PART I

ITEM 1.

BUSINESS

GENERAL

American Shared Hospital Services (ASHS and, together with its subsidiaries, the Company) provides Gamma Knife stereotactic radiosurgery equipment and radiation therapy and related equipment to nineteen (19) medical centers in seventeen (17) states, as of March 5, 2010. The Company provides Gamma Knife services through its 81% indirect interest in GK Financing, LLC, a California limited liability company (GKF). The remaining 19% of GKF is owned by GKV Investments, Inc., a wholly owned U.S. subsidiary of Elekta AG, a Swedish company (Elekta). Elekta is the manufacturer of the Leksell Gamma Knife (the Gamma Knife). GKF is a non-exclusive provider of alternative financing services for Elekta Gamma Knife units. Gamma Knife revenue accounted for 92% of the Company s revenue in 2009. The Company provides Image Guided Radiation Therapy (IGRT) and related equipment to one medical center in Massachusetts which accounted for approximately 8% of the Company s revenue in 2009.

In April 2006, the Company invested \$2,000,000 for a minority equity interest in Still River Systems, Inc. (Still River), a development-stage company based in Littleton, Massachusetts which, in collaboration with scientists from MIT s Plasma Science and Fusion Center, is developing a medical device for the treatment of cancer patients using proton beam radiation therapy (PBRT). On September 5, 2007 the Company invested approximately \$617,000 for an additional equity interest in Still River. The Company has deposited an additional \$2,250,000 towards the purchase of three Monarch250 (Monarch250) PBRT systems from Still River for anticipated delivery beginning in 2012. The Still River PBRT systems are not currently approved by the U.S. Food and Drug Administration (FDA).

The Company continues to develop its design and business model for The Operating Room for the 21 Century (OR21). OR21 is not expected to generate significant operations within the next twelve months.

The Company was incorporated in the State of California in 1983 and its predecessor, Ernest A. Bates, M.D., Ltd. (d/b/a American Shared Hospital Services), a California limited partnership, was formed in June 1980.

OPERATIONS

Gamma Knife Operations

Gamma Knife stereotactic radiosurgery, a non-invasive procedure, is an alternative to conventional brain surgery or can be an adjunct to conventional brain surgery. Compared to conventional surgery, Gamma Knife radiosurgery usually involves shorter patient

Table of Contents

hospitalization, lower risk of complications and can be provided at a lower cost. Typically, Gamma Knife patients resume their pre-surgical activities one or two days after treatment. The Gamma Knife treats patients with 201 single doses of gamma rays that are focused with great precision on small and medium size, well circumscribed and critically located structures in the brain. During 2006 Elekta introduced a new Gamma Knife model, the Perfexion unit (Perfexion), which treats patients with 192 single doses of gamma rays and will also provide the ability to perform procedures on areas of the upper cervical spine. The Gamma Knife delivers the concentrated dose of gamma rays from Cobalt-60 sources housed in the Gamma Knife. The Cobalt-60 sources converge at the target area and deliver a dose that is high enough to destroy the diseased tissue without damaging surrounding healthy tissue.

The Gamma Knife treats selected malignant and benign brain tumors, trigeminal neuralgia (facial pain) and arteriovenous malformations. Research is being conducted to determine whether the Gamma Knife can be effective in the treatment of epilepsy and other functional disorders.

As of December 31, 2009, there were approximately 108 Gamma Knife sites in the United States and 271 units in operation worldwide. Based on the most recent available data, an estimated percentage breakdown of Gamma Knife procedures performed in the U.S. by indications treated is as follows: malignant (46%) and benign (29%) brain tumors, functional disorders (16%) and vascular disorders (9%).

The Company, as of March 5, 2010, has nineteen (19) Gamma Knife units located at nineteen (19) sites in the United States. The Company's first Gamma Knife commenced operation in September 1991. The Company's Gamma Knife units performed approximately 1,800 procedures in 2009 for a cumulative total of approximately 22,600 procedures through December 31, 2009.

Revenue from Gamma Knife services for the Company during the five (5) years ended December 31, and the percentage of total revenue of the Company represented by the Gamma Knife for each of the last five years, are set forth below:

Year Ended	Total Gamma Knife Revenue (in thousands)	Gamma Knife Total Revenue
December 31, 2009	\$ 15,505	92.5%
2008	\$ 17,713	92.7%
2007	\$ 22,056(1)	97.5%
2006	\$ 20,385	100.0%
2005	\$ 18,231	100.0%

(1) includes \$3,200,000 of equipment sales revenue from the sale of a Gamma Knife system to an existing Gamma Knife customer at the end of the contract term.

Table of Contents

The Company conducts its Gamma Knife business through its 81% indirect interest in GKF. The remaining 19% interest is indirectly owned by Elekta. GKF, formed in October 1995, is managed by its policy committee. The policy committee is composed of one representative from the Company, Ernest A. Bates, M.D., ASHS's Chairman and CEO, and one representative from Elekta. The policy committee sets the operating policy for GKF. The policy committee may act only with the unanimous approval of both of its members. The policy committee selects a manager to handle GKF's daily operations. Craig K. Tagawa, Chief Executive Officer of GKF and Chief Operating and Financial Officer of ASHS, serves as GKF's manager.

GKF's profits and/or losses and any cash distributions are allocated based on membership interests. GKF's operating agreement requires that it have a cash reserve of at least \$50,000 before cash distributions are made to its members. From inception to December 31, 2009, GKF has distributed \$30,375,000 to the Company and \$7,125,000 to the minority partner.

Image Guided Radiation Therapy Operations

The Company's radiation therapy business currently consists of one Image Guided Radiation Therapy system that began operation in September 2007 at an existing Gamma Knife customer site. Revenue generated under IGRT services accounted for approximately 8% of the Company's total revenue in 2009.

IGRT technology integrates imaging and detection components into a state-of-the-art linear accelerator, allowing clinicians to plan treatment, verify positioning, and deliver treatment with a single device, providing faster, more effective radiation therapy with less damage to healthy tissue. IGRT captures CT, fluoroscopic and x-ray images on a daily basis, creating three-dimensional images that pinpoint the exact size, location and coordinates of tumors. Once tumors are pinpointed, the system delivers ultra-precise doses of radiation which ultimately leads to improved patient outcomes.

Based on the most recently available census information, there are approximately 3,235 linear accelerator based radiation therapy units installed in the United States, of which approximately 1,170 provided IGRT services.

Radiation therapy services were provided through approximately 1,400 hospital based oncology centers and approximately 700 non-hospital based oncology centers.

Additional information on our operations can be found in Item 6 Selected Financial Data, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 1 of our consolidated financial statements beginning on page A-8 of this report.

CUSTOMERS

The Company's current business is the outsourcing of stereotactic radiosurgery services and radiation therapy services. The Company typically provides the equipment, as well as planning, installation, reimbursement and marketing support services. The majority of the Company's customers pay the Company on a fee per use basis. The market for these services primarily consists of major urban medical centers. The business is capital intensive; the total cost of a

Table of Contents

Gamma Knife or IGRT facility usually ranges from \$3 million to \$5.5 million, including equipment, site construction and installation. The Company pays for the equipment and the medical center generally pays for site and installation costs. The following is a listing of the Company's current sites as of March 5, 2010:

Customers (Gamma Knife except as noted)	Original Term of Contract	Year Contract Began	Basis of Payment
Southwest Texas Methodist Hospital San Antonio, Texas	10 years	1998	Fee per use
Yale New Haven Ambulatory Services Corporation New Haven, Connecticut	10 years	1998	Fee per use
Kettering Medical Center Kettering, Ohio	10 years	1999	Revenue sharing
Tufts-New England Medical Center Boston, Massachusetts	10 years	1999	Fee per use
University of Arkansas for Medical Sciences Little Rock, Arkansas	15 years	1999	Revenue sharing
Froedtert Memorial Lutheran Hospital Milwaukee, Wisconsin	10 years	1999	Fee per use
JFK Medical Center Edison, New Jersey	10 years	2000	Fee per use
Sunrise Hospital and Medical Center Las Vegas, Nevada	10 years	2001	Fee per use
Central Mississippi Medical Center Jackson, Mississippi	10 years	2001	Fee per use
OSF Saint Francis Medical Center Peoria, Illinois	10 years	2001	Fee per use
Bayfront Medical Center St. Petersburg, Florida	10 years	2002	Fee per use
Mercy Medical Center Rockville Center, New York	10 years	2002	Fee per use
Baptist Medical Center Jacksonville, Florida	8 years	2003	Revenue Sharing
Albuquerque Regional Medical Center Albuquerque, New Mexico	10 years	2003	Fee per use
Lehigh Valley Hospital	10 years	2004	Fee per use

----------------------------------------------------	----------	------	-------------

Table of Contents

The Company's fee per use agreement is typically for a ten year term. The fixed fee per use reimbursement amount that the Company receives from the customer is based on the Company's cost to provide the service and the anticipated volume of the customer. The Gamma Knife contracts signed by the Company typically call for a fee ranging from \$7,500 to \$9,500 per procedure. There are no minimum volume guarantees required of the customer. Typically, GKF is responsible for providing the Gamma Knife and related ongoing Gamma Knife equipment expenses (i.e., personal property taxes, insurance, and equipment maintenance) and also helps fund the customer's Gamma Knife marketing. The customer generally is obligated to pay site and installation costs and the costs of operating the Gamma Knife. The customer can either renew the agreement or terminate the agreement at the end of the contractual term. If the customer chooses to terminate the agreement, then GKF removes the equipment from the medical center for possible placement at another site.

The Company's revenue sharing agreements (retail) are for a period of eight to fifteen years. Instead of receiving a fixed fee, the Company receives all or a percentage of the reimbursement (exclusive of physician fees) received by the customer. The Company is at risk for any reimbursement rate changes for radiosurgery or radiation therapy services by the government or other third party payors. There are no minimum volume guarantees required of the customer. In 2009, two customers accounted for approximately 14% and 10% each of the Company's total revenue. In 2008, three customers accounted for approximately 14%, 13% and 12% each of the Company's total revenue. In 2007, one customer accounted for approximately 13% of the Company's total revenue.

MARKETING

The Company markets its services through its preferred provider status with Elekta and a direct sales effort. In January 2007, the Company hired a Vice President of Sales and Business Development to lead the direct sales effort. Prior to that, the direct sales effort was generally led by the Company's Chief Executive and Chief Operating Officers, with the assistance of a Director of Sales. The major advantages to a health care provider in contracting with the Company for Gamma Knife services include:

The medical center avoids the high cost of owning the equipment. By not acquiring the Gamma Knife unit or other medical equipment, the medical center is able to allocate the funds otherwise required to purchase and/or finance the Gamma Knife to other projects.

The medical center avoids the risk of equipment under-utilization. The Company does not have minimum volume requirements. The medical center pays the Company only for each procedure performed on a patient.

The medical center transfers the risk of technological obsolescence to the Company. The medical center and its physicians are not under any obligation to utilize technologically obsolete equipment.

Table of Contents

The Company provides planning, installation, operating and marketing assistance and support to its customers.

FINANCING

The Company's IGRT site is owned by ASHS and is financed at approximately 100% of the total project cost, under a loan that fully amortizes over an 84-month period and is fully collateralized by the equipment, the customer contract and accounts receivable.

The Company's Gamma Knife business is operated through GKF. GKF generally funds its Gamma Knife units, upgrades and additions with loans or capital leases from various finance companies for 100% of the cost of each Gamma Knife, plus any sales tax, customs and duties. The financing is predominantly fully amortized over an 84-month period. The financing is collateralized by the Gamma Knife, customer contracts and accounts receivable, and is generally without recourse to the Company and Elekta.

COMPETITION

Conventional neurosurgery and radiation therapy are the primary competitors of Gamma Knife radiosurgery. Gamma Knife radiosurgery has gained acceptance as an alternative and/or adjunct to conventional surgery due to its more favorable morbidity outcomes for certain procedures as well as its non-invasiveness. Utilization of the Company's Gamma Knife units is contingent on the acceptance of Gamma Knife radiosurgery by the customer's neurosurgeons, radiation oncologists and referring physicians. In addition, the utilization of the Company's Gamma Knife units is impacted by the proximity of competing Gamma Knife centers and providers using other radiosurgery devices. The Company's ability to secure additional customers for Gamma Knife services and other radiosurgery and radiation therapy services is dependent on its ability to effectively compete against (i) Elekta, the manufacturer of the Gamma Knife, (ii) manufacturers of other radiosurgery and radiation therapy devices, and (iii) other companies that outsource these services. The Company does not have an exclusive relationship with Elekta or other manufacturers and has previously lost sales to customers that chose to purchase equipment directly from manufacturers. The Company may continue to lose future sales to such customers and may also lose sales to the Company's competitors.

GOVERNMENT PROGRAMS

The Medicare program is administered by the Centers for Medicare and Medicaid Services (CMS) of the U.S. Department of Health and Human Services (DHHS). Medicare is a health insurance program primarily for individuals 65 years of age and older, certain younger people with disabilities, and people with end-stage renal disease, and is provided without regard to income or assets.

