts are primarily used to hedge the foreign currency exposure of forecasted intercompany sales and intercompany trade receivables which are denominated in foreign currencies. In accordance with Canon's policy, a specific portion of foreign currency exposure resulting from forecasted intercompany sales are hedged using foreign exchange contracts which principally mature within three months.

Cash flow hedge

Changes in the fair value of derivative financial instruments designated as cash flow hedges, including foreign exchange contracts associated with forecasted intercompany sales, are reported in accumulated other comprehensive income (loss). These amounts are subsequently reclassified into earnings through other income (deductions) in the same period as the hedged items affect earnings. Substantially all amounts recorded in accumulated other comprehensive income (loss) at year-end are expected to be recognized in earnings over the next 12 months. Canon excludes the time value component from the assessment of hedge effectiveness. Changes in the fair value of a foreign exchange contract for the period between the date that the forecasted intercompany sales occur and its maturity date are recognized in earnings and not considered hedge ineffectiveness.

The amount of the hedging ineffectiveness was not material for the years ended December 31, 2008, 2007 and 2006. The amount of net gains or losses excluded from the assessment of hedge effectiveness (time value component) which was recorded in other income (deductions) was net losses of ¥3,701 million, ¥6,883 million and ¥5,917 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Derivatives not designated as hedges

Canon has entered into certain foreign exchange contracts to manage its foreign currency exposures. These foreign exchange contracts have not been designated as hedges. Accordingly, the changes in fair value of the contracts are recorded in earnings immediately.

Contract amounts of foreign exchange contracts at December 31, 2008 and 2007 are set forth below:

	December 31	
	2008	2007
	<i>(Millions of yen)</i>	
To sell foreign currencies	¥350,959	¥697,240
To buy foreign currencies	35,247	46,897

Table of Contents

Canon Inc. and Subsidiaries
Notes to Consolidated Financial Statements (continued)

20. Commitments and Contingent Liabilities**Commitments**

At December 31, 2008, commitments outstanding for the purchase of property, plant and equipment approximated ¥74,909 million, and commitments outstanding for the purchase of parts and raw materials approximated ¥60,281 million.

Canon occupies sales offices and other facilities under lease arrangements accounted for as operating leases. Deposits made under such arrangements aggregated ¥14,223 million and ¥14,440 million at December 31, 2008 and 2007, respectively, and are included in noncurrent receivables in the accompanying consolidated balance sheets. Rental expenses under the operating lease arrangements amounted to ¥41,169 million, ¥36,900 million and ¥36,157 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Future minimum lease payments required under noncancelable operating leases that have initial or remaining lease terms in excess of one year at December 31, 2008 are as follows:

Year ending December 31:	<i>(Millions of yen)</i>
2009	¥14,726
2010	11,127
2011	7,090
2012	5,105
2013	3,348
Thereafter	8,440
Total future minimum lease payments	¥49,836

Guarantees

Canon provides guarantees for bank loans of its employees, affiliates and other companies. The guarantees for the employees are principally made for their housing loans. The guarantees of loans of its affiliates and other companies are made to ensure that those companies operate with less financial risk.

For each guarantee provided, Canon would have to perform under a guarantee if the borrower defaults on a payment within the contract periods of 1 year to 30 years, in the case of employees with housing loans, and of 1 year to 10 years, in the case of affiliates and other companies. The maximum amount of undiscounted payments Canon would have had to make in the event of default is ¥22,308 million at December 31, 2008. The carrying amounts of the liabilities recognized for Canon's obligations as a guarantor under those guarantees at December 31, 2008 were not significant.

Canon also issues contractual product warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. Changes in accrued product warranty cost for the years ended December 31, 2008 and 2007 are summarized as follows:

	Years ended December 31	
	2008	2007
	<i>(Millions of yen)</i>	
	¥	¥
Balance at beginning of year	20,138	18,144

Notes to Consolidated Financial Statements (continued)

20. Commitments and Contingent Liabilities (continued)***Legal proceedings***

In October 2003, a lawsuit was filed by a former employee against the Company at the Tokyo District Court in Japan. The lawsuit alleges that the former employee is entitled to ¥45,872 million as reasonable remuneration for an invention related to certain technology used by the Company, and the former employee has sued for a partial payment of ¥1,000 million and interest thereon. On January 30, 2007, the Tokyo District Court of Japan ordered the Company to pay the former employee approximately ¥33.5 million and interest thereon. On the same day, the Company appealed the decision. On February 26, 2009, the Intellectual Property High Court of Japan issued a judgment in the appellate court review and ordered the Company to pay the former employee approximately ¥69.6 million, consisting of reasonable remuneration of approximately ¥56.3 million and interest thereon. On March 12, 2009, the Company appealed the decision to the Supreme Court.