The Medicare program is subject to statutory and regulatory changes, administrative rulings, interpretations and determinations, requirements for utilization review, and federal and state funding restrictions, all of which could materially increase or decrease payments from these

Table of Contents

government programs in the future, as well as affect the cost of providing services to patients and the timing of payments to our client hospitals.

The Company's Gamma Knife and radiation therapy customers receive payments for patient care from federal government and private insurer reimbursement programs. Currently in the United States, Gamma Knife services are performed primarily on an out-patient basis. Gamma Knife patients with Medicare as their primary insurer and treated on either an in-patient or out-patient basis, comprise an estimated 20% to 35% of the total Gamma Knife patients treated. Radiation therapy patients with Medicare as their primary insurer are treated primarily on an out-patient basis, and comprise an estimated 35% to 45% of the total radiation therapy patients treated.

A Prospective Payment System (PPS) is utilized to reimburse hospitals for care given to hospital in-patients covered by federally funded reimbursement programs. Patients are classified into a Diagnosis Related Group (DRG) in accordance with the patient's diagnosis, necessary medical procedures and other factors. Patient reimbursement is limited to a predetermined amount for each DRG. The reimbursement payment may not necessarily cover the cost of all medical services actually provided because the payment is predetermined. Effective October 1, 1997, Gamma Knife services for Medicare hospital in-patients are predominantly reimbursed under either DRG 7 or DRG 8. In 1986 and again in 1990, Congress enacted legislation requiring the DHHS to develop proposals for a PPS for Medicare out-patient services. DHHS proposed a new payment system, Ambulatory Payment Classifications (APC), which affects all out-patient services performed in a hospital based facility. APC implementation took place in the third quarter of 2000.

The APC consists of 346 clinically homogenous classifications or groupings of codes that are typically used in out-patient billing. Out-patient services are bundled with fixed rates of payment determined according to specific regional and national factors, similar to that of the in-patient PPS.

The Gamma Knife APC rate is modified periodically but the total reimbursement amount has historically remained fairly constant. Total Gamma Knife reimbursement effective January 1, 2010 based on all commonly used billing codes will have a decrease of approximately 3% (to approximately \$9,136) compared to 2009. This follows a 5% decrease in 2009, a 5% decrease in 2008 and an increase of 24% in 2007, compared to the prior years, respectively. The Company has five Gamma Knife contracts from which its revenue is directly affected by changes in payment rates under the APC system.

IGRT is a relatively new service to radiation oncology. The 2005 through 2007 APC payment rates averaged approximately \$80 for each of five procedure codes. In 2008 DHHS determined that these services are to be packaged into other services. As a result, there are currently no specific outpatient payment rates for IGRT, and reimbursement is made through various packaged codes. However, standard radiation therapy services are reimbursed by CMS and other third party payors.

Table of Contents

With respect to proton beam radiation therapy, for 2010, the CMS PBRT reimbursement rate for Medicare patients receiving hospital based PBRT treatment is expected to increase to rates ranging from approximately \$942 to \$1,233 for each PBRT treatment, or an average increase of approximately 43% over 2009. This increase follows a decrease of approximately 14% in 2009, a decrease of approximately 14% in 2008 and an increase of approximately 20% in 2007, compared to the prior year's reimbursement level, respectively.

We are unable to predict the effect of future government health care funding policy changes on operations. If the rates paid by governmental payers are reduced, if the scope of services covered by governmental payers is limited, or if one or more of our hospital clients are excluded from participation in the Medicare program or any other government health care program, there could be a material adverse effect on our business.

In addition, approval by the FDA is pending with respect to the proton beam radiation therapy systems to be furnished by the Company to certain of its hospital clients. Failure to obtain FDA approval for such proton beam systems may have a material impact on the availability of reimbursement under government programs to the Company's hospital clients.

GOVERNMENT REGULATION

The payment of remuneration to induce the referral of health care business has been a subject of increasing governmental and regulatory focus in recent years. Section 1128B(b) of the Social Security Act (sometimes referred to as the federal anti-kickback statute) provides criminal penalties for individuals or entities that knowingly and willfully offer, pay, solicit or receive remuneration in order to induce referrals for items or services for which payment may be made under the Medicare and Medicaid programs and certain other government funded programs. The Social Security Act provides authority to the Office of Inspector General through civil proceedings to exclude an individual or entity from participation in the Medicare and state health programs if it is determined any such party has violated Section 1128B(b) of the Social Security Act. The Company believes that it is in compliance with the federal anti-kickback statute. Additionally, the Omnibus Budget Reconciliation Act of 1993, often referred to as Stark II, bans physician self-referrals to providers of designated health services with which the physician has a financial relationship. On September 5, 2007, the third and final phase of the Stark regulations (Phase III) was published. The term designated health services includes, among others, radiation therapy services and in-patient and out-patient hospital services. On January 1, 1995, the Physician Ownership and Referral Act of 1993 became effective in California. This legislation prohibits physician self-referrals for covered goods and services, including radiation oncology, if the physician (or the physician's immediate family) concurrently has a financial interest in the entity receiving the referral. The Company believes that it is in compliance with these rules and regulations.

On August 19, 2008, the Centers for Medicare and Medicaid (CMS) published a final rule relating to inpatient hospital services paid under the Inpatient Prospective Payment System for discharges in the Fiscal Year 2009 (the Final Rule). Among other things, the Final Rule prohibits per-click payments to physician lessors for services rendered to patients who were referred by the physician lessor. This prohibition on per-click payments for leased equipment

Table of Contents

used in the treatment of a patient referred to a hospital lessee by a physician lessor applies regardless of whether the physician himself or herself is the lessor or whether the lessor is an entity in which the referring physician has an ownership or investment interest. The effective date of this prohibition was October 1, 2009. The Company does not have transactions of this nature, and therefore, believes that it is in compliance with this Final Rule.

A range of federal civil and criminal laws target false claims and fraudulent billing activities. One of the most significant is the Federal False Claims Act, which prohibits the submission of a false claim or the making of a false record or statement in order to secure a reimbursement from a government-sponsored program. In recent years, the federal government has launched several initiatives aimed at uncovering practices which violate false claims or fraudulent billing laws. Claims under these laws may be brought either by the government or by private individuals on behalf of the government, through a whistleblower or qui tam action. The Company believes that it is in compliance with the Federal False Claims Act; however, because such actions are filed under seal and may remain secret for years, there can be no assurance that the Company or one of its affiliates is not named in a material qui tam action. Legislation in various jurisdictions requires that health facilities obtain a Certificate of Need (CON) prior to making expenditures for medical technology in excess of specified amounts. Four of the Company s existing customers were required to obtain a CON or its equivalent. The CON procedure can be expensive and time consuming and may impact the length of time before Gamma Knife services commence. CON requirements vary from state to state in their application to the operations of both the Company and its customers. In some jurisdictions the Company is required to comply with CON procedures to provide its services and in other jurisdictions customers must comply with CON procedures before using the Company s services.

The Company s Gamma Knife units contain Cobalt 60 radioactive sources. The medical centers that house the Company s Gamma Knife units are responsible for obtaining possession and user s licenses for the Cobalt 60 source from the Nuclear Regulatory Commission.

Standard linear accelerator equipment utilized to treat patients is regulated by the Food and Drug Administration. The licensing is obtained by the individual medical center operating the equipment.

The Company believes it is in substantial compliance with the various rules and regulations that affect its businesses.

INSURANCE AND INDEMNIFICATION

The Company s contracts with equipment vendors generally do not contain indemnification provisions. The Company maintains a comprehensive insurance program covering the value of its property and equipment, subject to deductibles, which the Company believes are reasonable.

The Company s customer contracts generally contain mutual indemnification provisions. The Company maintains general and professional liability insurance. The Company is not involved

Table of Contents

in the practice of medicine and therefore believes its present insurance coverage and indemnification agreements are adequate for its business.

PROTON BEAM RADIATION THERAPY BUSINESS

Proton beam radiation therapy is an alternative to traditional external beam, photon based radiation delivered by linear accelerators. PBRT, first clinically introduced in the 1950s, has physics advantages compared to photon based systems which allow PBRT to deliver higher radiation doses to the tumor with less radiation to healthy tissue. PBRT currently treats prostate, eye, cranial-spinal, head and neck, lung, liver and breast tumors. In excess of 55,000 patients have been treated with protons worldwide.

Introduction of PBRT in the United States, until recently, has been limited due to lack of adequate reimbursement and the high capital costs of these projects. The Company believes that the current development of one and two treatment room PBRT systems at lower capital costs, and the recent implementation of reimbursement rates for PBRT from the CMS will help make this technology available to a larger segment of the market.

There are several competing manufacturers of proton beam systems, including Still River, IBA Particle Therapy Inc., Hitachi Ltd., Optivus Proton Therapy Inc., Varian Medical Systems, Inc. (Accel) and Mitsubishi Electric. The Company has invested in Still River and has made deposits towards the purchase of three of Still River's Monarch250 systems. The Still River system potentially provides cancer centers the opportunity to introduce single treatment room PBRT services with cost in the range of approximately \$20 to \$25 million rather than four and five PBRT treatment room programs costing in excess of \$100 million. The Still River system is not yet FDA approved and there can be no assurance that it will be approved.

The Company believes the business model it has developed for use in its Gamma Knife and radiation therapy businesses can be tailored for the PBRT market segment. The Company is targeting large, hospital based cancer programs. The Company's ability to develop a successful PBRT financing entity depends on the decision of cancer centers to self fund or to fund the PBRT through conventional financing vehicles, the Company's ability to capture market share from competing alternative PBRT financing entities, and the Company's ability to raise capital to fund PBRT projects.

EMPLOYEES

At December 31, 2009, the Company employed twelve (12) people on a full-time basis and two (2) people on a part-time basis. None of these employees is subject to a collective bargaining agreement and there is no union representation within the Company. The Company maintains various employee benefit plans and believes that its employee relations are good.

Table of Contents**EXECUTIVE OFFICERS OF THE COMPANY**

The following table provides current information concerning those persons who serve as executive officers of the Company. The executive officers were appointed by the Board of Directors and serve at the discretion of the Board of Directors.

Name:	Age:	Position:
Ernest A. Bates, M.D.	73	Chairman of the Board of Directors and Chief Executive Officer
Craig K. Tagawa	56	Senior Vice President Chief Operating and Financial Officer
Ernest R. Bates	43	Vice President of Sales and Business Development

Ernest A. Bates, M.D., founder of the Company, has served in the positions listed above since the incorporation of the Company. A board-certified neurosurgeon, Dr. Bates is Emeritus Vice Chairman of the Board of Trustees of the John Hopkins University and serves on the Board of Visitors of the John Hopkins Medical Center and the John Hopkins Neurosurgery Advisory Board. He serves on the boards of the University of Rochester, FasterCures and the Salzburg Global Seminar. Dr. Bates was appointed to the California Commission for Jobs and Economic Growth and the Magistrate Judge Merit Selection Panel. From 1981-1987 he was a member of the Board of Governors of the California Community Colleges, and he served on the California High Speed Rail Authority from 1997 to 2003. Dr. Bates is a member of the Board of Overseers at the University of California, San Francisco, School of Nursing. He is a trustee of the Museum of the African Diaspora and a member of the Brookings and Milken Institutes. Dr. Bates is a partner in Black Coyote Wines. He is a graduate of the School of Arts and Sciences of the John Hopkins University, and he earned his medical degree at the University of Rochester School of Medicine and Dentistry.

Craig K. Tagawa has served as Chief Operating Officer since February 1999 in addition to serving as Chief Financial Officer since May 1996. Mr. Tagawa also served as Chief Financial Officer from January 1992 through October 1995. Previously a Vice President in such capacity, Mr. Tagawa became a Senior Vice President on February 28, 1993. He is also the Chief Executive Officer of GKF. From September 1988 through January 1992, Mr. Tagawa served in various positions with the Company. He is a former Chair of the Industrial Policy Advisory Committee of the Engineering Research Center for Computer-Integrated Surgical Systems and Technology at The Johns Hopkins University. He received his Undergraduate degree from the University of California at Berkeley and his M.B.A from Cornell University.

Ernest R. Bates joined the Company in January 2007 as Vice President of Sales and Business Development. He was on the board of directors of the Company from 2004 through February 2007. Prior to joining the Company, he had been Managing Director, Institutional Fixed Income Sales of HSBC Securities (USA), Inc. since 2003. Mr. Bates has also served as Managing

Table of Contents

Director, Head of Asian Product for HSBC Securities (USA) Inc. from 1999 to 2003. From 1993 through 1999, Mr. Bates held various positions with Merrill Lynch, last serving as Vice President, European Syndicate for Merrill Lynch International. He received his undergraduate degree from Brown University and a M.B.A. degree from The Wharton Business School. Ernest R. Bates is the son of Chairman of the Board and Chief Executive Officer Dr. Ernest A. Bates.

AVAILABLE INFORMATION

Our Internet address is www.ashs.com. We make available free of charge through our Internet website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (Exchange Act) as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The information contained on our Internet website is not part of this document.

ITEM 1A.

RISK FACTORS

In addition to the other information in this report, the following factors could affect our future business, results of operations, cash flows or financial position, and could cause future results to differ materially from those expressed in any of the forward-looking statements contained in this report.

The Company's Capital Investment at Each Site is Substantial

Each radiosurgical or radiation therapy device requires a substantial capital investment. In some cases, we contribute additional funds for capital costs and/or annual operating and equipment related costs such as marketing, maintenance, insurance and property taxes. Due to the structure of our contracts with medical centers, there can be no assurance that these costs will be fully recovered or that we will earn a satisfactory return on our investment.

The Market for the Gamma Knife is Limited

There is a limited market for the Gamma Knife, and the market may be mature. The Company has entered into only one Gamma Knife contract at a new site since 2004. Due to the substantial costs of acquiring a Gamma Knife unit, we must identify medical centers that possess neurosurgery and radiation oncology departments capable of performing a large number of Gamma Knife procedures. As of December 31, 2009, there were approximately 108 operating Gamma Knife units in the United States, of which 19 units were owned by us, and approximately 271 units in operation worldwide. There can be no assurance that we will be successful in placing additional units at any sites in the future. The Company's existing contracts with its customers are fixed in length and there can be no assurance that the customers will wish to extend the contract beyond the end of the term.

The Company Has a High Level of Debt

The Company's business is capital intensive. The Company finances its IGRT system through ASHS and its Gamma Knife units through its GKF subsidiary. The amounts financed through

Table of Contents

GKF have been generally non-recourse to ASHS. The Company's combined long term debt and present value of capital leases totals \$25,774,000 as of December 31, 2009 and is collateralized by the Gamma Knife and IGRT equipment and other assets, including accounts receivable and future proceeds from any contract between the Company and any end user of the financed equipment. This high level of debt may adversely affect the Company's ability to secure additional credit in the future, and as a result may affect operations and profitability. If default on debt occurs in the future, the Company's creditors would have the ability to accelerate the defaulted loan, to seize the Gamma Knife unit or other equipment with respect to which default has occurred, and to apply any collateral they may have at the time to cure the default. The Company also has a line of credit with a bank, against which it has drawn \$7,900,000 as of December 31, 2009.

The Market is Competitive

The Company estimates that there are three other companies that actively provide alternative, non-conventional Gamma Knife financing to potential customers. We believe there are no competitor companies that currently have more than six Gamma Knife units in operation. The Company's relationship with Elekta, the manufacturer of the Leksell Gamma Knife unit, is non-exclusive, and in the past the Company has lost sales to customers that chose to purchase a Gamma Knife unit directly from Elekta. In addition, the Company may continue to lose future sales to such customers and may also lose future sales to its competitors. There can be no assurance that the Company will be able to successfully compete against others in placing future units.

There Are Alternatives to the Gamma Knife

There are other radiosurgery devices as well as conventional neurosurgery that compete against the Gamma Knife. Each of the medical centers targeted by the Company could decide to acquire another radiosurgery device instead of a Gamma Knife. In addition, neurosurgeons who are primarily responsible for referring patients for Gamma Knife surgery may not be willing to make such referrals for various reasons, instead opting for invasive surgery. There can be no assurance that the Company will be able to secure a sufficient number of future sites or Gamma Knife procedures to sustain its profitability and growth.

The Company's Revenue Could Decline if Federal Reimbursement Rates are Lowered

The amount reimbursed to medical centers for each Gamma Knife or radiation therapy treatment may decline in the future. The reimbursement decrease may come from federally mandated programs (i.e., Medicare and Medicaid) or other third party payor groups. Fourteen of the Company's twenty existing contracts are reimbursed by the medical center to the Company on a fee per use basis. The primary risk under this type of contract is that the actual volume of procedures could be less than projected. However, a significant reimbursement rate reduction may result in the Company restructuring certain of its existing contracts. There are also six contracts where the Company receives revenue based directly on the amount of reimbursement received for procedures performed. Revenue under those contracts and any future contracts with revenue based directly on reimbursement amounts will be impacted by any reimbursement rate change. Some of the Company's future contracts for Gamma Knife services may have revenue based on such reimbursement rates instead of a fee per use basis. There can be no assurance that

Table of Contents

future changes in healthcare regulations and reimbursement rates will not directly or indirectly adversely affect the Company's Gamma Knife revenue.

New Technology and Products Could Result in Equipment Obsolescence

There is constant change and innovation in the market for highly sophisticated medical equipment. New and improved medical equipment can be introduced that could make the Gamma Knife technology obsolete and that would make it uneconomical to operate. During 2000, Elekta introduced an upgraded Gamma Knife which cost approximately \$3.6 million plus applicable tax and duties. This upgrade includes an Automatic Positioning System (APS), and therefore involves less health care provider intervention. In early 2005, Elekta introduced a new upgrade, the Gamma Knife Model 4C (Model 4C). The cost to upgrade existing units to the Model 4C with APS is estimated to be approximately \$200,000 to \$1,000,000, depending on the current Gamma Knife configuration. In 2006 Elekta introduced a new model of the Gamma Knife, the Perfexion, which costs approximately \$4.5 million plus applicable taxes and duties. The Perfexion can perform procedures faster than previous Gamma Knife models and it provides the additional ability to perform procedures on areas of the cervical spine. Existing models of the Gamma Knife are not upgradeable to the Perfexion model. As of December 31, 2009, five of the Company's Gamma Knife units are Perfexion models; of the Company's remaining Gamma Knife units, six are Model 4C with APS and eight are upgradeable to more advanced Model 4C units. The failure to acquire or use new technology and products could have a material adverse effect on our business and results of operations.

In addition, there are constant advances made in radiation therapy equipment. The Company purchased an IGRT system in 2006 with a list price of approximately \$8,300,000. New and improved medical equipment can be introduced that could make the existing technology obsolete and that would make it uneconomical to operate.

The Company has Invested in a Proton Beam Business that is Developmental and Unproven

We have committed a substantial amount of our financial resources to next-generation proton beam technology. The PBRT system being developed by Still River is not commercially proven and cannot be reimbursed by most major insurers prior to FDA approval, which may not be obtained. Prior to that time, we must make progress payments of \$6,500,000 for three Monarch250 systems (the Company has already made deposits of \$2,250,000 towards this commitment). There can be no assurance that we will recover this investment or future investments, or our \$2,617,000 minority investment in Still River. Our current belief is that we will begin to receive revenue for PBRT systems placed and financed by us during 2012, assuming FDA approval is obtained.

ITEM 2.

PROPERTIES

The Company's corporate offices are located at Four Embarcadero Center, Suite 3700, San Francisco, California, where it leases approximately 4,600 square feet for \$23,195 per month. This lease expires in May 2011. A portion of the office space is subleased on a month-to-month

Table of Contents

basis to two third parties for approximately \$1,000 per month. The Company also leases an apartment for \$3,400 per month in San Francisco for use by corporate officers, board members and business guests. The lease is an annual renewable lease with a renewal date of September 2010.

For the year ended December 31, 2009 the Company's aggregate net rental expenses for all properties and equipment were approximately \$437,000.

ITEM 3.

LEGAL PROCEEDINGS

There are no material pending legal proceedings involving the Company or any of its property. The Company knows of no legal or administrative proceedings against the Company contemplated by governmental authorities.

ITEM 4. REMOVED AND RESERVED

Table of Contents**PART II****ITEM 5.****MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS****Market Information and Dividend Policy**

The Company's common shares, no par value (the Common Shares), are currently traded on the NYSE Amex Exchange. At December 31, 2009, the Company had 4,595,070 issued and outstanding common shares, 598,930 common shares reserved for options and 2,000 restricted stock units issued.

The following table sets forth the high and low closing sale prices of the Common Shares of the Company on the NYSE Amex Exchange for each full quarter for the last two fiscal years.

Quarter Ending	Prices for Common Shares	
	High	Low
March 31, 2008	\$ 2.80	\$ 1.71
June 30, 2008	\$ 2.87	\$ 2.05
September 30, 2008	\$ 2.80	\$ 1.85
December 31, 2008	\$ 2.00	\$ 1.01
March 31, 2009	\$ 2.18	\$ 1.00
June 30, 2009	\$ 2.47	\$ 1.84
September 30, 2009	\$ 3.00	\$ 1.85
December 31, 2009	\$ 3.70	\$ 2.50

The Company estimates that there were approximately 2,500 beneficial holders of its Common Shares at December 31, 2009.

There were no dividends declared or paid during 2009 or 2008. Dividends had been paid by the Company from 2001 to 2007, but during 2007 the Board of Directors suspended dividends for the purpose of preserving cash for the development of its PBRT business. The Company did not pay cash dividends prior to 2001.

Stock Repurchase Program

In 1999 and 2001, the Board of Directors approved resolutions authorizing the Company to repurchase up to a total of 1,000,000 shares of its own stock on the open market from time to time at prevailing prices, and in 2008 the Board reaffirmed these authorizations. In 2009 and

Table of Contents

2008, the Company repurchased approximately 119,000 and 316,000 shares of its stock, respectively. Prior to 2008, there were no shares repurchased on the open market since the year ended December 31, 2001. A total of approximately 919,000 shares have been repurchased in the open market pursuant to these authorizations at a cost of approximately \$1,927,000. As of December 31, 2009 there are approximately 81,000 shares remaining under the repurchase authorizations. There were no shares repurchased by the Company during the fourth quarter of 2009.

Shareholder Rights Plan

On March 22, 1999, the Company adopted a Shareholder Rights Plan (Plan). Under the Plan, the Company made a dividend distribution of one Right for each outstanding share of the Company s common stock as of the close of business on April 1, 1999. The Rights become exercisable only if any person or group, with certain exceptions, becomes an acquiring person (acquires 15 percent or more of the Company s outstanding common stock) or announces a tender or exchange offer to acquire 15 percent or more of the Company s outstanding common stock. The Company s Board of Directors adopted the Plan to protect shareholders against a coercive or inadequate takeover offer. On March 12, 2009, the Board of Directors of the Company approved the First Amendment to its existing shareholder rights plan which, among other things, extends the final expiration date on which the Rights are exercisable until the close of business on April 1, 2019.

Equity Compensation Plans

During 2009 no holders of options to acquire the Company s common stock exercised their respective rights pursuant to such securities; however, 1,500 new shares of common stock were issued to the Company s Board of Directors from stock grants that vested in 2009.

Additional information regarding our equity compensation plans is incorporated herein by reference from the 2009 Proxy Statement. Also, see Note 9-Shareholders Equity to the Consolidated Financial Statements.

Performance Graph, Total Return to Shareholders

The following graph and table compares cumulative total shareholder return on the Company s Common Shares with the cumulative total return of the Standard & Poor s 500 Stock Index (S&P500) and with the Standard & Poor s SmallCap 600 Stock Index (S&P SmallCap600), in each case during the five years ended December 31, 2009.

See accompanying note (1)

(1) In October 1995, the Company entered into an operating agreement granting to American Shared Radiosurgery Services (a California corporation and a wholly-owned subsidiary of the Company) an 81% ownership interest in GKF. ASHS incorporated a new wholly-owned subsidiary, OR21, Inc. in November 1999, and a new wholly-owned subsidiary, MedLeader.com, Inc. (MedLeader) in April 2000. Accordingly, the financial data for

Table of Contents

the Company

include the
results of GKF,
OR21 and
MedLeader for
2005 through
2009.

This financial data as of December 31, 2009, 2008 and 2007 and for the years ended December 31, 2009, 2008 and 2007 should be read in conjunction with our consolidated financial statements and the notes thereto beginning on page A-1 of this report and with Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 7.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

APPLICATION OF CRITICAL ACCOUNTING POLICIES

The Company's consolidated financial statements are prepared in accordance with generally accepted accounting principles and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques.

The most significant accounting policies followed by the Company are presented in Note 2 to the consolidated financial statements. These policies along with the disclosures presented in the other financial statement notes and in this discussion and analysis, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts, and the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for doubtful accounts, revenue recognition and the carrying value of its Still River investment to be three areas that required the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available. The following are our critical accounting policies in which management's

Table of Contents

estimates, assumptions and judgments most directly and materially affect the financial statements:

Revenue Recognition

The Company has one revenue-generating activity, which consists of equipment leasing to hospitals, and includes the operation of Gamma Knife units by GKF and the operation of an IGRT site by ASHS.

Revenue is recognized when services have been rendered and collectability is reasonably assured, on either a fee per use or revenue sharing basis. The Company has contracts with fourteen fee per use hospitals and six retail hospitals.

Under both of these types of agreements, the hospital is responsible for billing patients and collection of fees for services performed. Revenue associated with installation of the Gamma Knife and IGRT units, if any, is a part of the negotiated lease amount and not a distinctly identifiable amount. The costs, if any, associated with installation of the units are amortized over the period of the related lease to match revenue recognition of these costs.