In Germany, Verwertungsgesellschaft Wort (VG Wort), a collecting agency representing certain copyright holders, has filed a series of lawsuits seeking to impose copyright levies upon digital products such as PCs and printers, that allegedly enable the reproduction of copyrighted materials, against the companies importing and distributing these digital products. In May 2004, VG Wort filed a civil lawsuit against Hewlett-Packard GmbH seeking levies on multi-function printers sold in Germany during the period from 1997 through 2001. This is an industry test case under which Hewlett-Packard GmbH represents other companies sharing common interests, and Canon has undertaken to be bound by the final decision of this court case. In 2008, the Federal Supreme Court delivered its short judgment in favor of VG Wort, whereby the court decided that, for MFPs sold during the period from 1997 through 2001, the same full tariff as applicable to photocopiers (EUR 38.35 to EUR 613.56 per unit, depending on the printing speed and color printing capability) should be applied. Hewlett-Packard GmbH filed a claim with the Federal Constitutional Court challenging the judgment of the Federal Supreme Court in August 2008. For the multi-function printers sold during the period from 2002 through 2007, VG Wort made a request for arbitration with Canon before an arbitration court in January 2007, and the arbitration court delivered their settlement proposal in December 2008. However, VG Wort rejected such settlement proposal in January 2009. VG Wort is now able to transfer this case to a court of appeals. With regard to single-function printers, VG Wort filed a separate lawsuit in January 2006 against Canon seeking payment of copyright levies, and the court of first instance in Düsseldorf ruled in favor of the claim by VG Wort in November 2006. Canon lodged an appeal against such decision in December 2006 before the court of appeals in Düsseldorf. Following a decision by the same court of appeals in Düsseldorf on January 23, 2007 in relation to a similar court case seeking copyright levies on single-function printers of Epson Deutschland GmbH, Xerox GmbH and Kyocera Mita Deutschland GmbH, whereby the court rejected such alleged levies, in its judgment of November 13, 2007, the court of appeals rejected VG Wort's claim against Canon. VG Wort appealed further against said decision of the court of appeals before the Federal Supreme Court. In December 2007, for a similar Hewlett-Packard GmbH case relating to single-function printers, the Federal Supreme Court delivered its judgment in favor of Hewlett-Packard GmbH and dismissed VG Wort's claim. VG Wort has already filed a constitutional complaint with the Federal Constitutional Court against said judgment of the Federal Supreme Court. Canon, other companies and the industry associations have expressed opposition to such extension of the levy scope. Based on industry opposition to the extension of levies to digital products, Canon's assessments of the final conclusion of these court cases including the amount of levies to be imposed and the associated financial impact on Canon remain uncertain. In 2007, an amendment of German copyright law was carried out, and a new law has been effective from January 1, 2008 for both multi-function printers and single-function printers. The new law sets forth that the scope and tariff of copyright levies will be agreed between industry and the collecting society. Industry and the collecting society, based on the requirement under the new law, reached an agreement in December 2008. This agreement is applicable retroactively from January 1, 2008 and will remain effective through end of 2010. Accordingly, there is no longer any uncertainty with respect to levies for sales of printers on and after January 1, 2008.

In April 2005, a lawsuit was filed by Nano-Proprietary Inc., currently Applied Nanotech Holdings, Inc., (NPI) against the Company and Canon U.S.A., Inc. in the United States District Court of Texas alleging that SED Inc., a joint

venture company established by the Company and Toshiba Corporation, was not regarded as a subsidiary under the Patent License Agreement between the Company and NPI and the extension of the license to SED Inc. constituted a breach of the agreement. NPI also alleged that Canon committed fraud in executing such agreement, and requested rescission of the agreement and compensatory damages. In November 2006, the Court denied Canon's motion for a summary judgment that SED Inc. was a subsidiary of the Company. In January 2007, the Company purchased all the shares of SED Inc. owned by Toshiba Corporation, making SED Inc. a 100% owned subsidiary of the Company. However, on February 22, 2007, the Court issued a summary judgment stating that SED Inc. (before the above stock purchase) was not a subsidiary of the Company, that the Company had materially breached the patent license agreement and that NPI was allowed to terminate that agreement. Thereafter, a trial was held from April 30 to May 3, 2007, in Austin, Texas. NPI's fraud claims against Canon were withdrawn by NPI and the jury returned a verdict that NPI had sustained no damages. All claims against Canon U.S.A., Inc. were also withdrawn by NPI. On May 15, 2007, Canon filed a notice of appeal to the United States Court of Appeals for the Fifth Circuit (Appeals Court), appealing the District Court's prior ruling that Canon had breached the patent license agreement and allowing NPI to terminate that agreement. On June 4, 2007, NPI also filed a notice of appeal, appealing the District Court's determination that NPI had sustained no damages. On July 25, 2008, the Appeals Court reversed the District Court's judgment and found that termination of the patent license agreement was ineffective and that the 100% owned SED Inc. is a subsidiary of Canon. The Appeals Court also affirmed the District Court's judgment denying damages to NPI. NPI petitioned for rehearing of the judgment, but the Appeals Court denied the petition. Since NPI did not appeal to the Supreme Court within the required time limit, the Fifth Circuit's judgment is definitive and conclusive in favor of Canon.