For fee per use agreements, revenue is not estimated because these contracts provide for a fixed fee per procedure, and are typically for a ten year term. Revenue is recognized at the time the procedures are performed, based on each hospital's contracted rate. There is no guaranteed minimum payment. Costs related to operating the units are charged to costs of operations as incurred, which approximates the recognition of the related revenue. Revenue under fee per use agreements is recorded on a gross basis.

ASHS has one agreement and GKF has five agreements that are based on revenue sharing. These can be further classified as either turn-key arrangements or revenue sharing arrangements. For GKF's four turn-key sites, GKF is solely responsible for the costs to acquire and install the Gamma Knife. In return, GKF receives payment from the hospital in the amount of its reimbursement from third party payors. Revenue is recognized by the Company during the period in which the procedure is performed, and is estimated based on what can be reasonably expected to be paid by the third party payor to the hospital. The estimate is primarily determined from historical experience and hospital contracts with third party payors. These estimates are reviewed on a regular basis and adjusted as necessary to more accurately reflect the expected payment amount. The Company also records an estimate of operating costs associated with each procedure during the period in which the procedure is performed. Costs are determined primarily based on historical treatment protocols and cost schedules with the hospital. The Company's estimated operating costs are reviewed on a regular basis and adjusted as necessary to more accurately reflect the actual operating costs. Revenue for turn-key sites is recorded on a gross basis, and the operating expenses the Company reimburses to the hospital are recorded in other operating costs.

Under revenue sharing arrangements the hospital shares in the responsibility and risk with the Company for the capital investment to acquire and install the equipment. Unlike our turn-key arrangement, the lease payment under a revenue sharing arrangement is a percentage of revenue. Payments are made by the hospital, generally on a monthly basis, to the Company based on an agreed upon percentage allocation of cash collected. Revenue is recognized during the period in

Table of Contents

which procedures are performed, and is estimated based on the reimbursement amount that the Company expects to receive from the hospital for those procedures. This estimate is reviewed on a regular basis and adjusted as necessary to more accurately reflect the expected payment amount. Revenue from revenue sharing sites is recorded on a gross basis.

Revenue from retail arrangements amounted to approximately 35%, 42% and 32% of revenue for the years ended December 31, 2009, 2008 and 2007, respectively.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is estimated based on possible losses relating to the Company's revenue sharing customers. The Company receives reimbursement from the customer based on the customer's collections from individuals and third-party payors such as insurance companies and Medicare. Receivables are charged against the allowance in the period that they are deemed uncollectible.

If the Company's net accounts receivable estimates for revenue sharing customers as of December 31, 2009 changed by as much as 10% based on actual collection information, it would have the effect of increasing or decreasing revenue by approximately \$220,000.

Impairment Evaluation of Still River

The Company carries its investment in Still River at cost and reviews it for impairment on a quarterly basis, or as events or circumstances might indicate that the carrying value of the investment may not be recoverable. The Company evaluated this investment for impairment at December 31, 2009 in light of both current market conditions and the ongoing needs of Still River to raise cash to continue its development of the first compact, single room PBRT system. During the first quarter of 2009, Still River proposed a Series D round of financing to raise cash, which it was able to do, but at a per share price lower than the Company's cost basis investment. The Company calculated that, based on the Series D funding, there is an unrealized loss of approximately \$1.2 million compared to the Company's cost of its investment. However, based on its analysis, the Company believes that this investment is only temporarily impaired. It is the Company's intent to hold this investment for a reasonable period of time sufficient for a recovery of the investment's fair value; therefore the Company does not consider that this investment to be other-than-temporarily impaired at December 31, 2009, based in part on the following:

Still River's single room PBRT concept and design, although a departure from the large scale three and four room PBRT systems on the market, is based on the existing principle of generating protons from a cyclotron. Still River, through design innovations and advances in magnet technology, has made the cyclotron more compact such that it can be mounted on the gantry.

A gantry mounted cyclotron, although appearing to be revolutionary, has in fact been done previously. A neutron generating gantry mounted cyclotron has successfully treated patients for over ten years at one medical center in the United States.

Still River's development approach for the Monarch250 has been to integrate as many commercially existing components as possible into the Monarch250. The patient couch, CT imaging and treatment planning software are all commercially available and will be integrated into the Monarch250.

Table of Contents

Still River has hired engineers and staff with many years of accelerator and proton beam experience, including personnel with prior experience at MIT's Plasma Fusion Lab and one of Still River's proton beam competitors.

Still River has built the first three units of the magnet and other cyclotron subsystems, has completed the manufacture/assembly of the gantry system, and demonstrated integrated software control of all cyclotron operations on the prototype unit, with installation of the prototype unit projected to be finalized in late 2010 or early 2011.

Still River has recently completed and passed the cold mass test on the prototype unit, which is considered a major milestone and an integral part of the process towards gaining FDA approval.

Still River is currently in the beam extraction test phase, and projects that the beam extraction test will be completed in second quarter 2010.

A respected physicist was hired by the Company as a third party consultant to perform a technical review of this project. His discussions with Still River's chief technology officer indicated that the delays encountered have at times resulted in modifications being required, but the modifications were not significant, and he believes that development of the PBRT machine will be completed in 2010. The consultant was not engaged to analyze Still River's financial condition.

There were some minor problems during some of the tests that were quickly rectified, but have caused delays in the scheduled delivery of the first unit. As a result, the Company's expected delivery of its two units has also been delayed. However, minor problems such as these are expected in a new technology, and do not affect the Company's position on the viability of Still River technology.

In spite of the uncertain economic climate and a limited number of potential investors, with the Series D offering, Still River was still able to raise the cash required to continue its operations, and were able to add two new major investors.

Based on ongoing discussions with Still River management and regular review of their financial statements and cash flow projections, the Company believes that Still River will have adequate cash flow to continue development of the system. Still River, as a development stage company manufacturing its first product, continuously analyzes its cash requirements. Due to the high level of interest in more compact and lower cost proton beam radiation therapy devices, Still River has been able to attract funding from financially significant and highly sophisticated investors, such as Caxton Health and Life Sciences, Venrock Associates and CHL Medical Partners. Still River is prepared, as required, to raise additional funds as its needs dictates.

Still River recently added a new CEO, strengthening its management depth, and with the new investors, increased its board strength as well. Independent board members consist of the following: Robert Wilson, Former Vice Chairman of Johnson and Johnson; Peter P. D'Angelo, President, Caxton Associates; Dr. Anders Hove, MD, Partner, Venrock Associates; Dr. Myles D. Greenberg, MD, General Partner, CHL Medical Partners; Dr. Jay Rao, MD, JD, Portfolio Manager, Green Arrow Capital Management; and Mr. Paul Volcker, Former Chairman, United States Federal Reserve.

Still River currently has 15 sites under contract to install the Monarch250 system.

Table of Contents

Once FDA approval is obtained, the per share investment in Still River will likely increase to a level much higher than the Company's existing carrying value (cost). The estimated recovery period is anticipated to occur subsequent to the first system's clinical treatment of patients, which would shortly follow obtaining FDA approval. The treatment of patients is anticipated to begin in the first half of 2011. The Company has the intent and the ability to maintain its investment in Still River until at least these milestones are met.

GENERAL

For the year ended December 31, 2009, 92% of the Company's revenue was derived from its Gamma Knife business, and 8% from its IGRT business. For the year ended December 31, 2008, 93% of the Company's revenue was derived from its Gamma Knife business, and the remaining 7% from its IGRT business.

TOTAL REVENUE

(in thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Medical services revenue	\$ 16,768	(12.2%)	\$ 19,099	(15.6%)	\$ 22,622

Total revenue decreased 12.2% in 2009 compared to 2008, primarily due to a decline in Gamma Knife procedures of approximately 4.5%, which resulted in a decrease of Gamma Knife revenue of approximately 12.5%. Total revenue decreased 15.6% in 2008 compared to 2007, primarily due to a 1.7% decrease in medical services revenue, and no equipment sales revenue in 2008 compared to \$3,200,000 of equipment sales revenue in 2007.

Gamma Knife Revenue

Total Gamma Knife revenue for 2009 decreased by 12.5% to \$15,505,000 compared to \$17,713,000 in 2008. Total Gamma Knife revenue for 2008 decreased 19.7% to \$17,713,000 compared to \$22,056,000 in 2007. Revenue from equipment sales of \$3,200,000 in 2007 is not considered medical services revenue, and is not included in the table below.

	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Medical services revenue from Gamma Knife (in thousands)	\$ 15,505	(12.5%)	\$ 17,713	(6.1%)	\$ 18,856
Number of Gamma Knife procedures	1,785	(4.5%)	1,869	(20.0%)	2,335
Average revenue per procedure	\$ 8,692	(8.3%)	\$ 9,477	17.4%	\$ 8,075

Table of Contents

Medical services revenue from Gamma Knife operations decreased \$2,208,000 in 2009 compared to 2008 and decreased \$1,143,000 in 2008 compared to 2007. The decrease in 2009 compared to 2008 was primarily due to low volume for the year at one Gamma Knife site, physician turnover at another Gamma Knife site that resulted in no procedures being performed for the last two quarters of 2009, and lower per procedure collections at one of the Company's retail sites. In addition, three sites were out of service for several weeks each for upgrades to Perfexion and Model 4C units. The 2008 decrease compared to 2007 was primarily due to a reduction in the total number of Gamma Knife units the Company had in operation during the year. One contract terminated at the end of third quarter 2007 and another in early 2008 at the end of their respective contract terms. Another contract terminated at the end of the first quarter of 2008 when the customer chose to exercise a buyout provision in its contract. There were also two existing sites that were out of service for extended periods of time for upgrades to Perfexion units and one site for cobalt reload. These reductions were partially offset by the inclusion of a new Gamma Knife site that began operation in the third quarter of 2008, and a 7% increase in revenue at Gamma Knife sites in operation more than one year. The Company had nineteen, nineteen and twenty Gamma Knife units in operation at December 31, 2009, 2008 and 2007, respectively.

The number of Gamma Knife procedures in 2009 decreased by 84 compared to 2008 primarily due to low volume at one Gamma Knife site because a competing technology was installed at the site. In addition, physician turnover at another site resulted in no procedures being performed there for the last two quarters of 2009. Excluding these two sites, Gamma Knife procedures at sites in operation more than one year were approximately the same as in 2008. The number of Gamma Knife procedures in 2008 decreased by 466 compared to 2007 primarily due to a reduction in the number of Gamma Knife units the Company had in operation during the year, partially offset by a 1% increase in procedures performed at units in operation more than one year.

Revenue per procedure decreased by \$785 in 2009 and increased by \$1,402 in 2008 compared to the prior years, respectively. This decrease in 2009 was primarily due to lower volumes at the two retail sites discussed above, which have higher than average rates per procedure. In addition, the Company's contracts generally have different procedure rates because their investment basis varies, so revenue per procedure can vary year to year depending primarily on the mix of procedures performed at certain locations. For 2008, in addition to this normal variation in the procedure mix, the decrease was also due to the termination of a Gamma Knife contract in late 2007 and two more in early 2008, all of which had lower than average per procedure rates.

IGRT Revenue

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Medical services revenue from IGRT	\$ 1,263	(8.9%)	\$ 1,386	144.9%	\$ 566

Table of Contents

Revenue from the Company's contract for IGRT services decreased by \$123,000 in 2009 and increased by \$820,000 in 2008 compared to the prior years, respectively. The decrease in 2009 was due to generally lower volume at the Company's IGRT site. The increase in 2008 was due to the full year operation of the equipment, which began operation in September 2007.

COSTS OF REVENUE

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Total costs of revenue	\$ 9,781	(10.1%)	\$ 10,877	(18.5%)	\$ 13,354
Percentage of total revenue	58.3%		57.0%		59.0%

The Company's costs of revenue, consisting of cost of equipment sales, maintenance and supplies, depreciation and amortization, and other operating expenses (such as insurance, property taxes, sales taxes, marketing costs and operating costs from the Company's retail sites) decreased \$1,096,000 in 2009 compared to 2008, and decreased \$2,477,000 in 2008 compared to 2007. Costs of revenue in 2007 included \$3,394,000 in cost of equipment sales, compared to no cost in 2009 and 2008. Cost of equipment sales is specific to equipment sales revenue, and represents approximately 15% of total revenue in 2007.

The Company's maintenance and supplies costs were 9% of total revenue in 2009 and 6% of total revenue in each of the years 2008 and 2007. Maintenance and supplies costs increased \$266,000 in 2009 compared to 2008 and decreased \$121,000 in 2008 compared to 2007. The increase in 2009 compared to 2008 is primarily the result of maintenance contract expense that began for three sites that had been under warranty due to Perfexion upgrades that occurred in late 2007 and 2008. Partially offsetting this was the discontinuance of maintenance expense at one existing customer site that was upgraded to a Perfexion model in 2009 and two other sites that were upgraded to Model 4C units, and were under warranty during much of the year. The decrease in 2008 compared to 2007 was primarily due to the discontinuance of maintenance contract expense at three sites whose contracts ended, and at the three sites where Perfexion upgrades were installed in late 2007 and 2008 and the equipment was under warranty. Depreciation and amortization decreased \$211,000 in 2009 compared to 2008, and increased \$596,000 in 2008 compared to 2007. The decrease in 2009 was primarily due to depreciation being stopped for periods of time at three sites while they were being upgraded to Model 4C or Perfexion units. Depreciation also ended at another site whose contract was nearing its end, and its net book value had reached its salvage value. The increase in 2008 was primarily due to the replacement of two Gamma Knife units with Perfexion units in the first and second quarters of 2008 and the cobalt reload of another unit in the first quarter of 2008. It was also due to the full year inclusion of depreciation on an IGRT system that began operation in the third quarter of 2007, a cobalt reload of a Gamma Knife unit that occurred in the third quarter of 2007, and a Perfexion unit that began operation in the fourth quarter of 2007. These increases were partially offset by depreciation ending at three sites whose contracts ended in the third and fourth quarters 2007, and the first quarter 2008.

Table of Contents

Other direct operating costs as a percentage of medical services revenue were 12%, 16% and 12% in 2009, 2008 and 2007, respectively. The decrease of \$1,151,000 in 2009 compared to 2008 was primarily due to lower operating costs at the Company's turn-key sites because of lower revenue generated at those sites. It was also due to reduced site marketing and promotion costs and lower insurance costs. The increase of \$442,000 in 2008 compared to 2007 was primarily due to higher site marketing and promotion costs, property tax expense, and operating costs at one of the turn-key sites.

SELLING AND ADMINISTRATIVE EXPENSE

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Selling and administrative costs	\$3,928	(9.1%)	\$4,323	(7.0%)	\$4,646
Percentage of revenue	23.4%		22.6%		20.5%
Transaction costs	\$ 342	n/a	\$ 0	n/a	\$ 0
Percentage of revenue	2.0%		n/a		n/a

The Company's selling and administrative costs decreased \$395,000 in 2009 compared to 2008, and decreased \$323,000 in 2008 compared to 2007. The decrease in 2009 was primarily due to lower payroll costs of approximately \$157,000, travel and other business development costs of approximately \$150,000, investor relations costs of approximately \$67,000, and lower contributions and other fees, partially offset by increased rent expense. The decrease in 2008 compared to 2007 was primarily due to reduced business development costs of approximately \$73,000, consulting and other fees of approximately \$161,000 and legal and accounting fees of approximately \$44,000.

Transaction costs were \$342,000 in 2009 compared to \$0 in both 2008 and 2007. As previously disclosed, the Company had engaged in discussions with two parties concerning the possible sale of its 81% interest in GKF, with one of the parties providing indicative pricing for the interest that would be attractive to the Company if it were to sell its interest in GKF. Accordingly, the Company permitted the prospective acquirer to conduct a due diligence review of GKF and the parties engaged in preliminary negotiations of the terms of a transaction. In May 2009, the Company announced that the parties failed to reach an agreement and that the negotiations had terminated. Under applicable accounting rules, the Company is required to expense the legal, accounting, investment banking and other costs incurred for these activities.

INTEREST EXPENSE

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Interest expense	\$2,064	(15.3%)	\$2,437	25.2%	\$1,946
Percentage of revenue	12.3%		12.8%		8.6%

Table of Contents

The Company's interest expense decreased \$373,000 in 2009 compared to 2008, and increased \$491,000 in 2008 compared to 2007. The decrease in 2009 compared to 2008 was primarily due to lower interest expense on financing for the Company's more mature Gamma Knife units, and the payment of cash for deposits and upgrades that the Company had historically financed. Interest expense on financing is lower over time as payments reduce the principal amount outstanding. This reduction was partially offset by new financing obtained on one Perfexion unit and one Model 4C upgrade during 2009. The increase in 2008 was primarily due to additional interest expense from financing obtained during 2008 for the Company's two new Perfexion units and for the cobalt reload on a Gamma Knife unit, and the full year inclusion of interest expense on the financing in 2007 of a Perfexion unit and the IGRT system. This increase was partially offset by lower interest expense on borrowing under the Company's line of credit with a bank.

OTHER INCOME

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Other income	\$ 60	(85.1%)	\$404	23.2%	\$328

Percentage of revenue	0.4%		2.1%		1.4%
-----------------------	------	--	------	--	------

Other income decreased \$344,000 in 2009 compared to 2008 and increased \$76,000 in 2008 compared to 2007. The decrease in 2009 was primarily due to lower interest income because of lower interest rates available on invested cash in 2009 compared to 2008. In addition there was a cost of approximately \$20,000 in 2009 for early extinguishment of debt, and no gain on sale of assets compared to a \$60,000 gain in 2008. The increase in 2008 compared to 2007 was primarily due to a gain on sale of assets of approximately \$60,000, compared to a loss on disposal of assets of \$186,000 in the prior year. Investment interest income was approximately \$170,000 lower in 2008 than in the prior year because of lower interest rates available on invested cash.

INCOME TAX EXPENSE

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Income tax expense	\$ 247	(53.7%)	\$ 534	(41.9%)	\$ 919

Percentage of revenue	1.5%		2.8%		4.1%
-----------------------	------	--	------	--	------

Percentage of income before income taxes	34.6%		28.6%		30.1%
------------------------------------------	-------	--	-------	--	-------

Income tax expense decreased \$287,000 in 2009 compared to 2008, and decreased \$385,000 in 2008 compared to 2007. Lower income before income taxes in 2009 of \$713,000 compared to

Table of Contents

\$1,866,000 in 2008 is the primary reason for lower income tax expense in 2009 compared to the prior year. Income tax as a percentage of net income before income taxes increased to 34.6% compared to 28.6% in 2008. This is primarily the result of state income taxes calculated at the Company's profitable operating subsidiary, where in many states, separate state income tax returns are required and net operating loss carryforwards cannot be applied. This resulted in a higher effective income tax rate at the consolidated level. The Company's income tax expense decreased to 28.6% of income before income taxes in 2008 compared to 30.1% in 2007 primarily because of reduced income before income taxes of \$1,866,000 in 2008 compared to \$3,004,000 in 2007.

The Company anticipates that it will continue to record income tax expense if it operates profitably in the future. Currently there are state income tax payments required for most states in which the Company operates. However there are minimal current federal income tax payments required due to net operating loss carryforwards and other deferred tax assets available for tax purposes.

The Company had a net operating loss carryforward for federal income tax return purposes at December 31, 2009 of approximately \$9,695,000.

NET INCOME ATTRIBUTABLE TO NON-CONTROLLING INTEREST

(In thousands)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Net income attributable to non-controlling interest	\$654	23.5%	\$855	24.6%	\$1,134
Percentage of revenue	3.9%		4.5%		5.0%

Net income attributable to non-controlling interest decreased \$201,000 in 2009 and decreased \$279,000 in 2008 compared to the prior year, respectively. Net income attributable to non-controlling interest represents the pre-tax income earned by the minority partner's 19% interest in GKF. The decrease or increase in net income attributable to non-controlling interest reflects the relative profitability of GKF.

NET (LOSS) INCOME ATTRIBUTABLE TO AMERICAN SHARED HOSPITAL SERVICES

(In thousands, except per share amounts)	2009	Increase (Decrease)	2008	Increase (Decrease)	2007
Net (loss) income attributable to ASHS	\$ (188)	(139.4%)	\$ 477	(49.8%)	\$ 951
Net (loss) income per share attributable to ASHS, diluted	\$(0.04)	(140.0%)	\$0.10	(47.4%)	\$0.19

Table of Contents

A net loss was attributable to American Shared Hospital Services in 2009 of \$188,000 compared to income of \$477,000 in 2008 and \$951,000 in 2007. The net loss attributable to American Shared Hospital Services for 2009 was \$665,000 less than the net income attributable to American Shared Hospital Services in 2008. This was primarily because of reduced medical services revenue at two of the Company's Gamma Knife sites, a reduction of interest and other income of \$344,000, and transaction costs in 2009 of \$342,000. This was partially offset by a reduction in selling and administrative costs, depreciation expense, and other direct operating costs, particularly marketing costs and operating costs at the Company's turn-key sites. Net income in 2008 was lower than 2007 primarily because of reduced medical services revenue from the loss of two Gamma Knife contracts in 2008 and one in late 2007, which was partially offset by the addition of one new Gamma Knife contract in 2008 and the full year inclusion of revenue from the IGRT contract that started in 2007. Net income was also reduced because of higher depreciation and interest expense from the upgrade of equipment and financing on this equipment at three existing customer sites in late 2007 and early 2008.

LIQUIDITY AND CAPITAL RESOURCES

The Company had cash and cash equivalents of \$833,000 at December 31, 2009 compared to \$10,286,000 at December 31, 2008, a decrease of \$9,453,000. The major reason for the decrease in cash is due to a 2009 investment in a certificate of deposit of \$9,000,000. The Company's expected primary cash needs on both a short and long-term basis are for capital expenditures, business expansion, working capital and other general corporate purposes. It is the Company's intent at appropriate times to invest a portion of its cash in high-quality short to long-term fixed income marketable securities in order to maximize income on its available cash and to hold these securities until maturity. Securities with maturity dates between three and twelve months are classified as current assets and securities with maturities in excess of one year are classified as long-term. At both December 31, 2009 and December 31, 2008 the Company had no short-term or long-term investments in securities. However, at December 31, 2009 the Company had approximately \$9,000,000 invested in a certificate of deposit with a bank that matures in August 2010. Restricted cash of \$50,000 at December 31, 2009 reflects cash that may only be used for the operations of GKF. The Company has a \$9,000,000 renewable line of credit with a bank that is secured by cash and securities. The line of credit has been in place since June 2004 and has a maturity date of August 1, 2011. As of December 31, 2009, there was \$7,900,000 borrowed against the line of credit. The Company believes it has the ability, and it is the Company's intention, to renew the line of credit at its maturity in 2011. Operating activities provided cash of \$7,704,000 in 2009, which is primarily due to net income of \$466,000 increased by non-cash charges for depreciation and amortization of \$6,492,000, deferred income taxes of \$409,000 and stock-based compensation expense of \$135,000. A decrease in accounts receivable of \$573,000 was offset by an increase in prepaid expense and

Table of Contents

other assets of \$110,000 and accounts payable and accrued liabilities of \$262,000. The Company's trade accounts receivable decreased to \$3,817,000 at December 31, 2009 from \$4,229,000 at December 31, 2008, primarily due to low revenue volume generated at two Gamma Knife sites. The number of days revenue (sales) outstanding (DSO) in accounts receivable as of December 31, 2009 remained consistent at 78 days compared to 80 days at December 31, 2008. DSO can and does fluctuate depending on timing of customer payments received and the mix of fee per use versus retail customers. Retail sites generally have longer collection periods than fee per use sites.

Investing activities used \$10,145,000 of cash in 2009 primarily due to an investment in a certificate of deposit of \$9,000,000. In addition, there was payment of \$1,145,000 made towards the purchase of property and equipment. The Company's acquisition of property and equipment included a deposit toward the purchase of a Perfexion Gamma Knife unit and payments made for an upgrade to a Model 4C unit at an existing customer.

Financing activities used \$7,012,000 of cash during 2009, primarily due to principal payments on long-term debt of \$6,808,000, principal payments towards capital leases of \$1,631,000, distributions to minority owners of \$513,000, payments on the line of credit of \$700,000 and the repurchase of Company stock of \$271,000. This was partially offset by long term debt financing on the purchase of property and equipment of \$811,000 and advances on the line of credit of \$2,100,000.

The Company had working capital at December 31, 2009 of \$6,497,000 compared to a working capital deficit of \$205,000 at December 31, 2008, primarily because the line of credit was reclassified as long-term when it was renewed for a two-year period in August 2009. A reduction in the current portion of long-term debt and capital leases of \$928,000 was offset by a reduction in receivables of \$573,000 and cash, cash equivalents and certificates of deposit of \$453,000.

The Company primarily invests its cash in money market or similar funds and high quality short to long-term securities in order to minimize the potential for principal erosion. Cash is invested in these funds pending use in the Company's operations. The Company believes its cash position is adequate to service the Company's cash requirements in 2010.

The Company finances all of its Gamma Knife and radiation therapy units and anticipates that it will continue to do so with future contracts. The Company has secured financing for its projects from several lenders and anticipates that it will be able to secure financing on future projects from these or other lending sources, but there can be no assurance that financing will continue to be available on acceptable terms. The Company meets all debt covenants required under notes with its lenders, and expects that any covenants required by future lenders will be acceptable to the Company.

IMPACT OF INFLATION AND CHANGING PRICES

The Company does not believe that inflation has had a significant impact on operations because a substantial majority of the costs that it incurs under its customer contracts are fixed through the term of the contract.