Canon is involved in various claims and legal actions, including those noted above, arising in the ordinary course of business. In accordance with SFAS No. 5, Accounting for Contingencies, Canon has recorded provisions for liabilities when it is probable that liabilities have been incurred and the amount of loss can be reasonably estimated. Canon reviews these provisions at least quarterly and adjusts these provisions to reflect the impact of the negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Based on its experience, Canon believes that any damage amounts claimed in the specific matters discussed above are not a meaningful indicator of Canon's potential liability. In the opinion of management, the ultimate disposition of the above mentioned matters will not have a material adverse effect on Canon's consolidated financial position, results of operations, or cash flows. However, litigation is inherently unpredictable. While Canon believes that it has valid defenses with respect to legal matters pending against it, it is possible that Canon's consolidated financial position, results of operations, or cash flows could be materially affected in any particular period by the unfavorable resolution of one or more of these matters.

21. Disclosures about the Fair Value of Financial Instruments and Concentrations of Credit Risk***Fair value of financial instruments***

The estimated fair values of Canon's financial instruments at December 31, 2008 and 2007 are set forth below. The following summary excludes cash and cash equivalents, trade receivables, finance receivables, noncurrent receivables, short-term loans, trade payables and accrued expenses for which fair values approximate their carrying amounts. The summary also excludes investments which are disclosed in Note 3.

	December 31		December 31	
	2008	2007	2008	2007
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
	<i>(Millions of yen)</i>			
Long-term debt, including current installments	¥(13,743)	¥(13,727)	¥(24,109)	¥(24,714)
Foreign exchange contracts:				
Assets	10,516	10,516	806	806
Liabilities	(678)	(678)	(12,335)	(12,335)

The following methods and assumptions are used to estimate the fair value in the above table.

Long-term debt

The fair values of Canon's long-term debt instruments are based on the quoted price in the most active market or the present value of future cash flows associated with each instrument discounted using Canon's current borrowing rate for similar debt instruments of comparable maturity.

Foreign exchange contracts

The fair values of foreign exchange contracts, all of which are used for purposes other than trading, are estimated by obtaining quotes from counterparties or third parties.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Concentrations of credit risk

At December 31, 2008 and 2007, one customer accounted for approximately 19% and 16% of consolidated trade receivables, respectively. Although Canon does not expect that the customer will fail to meet its obligations, Canon is potentially exposed to concentrations of credit risk if the customer failed to perform according to the terms of the contracts.

22. Fair Value Measurements

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. SFAS 157 establishes a three-level fair value hierarchy that prioritizes the inputs used to measure fair value as follows:

Level 1 - Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs are quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable, which reflect the reporting entity's own assumptions about the assumptions that market participants would use in establishing a price.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table presents Canon's assets and liabilities that are measured at fair value on a recurring basis at December 31, 2008 consistent with the fair value hierarchy provisions of SFAS No. 157.

	Level 1	Level 2	Level 3	Total
	<i>(Millions of yen)</i>			
Assets:				
Cash and cash equivalents	¥	¥194,030	¥	¥194,030
Investments	14,108	981	1,516	16,605
Derivatives		10,516		10,516
Total assets	¥14,108	¥205,527	¥1,516	¥221,151
Liabilities:				
Derivatives	¥	¥ 678	¥	¥ 678
Total liabilities	¥	¥ 678	¥	¥ 678

Level 1 investments are comprised principally of equity securities, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions. Level 2 cash and cash equivalents are valued using quoted prices for identical assets in markets that are not active. Level 3 investments are comprised of corporate debt securities, which are valued based on unobservable inputs as the market for the assets was not active at the measurement date.

Derivative financial instruments are comprised of foreign exchange contracts. Level 2 derivatives are valued using quotes obtained from counterparties or third parties, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and interest rates.

The following table presents the changes in Level 3 assets measured on a recurring basis, consisting solely of corporate debt securities, for the year ended December 31, 2008.

	<i>(Millions of yen)</i>
Balance at beginning of year	¥ 1,889
Total gains or losses (realized or unrealized):	
Included in earnings	(559)
Included in other comprehensive income (loss)	(8)

Purchases, issuances, and settlements	194
Balance at end of year	¥ 1,516

All gains and losses included in earnings are related to corporate debt securities still held at December 31, 2008, and are reported in Other, net in the consolidated statements of income.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Non-marketable equity securities with a carrying amount of ¥513 million were written down to their fair value of ¥112 million, resulting in an other-than-temporary impairment charge of ¥401 million, which was included in earnings for the year ended December 31, 2008. All impaired non-marketable equity securities were classified as Level 3 instruments, as Canon uses unobservable inputs to value these investments.