Table of Contents**CONTRACTUAL OBLIGATIONS, COMMITMENTS, CONTINGENT LIABILITIES AND OFF BALANCE SHEET ARRANGEMENTS**

The following table presents, as of December 31, 2009, the Company's significant fixed and determinable contractual obligations by payment date. The payment amounts represent those amounts contractually due to the recipient and do not include any unamortized premiums or discounts, hedge basis adjustments, or other similar carrying value adjustments. Further discussion of the nature of each obligation is included in the referenced note to the consolidated financial statements.

Contractual Obligations	Total amounts committed	Payments Due by Period			After 5 years
		Less than 1 year	1-3 years	4-5 years	
Long-term debt (includes interest)	\$ 19,740,000	\$ 6,035,000	\$ 7,593,000	\$ 5,776,000	\$ 336,000
Capital leases (includes interest)	10,970,000	2,449,000	4,326,000	2,909,000	1,286,000
Line of credit	7,900,000		7,900,000		
Future equipment purchases (1)	42,755,000	4,605,000	38,150,000		
Operating leases	444,000	314,000	130,000		
Total contractual obligations	\$ 81,809,000	\$ 13,403,000	\$ 58,099,000	\$ 8,685,000	\$ 1,622,000

(1) The Company has made cash deposits totaling \$4,595,000 toward these equipment purchase commitments. The commitments include the purchase of two Gamma Knife Perfexion units, one Model 4C unit and three Monarch250 proton beam units as of December 31, 2009. For the first two Monarch250 units specifically, the

Company has a commitment to total deposits of \$3,000,000 per machine until FDA approval is received, at which time the remaining balance is committed. For the third Monarch250 unit, the Company has a commitment to total deposits of \$500,000 until FDA approval is received, at which time the remaining balance is committed. The Company has made a commitment to purchase one of the Perfexion Gamma Knife units for the purpose of upgrading an existing site. There were no deposits made towards the purchase of this unit as of December 31, 2009, however a financing commitment has been obtained. Financing has not yet been obtained for any of the other equipment. For all equipment in this

classification,
term financing
for these
purchases will
not be finalized
until 2010 or
later, and
therefore an
accurate
determination of
payments by
period cannot be
made as of
December 31,
2009. For
purposes of this
table, these
commitments
are listed in the
1-year or
1-3 year
categories.

Further discussion of the long-term debt commitment is included in Note 5, capital leases in Note 6, and operating leases in Note 12 of the consolidated financial statements.

The Company has no significant off-balance sheet arrangements.

ITEM 7A.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The table below presents information about certain market-sensitive financial instruments as of December 31, 2009. The fair values were determined based on quoted market prices for the same or similar instruments.

Table of Contents

We do not hold or issue derivative instruments for trading purposes and are not a party to any instruments with leverage or prepayment features.

(amounts in thousands)	Payments Due by Period					There- after	Total	Fair Value
	2010	2011	2012	2013	2014			
Fixed rate long-term debt and present value of capital leases	\$6,705	\$5,242	\$4,452	\$4,022	\$3,800	\$1,553	\$25,774	\$25,746
Average interest rates	7.9%	7.9%	7.9%	7.8%	7.8%	7.7%	7.8%	

At December 31, 2009, we had no significant long-term, market-sensitive investments.

We have no affiliation with partnerships, trust or other entities whose purpose is to facilitate off-balance sheet financial transactions or similar arrangements, and therefore have no exposure to the financing, liquidity, market or credit risks associated with such entities.

ITEM 8.**FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

See the Index to Consolidated Financial Statements and Financial Statement Schedules included at page A-1 of this report.

ITEM 9.**CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

ITEM 9A(T).**CONTROLS AND PROCEDURES****(a) Evaluation of disclosure controls and procedures.**

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to its management and Board of Directors regarding the preparation and fair presentation of published financial statements.

Table of Contents

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2009. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control - Integrated Framework. Based on this assessment management believes that, as of December 31, 2009, the Company's internal control over financial reporting is effective based on those criteria.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Our Chief Executive Officer and our Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 (Exchange Act) Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this annual report, have concluded that our disclosure controls and procedures are effective based on their evaluation of these controls and procedures required by paragraph (b) of Exchange Act Rules 13a-15 or 15d-15.

(b) Changes in internal controls over financial reporting.

Our Chief Executive Officer and our Chief Financial Officer have evaluated the changes to the Company's internal control over financial reporting that occurred during our last fiscal quarter ended December 31, 2009, as required by paragraph (d) of Exchange Act Rules 13a-15 and 15d-15, and have concluded that there were no such changes that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

American Shared Hospital Services

We have audited the accompanying consolidated balance sheets of American Shared Hospital Services as of December 31, 2009 and 2008, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board of the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of American Shared Hospital Services at December 31, 2009 and 2008, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2009 in conformity with U.S. generally accepted accounting principles.

/s/ MOSS ADAMS LLP

Stockton, California

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 1 Business and Basis of Presentation

Business American Shared Hospital Services (ASHS and, together with its subsidiaries, the Company), a California corporation, provides Leksell Gamma Knife® (Gamma Knife) units to nineteen medical centers in Arkansas, California, Connecticut, Florida, Illinois, Massachusetts, Mississippi, Nevada, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas and Wisconsin. The Company also provides Image Guided Radiation Therapy and related equipment to one medical center in Massachusetts.

The Company (through American Shared Radiosurgery Services) and Elekta AB, the manufacturer of the Gamma Knife (through its wholly owned United States subsidiary GKV Investments, Inc.), entered into an operating agreement and formed GK Financing, LLC (GKF). GKF is a non-exclusive provider of alternative financing services for Elekta Gamma Knife units in the United States and Brazil.

OR21, Inc., is a wholly-owned subsidiary of the Company that will provide the product The Operating Room for the 21st Century®, which is currently under development.

MedLeader.com, Inc., is a wholly-owned subsidiary of the Company that will provide continuing medical education online and through videos for doctors, nurses and other healthcare workers. This subsidiary is not operational at this time.

The consolidated financial statements include the accounts of the Company, its wholly owned subsidiaries, OR21, Inc., MedLeader.com, Inc., ASRS and its majority-owned subsidiary, GK Financing, LLC.

All significant intercompany accounts and transactions have been eliminated in consolidation.

Note 2 Accounting Policies

Use of estimates in the preparation of financial statements In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents The Company considers all liquid investments with original maturities of three months or less at the date of purchase to be cash equivalents. Restricted cash is not considered a cash equivalent for purposes of the consolidated statements of cash flows.

Securities The Company at times invests excess cash in short to long term fixed income marketable securities. It is the Company's intent and ability to hold any such securities until maturity and they are therefore regarded as *held-to-maturity* investments. The value of securities

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 2 Accounting Policies (Continued)

with maturity dates greater than three months to one year are considered current, and securities with maturity dates greater than one year are considered long-term securities and are classified accordingly on the balance sheet.

Securities with maturity dates of three months or less are considered cash equivalents.

Certificate of deposit As of December 31, 2009, the Company had a \$9,000,000 principal investment in a certificate of deposit with a bank with an interest rate of 1.39% and a maturity date in August 2010.

Restricted cash Restricted cash represents the minimum cash that, by agreement, must be maintained in GKF to fund operations.

Business and credit risk The Company maintains its cash balances, which exceed federally insured limits, in financial institutions. At times, the Company's securities are invested in short to long term fixed income securities that are not insured. Currently much of the Company's cash is invested in a certificate of deposit. The Company has not experienced any losses and believes it is not exposed to any significant credit risk on cash, cash equivalents and securities. The Company monitors the financial condition of the financial institutions it uses on a regular basis. All of the Company's revenue is provided by nineteen customers. These customers constitute accounts receivable at December 31, 2009. The Company performs credit evaluations of its customers and generally does not require collateral. The Company has not experienced significant losses related to receivables from individual customers or groups of customers in any particular geographic area.

Accounts receivable and doubtful accounts Accounts receivable are recorded at net realizable value. An allowance for doubtful accounts is estimated based on historical collections plus an allowance for probable losses. Receivables are considered past due based on contractual terms and are charged off in the period that they are deemed uncollectible. Recoveries of receivables previously charged off are recorded as revenue when received.

Non-controlling interests - On January 1, 2009, the Company adopted authoritative guidance that establishes accounting and reporting standards for the non-controlling interest, previously referred to as minority interest, in a subsidiary. The guidance addresses the accounting for changes, both increases and decreases, in a parent's ownership interest in a subsidiary, including the requirement that a retained non-controlling interest upon the deconsolidation of a subsidiary be initially measured at its fair value in determining the gain or loss resulting from the deconsolidation. The Company is required to report its non-controlling interests as a separate component of shareholders' equity. The Company is also required to present the consolidated net income and the portion of the consolidated net income allocable to the non-controlling interests and to the shareholders of the Company separately in its consolidated statements of income. The

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 2 Accounting Policies (Continued)**

guidance also requires losses applicable to the non-controlling interest be allocated to the non-controlling interest even when those losses are in excess of the non-controlling interests' investment basis. The provisions of the guidance are to be applied to existing non-controlling interests prospectively, except for the presentation and disclosure requirements, which are to be applied retrospectively to all periods presented. The December 31, 2008 and 2007 financial statements have been restated to reflect the changes in presentation described above.

Property and equipment Property and equipment are stated at cost less accumulated depreciation. Depreciation is determined using the straight-line method over the estimated useful lives of the assets, which for medical and office equipment is generally 3 to 15 years. The Company capitalized interest of \$288,000 and \$461,000 in 2009 and 2008, respectively, as costs of medical equipment.

The Company leases Gamma Knife and radiation therapy equipment to its customers under arrangements typically accounted for as operating leases. At December 31, 2009, the Company held equipment under operating lease contracts with customers with an original cost of \$69,444,000 and accumulated depreciation of \$34,318,000. At December 31, 2008, the Company held equipment under operating lease contracts with customers with an original cost of \$67,803,000 and accumulated depreciation of \$31,577,000.

Investment in convertible preferred stock As of December 31, 2009 the Company has convertible preferred stock representing an approximate 3.7% interest in Still River Systems, Inc. (Still River), and accounts for this investment under the cost method. The cost of the Company's cost-method investment in Still River was \$2,617,000 as of December 31, 2009. The Company reviews its investment in Still River for impairment on a quarterly basis, or as events or circumstances might indicate that the carrying value of the investment may not be recoverable. See Note 4 Convertible Preferred Stock Investment for further discussion.

Fair value of financial instruments The carrying amounts of financial instruments, including cash and cash equivalents, securities, restricted cash, accounts receivable, accounts payable, and other accrued liabilities approximated their fair value as of December 31, 2009 and 2008 because of the relatively short maturity of these instruments. The fair value of the Company's various debt obligations, discounted at currently available interest rates was approximately \$25,746,000 and \$28,789,000 at December 31, 2009 and 2008, respectively.

Revenue recognition - Revenue is recognized when services have been rendered and collectability is reasonably assured. There are no guaranteed minimum payments. The Company's contracts are typically for a ten year term and are classified as either fee per use or retail. Retail arrangements are further classified as either turn-key or revenue sharing.

Revenue from fee per use contracts is recorded on a gross basis as determined by each hospital's contracted rate. Under revenue sharing arrangements, the Company receives a contracted percentage of the reimbursement received by the hospital. Revenue is recorded on a gross basis

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 2 Accounting Policies (Continued)**

and estimated based on historical experience. Under turn-key arrangements, the Company receives payment from the hospital in the amount of its reimbursement from third party payors, and is responsible for paying all the operating costs of the Gamma Knife. Revenue is recorded on a gross basis and estimated based on historical experience and hospital contracts with third party payors. Revenue estimates are reviewed periodically and adjusted as necessary. Revenue recognition is consistent with guidelines provided under the applicable accounting standards for revenue recognition.

Stock-based compensation The Company measures all employee stock-based compensation awards using a fair value method and records such expense in its consolidated financial statements. See Note 9 for additional information on the Company's stock-based compensation programs.

Income taxes The Company accounts for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. See Note 8 for further discussion on income taxes.

Earnings per share Basic earnings per share excludes dilution and is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the year. Diluted earnings per share reflect the potential dilution that could occur if common shares were issued pursuant to the exercise of options or warrants. The following table illustrates the computations of basic and diluted earnings per share for the years ended December 31, 2009, 2008 and 2007.

	2009	2008	2007
Numerator for basic and diluted earnings per share	\$ (188,000)	\$ 477,000	\$ 951,000
Denominator:			
Denominator for basic earnings per share - weighted-average shares	4,656,000	4,990,000	5,025,000
Effect of dilutive securities			
Employee stock options/restricted stock units	6,000	2,000	17,000
Denominator for diluted earnings per share - adjusted weighted-average shares	4,662,000	4,992,000	5,042,000
(Loss) earning per share - basic	\$ (0.04)	\$ 0.10	\$ 0.19
(Loss) earning per share - diluted	\$ (0.04)	\$ 0.10	\$ 0.19

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 2 Accounting Policies (Continued)

In 2009, options outstanding to purchase 366,000 shares of common stock at an exercise price range of \$2.96 – \$6.50 per share were not included in the calculation of diluted earnings per share as the exercise price of the options was greater than the average market price of common stock during the year.

In 2008, options outstanding to purchase 618,000 shares of common stock at an exercise price range of \$2.30 – \$6.50 per share were not included in the calculation of diluted earnings per share as the exercise price of the options was greater than the average market price of common stock during the year.

In 2007, options outstanding to purchase 436,000 shares of common stock at an exercise price range of \$2.76 – \$6.50 per share were not included in the calculation of diluted earnings per share as the exercise price of the options was greater than the average market price of common stock during the year.

Business segment information - The Company, which engages in the business of leasing radiosurgery and radiation therapy equipment to health care providers, has one reportable segment, Medical Services Revenue.

Reclassifications Certain reclassifications have been made to the 2008 balances to conform with the 2009 presentation.

Recent accounting pronouncements The Financial Accounting Standards Board (FASB) approved Accounting Standards Codification (ASC) effective with interim and annual periods ending after September 15, 2009. ASC is now the single source of authoritative nongovernmental U.S. Generally Accepted Accounting Principles (GAAP). ASC supersedes all previous level (a) – (d) U.S. GAAP standards issued by a standard-setter, including FASB, American Institute of Certified Public Accountants, Emerging Issues Task Force, and related literature.

FASB ASC Topic 260, Earnings Per Share. On January 1, 2009, the Company adopted new authoritative accounting guidance under FASB ASC Topic 260, Earnings Per Share, which provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. Adoption of the new guidance did not significantly impact the Company's financial statements.

FASB ASC Topic 820, Fair Value Measurements and Disclosures. New authoritative accounting guidance under ASC Topic 820, Fair Value Measurements and Disclosures, affirms that the objective of fair value when the market for an asset is not active is the price that would be received to sell the asset in an orderly transaction, and clarifies and includes additional factors for determining whether there has been a significant decrease in market activity for an asset when

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 2 Accounting Policies (Continued)

the market for that asset is not active. ASC Topic 820 requires an entity to base its conclusion about whether a transaction was not orderly on the weight of the evidence. The new accounting guidance amended prior guidance to expand certain disclosure requirements. The Company adopted the new authoritative accounting guidance under ASC Topic 820 during the first quarter of 2009. Adoption of the new guidance did not significantly impact the Company's financial statements.

Further new authoritative accounting guidance (Accounting Standards Update No. 2009-5) under ASC Topic 820 provides guidance for measuring the fair value of a liability in circumstances in which a quoted price in an active market for the identical liability is not available. In such instances, a reporting entity is required to measure fair value utilizing a valuation technique that uses (i) the quoted price of the identical liability when traded as an asset, (ii) quoted prices for similar liabilities or similar liabilities when traded as assets, or (iii) another valuation technique that is consistent with the existing principles of ASC Topic 820, such as an income approach or market approach. The new authoritative accounting guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The forgoing new authoritative accounting guidance under ASC Topic 820 became effective for the Company's financial statements beginning October 1, 2009 and had no impact on the Company's financial statements.

FASB ASC Topic 825, Financial Instruments. New authoritative accounting guidance under ASC Topic 825,

Financial Instruments, requires an entity to provide disclosures about the fair value of financial instruments in interim financial information and amends prior guidance to require those disclosures in summarized financial information at interim reporting periods. The Company adopted this standard and included the disclosures beginning with their June 30, 2009 Form 10-Q.

FASB ASC Topic 810, Consolidation. New authoritative accounting guidance under ASC Topic 810, Consolidation, amended prior guidance to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. Under ASC topic 810, a non-controlling interest in a subsidiary, which is sometimes referred to as a minority interest, is an ownership interest in the consolidated entity that should be reported as a component of equity in the consolidated financial statements. Among other requirements, ASC Topic 810 requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the non-controlling interest. It also requires disclosure, on the face of the consolidated income statement, of the amounts of consolidated net income attributable to the parent and to the non-controlling interest. The new authoritative accounting guidance under ASC Topic 810 became effective for the Company on January 1, 2009 and did not have a significant impact on the company's financial statements.

Further new authoritative accounting guidance under ASC Topic 810 amends prior guidance to change how a company determines when an entity is insufficiently capitalized or is not controlled

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 2 Accounting Policies (Continued)**

through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity's financial statements. The new authoritative accounting guidance under ASC Topic 810 will be effective January 1, 2010 and is not expected to have a significant impact on the Company's financial statements.

FASB ASC Topic 320, Investments-Debt and Equity Securities. New authoritative accounting guidance under ASC Topic 320, Investments- Debt and Equity Securities, (i) changes existing guidance for determining whether an impairment is other than temporary to debt securities and (ii) replaces the existing requirement that the entity's management assert it has both the intent and ability to hold an impaired security until recovery with a requirement that management assert: (a) it does not have the intent to sell the security; and (b) it is more likely than not it will not have to sell the security before recovery of its cost basis. Under ASC Topic 320, declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. The Company adopted the provisions of the new authoritative accounting guidance under ASC Topic 320 during the second quarter of 2009. Adoption of the new guidance did not significantly impact the Company's financial statements.

Note 3 Property and Equipment

Property and equipment consists of the following:

	DECEMBER 31,	
	2009	2008
Medical equipment and facilities	\$ 73,643,000	\$ 71,854,000
Office equipment	692,000	703,000
Deposits and construction in progress	3,602,000	2,953,000
Deposits towards purchase of proton beam systems	2,250,000	2,250,000
	80,187,000	77,760,000
Accumulated depreciation	(36,898,000)	(33,897,000)
Net property and equipment	\$ 43,289,000	\$ 43,863,000

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 3 Property and Equipment (Continued)

As of December 31, 2009, the Company has equipment that is secured under capitalized leases with a total cost of approximately \$17,091,000 which is included in Medical equipment and facilities, and associated accumulated depreciation totaling approximately \$8,146,000.

As of December 31, 2009, the Company has \$2,250,000 in deposits toward the purchase of three Monarch250 proton beam radiation therapy (PBRT) systems from Still River Systems, Inc., a development-stage company. For the first two machines, the Company has a commitment to total deposits of \$3,000,000 per machine until FDA approval is received, at which time the remaining balance is committed. The delivery dates for the first two machines are now anticipated to be in 2012 and 2013. For the third machine, the Company has a commitment to total deposits of \$500,000 until FDA approval is received, at which time the remaining balance is committed. The Company has entered into a partnership agreement with a radiation oncology physician group, which has contributed \$50,000 towards the deposits on the third machine. The Still River PBRT system is not commercially proven and there is no assurance FDA approval will be received. The Company reviews the carrying value of these deposits for impairment on a quarterly basis, or as events or circumstances might indicate that the carrying value may not be recoverable. See Note 13-Commitments and Contingencies for additional discussion on purchase commitments.

Note 4 Convertible Preferred Stock Investment

On April 10, 2006 the Company invested \$2,000,000 for a convertible preferred stock interest in Still River, a development-stage company based in Littleton, Massachusetts, which in collaboration with scientists from MIT's Plasma Science and Fusion Center, is developing a medical device for the treatment of cancer patients using proton beam radiation therapy. The Company also has deposits towards the purchase of three Still River PBRT systems as described more fully in Note 3. The PBRT systems are not currently FDA approved.

The Company's initial investment in Still River consisted of approximately 2,353,000 shares of Series B Convertible Preferred Stock. The Series B Convertible Preferred Stock is considered pari passu with previously issued Series A Convertible Preferred Stock.

On September 5, 2007 the Company invested approximately \$617,000 for an additional equity interest in Still River. This investment represents approximately 588,000 shares of Series C Convertible Preferred Stock, which is considered pari passu with the previously issued Series A and Series B Convertible Preferred Stock (all issues together Preferred Stock).

The Preferred Stock is convertible at any time at the option of the holder into shares of common stock of Still River at a conversion price, subject to certain adjustments, but initially set at the original purchase price. The Preferred Stock has voting rights equivalent to the number of common stock shares into which it is convertible, and holders of the Preferred Stock, subject to certain exceptions, have a pro-rata right to participate in subsequent stock offerings. In the event

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 4 Convertible Preferred Stock Investment(Continued)

of liquidation, dissolution, or winding up of Still River, the Preferred Stock holders have preference to the holders of common stock, and any other class or series of stock that is junior to the Preferred Stock. Upon conversion of the Preferred Stock, the Company's investment represents an approximate 3.7% interest in the common stock of Still River as of December 31, 2009. The Company does not have a Board of Directors seat with Still River.

The Company accounts for its investment in Still River under the cost method and evaluates the investment for impairment on a quarterly basis or as events or circumstances might indicate that the carrying value of the investment may not be recoverable. The Company reviewed its investment in Still River at December 31, 2009 in light of both current market conditions and the ongoing needs of Still River to raise cash to continue its development of the first compact, single room PBRT system.

In October 2008, Still River offered a Series D round of funding to raise cash for its next phase of development and continued manufacture of the prototype model of the proton beam unit. The offering was originally made at \$1.30 per share, an increase over previous offerings, and in line with the continued development of the PBRT system. Due to the troubled economy and the scarcity of funds available at the time from investors, this series was finalized in February 2009 at \$0.17 per share. The Company chose not to further invest in Still River at this time, choosing to use its cash towards future projects rather than equity positions. The Series D round of funding was originally committed at \$33 million. Recently the Series D was restructured to a \$30 million commitment in exchange for earlier advancement of funds. The lower price per share of the Series D offering could be viewed as a reasonable estimate of the fair value of our cost-method investment indicating our investment is impaired. The Company estimates that there is an unrealized loss (impairment) of approximately \$1.2 million based on the issuance of the Series D funding compared to the Company's cost of its investment. In assessing whether the impairment is other than temporary, we evaluated the length of time and extent to which market value has been below cost, the financial condition and near term prospects of Still River and our ability and intent to retain our investment for a period sufficient to allow for an anticipated recovery in the market value. The Company believes that this is a temporary situation brought on solely due to the recent downturn of the economy, and is not a reflection on the progress or viability of Still River or its PBRT design, and believes that our investment in Still River is temporarily impaired.

Note 5 Long-Term Debt

Long-term debt consists primarily of 14 notes with financing companies, related to Gamma Knife and radiation therapy equipment, construction and installation, totaling \$16,730,000. These notes accrue interest at fixed annual rates between 7.05% and 8.55%, are payable in 48 to 84 monthly installments, mature between March 2010 and April 2015, and are collateralized by the respective Gamma Knife units and radiation therapy equipment. As of December 31, 2009 and December 31, 2008 the Company was in compliance with all debt covenants required under

Table of Contents

American Shared Hospital Services
Notes to Consolidated Financial Statements
Note 5 Long-Term Debt (Continued)

notes with its lenders. The following are contractual maturities of long-term debt by year at December 31, 2009:

Year ending December 31,	
2010	\$ 4,894,000
2011	3,285,000
2012	2,925,000
2013	2,676,000
2014	2,619,000
Thereafter	331,000
	\$ 16,730,000

Note 6 Obligations Under Capital Leases

The Company has five capital lease obligations with three financing companies, collateralized by Gamma Knife equipment having an aggregate net book value of approximately \$8,945,000 at December 31, 2009. These obligations have stated interest rates ranging between 6.88% and 8.79%, are payable in 60 to 84 monthly installments, and mature between January 2012 and June 2016.

Future minimum lease payments, together with the present value of the net minimum lease payments under capital leases at December 31, 2009, are summarized as follows:

	Net Present Value of Minimum Lease Payments
Year ending December 31,	
2010	\$ 2,450,000
2011	2,450,000
2012	1,876,000
2013	1,587,000
2014	1,321,000
Thereafter	1,286,000
Total capital lease payments	10,970,000
Less imputed interest	1,926,000
	9,044,000
Less current portion	1,811,000
	\$ 7,233,000

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 7 Line of Credit

The Company has a \$9,000,000 renewable line of credit with a bank that is secured by cash and securities. The line of credit has been in place since June 2004 and has a maturity date of August 1, 2011. As of December 31, 2009, there was \$7,900,000 borrowed against the line of credit.

Note 8 Income Taxes

Effective January 1, 2007, the Company adopted accounting standards which prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of uncertain tax positions taken or expected to be taken in a company's income tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

The cumulative effect of adopting these standards is recognized as a change in accounting principle, and any adjustment required as the result of adoption would be recorded as an adjustment to the opening balance of retained earnings on January 1, 2007. The Company recognized no change in the liability for unrecognized tax benefits related to tax positions taken in prior periods, and no corresponding change in retained earnings, as the result of implementing these standards. Additionally, these accounting standards specify that tax positions for which the timing of the ultimate resolution is uncertain should be recognized as long-term liabilities. The Company made no reclassifications between current taxes payable and long term taxes payable upon adoption of these standards. Also, the Company had no amounts of unrecognized tax benefits that, if recognized, would affect its effective income tax rate for the years ended December 31, 2009, 2008 and 2007.

The Company's policy for deducting interest and penalties is to treat interest as interest expense and penalties as taxes. As of December 31, 2009, the Company had no amount accrued for the payment of interest and penalties related to unrecognized tax benefits.

The tax return years 1999 through 2009 remain open to examination by the major domestic taxing jurisdictions to which the Company is subject. Net operating losses generated on a tax return basis by the Company for calendar years 1999 through 2004 remain open to examination by the major domestic taxing jurisdictions.

Table of Contents

American Shared Hospital Services
Notes to Consolidated Financial Statements
Note 8 Income Taxes (continued)

Significant components of the Company's deferred tax liabilities and assets as of December 31, 2009 and 2008 are as follows:

	DECEMBER 31,	
	2009	2008
Deferred tax liabilities:		
Fixed assets	\$ (6,574,000)	\$ (5,882,000)
Total deferred tax liabilities	(6,574,000)	(5,882,000)
Deferred tax assets:		
Net operating loss carryforwards	3,540,000	2,859,000
Accrued reserves	133,000	170,000
Other net	401,000	561,000
Total deferred tax assets	4,074,000	3,590,000
Valuation allowance	(201,000)	
Deferred tax assets net of valuation allowance	3,873,000	3,590,000
Net deferred tax liabilities	\$ (2,701,000)	\$ (2,292,000)

These amounts are presented in the financial statements as follows:

	DECEMBER 31,	
	2009	2008
Current deferred tax assets	\$ 219,000	\$ 246,000
Deferred income taxes (non-current)	(2,920,000)	(2,538,000)
	\$ (2,701,000)	\$ (2,292,000)

Table of Contents

American Shared Hospital Services
Notes to Consolidated Financial Statements
Note 8 Income Taxes (continued)

The components of the provision for income taxes consist of the following:

	YEARS ENDED DECEMBER 31,		
	2009	2008	2007
Current:			
Federal	\$ (170,000)	\$ 29,000	\$ 82,000
State	8,000	140,000	379,000
Total current	(162,000)	169,000	461,000
Deferred:			
Federal	348,000	299,000	469,000
State	61,000	66,000	(11,000)
Total deferred	409,000	365,000	458,000
	\$ 247,000	\$ 534,000	\$ 919,000

The provision for income taxes differs from the amount computed by applying the U.S. federal statutory tax rate (34% in 2009, 2008 and 2007) to income before taxes as follows:

	YEARS ENDED DECEMBER 31,		
	2009	2008	2007
Computed expected federal income tax	\$ 20,000	\$ 344,000	\$ 630,000
State income taxes, net of federal benefit	90,000	159,000	216,000
Non-deductible expenses	48,000	48,000	23,000
Other	89,000	(17,000)	50,000
	\$ 247,000	\$ 534,000	\$ 919,000

At December 31, 2009, the Company had net operating loss carryforwards for federal income tax return purposes of approximately \$9,695,000 which expire between 2019 and 2029. The Company has net operating loss carryforwards for state income tax purposes of approximately \$4,015,000 that begin to expire in 2011. A substantial part of this carryforward is subject to separate return limitations.

The Company's ability to utilize its net operating loss carryforwards and other deferred tax assets may be limited in the event of a 50% or more ownership change within any three-year period. Future federal net operating losses generated by the Company can be carried forward for 20 years.

Table of Contents

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 8 Income Taxes (continued)

On September 30, 2008, the State of California enacted tax legislation on the utilization of net operating losses and credit limitations. Effective calendar year 2008, any California net operating losses that the Company generates will have a 20 year carryforward period and effective for calendar year 2011, will have a two year carryback period. In addition, for calendar years 2008 and 2009, the Company is unable to utilize California net operating losses as they are being temporarily disallowed as a result of this legislation. This may give rise to a tax expense for any such taxable income rising out of the disallowable two year period. Any disallowed California net operating losses that cannot be utilized during the disallowed period will be extended. For calendar year 2011, the carryback amount cannot exceed 50% of the net operating loss attributable to 2011, for calendar year 2012, the carryback amount cannot exceed 75% of the net operating loss attributable to 2012, and for calendar year 2013 and later, the carryback amount will be 100% of the net operating loss attributable to 2013 and later years.

Note 9 Shareholders Equity

2006 Stock Incentive Plan

On June 28, 2006, the Company's shareholders approved the 2006 Stock Incentive Plan (the "2006 Plan") under which 750,000 shares of the Company's common stock are reserved for issuance of shares to officers of the Company, other key employees, non-employee directors, and advisors. The 2006 Plan serves as successor to the Company's previous two stock-based employee compensation plans, the 1995 and 2001 Stock Option Plans. Shares reserved under these two plans were transferred to the 2006 Plan upon its approval by the shareholders in June 2006. The 1995 and 2001 Stock Option Plans are no longer active, and no further grants or share issuances will be made under those plans.

The 2006 Plan provides for nonqualified stock options, qualified (or incentive stock options) and stock grants.

Provisions of the 2006 Plan include an automatic annual grant to each non-employee director of options to purchase up to 2,000 shares on the date of the Company's Annual Shareholder Meeting, at an exercise price equal to the market price of the Company's common shares on that date, and an automatic annual grant of 500 restricted stock units of the Company's common shares. Options and restricted stock units awarded under the automatic annual grant program for non-employee directors vest after one year. Other options may vest fully and immediately, or over periods of time as determined by the Plan Administrator, but no longer than seven years from the grant date. Discretionary options currently awarded under the 2006 Plan vest over a period of 5 years.

Under the 2006 Plan, a total of 7,000 restricted stock units have been granted, consisting of annual automatic grants to non-employee directors. There have been no restricted stock units awarded outside the automatic grant program for non-employee directors.

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 9 Shareholders Equity (Continued)**

As of December 31, 2009, there are approximately 599,000 stock options issued and outstanding, of which approximately 97,000 shares were transferred from the previous plans. Approximately 284,000 stock options are vested as of December 31, 2009.

Changes in options outstanding under the Stock Option Plans during 2009 are as follows :

	Number	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Options	of Options			
Balance at December 31, 2008	618,000	\$ 3.72		
Granted	11,000	\$ 2.43		
Exercised		\$		
Forfeited	(30,000)	\$ 3.40		
Balance at December 31, 2009	599,000	\$ 3.73	4.76	\$
Exercisable at December 31, 2009	284,000	\$ 4.13	4.73	\$

The weighted average grant-date fair value of the options granted during the years 2009, 2008 and 2007 was \$1.16, \$0.84, and \$1.24, respectively. The total intrinsic value of options exercised during the years ended December 31, 2009 and 2008 and 2007 was \$0, \$0 and \$3,000, respectively.

There was no cash received from options exercised under any share-based payment arrangements for the years ended December 31, 2009, 2008 and 2007, and as a result, there was no actual tax benefit realized for tax deductions from option exercises in any of those years.

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 9 Shareholders Equity (Continued)**

A summary of the status of the Company's non-vested shares as of December 31, 2009, and changes during the year ended December 31, 2009 is presented below:

	Number of Options	Weighted Average Grant-Date Fair Value
Nonvested Shares		
Nonvested at January 1, 2009	419,000	\$ 1.21
Granted	11,000	\$ 1.16
Vested	(113,000)	\$ 1.40
Forfeited	(2,000)	\$ 1.23
Nonvested at December 31, 2009	315,000	\$ 1.24

At December 31, 2009, there was approximately \$273,000 of unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the 2006 Plan. This cost is expected to be recognized over a period of approximately five years.

The Company's stock-based awards to employees are calculated using the Black-Scholes options valuation model. The Black-Scholes model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, the Black-Scholes model requires the input of highly subjective assumptions including the expected stock price volatility. The Company's stock-based awards have characteristics significantly different from those of traded options, and changes in the subjective input assumptions can materially affect the present value estimates. For these reasons, management believes that the existing models do not necessarily provide a reliable single measure of the fair value of its stock-based awards to employees.

The fair value of the Company's option grants issued during 2009, 2008 and 2007 were estimated using assumptions for expected life, volatility, dividend yield, forfeiture rate, and risk-free interest rate which are specific to each award as summarized in the following table. The estimated fair value of the Company's options is amortized over the period during which the optionee is required to provide service in exchange for the award, usually the vesting period.

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 9 Shareholders Equity (Continued)**

The fair value of the Company's option grants under the 2006 Plan in 2009, 2008 and 2007 was estimated assuming the following weighted-average assumptions:

	2009	2008	2007
Expected life (years)	7.0	7.0	7.0
Expected forfeiture rate	0.0 - 2.0%	0.0 - 2.0%	0.0 - 2.0%
Expected volatility	111-121%	40.6 - 60.6%	40.6 - 60.6%
Dividend yield	0.0%	0.0%	0.0%
Risk-free interest rate	3.3 - 3.5%	3.6 - 3.7%	3.6 - 3.7%

Repurchase of Common Stock, Common Stock Warrants and Stock Options

In 1999 and 2001, the Board of Directors approved resolutions authorizing the Company to repurchase up to a total of 1,000,000 shares of its own stock on the open market, which the Board reaffirmed in 2008. During 2009 the Company repurchased approximately 119,000 shares of its stock, of which 70,000 shares were purchased from two of the Company's officers. In 2008, the Company repurchased 316,000 shares of its stock. Prior to this, there had been no shares repurchased on the open market since the year ending December 31, 2001. There are approximately 81,000 shares remaining under this repurchase authorization.

Dividends

The Company did not pay or declare dividends in 2009 or 2008. In 2007, the Company paid quarterly dividends of \$0.0475 per share in January, April and July, after which time the Board of Directors suspended payment of dividends to conserve cash for growth.

Note 10 Retirement Plan

The Company has a defined-contribution retirement plan (the Plan) that allows for a matching safe harbor contribution. For 2009, the Board of Directors elected to match participant deferred salary contributions up to a maximum of 4% of the participant's annual compensation. Matching contributions must be invested initially in shares of the Company's stock. Discretionary profit sharing contributions are allowed under the Plan in years that the Board does not elect a safe harbor match. The Company has accrued approximately \$48,000 for the estimated safe harbor matching contribution for the year ended December 31, 2009. The Company contributed \$45,000 and \$53,000 to the Plan for the safe harbor match for the years ended December 31, 2008 and December 31, 2007, respectively.

Table of Contents**American Shared Hospital Services****Notes to Consolidated Financial Statements****Note 11 Equipment Sales Revenue**

In 2007, the Company agreed to sell to one of its existing Gamma Knife customers, one of the Gamma Knife units it had committed to purchase from the manufacturer, and this sale is recorded as Equipment sales revenue. The Company's lease with the customer was amended to allow for the sale of the equipment and also allow for the lease revenue to the Company to continue under similar terms until the lease expired in January 2008. The net cost of the equipment purchased and the remaining net book value of the equipment that was traded in was recorded in Cost of equipment sales.

Note 12 Operating Leases

The Company leases office space and equipment under operating leases expiring at various dates through 2012. Future minimum payments under non-cancelable operating leases having initial terms of more than one year consisted of the following at December 31, 2009:

Year ending December 31,	
2010	314,000
2011	125,000
2012	5,000
	\$444,000

Payments for repair and maintenance agreements incorporated in operating lease agreements are included in the future minimum operating lease payments shown above.

Rent expense was \$437,000, \$389,000, and \$417,000 for the years ended December 31, 2009, 2008 and 2007, respectively, and includes the above operating leases as well as month-to-month rental and certain executory costs. The Company subleases a portion of its office space to two third parties for approximately \$1,000 per month under month-to-month sublease agreements.

Note 13 Commitments and Contingencies

As of December 31, 2009, the Company has commitments to purchase three PBRT systems, two Gamma Knife Perfexion systems and one Gamma Knife model 4C system. These commitments total approximately \$47,350,000, and the Company has made deposits and progress payments totaling approximately \$4,595,000 towards the purchase of this equipment. One Perfexion system is scheduled to be installed in 2010 at an existing customer site in connection with a seven year contract extension. The Gamma Knife model 4C system is intended for placement in late 2010 at the Company's new customer site in Peru. The three PBRT systems currently have anticipated delivery dates in 2012 and later, pending FDA approval and certain construction milestones. The deposits and progress payments are classified as deposits and construction in progress under Property and Equipment.

Notes to Consolidated Financial Statements

Note 14 Major Customers

The Company's revenue was provided by nineteen customers in 2009, twenty customers in 2008 and twenty-one customers in 2007. In 2009, two customers accounted for approximately 14% and 10% each of the Company's total revenue. In 2008, three customers accounted for approximately 14%, 13% and 12% each of total revenue. In 2007, one customer accounted for approximately 13% of total revenue.

Note 15 Subsequent Events

In February 2010, the Company entered into a six-year agreement with a new customer in Peru to provide a Gamma Knife 4C system, with an estimated installation date in fourth quarter 2010.

In February 2010, the Company entered into an agreement with an existing customer to extend the customer contract by a period of approximately two years beyond the term of its current contract.

In February 2010, the Company entered into an agreement with an existing customer to extend the customer contract by a period of approximately ten years beyond the term of its current contract, and to provide a Gamma Knife Perfexion system with an estimated installation date in third quarter 2010.
